(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2018

Or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 001-36562

LOXO ONCOLOGY, INC.

(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or Other Jurisdiction of
Incorporation or Organization)

281 Tresser Blvd., 9th Floor
Stamford, CT
(Address of Principal Executive Offices)

46-2996673
(I.R.S. Employer
Identification No.)

06901
(Zip Code)

Registrant's telephone number, including area code: **(203) 653-3880**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, par value \$0.0001 per share	Nasdaq Global Market

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.:

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company
Emerging growth company
(Do not check if a smaller reporting company)

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Common Stock, \$0.0001 par value

Shares outstanding as of April 30, 2018: 30,075,162

LOXO ONCOLOGY, INC.

Notes to Unaudited Condensed Consolidated Financial Statements

March 31, 2018

1. Organization and Description of the Business

Loxo Oncology, Inc. (the “Company”) was incorporated on May 9, 2013 in the State of Delaware. The Company is a biopharmaceutical company innovating the development of highly selective medicines for patients with genetically defined cancers. Its pipeline focuses on cancers that are uniquely dependent on single gene abnormalities, such that a single drug has the potential to treat the cancer with dramatic effect. The Company operates in one segment and has its principal office in Stamford, Connecticut.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”) and include the results of operations of the Company and its wholly owned subsidiary. All intercompany accounts and transactions have been eliminated in consolidation. Any reference in these notes to applicable guidance is meant to refer to GAAP as found in the Accounting Standards Codification (“ASC”) and Accounting Standards Update (“ASU”) of the Financial Accounting Standards Board (“FASB”).

Unaudited Interim Financial Information

The accompanying balance sheet as of December 31, 2017, was derived from the Company’s audited financial statements included in Form 10-K filed with the Securities and Exchange Commission (“SEC”) on March 1, 2018. It is suggested that the interim unaudited condensed consolidated financial statements be read in conjunction with the annual financial statements and the notes thereto included in the Company’s Annual Report on Form 10-K.

The accompanying balance sheet as of March 31, 2018, the statements of operations for the three months ended March 31, 2018 and 2017, the statements of comprehensive loss for the three months ended March 31, 2018 and 2017, the statement of stockholders’ equity for the period from January 1, 2018 to March 31, 2018 and the statements of cash flows for the three months ended March 31, 2018 and 2017 are unaudited.

The interim unaudited condensed consolidated financial statements have been prepared on the same basis as the annual audited financial statements and, in the opinion of management, reflect all adjustments, which include only normal recurring adjustments, necessary for the fair presentation of the Company’s financial position as of March 31, 2018, the results of its operations for the three months ended March 31, 2018 and 2017 and its cash flows for the three months ended March 31, 2018 and 2017. Certain amounts from prior periods have been reclassified to conform to the current period presentation. Additionally, operating results for the three months ended March 31, 2018 are not necessarily indicative of the results that may be expected for any other interim period or for the year ending December 31, 2018.

The interim unaudited condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the SEC. Certain information and note disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to those rules and regulations, although the Company believes that the disclosures made are adequate to make the information not misleading.

Significant Accounting Policies

The Company’s significant accounting policies are disclosed in the audited financial statements for the year ended December 31, 2017 included in the Company’s Form 10-K filed with the SEC on March 1, 2018. Since the date of such financial statements, there have been no changes to the Company’s significant accounting policies, except as it relates to the impact of the adoption of applicable new accounting guidance as described below under Recently Adopted Accounting Pronouncements and policies related to the collaboration agreement with Bayer Consumer Care AG (“Bayer”).

[Table of Contents](#)

Revenue Recognition

The Company entered into a License, Development and Commercialization Agreement (the “Bayer Agreement”) in November 2017, which is within the scope of ASC 808, *Collaborative Arrangements* (“ASC 808”). Under the Bayer Agreement, the Company has licensed certain rights to its larotrectinib and LOXO-195 product candidates to Bayer. The terms of the agreement include payment to the Company of one or more of the following: a non-refundable, up-front license fee, regulatory and commercial milestone payments, and royalties on net sales of licensed products.

Licenses of intellectual property: If the license of the Company’s intellectual property is determined to be a separate unit of accounting from the other performance obligations identified in the arrangement, the Company recognizes revenue from non-refundable, up-front fees allocated to the license when the license is transferred to the collaborative partner and the collaborative partner is able to use and benefit from the license. For licenses that are bundled with other promises, such as development activities, the Company recognizes revenue over time, using a proportional performance method as the related development activities are performed. Up-front payments are recorded as deferred revenue upon receipt and require deferral of revenue recognition to a future period until the Company performs its obligations under these arrangements. Amounts payable to the Company are recorded as accounts receivable when the Company’s right to consideration is unconditional.

Milestone payments: Regulatory or commercial milestone payments will be recognized as revenue in the period the milestone is achieved. To date, the Company has not recognized any milestone payments as revenue resulting from its collaboration arrangement.

Co-promote: In the United States, where the Company and Bayer will co-promote the products, the Company will be responsible for 50% of the commercial costs and receive 50% of the profits. Co-promote net cost/profit will be recognized when the related expenses and sales occur as a decrease/increase to Revenue from collaboration agreement. See Note 3 to our unaudited condensed consolidated financial statements for details of the co-promote net cost incurred to date.

Royalties: Sales-based royalties, including milestone payments based on the level of sales, will be recognized when the related sales occur. To date, the Company has not recognized any royalty revenue resulting from its collaboration arrangement.

Research and Development Expenses

Research and development costs are charged to expense as incurred. These costs include, but are not limited to, employee-related expenses, including salaries, benefits, stock-based compensation and travel as well as expenses related to asset acquisitions of IPR&D, third-party collaborations, contract research arrangements, chemistry, manufacturing and controls (“CMC”) related expenses and activities associated with the development of companion diagnostics for our product candidates. Under the Bayer Agreement, the Company receives reimbursement for 50% of its development activity expenses incurred for larotrectinib and LOXO-195 beginning January 1, 2018. This reimbursement of \$8.3 million for the three months ended March 31, 2018 is recorded as a reduction to the Company’s research and development costs.

Research and development activities are central to our business model. Product candidates in later stages of clinical development generally have higher development costs than those in earlier stages of clinical development, primarily due to the increased size and duration of later-stage clinical trials. As we advance our product candidates, we expect the amount of external research and development will continue to increase for the foreseeable future.

It is difficult to determine with certainty the duration and completion costs of our current or future preclinical programs and clinical trials of our product candidates, or if, when or to what extent we will generate revenue from the commercialization and sale of any of our product candidates that obtain regulatory approval. We may never succeed in achieving regulatory approval for any of our product candidates. The duration, costs and timing of clinical trials and development of our product candidates will depend on a variety of factors, including the uncertainties of future clinical and preclinical studies, uncertainties in clinical trial enrollment rate and significant and changing government regulation. In addition, the probability of success for each product candidate will depend on numerous factors, including competition, manufacturing capability and commercial viability. We will determine which programs to pursue and how much to fund each program in response to the scientific and clinical success of each product candidate, as well as an assessment of each product candidate’s commercial potential.

Cash, Cash Equivalents and Restricted Cash

The Company considers all highly-liquid investments that have maturities of three months or less when acquired to be cash equivalents. The Company’s cash and cash equivalents generally consist of a business checking account, repurchase agreements and a money market account. The Company’s restricted cash balance consists of cash held to collateralize an outstanding letter of credit associated with the lease of its corporate office space in Connecticut.

[Table of Contents](#)

The following table provides a reconciliation of cash, cash equivalents and restricted cash in the consolidated balance sheets to the total amount shown in the consolidated statements of cash flows (in thousands):

	March 31, 2018	March 31, 2017
Cash, cash equivalents and restricted cash reconciliation:		
Cash and cash equivalents	\$ 103,780	\$ 48,496
Restricted cash included in Other assets	316	316
Total cash, cash equivalents and restricted cash	<u>\$ 104,096</u>	<u>\$ 48,812</u>

Recently Adopted Accounting Pronouncements

In May 2017, the FASB issued ASU 2017-09, *Compensation — Stock Compensation (Topic 718): Scope of Modification Accounting* (“ASU 2017-09”). ASU 2017-09 provides guidance about which changes to the terms or conditions of a share-based award require an entity to apply modification accounting under Topic 718 on a prospective basis. Specifically, an entity would not apply modification accounting if the fair value, vesting conditions and classification of the awards are the same immediately before and after a modification. ASU 2017-09 was effective for annual and interim periods beginning after December 15, 2017, with early adoption permitted. The Company adopted this standard effective January 1, 2018. The adoption of ASU 2017-09 did not have an impact on the Company’s financial statements.

In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* (“ASU 2016-18”), which amended the existing accounting standards for the statement of cash flows by requiring restricted cash to be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. ASU 2016-18 was effective for the Company in the first quarter of 2018. All prior periods were retrospectively adjusted upon adoption of the ASU.

In August 2016, the FASB issued ASU No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments* (“ASU 2016-15”), which amended the existing accounting standards for the statement of cash flows by providing guidance on eight classification issues related to the statement of cash flows. ASU 2016-15 was effective for the Company in the first quarter of 2018. The adoption of ASU 2016-15 did not have an impact on the Company’s financial statements.

In January 2016, the FASB issued ASU No. 2016-01, *Financial Instruments - Overall (Subtopic 825-10), Recognition and Measurement of Financial Assets and Financial Liabilities* (“ASU 2016-01”), which addresses certain aspects of recognition, measurement, presentation and disclosure of financial instruments. ASU 2016-01 was effective for the Company in the first quarter of 2018. The adoption of ASU 2016-01 did not have an impact on the Company’s financial statements.

In May 2014, the FASB issued ASU No. 2014-09, which amends the guidance for accounting for revenue from contracts with customers (“ASU 2014-09”). ASU 2014-09 supersedes the revenue recognition requirements in ASC Topic 605, Revenue Recognition, and creates a new ASC Topic 606, Revenue from Contracts with Customers. Subsequent to May 2014, the FASB issued additional guidance that delayed the effective date and clarified various aspects of the new guidance, including principal versus agent considerations, identifying performance obligations and licensing, and also included other improvements and practical expedients. ASU 2014-09 was effective for the Company in the first quarter of 2018. The adoption of ASU 2014-09 did not have a material impact on the Company’s financial statements as the Company did not have any contracts with customers subject to the guidance.

Recent Accounting Pronouncements Not Yet Adopted

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* (“ASU 2016-02”), which requires lessees to recognize assets and liabilities for the rights and obligations created by most leases on their balance sheet. The guidance is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted. ASU 2016-02 requires modified retrospective adoption for all leases existing at, or entered into after, the date of initial application, with an option to use certain transition relief. The Company is currently evaluating the impact the standard will have on the Company’s financial statements and related disclosures.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments — Credit Losses*, which replaces the incurred loss impairment methodology with a methodology that reflects expected credit losses. The update is intended to provide financial statement users with more useful information about expected credit losses. The amended standard is effective for fiscal years

[Table of Contents](#)

beginning after December 15, 2019, with early adoption permitted. The Company is currently evaluating the impact the standard will have on the Company's financial statements and related disclosures.

In February 2018, the FASB issued ASU No. 2018-02, *Income Statement — Reporting Comprehensive Income* (ASU 2018-02), to allow reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act. ASU 2018-02 will be effective for annual and interim periods beginning after December 15, 2018, with earlier application permitted. The Company is currently evaluating the impact the standard will have on the Company's financial statements and related disclosures.

3. Collaboration Agreement

Agreement Terms

On November 14, 2017, the Company entered into the Bayer Agreement pursuant to which the Company and Bayer will collaborate to develop and commercialize larotrectinib and LOXO-195, the Company's franchise of highly selective TRK inhibitors for patients with TRK fusion cancers. Pursuant to the Bayer Agreement, Loxo has granted co-exclusive development and commercialization licenses to Bayer for both larotrectinib and LOXO-195. Upon the effective date, the Company became eligible for a non-refundable, upfront cash payment of \$400 million from Bayer. In accordance with the terms of the Bayer Agreement, the Company received \$250 million in November 2017 and the remaining \$150 million in March 2018.

