THE EASTERN COMPANY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
July 4, 2015

Note A – Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and footnotes required by generally accepted accounting principles in the United States for complete financial statements. Refer to the Company's consolidated financial statements and notes thereto included in its Form 10-K for the year ended January 3, 2015 for additional information.

The accompanying condensed consolidated financial statements are unaudited. However, in the opinion of management, all adjustments (consisting only of normal recurring accruals) necessary for a fair presentation of the results of operations for interim periods have been reflected therein. All intercompany accounts and transactions are eliminated. Operating results for interim periods are not necessarily indicative of the results that may be expected for the full year.

The condensed consolidated balance sheet as of January 3, 2015 has been derived from the audited consolidated balance sheet at that date.

Note E – Recent Accounting Pronouncements

In January 2015, the FASB issued authoritative guidance that modifies reporting of extraordinary items in the income statement. The amendments in this update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of the new guidance is not expected to have a material impact on the consolidated financial statements of the Company.

In February 2015, the FASB issued authoritative guidance which amends certain requirements for determining whether a variable interest entity must be consolidated. The amendments in this update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of the new guidance is not expected to have a material impact on the consolidated financial statements of the Company.

In April 2015, the FASB issued authoritative guidance which simplifies the presentation of debt issuance costs. The amendments in this accounting standard update require debt issuance costs be presented on the balance sheet as a direct reduction from the carrying amount of the related debt liability. The amendments in this accounting standard update are to be applied retrospectively and are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of the new guidance is not expected to have a material impact on the consolidated financial statements of the Company.

The Company has implemented all new accounting pronouncements that are in effect and that could impact its consolidated financial statements and does not believe that there are any other new accounting pronouncements that have been issued, but are not yet effective, that might have a material impact on the consolidated financial statements of the Company.

Note F – Debt

On January 29, 2010, the Company signed a secured Loan Agreement (the “Loan Agreement”) with People’s United Bank which included a \$5,000,000 term portion (the “Original Term Loan”) and a \$10,000,000 revolving credit portion. On January 25, 2012, the Company amended the loan agreement by taking an additional \$5,000,000 term loan (the “2012 Term Loan”). Interest on the Original Term Loan portion of the Loan Agreement is fixed at 4.98%. Interest on the 2012 Term Loan is fixed at 3.90%. The interest rate on the revolving credit portion of the Loan Agreement varied based on the LIBOR rate or People’s Prime rate plus a margin spread of 2.25%, with a floor rate of 3.25% and a maturity date of January 31, 2014. On January 23, 2014, the Company signed an amendment to its secured Loan Agreement with People’s United Bank (“People’s”) which extended the maturity date of the \$10,000,000 revolver portion of the Loan Agreement to July 1, 2016 and changed the interest rate to LIBOR plus 2.25%, eliminating the floor previously in place.

The Company has loan covenants under the Loan Agreement which required the Company to maintain a fixed charge coverage ratio of at least 1.1 to 1, a leverage ratio of no more than 1.75 to 1, and minimum tangible net worth of \$43 million as of the end of Fiscal 2010 increasing each year by 50% of consolidated net income. As part of the amendment signed on January 23, 2014, the leverage ratio was eliminated and the minimum tangible net worth covenant was modified to a fixed \$55 million, effective as of March 29, 2014. In addition, the Company has restrictions on, among other things, new capital leases, purchases or redemptions of its capital stock, mergers and divestitures, and new borrowing. The Company was in compliance with all covenants in 2014 and for the six month period ended July 4, 2015.

Note G – Goodwill

The following is a roll-forward of goodwill from year-end 2014 to the end of the second quarter 2015:

	Industrial Hardware Segment	Security Products Segment	Metal Products Segment	Total

Note H – Intangibles

Patents are recorded at cost and are amortized using the straight-line method over the lives of the patents. Technology and licenses are recorded at cost and are generally amortized on a straight-line basis over periods ranging from 5 to 17 years. Customer relationships, non-compete agreements and intellectual property are being amortized using the straight-line method over a period of 5 years. Trademarks are not amortized as their lives are deemed to be indefinite.

