SPECIALIZED DISCLOSURE REPORT CONFLICT MINERALS

TTM TECHNOLOGIES, INC.

(Exact name of the registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization) 0-31285 (Commission File Number) 91-1033443 (IRS Employer Identification No.)

1665 Scenic Avenue, Suite 250 Costa Mesa, California (Address of principal executive offices)

92626 (Zip code)

Daniel J. Weber
(314) 746-2087
(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1, 2016 to December 31, 2016.

Section 1. Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

(c) Conflict Minerals Report

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and the instructions to Form SD, and the Public Statement on the Effect of the Recent Court of Appeals Decision on the Conflict Minerals Rule issued by the Director of the Division of Corporation Finance of the Securities and Exchange Commission on April 29, 2014, TTM Technologies, Inc. (the "Company") is filing with this Form SD a Conflict Minerals Report, which is attached hereto as Exhibit 1.01 and incorporated herein by reference.

The Company's Statement on its Conflict Minerals Policy and this Form SD, including the Company's Conflict Minerals Report, are available on the Company's website at www.ttm.com/about/about_ethics_governance.aspx. The content of our website as referred to in this Form and Report is included for general information only and is not incorporated by reference herein.

Item 1.02 Exhibit

The Conflict Minerals Report required by Item 1.01 is filed as Exhibit 1.01 to this Form SD.

Section 2. Exhibits

Item 2.01 Exhibits

Exhibit 1.01 – Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

TTM TECHNOLOGIES, INC.

By: /s/ Daniel J. Weber

Name: Daniel J. Weber

Title: Senior Vice President, General Counsel and

Secretary

May 30, 2017

Exhibit 1.01 Conflict Minerals Report

This is the Conflict Minerals Report of TTM Technologies, Inc. (the "Company" or "TTM") for the calendar year 2016 (ended December 31, 2016) in accordance with Rule 13p-1 ("Rule 13p-1") under the Securities Exchange Act of 1934 (the "1934 Act"), the instructions to Form SD. Please refer to Rule 13p-1, Form SD and the 1934 Act Release No. 34-67716 for definitions to the terms used in this Report, unless otherwise defined herein.

Rule 13p-1 and Form SD require the disclosure of certain information if a company manufactures or contracts to manufacture products for which certain "Conflict Minerals" (as defined below) are present in the products and necessary to the functionality of such products. Form SD defines "Conflict Minerals" as: i)(a) columbite-tantalite (or coltan, the metal ore from which tantalum is extracted), (b) cassiterite (the metal ore from which tin is extracted), (c) gold and (d) wolframite (the metal ore from which tungsten is extracted), or their derivatives, which are currently limited to tantalum, tin and tungsten; or ii) any other mineral or its derivatives determined by the U.S. Secretary of State to be financing conflict in the Democratic Republic of the Congo ("DRC") or an adjoining country (collectively, the "Covered Countries").

(1) Product Description

TTM is leading global printed circuit board ("PCB") manufacturer, focusing on quick-turn and volume production of technologically complex PCBs and electro-mechanical solutions ("E-M Solutions"). The Company provides time-to-market and volume production of advanced technology products and offer a one-stop manufacturing solution to our customers from engineering support to prototype development through final mass production. The Company serves a diversified customer base in various markets throughout the world, including manufacturers of networking/communications infrastructure products, smartphones and touchscreen tablets, as well as aerospace and defense, automotive, high-end computing, and medical, industrial and instrumentation related products. The Company's customers include both original equipment manufacturers ("OEMs") and electronic manufacturing services ("EMS") providers.

As a company whose business is the manufacturing and assembly of PCBs and E-M Solutions, TTM is several levels removed from the actual mining and refining of Conflict Minerals. TTM does not purchase raw ore or unrefined Conflict Minerals and makes no direct purchases in the Covered Countries.

Our customers, who may also have a responsibility to conduct due diligence as to the source of Conflict Minerals used in their products, frequently specify the exact materials and components we use, and in many cases specify the suppliers from which we source these minerals and components. As a result, we are limited in our ability to exercise discretion in sourcing certain materials and components. Similarly, our ability to influence the supply chain practices of suppliers selected by our customers is limited. Thus, our ability to change the sourcing of our Conflict Minerals depends on our customers' selections of suppliers and designs.

(2) Due Diligence in Accordance with the Organization for Economic Cooperation and Development (the "OECD") 5-Step Framework

TTM has processes in place for the purpose of exercising due diligence over its supply chain as it relates to minerals from conflict-affected and high risk areas. The design of the due diligence processes conforms substantially to the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and the related Supplements for gold and for tin, tantalum and tungsten (the "OECD Guidance") as it relates to "downstream" purchasers of products and components. The due diligence processes have been described below under sub-headings corresponding to the five-step framework of the OECD Guidance.