In addition to the upfront cash payment of \$400 million, the Company is eligible to receive \$450 million in milestone payments upon larotrectinib regulatory approvals and first commercial sale events in certain major markets and an additional \$200 million in milestone payments upon LOXO-195 regulatory approvals and first commercial sale events in certain major markets. Bayer will also pay the Company a \$25 million milestone upon achieving a certain aggregate U.S. net sales threshold.

The Company will lead global development activities and regulatory activities in the United States. Bayer will lead regulatory activities outside the United States and global commercial activities. Globally, the Company will be responsible for 50% of development costs. In the United States, where the Company and Bayer will co-promote the products, the Company will be responsible for 50% of the commercial costs and receive 50% of the profits. The Company will have the right to opt-out of the U.S. co-promotion, in which case the Company would receive a royalty in the low thirties percentage range on U.S. net sales, which is meant to approximate the economics of the 50/50 profit split. Both parties will participate on a Global Steering Committee and a Joint Steering Committee and will participate in working groups established by the Committees.

Outside of the United States, where Bayer will commercialize, Bayer will pay the Company tiered, double digit royalties on net sales, and sales milestones totaling \$475 million.

The Bayer Agreement will terminate as to a product or country upon the expiration of the royalty term applicable to such product in such country. The Bayer Agreement may be terminated by either party for material breach or bankruptcy. In addition, (i) Bayer may terminate the Bayer Agreement after the fourth anniversary of the effective date upon written notice to the Company which termination shall be effective 18 months following the Company's receipt of such notice, or (ii) Bayer shall have the right, but not the obligation, to terminate the Bayer Agreement with respect to the Co-Promotion Territory or in its entirety by written notice to the Company with immediate effect in the event that the Company receives a "complete response letter" from the U.S. Food and Drug Agency with respect to larotrectinib, or if the Company does not receive marketing approval for larotrectinib by December 31, 2018.

The Agreement contains customary representations, warranties and covenants by the Company and Bayer. Each of the Company and Bayer is required to indemnify the other party against all losses and expenses related to breaches of its representations, warranties and covenants under the Agreement.

Revenue Recognition

To account for the Bayer Agreement, the Company applied the guidance in ASC 808. ASC 808 does not contain prescriptive guidance on recognition of revenues. Therefore, there was significant judgment applied in determining a reasonable, rational method of recognizing revenue under the Bayer Agreement, with the Company considering the guidance in ASC 606, *Revenue from Contracts with Customers*. The Company identified the following performance obligations under the Bayer Agreement relating to the upfront payment: (1) the grant of licenses related to larotrectinib, (2) the grant of licenses related to LOXO-195, (3) research and development activities for larotrectinib, and (4) research and development activities for LOXO-195. The Company determined that each of the licenses is not a separate unit of accounting from its research and development activities because they significantly increase the utility of the intellectual property transferred.

[Table of Contents](#)

The Company concluded that it will utilize a proportional performance method to recognize revenue for the \$400.0 million upfront payment under the Bayer Agreement. In applying the proportional performance method of revenue recognition, revenue will be recognized based on actual development costs incurred as a percentage of the total budgeted development costs over the time period the Company completes its development activities, which the Company believes will be five years for larotrectinib and seven years for LOXO-195. A proportional performance method of revenue recognition requires management to make estimates of costs to complete the development activities. In making such estimates, significant judgment is required to evaluate assumptions related to cost estimates. The cumulative effect of revisions to estimated costs to complete the Company's performance obligations will be recorded in the period in which changes are identified and amounts can be reasonably estimated. A significant change in these assumptions and estimates could have a material impact on the timing and amount of revenue recognized in future periods.

The Company has not yet recognized any revenues for milestone payments as the related regulatory or sales milestones have not yet been achieved.

The Company and Bayer make quarterly cost-sharing payments to one another in amounts necessary to ensure that each party bears its contractual share of the overall shared co-promote profits/costs incurred.

The following table shows the components of revenue from collaboration agreement for the three months ended March 31, 2018 and March 31, 2017 (in thousands):

	Three Months Ended March 31, 2018 (unaudited)	Three Months Ended March 31, 2017 (unaudited)
Upfront:		
Revenue recognized from \$400M upfront payment	\$ 42,853	\$ —
Milestones		
	—	—
Royalties		
	—	—
Co-promote:		
Product revenue subject to profit sharing (as recorded by Bayer)	—	—
Combined cost of goods sold, distribution, selling, general and administrative expenses	(8,848)	—
Combined collaboration co-promotion profit/(loss)	(8,848)	—
Loxo Oncology's 50/50 share of collaboration co-promotion profit/(loss)	(4,424)	—
Total revenue from collaboration agreement	\$ 38,429	\$ —

4. Net Loss Per Common Share

The following table sets forth the computation of basic and diluted net loss per share for the periods indicated (in thousands, except share and per share data):

	Three Months Ended March 31, 2018	Three Months Ended March 31, 2017
Basic and diluted net loss per common share calculation:		
Net loss	\$ (3,558)	\$ (24,528)
Weighted average common shares outstanding — basic and diluted	30,025,461	25,668,052
Net loss per share of common stock — basic and diluted	<u>\$ (0.12)</u>	<u>\$ (0.96)</u>

The following outstanding securities at March 31, 2018 and 2017 have been excluded from the computation of diluted weighted average shares outstanding, as they would have been anti-dilutive:

[Table of Contents](#)

	March 31, 2018	March 31, 2017
Unvested restricted stock	—	22,014
Stock options	4,395,060	3,043,527
	<u>4,395,060</u>	<u>3,065,541</u>

5. Fair Value Measurements

Financial Instruments

The financial instruments recorded in the Company's balance sheets include cash and cash equivalents, investments, and accounts payable. Included in cash and cash equivalents are money market funds representing a type of mutual fund required by law to invest in low-risk securities (for example, U.S. government bonds, U.S. treasury bills and commercial paper) and overnight repurchase agreements. Money market funds are structured to maintain the fund's net asset value at \$1.00 per unit, which assists in providing adequate liquidity upon demand by the holder. Money market funds pay dividends that generally reflect short-term interest rates. Thus, only the dividend yield fluctuates. Also included in cash and cash equivalents are U.S. government sponsored enterprise debt securities that have a maturity of 3 months or less from their original acquisition date. Due to their short-term maturity, the carrying amounts of cash and cash equivalents (including money market funds), and accounts payable approximate their fair values. The Company classifies its remaining investments as available-for-sale. Gains or losses on securities sold are based on the specific identification method.

For investments classified as available-for-sale, the Company records unrealized gains or losses resulting from changes in fair value between measurement dates as a component of other comprehensive loss.

(amounts in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Fair Value
March 31, 2018				
Overnight repurchase agreements	\$ 54,250	\$ —	\$ —	\$ 54,250

Government enterprise debt securities	292,274	—	(444)	291,830
<i>Short-term available-for-sale securities</i>	<u>484,747</u>	<u>1</u>	<u>(573)</u>	<u>484,175</u>
<i>Total fair value financial instruments</i>	<u>\$ 610,685</u>	<u>\$ 1</u>	<u>\$ (573)</u>	<u>\$ 610,113</u>

Fair value guidance establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include:

- Level 1—Quoted prices in active markets for identical assets or liabilities.
- Level 2—Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

[Table of Contents](#)

- Level 3—Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company's financial assets measured at fair value on a recurring basis at March 31, 2018 were as follows (in thousands):

	Fair Value Measurements at Measurement Date:			Total as of March 31, 2018
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Assets:				
Cash and cash equivalents				
Cash	\$ 18,857	\$ —	\$ —	\$ 18,857
Overnight repurchase agreements	54,250	—	—	54,250
Money market funds	30,673	—	—	30,673
Total cash and cash equivalents	103,780	—	—	103,780
Short-term investments				
U.S. Government debt securities	226,509	—	—	226,509
Government enterprise debt securities	—	379,940	—	379,940
Total short-term investments	226,509	379,940	—	606,449
Long-term investments				
Government enterprise debt securities	—	25,355	—	25,355
Total long-term investments	—	25,355	—	25,355
Totals	\$ 330,289	\$ 405,295	\$ —	\$ 735,584

The Company's financial assets measured at fair value on a recurring basis at December 31, 2017 were as follows (in thousands):

	Fair Value Measurements at Measurement Date:			Total as of December 31, 2017
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Assets:				
Cash and cash equivalents				
Cash	\$ 16,087	\$ —	\$ —	\$ 16,087
Overnight repurchase agreements	51,750	—	—	51,750
Money market funds	50,744	—	—	50,744
Government enterprise debt securities	—	23,444	—	23,444
Total cash and cash equivalents	118,581	23,444	—	142,025
Short-term investments				
U.S. Government debt securities	192,345	—	—	192,345
Government enterprise debt securities	—	291,830	—	291,830
Total short-term investments	192,345	291,830	—	484,175
Totals	\$ 310,926	\$ 315,274	\$ —	\$ 626,200

There were no items that were accounted for at fair value on a non-recurring basis for the three months ended March 31, 2018 and 2017. The Company's Level 2 securities are typically valued utilizing third party pricing services or other observable market data. The pricing services utilize industry standard valuation models, including both income and market based approaches and observable market inputs to determine value. These observable market inputs include reportable trades, benchmark yields, credit spreads, broker/dealer quotes, bids, offers, and other industry and economic events.

Financial instruments that potentially subject the Company to a concentration of credit risk consist of cash and cash equivalents. At March 31, 2018 and December 31, 2017, the Company's cash and cash equivalents were held by two financial institutions and the amounts on deposit were in excess of Federal Deposit Insurance Company insurance limits. The Company mitigates this risk by depositing its uninsured cash in major well capitalized financial institutions, and by investing excess operating

[Table of Contents](#)

cash in overnight repurchase agreements which are 100% collateralized by U.S. government backed securities with the Company's bank. The Company has not recognized any losses on its cash and cash equivalents.

6. Stock-Based Compensation

Equity Incentive Plan (the "Plan")

Effective July 2013, the Company adopted the 2013 Equity Incentive Plan, which was amended in November 2013 (the "2013 Plan"). The 2013 Plan provided for the granting of incentive stock options, non-statutory stock options and the issuance of restricted stock awards. As of March 31, 2018, the Company reserved 1,544,615 shares of common stock authorized for issuance in connection with the 2013 Plan. In connection with the Company's initial public offering, no further grants will be made under this plan and all remaining shares available for grant were transferred to the 2014 Equity Incentive Plan.

The Company adopted the 2014 Equity Incentive Plan (the "2014 Plan") that became effective on July 30, 2014 and serves as the successor to the 2013 Plan. The 2014 Plan provides for the grant of awards to employees, directors, consultants, independent contractors and advisors, provided the consultants, independent contractors, directors and advisors are natural persons that render services other than in connection with the offer and sale of securities in a capital-raising transaction. The exercise price of stock options must be at least equal to the fair market value of the Company's common stock on the date of grant.

The Company has reserved 2,828,874 shares of its common stock to be issued under the 2014 Plan of which 216,282 shares were available for future issuance as of March 31, 2018. Shares authorized will increase automatically on January 1 of each of the years between 2015 through 2024 by the number of shares equal to 3.0% of the aggregate number of outstanding shares of the Company's common stock as of the immediately preceding December 31. The Company's Board of Directors ("Board") may reduce the amount of the increase in any particular year. The 2014 Plan authorizes the award of stock options, restricted stock awards ("RSAs"), stock appreciation rights ("SARs"), restricted stock units ("RSUs"), performance awards and stock bonuses.