The gross carrying amount and accumulated amortization of amortizable intangible assets:

Note I – Retirement Benefit Plans

The Company has non-contributory defined benefit pension plans covering certain U.S. employees. Plan benefits are generally based upon age at retirement, years of service and, for its salaried plan, the level of compensation. The Company also sponsors unfunded nonqualified supplemental retirement plans that provide certain current and former officers with benefits in excess of limits imposed by federal tax law.

The Company also provides health care and life insurance for retired salaried employees in the United States who meet specific eligibility requirements.

Significant disclosures relating to these benefit plans for the second quarter and first six months of fiscal 2015 and 2014 follow:

The Company's funding policy with respect to its qualified plans is to contribute at least the minimum amount required by applicable laws and regulations. In 2015, the Company expects to contribute \$3.0 million into its pension plans and \$150,000 into its postretirement plan. As of July 4, 2015, the Company has made contributions totaling approximately \$1.2 million into its pension plans and \$57,000 to its postretirement plan and will make the remaining contributions as required during the second half of the year.

The Company has a contributory savings plan under Section 401(k) of the Internal Revenue Code covering substantially all U.S. non-union employees. The plan allows participants to make voluntary contributions of up to 100% of their annual compensation on a pretax basis, subject to IRS limitations. The plan provides for contributions by the Company at its discretion. The Company made contributions of \$55,660 and \$107,926 in the second quarter and first six months of 2015, respectively and \$50,964 and \$103,455 in the second quarter and first six months of 2014, respectively.

Note J – Stock Based Compensation and Stock Options

The Company has a stock option plan for officers, other key employees, and non-employee directors. As of July 4, 2015 the 2010 plan had 500,000 shares reserved for future grant and issuance. Incentive stock options granted under the 2010 plan must have exercise prices that are not less than 100% of the fair market value of the stock on the dates the options are granted. Restricted stock awards may also be granted to participants under the 2010 plan with restrictions determined by the Compensation Committee of the Company's Board of Directors. Under the 2010 plan, nonqualified stock options granted to participants will have exercise prices determined by the Compensation Committee of the Company's Board of Directors. No options or restricted stock were granted in the first six months of 2015 or 2014.

At July 4, 2015, there were no outstanding or exercisable options.

Note K – Income Taxes

The Company files income tax returns in the U.S. federal jurisdiction, and various states and foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years before 2011 and non-U.S. income tax examinations by tax authorities prior to 2009.

The Company repatriated approximately \$1.2 million and \$2.8 million in cash from its foreign subsidiaries in the first six months of 2015 and 2014, respectively. The impact on the effective tax rate was less than 1% in 2015 and approximately 2.4% in 2014.

The total amount of unrecognized tax benefits could increase or decrease within the next twelve months for a number of reasons, including the closure of federal, state and foreign tax years by expiration of the statute of limitations and the recognition and measurement considerations under FASB Accounting Standards Codification ("ASC") 740. There have been no significant changes to the amount of unrecognized tax benefits during the six months ended July 4, 2015. The Company believes that it is reasonably possible that the total amount of unrecognized tax benefits will not increase or decrease significantly over the next twelve months.

Note L - Financial Instruments and Fair Value Measurements

Financial Risk Management Objectives and Policies

The Company is exposed primarily to credit, interest rate and currency exchange rate risks which arise in the normal course of business.

Credit Risk

Credit risk is the potential financial loss resulting from the failure of a customer or counterparty to settle its financial and contractual obligations to the Company, as and when they become due. The primary credit risk for the Company is its receivable accounts with customers. The Company has established credit limits for customers and monitors their balances to mitigate the risk of loss. At July 4, 2015 and January 3, 2015, there were no significant concentrations of credit risk. No one customer represented more than 10% of the Company's net trade receivables at July 4, 2015 or at January 3, 2015. The maximum exposure to credit risk is primarily represented by the carrying amount of the Company's accounts receivable.

