AMERICAN OUTDOOR BRANDS CORPORATION

CONFLICT MINERALS REPORT

**FOR THE REPORTING PERIOD
JANUARY 1, 2017 TO DECEMBER 31, 2017**

INTRODUCTION

This Conflict Minerals Report for AMERICAN OUTDOOR BRANDS CORPORATION (“**AOBC**,” “**Company**,” “**we**,” or “**our**”) is provided for the reporting period January 1, 2017 to December 31, 2017, and is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 (the “**Rule**”), and the Public Statement on the Effect of the Recent Court of Appeals Decision on the Conflict Minerals Rule issued by the Director of the Division of Corporation Finance of the Securities and Exchange Commission on April 29, 2014 (the “**SEC Statement**”). The Rule was adopted by the Securities and Exchange Commission (the “**SEC**”) to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act (“**Dodd-Frank Act**”). The Rule imposes certain reporting obligations on SEC registrants whose manufactured products contain tin, tantalum, tungsten, or gold (“**3TG**,” also defined by the Rule as “conflict minerals”), and who have reason to believe that the products they manufacture, or contract to manufacture, contain conflict minerals that are necessary to the functionality or production of those products. If the SEC registrant has reason to believe that any conflict minerals may have originated in the Democratic Republic of the Congo or an adjoining country, or is unable to determine the country of origin of those conflict minerals, the SEC registrant is required to submit a Conflict Minerals Report to the SEC that includes a description of the measures it took to exercise due diligence on the conflict minerals’ source and chain of custody.

COMPANY BACKGROUND

American Outdoor Brands Corporation is a provider of quality products for shooting, hunting, and rugged outdoor enthusiasts in the global consumer and professional markets. The Company reports two segments: Firearms and Outdoor Products & Accessories. Firearms manufactures handgun and long gun products sold under the Smith & Wesson®, M&P®, and Thompson/Center Arms™, and Gemtech® brands as well as provides forging, machining, and precision plastic injection molding services. Outdoor Products & Accessories provides shooting, hunting, and outdoor accessories, including reloading, gunsmithing, and gun cleaning supplies, tree saws, vault accessories, knives, laser sighting systems, tactical lighting products, and survival and camping equipment. Brands in Outdoor Products & Accessories include Smith & Wesson®, M&P®, Thompson/Center Arms™, Crimson Trace®, Caldwell® Shooting Supplies, Wheeler® Engineering, Tipton® Gun Cleaning Supplies, Frankford Arsenal® Reloading Tools, Lockdown® Vault Accessories, Hooyman® Premium Tree Saws, BOG POD®, Golden Rod® Moisture Control, Schrade®, Old Timer®, Uncle Henry®, Imperial® and UST™.

A copy of the Company’s Conflict Mineral Policy is available on our website at www.aob.com/conflictmineralsreport.

REPORT

This Conflict Minerals Report is provided for the reporting period January 1, 2017 to December 31, 2017 in accordance with the Rule, the instructions to Form SD, and the SEC Statement. Please refer to the Rule, Form SD and Securities Exchange Release No. 34-67716 for definitions to the terms used in this Report, unless otherwise defined herein.

In accordance with the Rule and the instructions to Form SD, AOBC undertook due diligence to determine the source of origin of any necessary conflict minerals used in products it manufactures or contracts to manufacture. In conducting its due diligence, AOBC implemented the Organization for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (including the Supplements on Tin, Tantalum and Tungsten, and the Gold Supplement) (Second Edition OECD 2013) (“**OECD Guidance**”), an internationally recognized due diligence framework.

Design of Our Due Diligence Measures

Our conflict minerals due diligence measures have been designed to conform with the OECD Guidance, as applicable for tin, tantalum, tungsten, gold and downstream companies (as the term is defined in the OECD Guidance), in all material respects. The Company does not make direct purchases of raw ore or unrefined conflict minerals in the Covered Countries. We designed our due diligence measures to:

1. design and implement strategies to determine the presence of conflict minerals in our products;
2. establish management systems for supply chain due diligence and reporting compliance;
3. identify and assess conflict minerals content in our supply chain;
4. identify and mitigate any risk for potential non-compliance with the Rule; and
5. report on our conflict minerals supply chain due diligence activities, as required by the Rule.

Due Diligence Measures Performed

Our due diligence measures for the reporting period January 1, 2017 to December 31, 2017 included the following activities:

1. We updated our product taxonomy for the products that were subject to reporting in the 2017 reporting period, and reviewed additions with company product managers, engineers, metallurgists and supply chain personnel, to determine which products or components have the possibility of containing necessary conflict minerals.
2. We surveyed any suppliers involved with products or components we determined could possibly contain necessary conflict minerals, to ascertain for each of these conflict minerals (i) whether the product or component contained necessary conflict minerals, (ii) the smelter or refiner where it was processed, (iii) its country of origin, and (iv) its mine of origin.
3. We leveraged the due diligence conducted on smelters and refiners by the Responsible Minerals Initiative (the “**RMI**”), and its Responsible Minerals Assurance Process (the “**RMAP**”), by comparing the names of the smelters identified by our suppliers to those identified as compliant in the RMAP. The RMAP uses independent private sector auditors to audit the source, including mines of origin, and chain of custody of the conflict minerals used by smelters and refiners that agree to participate in the RMAP. The smelters and refiners that are found to be RMAP compliant are those for which the independent auditor has verified that the smelter’s or refiner’s conflict minerals originated from conflict free mines and trading in the Democratic Republic of the Congo or any of its adjoining countries. A list of smelters identified to date, and associated information, is provided hereto as **Attachment A**.

After conducting good faith due diligence on the presence of necessary conflict minerals in certain of the Company’s products, AOBC has been unable to identify all smelters, refiners in its supply chain and the ultimate source of origin of such minerals. The Company is continuing its efforts to identify and mitigate risks in its supply chain and to obtain complete information from its upstream suppliers. The Company’s efforts are necessarily dependent upon the willingness of its supply chain participants to cooperate and assist in this endeavor and there can be no guarantee that the Company will be able to obtain adequate and reliable information upon which to base its analysis.