The following table summarizes stock option activity for the period from January 1, 2018 through March 31, 2018:

	Number of Shares	Weighted- Average Exercise Price	Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
Outstanding at January 1, 2018	3,225,356	\$ 25.82	7.72	\$ 188,626
Granted	1,261,700	86.97		
Exercised	(63,496)	3.61		
Forfeited and expired	(28,500)	89.00		
Outstanding at March 31, 2018	<u>4,395,060</u>	\$ 43.28	8.14	\$ 317,176
Vested and expected to vest at March 31, 2018	<u>4,177,316</u>	\$ 41.89	8.08	\$ 307,241
Exercisable at March 31, 2018	<u>1,917,182</u>	\$ 17.38	6.84	\$ 187,862
Weighted-average grant date fair value of options granted during the three months ended March 31, 2018	<u>\$ 52.91</u>			

As of March 31, 2018, there was \$99.9 million of total unrecognized compensation expense related to options granted but not yet vested of which \$9.4 million was attributable to non-employee awards and subject to re-measurement until vested. The total unrecognized compensation expense of \$99.9 million will be recognized as expense over a weighted-average period of 3.34 years.

The Company uses the Black-Scholes option pricing model to estimate the fair value of option awards with the following weighted-average assumptions, certain of which are based on industry comparative information, for the period indicated:

	Three Months Ended March 31, 2018
Risk-free interest rate	2.35%
Expected dividend yield	0.00%
Expected stock price volatility	64.68%
Expected term of options (in years)	6.2
Expected forfeiture rate	9.44%

The weighted-average valuation assumptions were determined as follows:

[Table of Contents](#)

- Risk-free interest rate: The Company bases the risk-free interest rate on the interest rate payable on U.S. Treasury securities in effect at the time of grant for a period that is commensurate with the assumed expected option term.
- Expected annual dividends: The estimate for annual dividends is 0%, because the Company has not historically paid, and does not expect for the foreseeable future to pay, a dividend.
- Expected stock price volatility: The expected volatility used is based on historical volatilities of similar entities within the Company's industry which were commensurate with the Company's expected term assumption.
- Expected term of options: The expected term of options represents the period of time options are expected to be outstanding. The expected term of the options granted to employees is derived from the "simplified" method as described in Staff Accounting Bulletin 107 relating to stock-based compensation. The expected term for options granted to non-employees is equal to the contractual term of the awards.
- Expected forfeiture rate: The Company's estimated forfeiture rate is based on historical forfeiture experience of its various employee groups.
- Estimated fair value of the Company's stock-based awards: The estimated fair value of the Company's stock-based awards is amortized on a straight-line basis over the awards' service period for those awards with graded vesting and which contain only a service condition. For awards with graded vesting and a performance and service condition, when achievement of the performance condition is deemed probable, the Company recognizes compensation cost using the accelerated recognition method over the awards' service period.

Share-based compensation expense recognized was as follows (in thousands):

	Three Months Ended March 31, 2018	Three Months Ended March 31, 2017
Research and development	\$ 4,283	\$ 2,406
General and administrative	5,368	1,568
	<u>\$ 9,651</u>	<u>\$ 3,974</u>

7. Commitments and Contingencies

Array Bio Pharma ("Array") Collaboration

On July 3, 2013, the Company signed a multi-year strategic collaboration agreement with Array, and this agreement was subsequently amended on November 26, 2013, April 10, 2014, October 13, 2014, March 31, 2015 and February 18, 2016. Under the terms of the collaboration agreement, the Company obtained certain rights to Array's tropomyosin receptor kinase ("TRK") inhibitor program, as well as additional novel oncology targets, including rearranged during transfection ("RET") and fibroblast growth factor receptor ("FGFR"). The Company received worldwide commercial rights to each product candidate from the collaboration and Array participates in any potential successes through milestones and royalties.

With respect to the discovery and preclinical program, the collaboration agreement, as amended, runs through September 30, 2017, and the Company has the option to extend the term for up to one additional one-year renewal period by providing written notice to Array at least three months before the end of the initial discovery and preclinical development programs term. This option was exercised during the three-month period ended June 30, 2017. Therefore, the current agreement runs through September 30, 2018.

Before the February 2016 amendment, in addition to larotrectinib the parties designated 12 discovery targets, of which seven were selected for additional study in January 2015, which was to be reduced to four on or before January 2016. The Company had the option to maintain the total target number at five for an additional payment, and the Company exercised this option to maintain five discovery programs in January 2016. In the February 2016 amendment, the parties designated a total of six discovery targets. An additional payment was due at contract signing, satisfying a prior obligation of the April 2014 amendment.

As part of the agreement the Company agreed to pay Array a fixed amount per month, based on Array's commitment to provide full-time equivalents and other support relating to the conduct of the discovery and preclinical development programs. The Company incurred \$2.4 million and \$1.9 million of research and development expenses under the Array Agreement for the three months ended March 31, 2018 and 2017.

[Table of Contents](#)

Milestones

With respect to product candidates directed to TRK, including larotrectinib and LOXO-195, the Company could be required to pay Array up to \$223 million in milestone payments for each compound, the substantial majority of which are due upon the achievement of commercial milestones. The Company has made or accrued \$7.0 million and \$1.3 million in larotrectinib and LOXO-195 milestone payments, respectively, from inception through March 31, 2018. No expense relating to a milestone payment was recognized in research and development expenses for either larotrectinib or LOXO-195 in the three months ended March 31, 2018 and 2017.

With respect to product candidates directed to targets other than TRK, including LOXO-292, the Company could be required to pay Array up to \$213 million in milestone payments, the substantial majority of which are due upon the achievement of commercial milestones. The Company has made or accrued \$1.3 million in LOXO-292 milestone payments from inception through March 31, 2018. No expense relating to a milestone payment was recognized in research and development expenses for other product candidates, including LOXO-292, in the three months ended March 31, 2018 and 2017.

Royalties

The Company is required to pay Array mid-single digit royalties on worldwide net sales of products that were discovered under the agreement. With respect to the royalty on products directed to targets other than TRK, the Company has the right to credit certain milestone payments against royalties on sales of products directed to such target.

Research and Development Arrangements

In the course of normal business operations, the Company enters into agreements with contract research organizations (“CROs”), to assist in the performance of research and development and preclinical activities and contract manufacturers to assist with CMC related expenses. Expenditures to CROs may represent a significant cost in preclinical and clinical development for the Company in future periods. The Company can elect to discontinue the work under these agreements at any time. The Company also enters into agreements with third parties, to develop and commercialize companion diagnostics. The Company could also enter into additional collaborative research, contract research, manufacturing and supplier agreements in the future, which may require upfront payments and long-term commitments of cash.

Legal Proceedings

The Company is not involved in any legal proceeding that it expects to have a material effect on its business, financial condition, results of operations and cash flows.

8. Related Party Transactions

Dr. Lori Kunkel, a board member, had a consulting agreement with the Company to assist in the Company’s drug development process which was modified effective as of October 31, 2015, to provide that she receives only the standard director compensation for her services. Dr. Kunkel also received stock option grants in 2013 and 2014 as compensation for her consulting services which continue to vest. During the three months ended March 31, 2018 and 2017, the Company recognized stock-based compensation expense of \$0.4 million and \$0.8 million in accordance with the terms of the consulting agreement.

Dr. Keith Flaherty, a board member, has an agreement with the Company to serve as its Scientific Advisor Board (“SAB”) Chair for which he receives cash compensation. Dr. Flaherty also received stock option grants in 2013, 2014, and 2018 as compensation for his SAB services which continue to vest. Both cash compensation that was expensed as incurred and stock-based compensation are recorded as a component of research and development expenses. During both the three months ended March 31, 2018 and 2017, the Company recognized cash compensation expense of \$15 thousand and during the three months ended March 31, 2018 and 2017, the Company recognized stock-based compensation expense of \$0.4 million and \$0.6 million in accordance with the terms of the SAB agreement.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The interim unaudited condensed consolidated financial statements and this Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the financial statements and notes thereto for the year ended December 31, 2017 and the related Management's Discussion and Analysis of Financial Condition and Results of Operations, both of which are contained in our Annual Report on Form 10-K filed with the SEC on March 1, 2018. As used in this report, unless the context suggests otherwise, "we," "us," "our," "the Company" or "Loxo" refer to Loxo Oncology, Inc.

Forward Looking Statements

The information in this discussion contains forward-looking statements and information within the meaning of Section 27A of the Securities Act of 1933, as amended ("the Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended, ("the Exchange Act"), which are subject to the "safe harbor" created by those sections. This Quarterly Report on Form 10-Q contains forward-looking statements that involve substantial risks and uncertainties. In some cases, you can identify forward-looking statements by the words "may," "might," "will," "could," "would," "should," "expect," "intend," "plan," "objective," "anticipate," "believe," "estimate," "predict," "project," "potential," "continue" and "ongoing," or the negative of these terms, or other comparable terminology intended to identify statements about the future. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from the information expressed or implied by these forward-looking statements. Although we believe that we have a reasonable basis for each forward-looking statement contained in this Form 10-Q, we caution you that these statements are based on a combination of facts and factors currently known by us and our expectations of the future, about which we cannot be certain. You should refer to the risks set forth in Part II, Item 1A, "Risk Factors" in this Quarterly Report on Form 10-Q for a discussion of important factors that may cause our actual results to differ materially from those expressed or implied by our forward-looking statements. Furthermore, such forward-looking statements speak only as of the date of this report. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Overview

Loxo Oncology is a biopharmaceutical company innovating the development of highly selective medicines for patients with genetically defined cancers. Our pipeline focuses on cancers that are uniquely dependent on single gene abnormalities, such that a single drug has the potential to treat the cancer with dramatic effect. We believe that the most selective, purpose-built medicines have the highest probability of maximally inhibiting the intended target, thereby delivering best-in-class disease control and safety. Our management team seeks out experienced industry partners, world-class scientific advisors and innovative clinical-regulatory approaches to deliver new cancer therapies to patients as quickly and efficiently as possible.

With our scientific knowledge, collaborative partnerships and targeted approach, we are developing multiple small molecule therapeutics utilizing focused clinical development strategies in well-defined patient populations. Larotrectinib, a selective TRK inhibitor currently in clinical development, is being evaluated in three ongoing multi-center studies that include patients with solid tumors that harbor TRK gene fusions. In March 2018, we announced that we completed the rolling submission of a New Drug Application ("NDA") to the U.S. Food and Drug Administration ("FDA") for larotrectinib for the treatment of adult and pediatric patients with locally advanced or metastatic solid tumors harboring an NTRK gene fusion. We also have programs in development for TRK (LOXO-195), RET (LOXO-292), BTK (LOXO-305), FGFR and other targets.

Since inception, we have incurred significant operating losses. Our net loss for the three months ended March 31, 2018 was \$3.6 million, including approximately \$32.0 million of total research and development expenses, and approximately \$12.2 million of total general and administrative expenses, partially offset by revenue from our Bayer collaboration agreement of \$38.4 million. We expect to incur significant expenses and operating losses for the foreseeable future as we continue the discovery, development and clinical trials of, and seek regulatory approval for and pursue potential commercialization of, our product candidates. In addition, we will also incur additional expenses if and as we enter into additional collaboration agreements, acquire or in-license products and technologies, expand our collaboration with Array, enter into companion diagnostics collaborations, establish sales, marketing and distribution infrastructure and/or expand and protect our intellectual property portfolio.

While we have substantial cash on hand for immediate operations, we will need to obtain substantial additional funding in connection with our long term continuing operations. We will seek to fund our operations through the sale of equity, debt financings or other sources, including potential collaborations. We may be unable to raise additional funds or enter into such other agreements when needed on favorable terms, or at all. If we fail to raise capital or enter into such other arrangements as, and when, needed, we may have to significantly delay, scale back or discontinue the development and commercialization of one or more of our product candidates.