Interest Rate Risk

On July 4, 2015, the Company has no exposure to the risk of changes in market interest rates as the interest rate on the outstanding debt is fixed at 4.98% and 3.90%.

Fair Value Measurements

Assets and liabilities that require fair value measurement are recorded at fair value using market and income valuation approaches and considering the Company's and counterparty's credit risk. The Company uses the market approach and the income approach to value assets and liabilities as appropriate. There are no assets or liabilities requiring fair value measurements on July 4, 2015 or January 3, 2015.

ITEM 2 – MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion is intended to highlight significant changes in the Company’s financial position and results of operations for the twenty-six weeks ended July 4, 2015. The interim financial statements and this Management’s Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Consolidated Financial Statements and Notes thereto for the fiscal year ended January 3, 2015 and the related Management’s Discussion and Analysis of Financial Condition and Results of Operations, both of which are contained in the Company’s Annual Report on Form 10-K for the fiscal year ended January 3, 2015.

Certain statements set forth in this discussion and analysis of financial condition and results of operations are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. They use such words as “may,” “will,” “expect,” “believe,” “plan” and other similar terminology. These statements reflect management’s current expectations regarding future events and operating performance and speak only as of the date of this release. These forward-looking statements involve a number of risks and uncertainties, and actual future results and trends may differ materially depending on a variety of factors, including changing customer preferences, lack of success of new products, loss of customers, competition, increased raw material prices, problems associated with foreign sourcing of parts and products, changes within our industry segments and in the overall economy, litigation and legislation. In addition, terrorist threats and the possible responses by the U.S. government, the effects on consumer demand, the financial markets, the travel industry, the trucking industry and other conditions increase the uncertainty inherent in forward-looking statements. Forward-looking statements reflect the expectations of the Company at the time they are made, and investors should rely on them only as expressions of opinion about what may happen in the future and only at the time they are made. The Company undertakes no obligation to update any forward-looking statement. Although the Company believes it has an appropriate business strategy and the resources necessary for its operations, future revenue and margin trends cannot be reliably predicted and the Company may alter its business strategies to address changing conditions.

In addition, the Company makes estimates and assumptions that may materially affect reported amounts and disclosures. These relate to valuation allowances for accounts receivable and for excess and obsolete inventories, accruals for pensions and other postretirement benefits (including forecasted future cost increases and returns on plan assets), provisions for depreciation (estimating useful lives), uncertain tax positions, and, on occasion, accruals for contingent losses.

Overview

Sales in the second quarter of 2015 increased 7% compared to the second quarter of 2014, and was primarily the result of a sales increase of 9% in new products to the many diverse markets we serve. The increase was offset in part by a decrease of 2% in sales of existing products. In the second quarter of 2015 Industrial Hardware sales increased less than 1%, Security Products sales increased 24% and Metal Products sales decreased 11% compared to the prior year period.

Sales in the first six months of 2015 increased 5% compared to the prior year period, and was primarily the result of a sales increase of 9% in new products to the many diverse markets we serve. The increase was offset in part by a decrease of 4% in sales of existing products. Compared to the prior year period, sales increased in the first six months of 2015 by 2% in the Industrial Hardware segment and by 18% in the Security Products segment, while sales decreased by 12% in the Metal Products segment resulting in a 5% increase.

Gross margin as a percentage of sales for both the three months and first six months ended July 4, 2015 was 21% compared to the 22% in the prior year period. This decrease was primarily the negative result of decreased sales volume of mining products in the Metal Products segment causing lower utilization of the Company’s production capacity in the 2015 period, the favorable impact of the Argo acquisition which is included in 2015 but not in 2014, and the mix of products produced and sold.