Step 1 – Establish Strong Company Management Systems

1.1 TTM has adopted a Conflict Minerals Policy and Statement (the "Policy"). A copy of the Policy, together with a copy of this Form SD and Conflict Minerals Report, can be found on the Company's website at www.ttm.com/about/about_ethics_governance.aspx. The content of our website as referred to in this Form and Report is included for general information only and is not incorporated by reference herein. In accordance with the Policy, TTM is continuing to review its suppliers' declarations and has sought their cooperation and assistance in ensuring that the Conflict Minerals used in TTM products are sourced reliably and responsibly. However, as noted in the Policy and above, TTM's purchasing decisions are limited by the level of cooperation it receives from suppliers in sourcing responsibly from non-conflict areas.

- 1.2 TTM has a Conflict Minerals Steering Committee (Steering Committee) to review and enhance the cross-functional working group (the "Working Group") tasked with developing policies and procedures consistent with the OECD Guidance.
- 1.3 In accordance with the requirements of Rule 13p-1 and the instructions to Form SD, the Working Group annually reviews the Company's PCB and E-M Solution products, all of which are manufactured to customer specifications, to determine if they contain Conflict Minerals necessary to the products' generally expected functions, use, purpose or production.
- 1.4 The Working Group concluded that the bare PCBs may contain either gold or tin in surface finishes, and the E-M Solutions products manufactured in 2016 may contain any of the four Conflict Minerals in components.

Step 2 – Identify and Assess Risks in the Supply Chain

- 2.1 The Working Group has identified the suppliers of the materials and components that contain Conflict Minerals in TTM's products and conducted a supply-chain survey to obtain source smelter identification from its suppliers of Conflict Minerals using the standard conflict minerals reporting template ("CMRT") published by the Conflict Free Sourcing Initiative ("CFSI") (formerly the Electronic Industry Citizenship Coalition and Global e-Sustainability Initiative ("EICC-GeSI")).
- 2.2 The CMRT was distributed to all identified suppliers of components or materials containing Conflict Minerals to determine the country of origin of the Conflict Minerals contained therein; whether such Conflict Minerals were sourced from recycled or scrap materials; or whether such Conflict Minerals were otherwise outside of the supply chain as of December 31, 2016. The CMRT requested information on Conflict Minerals in components or materials supplied to TTM during calendar year 2016 and contained representations as to the source and origin of the necessary Conflict Minerals contained in the relevant products.
- 2.3 In addition to identifying suppliers of Conflict Minerals to the Company and collecting supply-chain smelter information, TTM's diligence measures included requesting suppliers to declare if any Conflict Minerals contained in their products originated in the Covered Countries.
- 2.4 The Company believes that complete information was received from all identified suppliers to its PCB products (which represents 92.2% of the 2016 revenues of the Company). However, many suppliers to TTM's much smaller EM Solutions business (which represents 7.8% of the 2016 revenues of the Company) reported that their supply chain information was incomplete. TTM continues to seek complete and accurate information from its E-M Solutions business Conflict Minerals supply chain sources from its suppliers for its E-M Solutions business.
- 2.5 The Company became a member of CFSI during 2016 to improve its timely access to global Conflict Minerals smelter information.
- 2.6 Smelters and refiners identified in the supply-chain survey were checked against CFSI provided smelter information to determine the status of their Conflict Minerals related sourcing activities.

Step 3 – Design and Implement a Strategy to Respond to Identified Risks

- 3.1 Changes to the status of the identified TTM PCB supply chain smelters were monitored regularly. All identified PCB sourcing concerns were addressed through outreach to the relevant members of TTM's supply chain. There were cases during the reporting year where supply chain changes were related to conflict minerals sourcing. In such cases, TTM reached out to our direct supply chain and they reported modifying their sourcing in response.
- 3.2 Changes to the status of the identified TTM E-M Solutions supply chain smelters were only monitored for solder sourcing and there were no recorded cases where intervention occurred during the reporting year. All other raw materials used to manufacture customer parts are subject to strict controls from TTM' customers, were not subject to TTM discretionary change, and were therefore not included in any ongoing monitoring or outreach program.

3.3 After reviewing supply chain and other identified publicly available information, the Company believes that some portion of the tantalum, tin, tungsten and gold in our supply chain may have been mined in covered countries. Grouped by metal, the following is our best estimate of the smelter, and smelter location that may have contributed conflict minerals from covered countries to our supply chain during the 2016 calendar year:

Switzerland Gold Argor-Heraeus S.A. Gold Zhongyuan Gold Smelter of Zhongjin Gold Corporation China Metalor Technologies (Hong Kong) Ltd. Gold China Gold Mitsui Mining and Smelting Co., Ltd. ¹ Ceased recognized smelter operations during 2016.

No information obtained by TTM indicated that any of the conflict minerals from the smelters listed above were financed by or benefited armed groups that operate in the covered countries of the DRC region.

3.4 As noted above, the Company's supply chain survey did not yield complete source-smelter information from a number of customer-specified suppliers of Conflict Minerals for TTM's E-M Solutions products. The Company is continuing its efforts to work with such suppliers to ensure complete information is provided to the Company, including the country of origin of the relevant Conflict Minerals and the identity of the source smelters used to process the minerals. As additional information is obtained, the Company will undertake to determine whether such smelters have been certified by CFSI as "conflict-free" or otherwise. In connection with such continuing diligence, the Company intends to increase education of and outreach to its suppliers.