Bayer License, Development and Commercialization Agreement

In November 2017, we entered into a license, development and commercialization agreement with Bayer pursuant to which we and Bayer will collaborate to develop and commercialize larotrectinib and LOXO-195, our franchise of highly selective TRK inhibitors for patients with TRK fusion cancers. Pursuant to the Bayer Agreement, we granted co-exclusive development and commercialization licenses to Bayer for both larotrectinib and LOXO-195.

In addition to an upfront cash payment of \$400.0 million, we are eligible to receive \$450.0 million in milestone payments upon larotrectinib regulatory approvals and first commercial sale events in certain major markets and an additional \$200.0 million in milestone payments upon LOXO-195 regulatory approvals and first commercial sale events in certain major markets. Bayer will pay us a \$25.0 million milestone upon achieving a certain U.S. net sales threshold.

We will lead global development activities and regulatory activities in the United States. Bayer will lead regulatory activities outside the United States and global commercial activities. Globally, we will be responsible for 50% of development costs. In the United States, where we and Bayer will co-promote the products, we will be responsible for 50% of the commercial costs and receive 50% of the profits. We will have the right to opt-out of the U.S. co-promotion, in which case we would receive a royalty in the low thirties percent range on U.S. net sales, which is meant to approximate the economics of the 50/50 profit split.

Outside of the United States, where Bayer will commercialize, Bayer will pay us tiered, double digit royalties on net sales, and sales milestones totaling \$475.0 million.

The Bayer Agreement also includes a standstill provision that prevents Bayer from acquiring five percent or more of our voting securities.

The Bayer Agreement will terminate as to a product or country upon the expiration of the royalty term applicable to such product in such country. The Bayer Agreement may be terminated by either party for material breach or bankruptcy. In addition, Bayer may terminate the Bayer Agreement after the fourth anniversary of the effective date upon written notice to us, or in the event that we receive a “complete response letter” from the FDA with respect to larotrectinib, or if we do not receive marketing approval for larotrectinib by December 31, 2018.

Components of Operating Results

Revenue from Collaboration Agreement

Our revenue from collaboration agreement is derived from payments we receive under the license, development and commercialization collaboration agreement with Bayer. This currently includes a portion of the upfront payment, to be recognized as revenue over time using a proportional performance method as the related research and development activities are performed by us, partially offset by our share of co-promote costs.

Research and Development Expenses

Research and development costs are charged to expense as incurred. These costs include, but are not limited to, employee-related expenses, including salaries, benefits, stock-based compensation and travel as well as expenses related to asset acquisitions of IPR&D, third-party collaborations, contract research arrangements and activities associated with the development of companion diagnostics for our product candidates. Under the Bayer Agreement, we receive reimbursement for 50% of its development activity expenses incurred for larotrectinib and LOXO-195 beginning January 1, 2018. This reimbursement is recorded as a reduction to our research and development costs.

Research and development activities are central to our business model. Product candidates in later stages of clinical development generally have higher development costs than those in earlier stages of clinical development, primarily due to the increased size and duration of later-stage clinical trials. As we advance our product candidates, we expect the amount of external research and development will continue to increase for the foreseeable future, while our internal spending should increase at a slower and more controlled pace.

It is difficult to determine with certainty the duration and completion costs of our current or future preclinical programs and clinical trials of our product candidates, or if, when or to what extent we will generate revenue from the commercialization and sale of any of our product candidates that obtain regulatory approval. We may never succeed in achieving regulatory approval for any of our product candidates. The duration, costs and timing of clinical trials and development of our product candidates will depend on a variety of factors, including the uncertainties of future clinical and preclinical studies, uncertainties in clinical trial enrollment rate and

[Table of Contents](#)

significant and changing government regulation. In addition, the probability of success for each product candidate will depend on numerous factors, including competition, manufacturing capability and commercial viability. We will determine which programs to pursue and how much to fund each program in response to the scientific and clinical success of each product candidate, as well as an assessment of each product candidate's commercial potential.

General and Administrative Expenses

General and administrative expenses consist principally of salaries and related costs for executive and other personnel, including stock-based compensation and travel expenses. General and administrative expenses also include facility-related costs, communication expenses and professional fees for legal, patent prosecution and maintenance, consulting and accounting services.

Interest Income, net

Interest income consists principally of the interest earned from our short-term and long-term investments, partially offset by the amortization of discounts recorded in connection with the purchase of certain investments.

Critical Accounting Policies and Significant Judgments and Estimates

This discussion and analysis of our financial condition and results of operations is based on our financial statements, which have been prepared in accordance with generally accepted accounting principles in the U.S. ("GAAP"). The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. In accordance with GAAP, we base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions.

We believe there have been no significant changes in our critical accounting policies as discussed in our Form 10-K filed on March 1, 2018 with the SEC, except for those related to our collaboration agreement with Bayer and from the adoption of new accounting standards, as described in Note 2 to these condensed consolidated financial statements.

Results of Operations

Comparison of the Three Months Ended March 31, 2018 and 2017 (in thousands)

	Three Months Ended March 31, 2018 <u>(unaudited)</u>	Three Months Ended March 31, 2017 <u>(unaudited)</u>	Change
Revenue from collaboration agreement	\$ 38,429	\$ —	\$ 38,429
Operating expenses:			
Research and development	31,990	20,169	11,821
General and administrative	12,194	4,773	7,421
Total operating expenses	44,184	24,942	19,242
Loss from operations	(5,755)	(24,942)	19,187
Interest income, net	2,197	414	1,783
Net loss	\$ (3,558)	\$ (24,528)	\$ 20,970

Revenue from collaboration agreement

For the three months ended March 31, 2018, we recognized \$38.4 million of revenues under the Bayer Agreement which includes the components in the table below. We did not recognize any revenue from collaboration agreements during the three months ended March 31, 2017.

[Table of Contents](#)

	Three Months Ended March 31, 2018 (unaudited)	Three Months Ended March 31, 2017 (unaudited)
Upfront:		
Revenue recognized from \$400M upfront payment	\$ 42,853	\$ —
Milestones	—	—
Royalties	—	—
Co-promote:		
Product revenue subject to profit sharing (as recorded by Bayer)	—	—
Combined cost of goods sold, distribution, selling, general and administrative expenses	(8,848)	—
Combined collaboration co-promotion profit/(loss)	(8,848)	—
Loxo Oncology's 50/50 share of collaboration co-promotion profit/(loss)	(4,424)	—
Total revenue from collaboration agreement	\$ 38,429	\$ —

A portion of this amount represents the amount of the \$400.0 million upfront license fee recognized as revenue using a proportional performance method based on actual research and development costs incurred from the effective date of the Bayer Agreement as a percentage of the current projected development costs.

The Company has not yet recognized any revenues for milestone payments as the related regulatory or sales milestones have not yet been achieved.

The Company and Bayer make quarterly cost-sharing payments to one another in amounts necessary to ensure that each party bears its contractual share of the overall shared co-promote profits/costs incurred. For the three months ended March 31, 2018, the Company recognized \$42.9 million of revenue under the Bayer Agreement related to the portion of the upfront payment earned during the period, partially offset by \$4.4 million in co-promote costs.

Research and development expenses

Research and development expenses were \$32.0 million for the three months ended March 31, 2018, compared to \$20.2 million for the three months ended March 31, 2017. The increase was primarily due to expanded development activities including clinical costs, CMC related expenses and costs related to companion diagnostics development, as well as additional expenses related to our other programs. These numbers are net of 50/50 cost-sharing with Bayer for larotrectinib and LOXO-195 development costs. We also had higher headcount and employment-related costs, as well as higher stock-based compensation costs. As a result, we had increases in LOXO-292 development expenses of \$9.6 million, LOXO-305 development costs of \$3.0 million, Array full-time equivalents of \$0.5 million, and stock-based compensation of \$1.9 million. This was offset by a decrease in larotrectinib and LOXO-195 development expenses of \$4.8 million primarily due to the 50/50 cost sharing with Bayer.

General and administrative expenses

General and administrative expenses were \$12.2 million for the three months ended March 31, 2018, compared to \$4.8 million for the three months ended March 31, 2017. The increase was primarily due to increases in general and administrative professional fees of \$1.7 million, stock-based compensation expense of \$3.8 million and employment costs and other costs of \$1.3 million.

Interest income, net

Interest income was \$2.2 million for the three months ended March 31, 2018, compared to \$0.4 million for the three months ended March 31, 2017. The increase was primarily due to the increase in short and long-term investment balances as of March 31, 2018 as compared to March 31, 2017.

Liquidity and Capital Resources

Our financial statements and related disclosures have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. Accordingly, the financial statements do not include any adjustments that might be necessary should we be unable to continue in existence. We have not generated any revenues from products and have not yet achieved profitable operations. There is no assurance that profitable operations, if ever achieved, could

[Table of Contents](#)

be sustained on a continuing basis. In addition, development activities, clinical and preclinical testing and commercialization of our products will require significant additional financing. We incurred a net loss of \$3.6 million for the three months ended March 31, 2018. Net cash provided by operating activities was \$109.8 million during the three months ended March 31, 2018. At March 31, 2018, we had an accumulated deficit of \$291.7 million, and working capital of \$516.2 million. Aggregate cash equivalents and investments were \$735.6 million at March 31, 2018. Management expects to incur substantial and increasing losses in future periods.

Our ability to successfully pursue our business is subject to certain risks and uncertainties, including among others, uncertainty of product development, competition from third parties, uncertainty of capital availability, uncertainty in our ability to enter into agreements with collaborative partners, dependence on third parties, and dependence on key personnel. Historically, we have financed our operations principally through private placements of preferred stock, our initial public offering of common stock, follow-on offerings of common stock and the \$400.0 million upfront payment received from our collaboration with Bayer. We plan to finance future operations with a combination of proceeds from the issuance of equity, debt and other sources, our collaboration with Bayer and other potential collaborations and revenues from future product sales, if any. We have not generated positive cash flows from operations, and there are no assurances that we will be successful in obtaining an adequate level of financing for the development and commercialization of our planned products. We believe that our existing cash, cash equivalents and investments as of March 31, 2018, will be sufficient to enable us to continue as a going concern through at least May 9, 2019.

Cash Flows

The following table summarizes our cash flows for the three months ended March 31, 2018 and 2017 (in thousands):

	Three Months Ended March 31, 2018 <u>(unaudited)</u>	Three Months Ended March 31, 2017 <u>(unaudited)</u>
Net cash (used in) provided by:		
Operating activities	\$ 109,767	\$ (26,676)
Investing activities	(148,241)	(84,690)
Financing activities	229	129,486
Net (decrease) increase in cash, cash equivalents and restricted cash	<u>\$ (38,245)</u>	<u>\$ 18,120</u>

Net cash provided by operating activities

Net cash provided by operating activities was \$109.8 million for the three months ended March 31, 2018 and consisted of an increase in cash collected on the receivables from collaboration partner of \$145.5 million and an increase in accounts payable of \$1.8 million as well as noncash expenses of \$9.5 million, primarily attributable to stock-based compensation expense, partially offset by a net loss of \$3.6 million and a decrease in deferred revenue of \$42.9 million.

Net cash used in operating activities was \$26.7 million for the three months ended March 31, 2017 and consisted primarily of a net loss of \$24.5 million, a decrease in accrued expenses and other current liabilities of \$4.9 million and an increase in prepaid expenses and other current assets of \$1.5 million. This was offset by noncash expenses of \$4.1 million, primarily attributable to stock-based compensation expense.

Net cash used in investing activities

Net cash used in investing activities for the three months ended March 31, 2018 totaled \$148.2 million and consisted primarily of \$214.4 million of available-for-sale security purchases, partially offset by \$66.9 million of proceeds from maturing available-for-sale securities.

Net cash used in investing activities for the three months ended March 31, 2017 totaled \$84.7 million and consisted primarily of \$120.3 million of available-for-sale security purchases, partially offset by \$35.7 million of proceeds from maturing available-for-sale securities.