Selling and administration costs increased \$2.1 million or 42% in the second quarter and \$2.8 million or 28% in the first half of 2015 compared to the prior year period. The increase is primarily the result of legal and administrative costs totaling approximately \$1.4 million in the second quarter and \$2.0 million in the first six months of 2015 related to the proxy contest initiated by Barington Companies Equity Partners, L.P. and certain of its affiliates (“Barington”), reimbursement of Barington Companies Management, LLC costs for winning the proxy contest, and the legal and settlement costs associated with the settlement of a lawsuit initiated by Barington Companies Equity Partners, L.P.

Raw material prices have generally increased compared to the prior year periods. The Company, through price increases, is recovering these additional costs from our customers, wherever possible. The Company expects that raw material prices will continue to increase as worldwide economic conditions improve, which may have a negative impact on future operating margins if not recovered by price increases and productivity improvements. Currently, there is no indication that the Company will be unable to obtain supplies of all the raw materials that it requires.

Cash flow from operations in the first six months of 2015 decreased compared to the same period in 2014. This decrease was abnormally primarily impacted due to the Company’s legal and administrative expenses associated with the proxy contest initiated by Barington, reimbursement of proxy contest costs to Barington Companies Management, LLC for winning the proxy contest, and the legal and settlement costs associated with the settlement of the lawsuit initiated by Barington Companies Equity Partners, L.P. The decrease was also impacted by timing differences in the collection of accounts receivable, payments of liabilities, and changes in inventories. Cash on hand and cash flow from operations, along with controlling discretionary expenditures, should enable the Company to meet all its existing obligations and continue its quarterly dividend payments.

A more detailed analysis of the Company's results of operations and financial condition follows:

Industrial Hardware Segment

Net sales in the Industrial Hardware segment were up less than 1% in the second quarter and 2% in the first half of 2015 compared to the prior year periods. The increase in sales in both the second quarter and first half of 2015 primarily reflect sales from the introduction of new products which was reduced by lower sales of our lightweight composite panels to the Class 8 truck market and the Mexican market compared to the prior year periods.

Sales of existing products increased in both the second quarter and first half of 2015 to the distribution, trailer, service body, military, Class 8 truck and fire and rescue markets. This increase was reduced by lower sales to the bus and off-highway markets as well as lower sales of our lightweight composite panels to the Class 8 truck market and the Mexican market in 2015 compared to the prior year periods, both of which are the result of scheduling changes by customers. Our new lightweight composite panel facility in North Carolina made its initial shipments of sleeper cabs in March 2015 and continues to increase its daily build rate for the new lightweight composite sleeper cabs for the Class 8 truck market to meet customer demand. We expect the North Carolina facility to be accretive to earnings for fiscal year 2015 and to open new opportunities for its products now that Eastern has four panel making facilities in North America.

All of the new products were developed internally and included a cab door handle, a paddle assembly, a trigger latch, a rod assembly and a new sleeper, manufactured from our lightweight composite panel material in our new North Carolina facility, for the Class 8 truck market; a two-stage rotary, a handle latch and a gate latch for the off-highway market; a rear door lock for the bus market; a locking handle assembly, an adjustable draw latch and a heavy duty t-handle for the distribution market; a latch and an ergonomic t handle for the service body market; as well as a variety of locking and latching products for the many markets we serve.

Cost of products sold for the Industrial Hardware segment increased \$0.1 million or 1% in the second quarter and \$0.8 million or 4% in the first half of 2015 compared to the same periods in 2014.

The most significant factors resulting in changes to the cost of products sold in the second quarter of 2015 compared to the 2014 second quarter included:

- an increase of \$0.2 million or 7% in costs for payroll and payroll related charges;
- an increase of \$0.1 million or 100% in rental equipment;
- an increase of \$0.1 million or 151% in foreign exchange;
- an increase of \$0.1 million or 48% from the sale of scrap;
- a decrease of \$0.3 million or 4% in raw materials;
- and a decrease of \$0.1 million or 94% in fire and liability insurance.