Step 4 - Carry Out Independent Third-Party Audit (IPSA) of Smelter/Refiner's Due Diligence Practices

4.1 TTM supports the CFSI conflict free smelter program as well as the development and implementation of due diligence practices and tools such as the CMRT. TTM analyzed the data received on smelters and refiners and compared such information against the list of facilities that have received a "conflict free" designation from the CFSI. However, due to the structure of the Company's supply chain as noted in the Policy and above, there are generally multiple tiers of suppliers between TTM and the smelters and refiners in the supply chain, and TTM does not purchase raw ore or unrefined Conflict Minerals or make any direct purchases in the Covered Countries. Therefore, as contemplated by the OECD Guidance for "downstream" companies, TTM has not performed its own audits of smelters or refiners. TTM will obtain an IPSA as and when required by Form SD.

Step 5 – Report Annually on Supply Chain Due Diligence

5.1 TTM submitted its Form SD with Exhibit 1.01 for the reporting period ended December 31, 2015 to the SEC and posted same on TTM's external web site on May 26, 2016.

(3) Products

The Company has identified the following products that may contain Conflict Minerals necessary to the functionality or production of products manufactured, or contracted to manufacture:

As noted in section (1) above, TTM products are the following:

- 1. Bare PCBs fabricated to customer specifications, including procurement of heat sinks and their attachments, where applicable, and
- 2. E-M Solutions including printed circuit assemblies assembled to customer specified bills of materials using customer controlled components from customer approved vendor lists and any other products assembled to customer design and using customer specified suppliers.

Appendix I contains a listing of smelters provided by TTM's PCB supply chain for the reporting period. With the exception of the two indicated smelters that were subsequently removed from TTM's PCB supply chain, all are currently recognized as CFSI compliant or DRC Conflict Free.

Likewise, Appendix II is a listing of smelters reported by the Company's E-M Solutions supply chain. The supply chain data quality associated with the customer specified parts and components contained in these parts appears to be significantly less robust. Some smelters names provided may not be actual smelters and some names provided are recognized as not currently participating in any internationally recognized Conflict Free Smelter Program. TTM will continue to encourage customers to choose known Conflict Free sources as opportunities allow.

(4) Summary

TTM's reasonable country of origin inquiry is based on third party audit information and, to the extent that audited information is not available, it draws on additional information that TTM and others have collected. To the extent reasonably possible, TTM has documented the country of origin of identified smelters and refiners based on information from the CFSI, surveys of smelters and refiners, and/or third party reviews of publicly available information. However, some country of origin information has not been audited by a third party because, among other reasons, applicable smelters and refiners have gone out of operation before completing a third party audit, smelters and refiners have not gone through a third party audit, or the third party audit does not yet include reporting of country of origin information. TTM believes that the applicable conflict minerals smelters for 100% of its PCB product supplies have been identified, but available supplier information indicates that this is not yet true for its E-M Solutions products. Nevertheless, based on the information provided by TTM's suppliers, smelters, and refiners, as well as from the CFSI and other sources, TTM believes that the Conflict Minerals contained in its products were processed in the countries listed in the Annexes below and has indicated where the smelters have previously been audited by CFSI and found to be sourcing conflict free, or are working with CFSI to be audited in the future.

TTM's customers, who may also have a responsibility to conduct due diligence as to the source of Conflict Minerals used in their products, frequently specify the exact materials, components and suppliers we use, which limits our ability to exercise discretion in sourcing certain materials and components, and our ability to influence the supply chain practices of suppliers. Accordingly, the Company's success in making determinations about the potential presence of Conflict Minerals in its products depends upon various factors including, but not limited to, (i) the respective due diligence efforts of its suppliers and their supply chain; (ii) such suppliers' respective willingness, whether public or private entities, to disclose such information to the Company; and (iii) the ability of the involved entities to make their determinations in accordance with nationally or internationally recognized standards, including the Guidance provided by the OECD. The failure to obtain reliable information from any level of TTM's supply chain could have a material impact on the Company's future ability to report on the presence of Conflict Minerals with any degree of certainty. There can be no assurance that the Company's suppliers will continue to cooperate with diligence inquiries and requests for certifications or provide documentation or other evidence that TTM considers reliable or in a time frame sufficient to allow the Company to make its own assessment following appropriate further diligence measures, if any.

2 Elemetal Refining was CFSI Compliant during 2016, but withdrew from the audit program effective 4/13/2017. Elemetal Refining is no longer considered CFSI compliant and was consequently removed from TTM's supply chain.

Yunnan Chengfeng Non-ferrous Metals Co., Ltd was "Active" in the CFSI audit program in early 2016, and part of TTM's PCB supply chain until mid-year. The smelter was eliminated from TTM's supply chain for failure to complete their scheduled audit in a timely manner.

- Elemetal Refining was CFSI Compliant during 2016, but withdrew from the audit program effective 4/13/2017.

 Yunnan Chengfeng Non-ferrous Metals Co., Ltd was "Active" in the CFSI audit program in early 2016. The smelter was dropped from the CFSI program for failure to complete their scheduled audit in a timely manner.