Net cash provided by financing activities

Net cash provided by financing activities was \$0.2 million for the three months ended March 31, 2018, which was due to proceeds from the exercise of employee stock options.

Net cash provided by financing activities was \$129.5 million for the three months ended March 31, 2017, which was primarily due to \$129.4 million in net proceeds from the sale and issuance of our common stock in January 2017. We also received \$0.1 million in proceeds from the exercise of employee stock options.

Operating and Capital Expenditure Requirements

We have not achieved profitability since our inception and we expect to continue to incur net losses for the foreseeable future. We expect our cash expenditures to increase in the near term as we fund the larotrectinib, LOXO-292 and LOXO-195 clinical trials, prepare for potential larotrectinib commercialization, establish companion diagnostics collaborations, fund clinical trials of our other preclinical product candidates and continue other preclinical activities.

As a publicly traded company, we incur significant legal, accounting and other expenses that we were not required to incur as a private company. In addition, the Sarbanes-Oxley Act of 2002, as well as rules adopted by the SEC and The Nasdaq Stock Market, requires public companies to implement specified corporate governance practices that were inapplicable to us as a private company. We expect these rules and regulations will increase our legal and financial compliance costs and will make some activities more time-consuming and costly.

We anticipate that we will need to raise additional capital in the future to fund our operations. In order to meet these additional cash requirements, we may incur debt, license certain intellectual property and seek to sell additional equity or convertible securities that may result in dilution to our stockholders. If we raise additional funds through the issuance of equity or convertible securities, these securities could have rights or preferences senior to those of our common stock and could contain covenants that restrict our operations. There can be no assurance that we will be able to obtain additional equity or debt financing on terms acceptable to us, if at all. Our future capital requirements will depend on many factors, including:

- the progress and results of the clinical programs for larotrectinib, LOXO-292 and LOXO-195;
- the number and development requirements of any other product candidates that we pursue;
- our ability to enter into collaborative agreements for the development and commercialization of our product candidates;
- the scope, progress, results and costs of researching and developing our product candidates or any future product candidates, both in the U.S. and outside the U.S.;
- the costs, timing and outcome of regulatory review of our product candidates or any future product candidates, both in the U.S. and outside the U.S.;
- the costs and timing of future commercialization activities, including product manufacturing, marketing, sales and distribution, for any of our product candidates for which we receive marketing approval;
- the costs, timing and outcome of our companion diagnostics collaborations;
- any product liability or other lawsuits related to our products;
- the ability to achieve milestones associated with the Bayer collaboration;
- the expenses needed to attract and retain skilled personnel;
- the general and administrative expenses related to being a public company, including developing an internal accounting function;
- the revenue, if any, received from the commercialization of our product candidates for which we receive marketing approval; and
- the costs involved in preparing, filing and prosecuting patent applications, maintaining and enforcing our intellectual property rights and defending our intellectual property-related claims, both in the U.S. and outside the U.S.

See “Risk Factors” for additional risks associated with our substantial capital requirements.

If we are unable to successfully raise sufficient additional capital, through future equity financings, product sales, debt or other sources, our collaboration with Bayer and other potential collaborations, we will not have sufficient cash flows and liquidity to

[Table of Contents](#)

fund our planned business operations. In that event, we might be forced to limit many, if not all, of our programs and consider other means of creating value for our stockholders, such as licensing to others the development and commercialization of products that we consider valuable and would otherwise likely develop internally. To the extent that we raise additional capital through marketing and distribution arrangements or other collaborations, strategic alliances or licensing arrangements with third parties, we may have to relinquish valuable rights to our product candidates, future revenue streams, research programs or product candidates or to grant licenses on terms that may not be favorable to us. If we do raise additional capital through public or private equity offerings, the ownership interest of our existing stockholders will be diluted, and the terms of these securities may include liquidation or other preferences that adversely affect our stockholders' rights or restrict our operations. If we raise additional capital through debt financing, we may be subject to covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, making capital expenditures or declaring dividends.

Contractual Obligations and Commitments

Purchase Commitments

Other than amounts due for the leases of our office locations and under the Array collaboration agreement, as described below, we have no material non-cancelable purchase commitments with contract manufacturers or service providers as we have generally contracted on a cancelable basis.

Array Collaboration

On July 3, 2013, the Company signed a multi-year strategic collaboration agreement with Array, and this agreement was subsequently amended on November 26, 2013, April 10, 2014, October 13, 2014, March 31, 2015 and February 18, 2016. Under the terms of the collaboration agreement, the Company obtained certain rights to Array's tropomyosin receptor kinase inhibitor program, as well as additional novel oncology targets, including RET and FGFR. The Company received worldwide commercial rights to each product candidate from the collaboration and Array participates in any potential successes through milestones and royalties.

With respect to the discovery and preclinical program, the collaboration agreement, as amended, runs through September 30, 2017, and the Company has the option to extend the term for up to one additional one-year renewal period by providing written notice to Array at least three months before the end of the initial discovery and preclinical development programs term. This option was exercised during the three-month period ended June 30, 2017. Therefore, the current agreement runs through September 30, 2018.

Before the February 2016 amendment, in addition to larotrectinib the parties designated 12 discovery targets, of which seven were selected for additional study in January 2015, which was to be reduced to four on or before January 2016. The Company had the option to maintain the total target number at five for an additional payment, and the Company exercised this option to maintain five discovery programs in January 2016. In the February 2016 amendment, the parties designated a total of six discovery targets. An additional payment was due at contract signing, satisfying a prior obligation of the April 2014 amendment.

As part of the Array Agreement, as amended, we agreed to pay Array a fixed amount per month, based on Array's commitment to provide full-time equivalents and other support relating to the conduct of the discovery and preclinical development programs. For the three months ended March 31, 2018 and 2017, we recorded \$2.4 million and \$1.9 million of research and development expenses related to the collaboration agreement, respectively.

Milestones

With respect to product candidates directed to TRK, including larotrectinib and LOXO-195, we could be required to pay Array up to \$223 million in milestone payments for each compound, the substantial majority of which are due upon the achievement of commercial milestones. We have made or accrued \$7.0 million and \$1.3 million in larotrectinib and LOXO-195 milestone payments, respectively, from inception through March 31, 2018. No expense relating to a milestone payment was recognized in Research and Development expense for either larotrectinib or LOXO-195 in the three months ended March 31, 2018 and 2017.

With respect to product candidates directed to targets other than TRK, including LOXO-292, we could be required to pay Array up to \$213 million in milestone payments, the substantial majority of which are due upon the achievement of commercial milestones. We have made or accrued \$1.3 million in LOXO-292 milestone payments from inception through March 31, 2018. No expense relating to a milestone payment was recognized in Research and Development expense for other product candidates, including LOXO-292, in the three months ended March 31, 2018 and 2017.

[Table of Contents](#)

Royalties

We are required to pay Array mid-single digit royalties on worldwide net sales of products developed through the collaboration. With respect to the royalty on products directed to targets other than TRK, we have the right to credit certain milestone payments against royalties on sales of products directed to such target.

Off-Balance Sheet Arrangements

Through March 31, 2018, we do not have any off-balance sheet arrangements, as defined by applicable SEC regulations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk related to changes in interest rates. As of March 31, 2018 and December 31, 2017, we had cash and cash equivalents and investments of \$735.6 million and \$626.2 million, respectively. Our primary exposure to market risk is interest rate sensitivity, which is affected by changes in the general level of U.S. interest rates, particularly because our investments are in marketable debt securities. Our available-for-sale securities are subject to interest rate risk and will fall in value if market interest rates increase. Due to the short-term duration of our investment portfolio and the low risk profile of our investments, an immediate 10% change in interest rates would not have a material effect on the fair market value of our portfolio. We have the ability to hold our available-sale-securities until maturity, and therefore, we would not expect our operating results or cash flows to be affected to any significant degree by the effect of a change in market interest rates on our investments. We do not currently have any auction rate securities.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and principal financial officer, evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2018, the end of the period covered by this Quarterly Report on Form 10-Q.

Based on our evaluation, we believe that our disclosure controls and procedures as of March 31, 2018 are effective to provide reasonable assurance that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. We believe that a controls system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting during our fiscal quarter ended March 31, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

ITEM 1. LEGAL PROCEEDINGS

We are not currently a party to any material legal proceedings and we are not aware of any pending or threatened legal proceeding against us that we believe could have a material adverse effect on our business, operating results or financial condition.

ITEM 1A. RISK FACTORS

This Quarterly Report on Form 10-Q contains forward-looking information based on our current expectations. Because our actual results may differ materially from any forward-looking statements that we make or that are made on our behalf, this section includes a discussion of important factors that could affect our actual future results, including, but not limited to, our capital resources, the progress and timing of our clinical programs, the safety and efficacy of our product candidates, risks associated with regulatory filings, risks associated with determinations made by regulatory agencies, the potential clinical benefits and market potential of our product candidates, commercial market estimates, future development efforts, patent protection, effects of healthcare reform, reliance on third parties, and other risks set forth below.

Risks Related to Our Financial Position and Capital Needs

We have incurred significant losses since our inception. We expect to incur losses over the next several years and may never achieve or maintain profitability.

Since inception, we have incurred significant operating losses. Our net loss was \$3.6 million for the three months ended March 31, 2018. As of March 31, 2018, we had an accumulated deficit of \$291.7 million. We have focused primarily on our drug discovery efforts and developing our product candidates. To date, we have financed our operations primarily through private placements of our convertible preferred stock, our initial public offering, our follow-on public offerings and our collaboration agreement with Bayer. We expect to continue to incur significant expenses and increasing operating losses for the foreseeable future. The net losses we incur may fluctuate significantly from quarter to quarter. We anticipate that our expenses will increase substantially if and as we:

- continue development of our product candidates;
- seek to identify additional product candidates;
- enter into additional collaboration arrangements with regards to product discovery, acquire or in-license other products and technologies, or develop internal drug discovery capabilities;
- enter into collaboration arrangements for companion diagnostics for our cancer therapies;
- maintain and leverage our collaborations with Array, Bayer or others;
- continue and initiate clinical trials for our product candidates;
- seek marketing approvals for our product candidates that successfully complete clinical trials;
- establish a sales, marketing and distribution infrastructure to commercialize any products for which we may obtain marketing approval;
- maintain, expand and protect our intellectual property portfolio;
- hire additional personnel;
- add operational, financial and management information systems and personnel, including personnel to support our product development and planned future commercialization efforts; and
- incur increased costs as a result of operating as a public company.

To become and remain profitable, we must, alone or with our collaborators, develop and eventually commercialize a product or products with significant market potential. This will require us to be successful in a range of challenging activities, including completing clinical trials of our product candidates, successfully developing companion diagnostics, obtaining marketing approval for these product candidates and manufacturing, marketing and selling those products for which we may obtain marketing approval. We may never succeed in these activities and, even if we do, may never generate revenues that are significant or large enough to achieve profitability. If we do achieve profitability, we may not be able to sustain or increase profitability on a quarterly or annual basis. Our failure to become and remain profitable could impair our ability to raise capital, maintain our discovery and preclinical development

[Table of Contents](#)

efforts, expand our business or continue our operations and may require us to raise additional capital that may dilute your ownership interest. A decline in the value of Loxo Oncology could also cause you to lose all or part of your investment.

Our limited operating history may make it difficult to evaluate the success of our business to date and to assess our future viability.