The most significant factors resulting in changes to the cost of products sold in the first half of 2015 compared to the 2014 first half included:

- an increase of \$0.5 million or 8% in costs for payroll and payroll related charges;
- an increase of \$0.1 million or 1% in raw materials;
- an increase of \$0.1 million or 37% from the sale of scrap;
- an increase of \$0.1 million or 66% for property taxes;
- an increase of \$0.1 million or 19% in freight and shipping expenses;
- an increase of \$0.1 million or 47% in rent expense;
- a decrease of \$0.1 million or 61% in engineering expenses;
- and a decrease of \$0.1 million or 1,656% in foreign exchange.

Gross margin as a percentage of sales for the Industrial Hardware segment decreased in the second quarter to 25% in 2015 from 26% in the prior year period and in the first half to 24% from 25% in the prior year period. The decreases in both the second quarter and first half of 2015 reflect the mix of products produced and the changes to cost of products sold discussed above.

Selling and administrative expenses in the Industrial Hardware segment increased \$0.8 million or 34% in the second quarter of 2015 and \$1.1 million or 22% in the first half of 2015 as compared to the 2014 periods.

The most significant factor resulting in changes in selling and administrative expenses in the Industrial Hardware segment in the second quarter of 2015 compared to the 2014 second quarter included:

- an increase of \$0.6 million in allocated charges resulting from the proxy contest initiated by Barington in the first quarter of 2015;
- and an increase of \$0.2 million or 9% in costs for payroll and payroll related charges.

The most significant factors resulting in changes in selling and administrative expenses in the Industrial Hardware segment in the first half of 2015 compared to the 2014 first half included:

- an increase of \$0.8 million in allocated charges resulting from the proxy contest initiated by Barington in the first quarter of 2015;
- an increase of \$0.2 million or 6% in costs for payroll and payroll related charges
- and an increase of \$0.1 million or 31% in other administrative expenses.

Security Products Segment

Net sales in the Security Products segment increased 24% in the second quarter and increased 18% in the first half of 2015 compared to the 2014 periods. The increase in sales in both the second quarter and first half of 2015 was the result of the Argo acquisition which was not in the 2014 results; an increase in sales of existing products including money boxes and card systems to the commercial laundry market, and lock products to the travel, OEM, vehicle, furniture and cash management markets; as well as the introduction of new products.

Sales of new products included printed circuit board assemblies resulting from the Argo acquisition; a detach latch and a mini tubular cam lock for the vehicular markets; a passive keyless entry system for truck saddle boxes, and a short length cam lock with stainless steel tumblers for the storage market; and a mini tubular self-retaining lock for the computer market.

Cost of products sold for the Security Products segment increased \$2.2 million or 24% in the second quarter and \$3.1 million or 16% in the first half of 2015 compared to the same periods in 2014. The changes in dollars and percentages identified below primarily reflect the acquisition of Argo which was included in the 2015 periods but was not included in the comparable periods for 2014.

The most significant factors resulting in changes in cost of products sold in the second quarter of 2015 compared to the 2014 second quarter included:

- an increase of \$1.4 million or 23% in raw materials
- an increase of \$0.5 million or 28% in costs for payroll and payroll related charges;
- an increase of \$0.2 million or 103% in freight and shipping expenses;
- an increase of \$0.1 million or 21% in engineering expense;
- and a decrease of \$0.1 million or 38% in costs for supplies and tools.

The most significant factors resulting in changes in cost of products sold in the first half of 2015 compared to the 2014 first half included:

- an increase of \$1.8 million or 14% in raw materials;
- an increase of \$1.1 million or 28% in costs for payroll and payroll related charges;
- an increase of \$0.2 million or 35% in freight and shipping expenses;
- an increase of \$0.1 million or 38% in depreciation expense;
- an increase of \$0.1 million or 13% in engineering expense;
- an increase of \$0.1 million or 55% in rental equipment;
- an increase of \$0.1 million or 91% in maintenance and repair costs;
- a decrease of \$0.2 million or 35% in costs for supplies and tools;
- a decrease of \$0.1 million or 58% in miscellaneous taxes;
- and a decrease of \$0.1 million or 38% in fire and liability insurance.

Gross margin as a percentage of sales for the Security Products segment in the second quarter was 24% in 2015 and was comparable to the 2014 period, and increased in the first half to 24% from 22% in the prior year period. The increase in the first half of 2015 was primarily due to the gross margin contribution from the Argo acquisition which is included in the 2015 period when compared to the same period in 2014 which was prior to the acquisition.

Selling and administrative expenses in the Security Products segment increased \$1.0 million or 50% in the second quarter and \$1.5 million or 35% in the first half of 2015 as compared to the 2014 periods.

The most significant factors resulting in changes in selling and administrative expenses in the Security Products segment in the second quarter of 2015 compared to the 2014 second quarter included:

- an increase of \$0.6 million in allocated charges resulting from the proxy contest initiated by Barington in the first quarter of 2015;
- an increase of \$0.3 million or 24% in costs for payroll and payroll related charges;
- and an increase of \$0.1 million or 210% for in amortization costs primarily resulting from the acquisition of Argo in 2014.

The most significant factors resulting in changes in selling and administrative expenses in the Security Products segment in the first half of 2015 compared to the 2014 first half included:

- an increase of \$0.8 million in allocated charges resulting from the proxy contest initiated by Barington in the first quarter of 2015;
- an increase of \$0.4 million or 16% in costs for payroll and payroll related charges;
- an increase of \$0.1 million or 271% for in amortization costs primarily resulting from the acquisition of Argo in 2014;
- an increase of \$0.1 million or 86% in insurance costs;
- and an increase of \$0.1 million or 11% in other administrative expenses.

Metal Products Segment

Net sales in the Metal Products segment decreased 11% in the second quarter and 12% in the first half of 2015 as compared to the prior year periods. Sales of mining products were down 13% in the second quarter and 14% in the first half of 2015 compared to the prior year levels. The lower sales in both the second quarter and first half of 2015 primarily reflect significant sales reductions of 33% during the first half of 2015 to our largest customer who sells significant volumes into the Eastern (Appalachian) region thermal and metallurgical coal mining market. The remainder of the U.S. mining market is experiencing reductions of 10-15%, which is being partially offset by the Canadian market which has realized significant growth.

While the mining industry continues to be impacted by lower natural gas prices, excess coal inventories and stricter EPA regulations, it still represents approximately 30-35% of U.S. energy consumption and has historically fluctuated depending on natural gas prices.

The introduction of new products, including a shell and a small hole flange nut, helped offset some of the decrease in sales of mining products. In addition, sales of contract castings increased 8% in the second quarter and 4% in the first half of 2015 from the prior year levels. The increase in sales of contract castings was primarily due to new products, including nuts produced for gas fittings used in the utility industry. Sales of existing products used in the Class 8 truck market increased but were offset by timing issues of other products, principally in relation to a solar panel producer who sells through contract on major solar installations. We are working with several new customers in the contract casting markets, which should have a positive impact on the second half of 2015 and future.

Cost of products sold for the Metal Products segment decreased \$0.2 million or 3% in the second quarter and \$0.6 million or 4% in the first half of 2015 compared to the same periods in 2014.

The most significant factors resulting in changes in cost of products sold in the second quarter of 2015 compared to the 2014 second quarter included:

- an increase of \$0.8 million or 87% in raw materials;
- a decrease of \$0.6 million or 20% in costs for payroll and payroll related charges;
- a decrease of \$0.2 million or 33% in costs for maintenance and repairs;
- a decrease of \$0.1 million or 96% for pattern costs;
- and a decrease of \$0.1 million or 13% in costs for supplies and tools.

The most significant factors resulting in changes in cost of products sold in the first half of 2015 compared to the 2014 first half included:

- an increase of \$0.7 million or 27% in raw materials;
- an increase of \$0.1 million or 63% from the sale of scrap;
- a decrease of \$0.7 million or 12% in costs for payroll and payroll related charges;
- a decrease of \$0.3 million or 25% related to costs for maintenance and repairs;
- a decrease of \$0.2 million or 12% in costs for supplies and tools;
- a decrease of \$0.1 million or 5% in utility costs;
- and a decrease of \$0.1 million or 93% for pattern costs.