We are a clinical development company. We were incorporated in May 2013 and commenced operations in the third quarter of 2013. We rely on collaborations with third parties for discovery, preclinical development, manufacturing, companion diagnostics development and other activities critical to our business. For larotrectinib and LOXO-195, we rely on our collaboration with Bayer to commercialize these products and secure regulatory approvals outside of the United States. Our operations to date have been limited to organizing and staffing our Company, business planning, raising capital, acquiring and developing our technology, identifying and acquiring potential product candidates and conducting product development activities for larotrectinib, LOXO-292 and LOXO-195, which we have advanced into clinical trials, and other product candidates. We have not yet demonstrated our ability to successfully complete large-scale, pivotal clinical trials, develop companion diagnostics, obtain marketing approvals, manufacture a commercial scale product, or arrange for a third-party to do so on our behalf, or conduct sales and marketing activities necessary for successful product commercialization. Medicines, on average, take ten to fifteen years to be developed from the time they are discovered to the time they are available for treating patients. Consequently, any predictions about our future success or viability based on our short operating history to date may not be as accurate as if we had a longer operating history.

In addition, as a new business, we may encounter unforeseen expenses, difficulties, complications, delays and other known and unknown factors. We will need to transition from a company with a research focus to a company capable of supporting commercial activities. We may not be successful in such a transition.

We will need substantial additional funding. If we are unable to raise capital when needed, we would be compelled to delay, reduce or eliminate our product development programs or commercialization efforts.

We expect our expenses to increase in parallel with our ongoing activities, particularly as we continue our discovery and preclinical development collaborations to identify new clinical candidates and initiate clinical trials of, seek marketing approval for, and prepare for the commercial launch of our product candidates. In addition, if we obtain marketing approval for any of our product candidates, we expect to incur significant commercialization expenses related to product sales, marketing, diagnostics, manufacturing and distribution to the extent that such sales, marketing, manufacturing and distribution expenses are not the responsibility of Bayer or other collaborators. Furthermore, we continue to incur costs associated with operating as a public company. Accordingly, we will need to obtain substantial additional funding in connection with our continuing operations. If we are unable to raise capital when needed or on attractive terms, we would be forced to delay, reduce or eliminate our discovery and preclinical development programs or any future commercialization efforts.

Our future capital requirements will depend on many factors, including:

- the scope, progress, results and costs of compound discovery, preclinical development, laboratory testing and clinical trials for our product candidates;
- the extent to which we enter into additional collaboration arrangements with regard to product discovery or acquire or in-license products or technologies;
- the extent to which we enter into collaboration arrangements for companion diagnostics for our cancer therapies;
- our ability to establish additional discovery collaborations on favorable terms, if at all;
- the extent to which we develop or expand internal drug discovery and development capabilities;
- the costs, timing and outcome of regulatory review of our product candidates;
- the costs of future commercialization activities, including product sales, marketing, manufacturing and distribution, for any of our product candidates for which we receive marketing approval;
- revenue, if any, received from commercial sales of our product candidates, should any of our product candidates receive marketing approval; and
- the costs of preparing, filing and prosecuting patent applications, maintaining and enforcing our intellectual property rights and defending intellectual property-related claims.

Identifying potential product candidates and conducting preclinical testing and clinical trials is a time-consuming, expensive and uncertain process that takes years to complete, and we may never generate the necessary data or results required to obtain marketing approval and achieve product sales. In addition, our product candidates, if approved, may not achieve commercial success. In addition, public policy around drug pricing, in the U.S., and outside of the U.S., may affect the commercial success of our product candidates. Our commercial revenues, if any, will be derived from sales of products that we do not expect to be commercially

[Table of Contents](#)

available for many years, if at all. Accordingly, we will need to continue to rely on additional financing to achieve our business objectives. Adequate additional financing may not be available to us on acceptable terms, or at all.

Raising additional capital may cause dilution to our stockholders, restrict our operations or require us to relinquish rights to our technologies or product candidates.

Until such time, if ever, as we can generate substantial product revenues, we expect to finance our cash needs through a combination of equity offerings, debt financings or other sources, our collaboration with Bayer and other potential collaborations. We do not have any committed external source of funds. To the extent that we raise additional capital through the sale of equity or convertible debt securities, your ownership interest will be diluted, and the terms of these securities may include liquidation or other preferences that adversely affect your rights as a common stockholder. Debt financing and preferred equity financing, if available, may involve agreements that include covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, making capital expenditures or declaring dividends. If we raise additional funds through up-front payments or milestone payments pursuant to strategic collaborations with third parties, we may have to relinquish valuable rights to our product candidates, or grant licenses on terms that are not favorable to us.

We cannot be certain that additional funding will be available on acceptable terms, or at all. If we are unable to raise additional funds when needed, we may be required to delay, limit, reduce or terminate our product development or future commercialization efforts.

Risks Related to the Discovery and Development of Our Product Candidates

Our discovery and preclinical development is focused on the development of targeted therapeutics for well-defined patient populations, which is a rapidly evolving area of science, and the approach we are taking to discover and develop drugs is relatively new and may never lead to marketable products.

The discovery and development of targeted therapeutics for well-defined patient populations is an emerging field, and the scientific discoveries that form the basis for our efforts to discover and develop product candidates are relatively new. The scientific evidence to support the feasibility of developing product candidates based on these discoveries is both preliminary and limited. The patient populations for our product candidates are not completely defined but are substantially smaller than the general treated cancer population, and we will need to screen and identify these patients. Successful identification of patients is dependent on several factors, including achieving certainty as to how specific genetic alterations respond to our product candidates and developing companion diagnostics to identify such genetic alterations as appropriate. Furthermore, even if we are successful in identifying patients, we cannot be certain that the resulting patient populations will be large enough to allow us to successfully commercialize our products and achieve profitability. Our estimates of the potential market opportunities for our products are informed by work that is not definitive and future analyses may lead to estimates that are higher or lower than these estimates than those provided at any given time, with respect to addressable patient populations. Therefore, we do not know if our approach will be successful, and if our approach is unsuccessful, our business will suffer.

We are early in our development efforts and are substantially dependent on the development of our product candidates. If we or our collaborators are unable to successfully develop and commercialize our product candidates or experience significant delays in doing so, our business will be materially harmed.

We currently do not have any products that have gained regulatory approval. We have invested significant financial resources in identifying potential product candidates, funding our collaboration agreement with Array to conduct preclinical studies, conducting clinical development of our product candidates, acquiring the Redx Pharma Plc BTK program and opening scientific labs in Boulder, Colorado.

Our ability to generate product revenues will depend heavily on the successful development and eventual commercialization of our product candidates. We have not yet demonstrated an ability to successfully overcome many of the risks and uncertainties frequently encountered by companies in new and rapidly evolving fields, particularly in the biopharmaceutical area. For example, to execute our business plan, we will need to successfully:

- execute and complete development activities;
- obtain required regulatory approvals for the development and commercialization of our product candidates;
- maintain, leverage and expand our intellectual property portfolio;
- build and maintain robust sales, distribution and marketing capabilities, either on our own or in collaboration with strategic partners;
- establish successful companion diagnostics collaborations;
- gain market acceptance;

[Table of Contents](#)

- develop and maintain any strategic relationships we elect to enter into, including our collaborations with Bayer, Array and others; and
- manage our spending as costs and expenses increase due to drug discovery, preclinical development, clinical trials, regulatory approvals and commercialization.

If we are unsuccessful in accomplishing these objectives, we may not be able to successfully develop and commercialize larotrectinib or our other product candidates, and our business will suffer.

Difficulty in enrolling patients could delay or prevent clinical trials of our product candidates. We may find it difficult to enroll patients in our clinical trials given that we do not know how many patients harbor the relevant alteration each product candidate is designed to inhibit.

Identifying and qualifying patients to participate in clinical studies of our product candidates is critical to our success. The timing of our clinical studies depends in part on the speed at which we can recruit patients to participate in testing our product candidates, and we may experience delays in our clinical trials if we encounter difficulties in enrollment. The patient populations for our product candidates are not completely defined, but are substantially smaller than other cancer indications, because we are often looking for the same type of genetic alterations across different tumor types and the number of patients with these alterations may be small. We do not yet know exactly how many patients will have the targets that our product candidates are designed to inhibit. In addition, the adoption of genetic testing across large populations of patients with cancer will be required for us to identify patients appropriate for our trials that are restricted to genetically defined populations.

The number of patients suitable for trial enrollment and potential commercialization depends on a series of risks that are difficult to quantify based on available information. For example, in the case of TRK, there is significant uncertainty around the true number of patients with advanced cancer and a TRK fusion, the number of these patients who are referred for comprehensive genomic profiling, the sensitivity of the chosen comprehensive genomic assay for detecting TRK fusions, the ability of healthcare providers to recognize the importance of the presence of a TRK fusion, patient interest in seeking out a TRK inhibitor, and patient interest in larotrectinib instead of a competing program. Nevertheless, in the case of TRK fusion cancers, incidence appears to be low in the more common tumor types. Our proprietary work suggests that there are approximately 1,500-5,000 eligible advanced cancer patients addressable each year in the United States. However, the work that informed this estimate is not definitive and future analyses may lead to estimates that are higher or lower than this estimate. In addition, the broad utilization of sensitive diagnostic tests in routine clinical practice capable of identifying TRK fusion patients is as important to successful commercialization as the actual number of addressable patients. Similar issues apply to our RET and LOXO-305 programs as well.

In addition to potentially small populations, the eligibility criteria of our clinical trials will further limit the pool of available study participants as we will require that patients have specific characteristics that we can measure and/or that their disease is either severe enough or not too advanced to include them in a study. Additionally, the process of finding and diagnosing patients may prove costly. We also may not be able to identify, recruit and enroll a sufficient number of patients to complete our clinical studies because of the perceived risks and benefits of the product candidate under study, the availability and efficacy of competing therapies and clinical trials, the proximity and availability of clinical study sites for prospective patients, and the patient referral practices of physicians. If patients are unwilling to participate in our studies for any reason, the timeline for recruiting patients, conducting studies, and obtaining regulatory approval of potential products may be delayed.

If we experience delays in the completion of, or termination of, any clinical trial of our product candidates, the commercial prospects of our product candidates will be harmed, and our ability to generate product revenue from any of these product candidates could be delayed or prevented. In addition, any delays in completing our clinical trials will increase our costs, slow down our product candidate development and approval process and jeopardize our ability to commence product sales and generate revenue. Any of these occurrences may harm our business, financial condition and prospects significantly. In addition, many of the factors that cause, or lead to, a delay in the commencement or completion of clinical trials may also ultimately lead to the denial of regulatory approval of our product candidates, including:

- unforeseen safety issues or adverse side effects;
- failure of our companion diagnostics in identifying patients;
- modifications to protocols of our clinical trials resulting from FDA or institutional review board (“IRB”) decisions; and
- ambiguous or negative interim results of our clinical trials, or results that are inconsistent with earlier results.

[Table of Contents](#)

Clinical drug development involves a lengthy and expensive process, with an uncertain outcome. We may incur additional costs or experience delays in completing, or ultimately be unable to complete, the development and commercialization of our product candidates.

We have commenced the clinical development of larotrectinib, LOXO-292, and LOXO-195, and there is significant risk that one or more of our product candidates will fail to reach commercialization. Before obtaining marketing approval from regulatory authorities for the sale of any product candidate, we must complete preclinical development and then conduct extensive clinical trials to demonstrate the safety and efficacy of our product candidates in humans. Clinical testing is expensive, difficult to design and implement and can take many years to complete, and its outcome is inherently uncertain. Failure can occur at any time during the clinical trial process. Further, the results of preclinical studies and early clinical trials of our product candidates may not be predictive of the results of later-stage clinical trials, and interim results of a clinical trial do not necessarily predict final results. Moreover, preclinical and clinical data are often susceptible to varying interpretations and analyses, and many companies that have believed their product candidates performed satisfactorily in preclinical studies and clinical trials have nonetheless failed to obtain marketing approval of their products. It is difficult to accurately predict when or if any of our product candidates will prove effective or safe in humans or will receive regulatory approval.