Gross margin as a percentage of net sales for the Metal Products segment decreased from 13% to 5% in the second quarter and decreased from 14% to 6% in the first half of 2015 as compared to the 2014 periods. The decreases in both the second quarter and first half of 2015 are primarily due to the lower sales volume causing lower utilization of the Company's production capacity in 2015 as compared to the 2014 periods.

Selling and administrative expenses in the Metal Products segment increased \$0.2 million or 42% in the second quarter and \$0.3 million or 23% in the first half of 2015 as compared to the 2014 periods.

The most significant factor resulting in changes in selling and administrative expenses in the Metal Products segment in the second quarter of 2015 compared to the 2014 second quarter included:

- an increase of \$0.2 million in allocated charges resulting from the proxy contest initiated by Barington in the first quarter of 2015.

The most significant factors resulting in changes in selling and administrative expenses in the Metal Products segment in the first half of 2015 compared to the 2014 first half included:

- an increase of \$0.4 million in allocated charges resulting from the proxy contest initiated by Barington in the first quarter of 2015;
- and a decrease of \$0.1 million or 11% in costs for payroll and payroll related charges.

Other Items

Interest expense decreased 26% in the second quarter and 25% in the first six months of 2015 compared to the prior year period due to the decreased level of debt in 2015.

Other income was not material to the financial statements.

Income taxes reflected the change in operating results. The effective tax rates in the second quarter and first six months of 2015 were 29% and 32%, respectively, compared to 38% and 36%, respectively in the 2014 periods. The lower than expected effective rates are the result of decreased earnings estimates from our US sources (primarily related to the costs of the proxy contest during the first half of the year) compared to earnings estimates from foreign sources that have lower overall tax rates. The higher rates in 2014 also reflect taxes paid on the repatriation of approximately \$2.8 million of cash from foreign subsidiaries.

Liquidity and Sources of Capital

The Company generated \$1.4 million of cash from its operations during the first six months of 2015 compared to \$3.1 million during the same period in 2014. The decrease in cash flows in the 2015 quarter compared to the prior year period was primarily the result of lower earnings during the period related to the cash expended for the proxy contest as well as the associated timing differences in the collections of accounts receivable, payments of liabilities, and changes in inventories. Cash flow from operations coupled with cash on hand at the beginning of the year was sufficient to fund capital expenditures, debt service, and dividend payments.

Additions to property, plant and equipment were \$1.6 million for the first six months of 2015 and for the same period in 2014. Total capital expenditures for 2015 are expected to be approximately \$3.2 million. As of July 4, 2015, there is approximately \$200,000 of outstanding commitments for these capital expenditures.

The following table shows key financial ratios at the end of each period:

	Second Quarter 2015	Second Quarter 2014	Year End 2014
Current ratio	5.5	5.5	5.3
Average days' sales in accounts receivable	49	49	49
Inventory turnover	3.4	3.6	3.1
Total debt to shareholders' equity	4.8%	6.4%	5.7 %

The following table shows important liquidity measures as of the balance sheet date for each period below (in millions):

	Second Quarter 2015	Second Quarter 2014	Year End 2014
Cash and cash equivalents			
- Held in the United States	\$ 3.6	\$ 11.3	\$ 5.6
- Held by a foreign subsidiary	9.7	8.1	10.2
	13.3	19.4	15.8
Working capital	58.3	59.2	57.8
Net cash provided by operating activities	1.4	3.1	9.3
Change in working capital impact on net cash used in operating activities	(3.2)	(2.5)	(2.2)
Net cash used in investing activities	(1.6)	(1.6)	(8.6)
Net cash used in financing activities	(2.1)	(2.1)	(4.5)

U.S. income taxes have not been provided on the undistributed earnings of the Company's foreign subsidiaries except where required under U.S. tax laws. The Company would be required to accrue and pay United States income taxes to repatriate the funds held by foreign subsidiaries not otherwise provided. The Company intends to reinvest these earnings outside the United States indefinitely.