We may experience delays in our clinical trials and we do not know whether planned clinical trials will begin or enroll subjects on time, need to be redesigned or be completed on schedule, if at all. There can be no assurance that the FDA will not put any of our product candidates on clinical hold in the future. We may experience numerous unforeseen events during, or as a result of, clinical trials that could delay or prevent our ability to receive marketing approval or commercialize our product candidates. Clinical trials may be delayed, suspended or prematurely terminated because costs are greater than we anticipate or for a variety of reasons, such as:

- delay or failure in reaching agreement with the FDA or a comparable foreign regulatory authority on a trial design that we are able to execute;
- delay or failure in obtaining authorization to commence a trial or inability to comply with conditions imposed by a regulatory authority regarding the scope or design of a clinical trial;
- delays in reaching, or failure to reach, agreement on acceptable clinical trial contracts or clinical trial protocols with prospective trial sites;
- inability, delay, or failure in identifying and maintaining a sufficient number of trial sites, many of which may already be engaged in other clinical programs;
- delay or failure in recruiting and enrolling suitable subjects to participate in a trial;
- delay or failure in having subjects complete a trial or return for post-treatment follow-up;
- clinical sites and investigators deviating from trial protocol, failing to conduct the trial in accordance with regulatory requirements, or dropping out of a trial;
- lack of adequate funding to continue the clinical trial, including the incurrence of unforeseen costs due to enrollment delays, requirements to conduct additional clinical studies and increased expenses associated with the services of our CROs and other third parties;
- clinical trials of our product candidates may produce negative or inconclusive results, and we may decide, or regulators may require us, to conduct additional clinical trials or abandon product development programs;
- the number of patients required for clinical trials of our product candidates may be larger than we anticipate, enrollment in these clinical trials may be slower than we anticipate or participants may drop out of these clinical trials at a higher rate than we anticipate;
- we may experience delays or difficulties in the enrollment of patients whose tumors harbor the specific genetic alterations that our product candidates are designed to target;
- our third-party contractors may fail to comply with regulatory requirements or meet their contractual obligations to us in a timely manner, or at all;
- we may have difficulty partnering with experienced CROs that can screen for patients whose tumors harbor the applicable genetic alterations and run our clinical trials effectively;
- regulators or IRBs may require that we or our investigators suspend or terminate clinical research for various reasons, including noncompliance with regulatory requirements or a finding that the participants are being exposed to unacceptable health risks;

[Table of Contents](#)

- the supply or quality of our product candidates or other materials necessary to conduct clinical trials of our product candidates may be insufficient or inadequate; or
- there may be changes in governmental regulations or administrative actions.

If we are required to conduct additional clinical trials or other testing of our product candidates beyond those that we currently contemplate, if we are unable to successfully complete clinical trials of our product candidates or other testing, if the results of these trials or tests are not positive or are only modestly positive or if there are safety concerns, we may:

- be delayed in obtaining marketing approval for our product candidates;
- not obtain marketing approval at all;
- obtain approval for indications or patient populations that are not as broad as intended or desired;
- obtain approval with labeling that includes significant use or distribution restrictions or safety warnings that would reduce the potential market for our products or inhibit our ability to successfully commercialize our products;
- be subject to additional post-marketing restrictions and/or testing requirements; or
- have the product removed from the market after obtaining marketing approval.

Our product development costs will also increase if we experience delays in testing or marketing approvals. We do not know whether any of our preclinical studies or clinical trials will need to be restructured or will be completed on schedule, or at all. Significant preclinical or clinical trial delays also could shorten any periods during which we may have the exclusive right to commercialize our product candidates or allow our competitors to bring products to market before we do and impair our ability to successfully commercialize our product candidates and may harm our business and results of operations.

We may not be successful in advancing the clinical development of our product candidates, including larotrectinib, LOXO-292 and LOXO-195.

In order to execute on our strategy of advancing the clinical development of our product candidates, we have designed clinical trials for larotrectinib, LOXO-292 and LOXO-195, and expect to design future trials, to include patients whose tumors harbor the applicable genetic alterations that we believe contribute to cancer. Our goal is to enroll patients who have the highest probability of responding to the drug, in order to show early evidence of clinical efficacy. If we are unable to include patients whose tumors harbor the applicable genetic alterations, or if our product fails to work as we expect, our ability to assess the therapeutic effect, seek participation in FDA expedited review and approval programs, including Breakthrough Therapy, Fast Track Designation, Priority Review and Accelerated Approval, or otherwise to seek to accelerate clinical development and regulatory timelines, could be compromised, resulting in longer development times, larger trials and a greater likelihood of not obtaining regulatory approval.

We have completed the submission of a rolling NDA for larotrectinib for the treatment of adult and pediatric patients with locally advanced or metastatic solid tumors harboring an NTRK gene fusion. However, in order to obtain marketing approval from the FDA, we may need to study our product candidates, including larotrectinib, in clinical trials specific for a given tumor type and this may result in increased time and cost. Even if our product candidate demonstrates efficacy in a particular tumor type, we cannot guarantee that any product candidate, including larotrectinib, will behave similarly in all tumor types, and we may be required to obtain separate regulatory approvals for each tumor type we intend a product candidate to treat. If any of our clinical trials are unsuccessful, our business will suffer. Furthermore, we do not yet know if the NDA for larotrectinib will be considered for accelerated approval or full approval. If larotrectinib is granted accelerated approval, the FDA may impose significant post-marketing commitments that are challenging to satisfy. If these post-marketing commitments are not satisfied within an agreed-upon timeline with FDA, the larotrectinib approval could be rescinded.

Submission of MAAs by Bayer are planned for the EU, Japan and other markets. Regulatory standards in these territories may differ from those in the U.S. There is risk that larotrectinib will not receive approvals in these territories.

If serious adverse events or unacceptable side effects are identified during the development of our product candidates, we may need to abandon or limit our development of some of our product candidates.

If our product candidates are associated with undesirable side effects in preclinical or clinical trials or have characteristics that are unexpected, we may need to interrupt, delay or abandon their development or limit development to more narrow uses or subpopulations in which the undesirable side effects or other characteristics are less prevalent, less severe or more acceptable from a risk-benefit perspective.

For example, toxicology studies for LOXO-292 and LOXO-195 have demonstrated potential side effects that could affect humans, but also may have failed to uncover additional side effects that could affect humans. In the case of larotrectinib, adverse events observed in ongoing clinical trials are discussed in more detail in our Annual Report on Form 10-K filed with the SEC on March 1, 2018, under “Business— Product Candidates—Larotrectinib (TRK Inhibitor)”.

[Table of Contents](#)

Additional or more severe side effects may be identified in our ongoing clinical trials or in future clinical studies. These or other drug-related side effects could affect patient recruitment or the ability of enrolled subjects to complete the trial or result in potential product liability claims. Many compounds developed in the biopharmaceutical industry that initially showed promise in early-stage testing for treating cancer have later been found to cause side effects that prevented further development of the compound. Any of these occurrences may harm our business, financial condition and prospects significantly.

Investors should not place undue reliance on the results of preclinical experiments or our ongoing clinical trials since they are not necessarily predictive of the results that will form the basis of our global regulatory approval packages, and our product candidates may not receive regulatory approval.

Investors should not place undue reliance on the results from completed preclinical studies or data from our ongoing clinical trials since they do not ensure that other clinical trial data will be comparable, in terms of safety, ORR, DOR, or other factors the FDA and other regulators will consider in determining whether to approve our product candidates.

Final datasets, upon which global regulatory decisions will be based, will differ from interim datasets previously disclosed. Potential reasons for these differences include, but are not limited to:

- not all patients will demonstrate tumor regression, experience tumor regression that meets the measurement thresholds required under RECIST v1.1 for a partial response, or remain on study long enough for an initial or confirmatory response assessment;
- patients will discontinue our product candidates for a number of reasons, including an adverse event, tumor progression following a response, or a lack of tumor regression or clinical benefit and discontinuations will impact our product candidates' reported duration of therapy and DOR;
- additional time and patient accrual provide new opportunities to capture new adverse events and further characterize the ORR and DOR;
- patient accrual beyond interim disclosed data will likely include study subjects with new tumor types, demographics (e.g. pediatric patients), and exposures to varying prior therapies. Thus, the inclusion of these subpopulations in the final dataset may alter the characterization of our product candidates' overall safety, ORR and DOR; and
- the precise composition of the final dataset is subject to additional regulatory feedback, which is expected closer to the time of an NDA, or equivalent, and the advice may vary by regulatory authority.

As a result, the final efficacy and safety datasets for our product candidates have not been fully populated or established, and are expected to differ from any interim dataset publicly disclosed. Moreover, regulatory approvals will be based on the final efficacy and safety databases, and as such, we can give no assurance that our product candidates will receive regulatory approval.

We may expend our limited resources to pursue a particular product candidate or indication and fail to capitalize on product candidates or indications that may be more profitable or for which there is a greater likelihood of success.

Because we have limited financial and managerial resources, we must focus on a limited number of research programs and product candidates and on specific indications. As a result, we may forego or delay pursuit of opportunities with other product candidates or for other indications that later prove to have greater commercial potential. Our resource allocation decisions may cause us to fail to capitalize on viable commercial products or profitable market opportunities. Our spending on current and future discovery and preclinical development programs and product candidates for specific indications may not yield any commercially viable products.

We may expand our business through the acquisition of drug products, companies or businesses or by entering into collaborations or in-licensing product candidates that could disrupt our business and harm our financial condition.

We have in the past and may in the future seek to expand our pipeline and capabilities by acquiring one or more companies, businesses or assets, entering into collaborations or in-licensing one or more product candidates. For example, in July 2017, we acquired a patent portfolio from Redx Pharma Plc and Redx Oncology Limited in connection with our acquisition of the Redx BTK discovery program. Any difficulties we experience in transitioning and integrating such product candidate into our operations may result in delays in clinical trials as well as problems in our development efforts and regulatory filings, particularly if we do not receive all of the necessary drug product, information, reports and data from third parties in a timely manner. More particularly, we have had no involvement with or control over the preclinical development of LOXO-305 prior to acquiring the rights to it. Furthermore, we did not get any representations or warranties with regards to the patents or associated rights. In November 2017, we entered into the Bayer Agreement pursuant to which we will collaborate with Bayer to develop and commercialize larotrectinib and LOXO-195. For more descriptions of the risks involved in this agreement, see the risk factor "Our existing collaboration with Bayer is important to our business. If we are unable to maintain this or any other collaboration, or if this or any other collaboration is not successful, our business could be adversely affected."

[Table of Contents](#)

Acquisitions, collaborations and in-licenses involve numerous risks, including:

- substantial cash expenditures;
- potentially dilutive issuance of equity securities;
- incurrence of debt and contingent liabilities, some of which may be difficult or impossible to identify at the time of acquisition;
- potential adverse consequences if the acquired assets are worth less than we anticipated or we are unable to successfully develop and commercialize the acquired assets for any reason;
- difficulties in assimilating the operations and technology of the acquired companies;
- potential disputes, including litigation, regarding contingent consideration for the acquired assets;
- the assumption of unknown liabilities of the acquired businesses;
- diverting our management's attention away from other business concerns;
- entering markets in which we have limited or no direct experience; and
- potential loss of our key employees or key employees of the acquired companies or businesses.

Our experience in making acquisitions, entering collaborations and in-licensing product candidates is limited. We cannot assure you that any acquisition, collaboration or in-license will result in short-term or long-term benefits to us. We may incorrectly judge the value or worth of an acquired company or business or in-licensed product candidate. In addition, our future success may depend in part on our ability to manage the growth and technology integration associated with any of these acquisitions, collaborations and in-licenses. We cannot assure you that we will be able to successfully combine our business with that of acquired businesses, manage collaborations or integrate in-licensed product candidates or that such efforts would be successful. Furthermore, the development or expansion of our business or any acquired business or company or any collaboration or in-licensed product candidate may require a substantial capital investment by us. We may also seek to raise funds by selling shares of our capital stock, which could dilute our current stockholders' ownership interest, or securities convertible into our capital stock, which could dilute current stockholders' ownership interest upon conversion. We may also incur debt obligations, which could require us to comply with covenants which could restrict our ability to operate our business and negatively impact the value of our common stock.