All cash held by foreign subsidiaries is readily convertible into other currencies, including the U.S. Dollar.

Total inventories remained fairly constant at \$34.9 million on July 4, 2015 compared to \$34.4 million at year end 2014 and increased approximately 13% from \$30.8 million at the end of the second quarter of 2014. Management has made inventory control a priority in 2015, and has been able to hold inventory fairly level in the first six months of the year. Accounts receivable were \$19.9 million compared to \$17.1 million at year end 2014 and \$18.3 million at the end of the second quarter of 2014. The increase from year end is related to higher revenues in the first six months of the current year.

Cash on hand, cash flow from operating activities and funds available under the revolving credit portion of the Company's Loan Agreement are expected to be sufficient to cover future foreseeable working capital requirements.

ITEM 3 – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in market risk from what was reported in the 2014 Annual Report on Form 10-K.

ITEM 4 – CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures:

As of the end of the quarter ended July 4, 2015, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Chief Executive Officer (the "CEO") and Chief Financial Officer (the "CFO"), of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 240.13a-15. As defined in Exchange Act Rules 240.13a-15(e) and 240.15d-15(e), "the term disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Act (15 U.S.C. 78a et seq.) is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure." Based upon that evaluation, the CEO and CFO concluded that the Company's current disclosure controls and procedures were effective as of the July 4, 2015 evaluation date.

The Company believes that a controls system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected. The Company's disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives, and the CEO and CFO have concluded that these controls and procedures are effective at the "reasonable assurance" level.

Changes in Internal Controls:

During the period covered by this report, there have been no significant changes in the Company's internal control over financial reporting or in other factors that have materially affected, or are reasonably likely to materially affect, the Company's internal controls.

PART II – OTHER INFORMATION

ITEM 1 – LEGAL PROCEEDINGS

On April 17, 2015, Barington Companies Equity Partners, L.P. ("Barington") filed a purported class action lawsuit against the Company and its board of directors (the "Board") in the Superior Court of Waterbury, Connecticut (the "Action"). The Action alleged, among other things, that the Eastern Board breached its fiduciary duties by amending the Company's bylaws to allow the Board to fill vacancies resulting from an expansion of the number of Board seats. The Action also challenged the Board's announced intention to increase the size of the Board and appoint a new director after the May 20, 2015 Annual Meeting, and sought, among other things, injunctive relief preventing the Board from nominating a new director that is the result of an expansion of the number of Board seats without Shareholders voting on the appointment. On April 17, 2015, Barington filed a motion for expedited proceedings and discovery prior to the May 20, 2015 Annual Meeting. On April 29, 2015, the Court issued an Order holding that the Action is derivative, and staying the case until July 11, 2015 pursuant to Connecticut law. On July 13, 2015, the Court approved a Stipulation and Order of Dismissal (the "Stipulation") entered into by the parties in connection with the Action. The Stipulation provides for, among other things, the dismissal of the Action after the requisite notice period to shareholders has expired. The Company expensed \$320,500 in legal fees and settlement costs during the second quarter of 2015 resulting from this lawsuit. All costs and fees related to this matter in excess of this amount have been paid by the Company's insurance carrier.

During the fourth quarter of 2010, the Company was contacted by the State of Illinois regarding potential ground contamination at our plant in Wheeling, Illinois. The Company enlisted into a voluntary remediation program in Illinois and has engaged an environmental clean-up company to perform testing and develop a remediation plan, if needed. Based on discussions to date with the environmental clean-up company, the Company does not expect any remediation cost to have a material impact on the consolidated financial statements. However, no estimate for the cost of remediation was available when this Form 10-Q was filed with the SEC.

There are no other legal proceedings, other than ordinary routine litigation incidental to the Company's business, to which either the Company or any of its subsidiaries is a party or to which any of their property is the subject.