Failure to successfully validate, develop and obtain regulatory approval for companion diagnostics for our product candidates could harm our drug development strategy and operational results.

As one of the central elements of our business strategy and clinical development approach, we often seek to identify subsets of patients with a genetic alteration who may derive meaningful benefit from our development product candidates. To achieve this, our product development programs can be dependent on the development and commercialization of a companion diagnostic by us or by third-party collaborators. Companion diagnostics are developed in conjunction with clinical programs for the associated product and are subject to regulation as medical devices. For example, for larotrectinib, we are working with collaborators to develop appropriate companion diagnostics to identify patients with tumors that harbor TRK fusions. The approval of a companion diagnostic as part of the product labeling may limit the use of the product candidate to only those patients who express the specific genetic alteration it was developed to detect. We may also experience delays in developing a sustainable, reproducible and scalable manufacturing process or transferring that process to commercial partners or negotiating insurance reimbursement plans, all of which may prevent us from completing our clinical trials or commercializing our products on a timely or profitable basis, if at all.

Companion diagnostics are subject to regulation by the FDA and comparable foreign regulatory authorities as medical devices and require separate clearance or approval prior to their commercialization. To date, the FDA has required premarket approval of all companion diagnostics for cancer therapies, either at the time of initial drug approval, or as a post-marketing commitment. We, and our third-party collaborators, may encounter difficulties in developing and obtaining approval for these companion diagnostics. Our third-party collaborators may de-prioritize, abandon or fail to execute against our development projects. Any delay or failure by us or third-party collaborators to develop or obtain regulatory approval of a companion diagnostic could delay or prevent approval of our related product candidates.

Failure by us or our third-party collaborators to successfully commercialize companion diagnostics developed for use with our product candidates could harm our ability to commercialize these product candidates.

Even if we or our companion diagnostic collaborators successfully obtain regulatory approval for the companion diagnostics for our product candidates, our collaborators:

- may not perform their obligations as expected;

[Table of Contents](#)

- may not pursue commercialization of companion diagnostics for our therapeutic product candidates that achieve regulatory approval;
- may elect not to continue or renew commercialization programs based on changes in the collaborators' strategic focus or available funding, or external factors, such as an acquisition, that divert resources or create competing priorities;
- may not commit sufficient resources to the marketing and distribution of such product or products;
- may fail to establish adequate reimbursement for their products, thus limiting the use of such product; and
- may terminate their relationship with us.

Additionally, we, or our collaborators, may encounter production difficulties that could constrain the supply of the companion diagnostics, affect the ease of use, affect the price or have difficulties gaining acceptance of the use of the companion diagnostics in the clinical community.

If companion diagnostics for use with our product candidates fail to gain market acceptance, our ability to derive revenues from sales of our product candidates could be harmed. If insurance reimbursement to the laboratories who perform the companion diagnostic tests is inadequate, utilization may be low, and patient tumors may not be comprehensively screened for the presence of the genetic markers that predict response to our product candidates. If we or our collaborators fail to commercialize these companion diagnostics, we may not be able to enter into arrangements with another diagnostic company to obtain supplies of an alternative diagnostic test for use in connection with our product candidates or do so on commercially reasonable terms, which could adversely affect and delay the development or commercialization of our product candidates.

Risks Related to Regulatory Approval of Our Product Candidates and Other Legal Compliance Matters

If we or our collaborators are not able to obtain, or if there are delays in obtaining, required regulatory approvals, we will not be able to commercialize our product candidates, and our ability to generate revenue will be materially impaired.

Our product candidates must be approved by the FDA pursuant to an NDA in the United States and by the European Medicines Agency ("EMA") and similar regulatory authorities outside the United States prior to commercialization. The process of obtaining marketing approvals, both in the United States and abroad, is expensive and takes many years, if approval is obtained at all, and can vary substantially based upon a variety of factors, including the type, complexity and novelty of the product candidates involved. Failure to obtain marketing approval for a product candidate will prevent us from commercializing the product candidate. We have not received approval to market any of our product candidates from regulatory authorities in any jurisdiction. We have little experience in filing and supporting the applications necessary to gain marketing approvals and expect to rely on third-party CROs and our collaborators to assist us in this process. Securing marketing approval requires the submission of extensive preclinical and clinical data and supporting information to regulatory authorities for each therapeutic indication to establish the product candidate's safety and efficacy. Securing marketing approval also requires the submission of information about the product manufacturing process to, and inspection of manufacturing facilities by, the regulatory authorities, among other requirements. Our product candidates may not be effective, may be only moderately effective, may not have an acceptable durability of response, may not have an acceptable risk-benefit profile, or may prove to have undesirable or unintended side effects, toxicities or other characteristics that may preclude our obtaining marketing approval or prevent or limit commercial use. Regulatory authorities have substantial discretion in the approval process and may refuse to accept any application or may decide that our data are insufficient for approval and require additional preclinical, clinical or other studies. For example, development programs that span many tumor types are relatively novel, and to date, the FDA has approved only one therapy to treat multiple tumor types based on a common biomarker. We cannot be sure that the FDA will file and approve our NDA for larotrectinib or our other product candidates. In addition, varying interpretations of the data obtained from preclinical and clinical testing could delay, limit or prevent marketing approval of a product candidate. Changes in marketing approval policies during the development period, changes in or the enactment of additional statutes or regulations, or changes in regulatory review for each submitted product application, may also cause delays in or prevent the approval of an application.

New cancer drugs frequently are indicated only for patient populations that have not responded to an existing therapy or have relapsed. If any of our product candidates receives marketing approval, the accompanying labeling may limit the approved use of our drug in this way, which could limit sales of the product.

Any marketing approval we or our collaborators ultimately obtain may be limited or subject to restrictions or post-approval commitments that render the approved product not commercially viable.

If we experience delays in obtaining approval or if we or our collaborators fail to obtain approval of our product candidates, the commercial prospects for our product candidates may be harmed and our ability to generate revenues will be materially impaired.

We may seek Orphan Drug Exclusivity for some of our product candidates, and we may be unsuccessful.

Regulatory authorities in some jurisdictions, including the United States and Europe, may designate drugs for relatively small patient populations as orphan drugs. Under the Orphan Drug Act, the FDA may designate a product as an orphan drug if it is a drug

[Table of Contents](#)

intended to treat a rare disease or condition, which is generally defined as a disease with a patient population of fewer than 200,000 individuals in the United States. In September 2015, we announced that the FDA granted larotrectinib orphan drug designation for the treatment of soft tissue sarcoma. In January 2016, we announced that the European Commission designated larotrectinib as an orphan medicinal product for treatment of patients with soft tissue sarcoma. In May 2017, we announced that the FDA granted orphan drug designation to larotrectinib for the “treatment of solid tumors with NTRK-fusion proteins.” There can be no assurance that any of our other product candidates will be designated as an orphan drug.

Generally, if a product with an Orphan Drug Designation subsequently receives the first marketing approval for the indication for which it has such designation, the product is entitled to a period of marketing exclusivity, which precludes the EMA or the FDA from approving another marketing application for the same drug for the same indication during the period of exclusivity. The applicable period is seven years in the United States and ten years in Europe. The European exclusivity period can be reduced to six years if a drug no longer meets the criteria for Orphan Drug Designation or if the drug is sufficiently profitable so that market exclusivity is no longer justified. Orphan Drug Exclusivity may be lost if the FDA or EMA determines that the request for designation was materially defective, or if the manufacturer is unable to assure sufficient quantity of the drug to meet the needs of patients with the rare disease or condition.

Orphan Drug Exclusivity of larotrectinib or other product candidates, may not effectively protect the product candidate from competition because different drugs can be approved for the same orphan condition. In addition, after an orphan drug is approved and granted exclusivity, the FDA can subsequently approve a different drug containing the same active moiety for the same condition if the FDA concludes that the later drug is clinically superior in that it is shown to be safer, more effective or makes a major contribution to patient care. The FDA can also approve drugs containing the same active moiety for different indications.

A Fast Track Designation by the FDA, even if granted for any of our product candidates, may not lead to a faster development or regulatory review or approval process and does not increase the likelihood that our product candidates will receive marketing approval.

We do not currently have Fast Track Designation for any of our product candidates but we may seek such designation if we believe such a designation is warranted. If a drug is intended for the treatment of a serious or life-threatening condition and the drug demonstrates the potential to address unmet medical needs for this condition, the drug sponsor may apply for Fast Track Designation with the FDA. The FDA has broad discretion whether or not to grant this designation. Even if we believe a particular product candidate is eligible for this designation, we cannot assure you that the FDA would decide to grant it. Even if we do receive Fast Track Designation, we may not experience a faster development process, review or approval compared to conventional FDA procedures. The FDA may withdraw Fast Track Designation if it believes that the designation is no longer supported by data from our clinical development program. Many drugs that have received Fast Track Designation have failed to obtain drug approval.

A Breakthrough Therapy Designation by the FDA may not lead to a faster development or regulatory review or approval process, and does not increase the likelihood that our product candidates will receive marketing approval.

In July 2016, we announced that the FDA granted Breakthrough Therapy Designation to larotrectinib “for the treatment of unresectable or metastatic solid tumors with NTRK-fusion proteins in adult and pediatric patients who require systemic therapy and who have either progressed following prior treatment or who have no acceptable alternative treatments.” There can be no assurance that larotrectinib will be approved by the FDA with this indication or at all. There can be no assurance that any of our other product candidates will receive Breakthrough Therapy Designation. A Breakthrough Therapy is defined as a drug that is intended, alone or in combination with one or more other drugs, to treat a serious or life-threatening disease or condition, and preliminary clinical evidence indicates that the drug may demonstrate substantial improvement over existing therapies on one or more clinically significant endpoints, such as substantial treatment effects observed early in clinical development. For drugs that have received a Breakthrough Therapy Designation, interaction and communication between the FDA and the sponsor can help to identify the most efficient path for development.

The receipt of a Breakthrough Therapy Designation for a product candidate may not result in a faster development process, review or approval compared to drugs considered for approval under conventional FDA procedures and does not assure ultimate approval by the FDA. In addition, even if our product candidates receive a Breakthrough Therapy Designation, the FDA may later decide that such product candidates no longer meet the conditions for qualification.

Failure to obtain marketing approval in international jurisdictions would prevent our product candidates from being marketed abroad.

In order to market and sell our products in the European Union and many other jurisdictions, we or our third-party collaborators, including Bayer, must obtain separate marketing approvals and comply with numerous and varying regulatory requirements. The approval procedure varies among countries and can involve additional testing and different criteria for approval. The time required to obtain approval may differ substantially from that required to obtain FDA approval. The regulatory approval process outside the United States generally includes all of the risks associated with obtaining FDA approval. In addition, in many countries outside the United States, it is required that the product be approved for reimbursement before the product can be approved

[Table of Contents](#)

for sale in that country. We, or our third-party collaborators, may not obtain approvals from regulatory authorities outside the United States on a timely basis, if at all. Approval by the FDA does not ensure approval by regulatory authorities in other countries or jurisdictions, and approval by one regulatory authority outside the United States does not ensure approval by regulatory authorities in other countries or jurisdictions or by the FDA. However, failure to obtain approval in some countries or jurisdictions may compromise our ability to obtain approval elsewhere. We may not be able to file for marketing approvals and may not receive necessary approvals to commercialize our products in any market.

Any product candidate for which we obtain marketing approval will be subject to extensive post-approval regulatory requirements and could be subject to post-approval restrictions or withdrawal from the market, and we may be subject to penalties if we fail to comply with regulatory requirements or if we experience unanticipated problems with our products, when and if any of them are approved.

Our product candidates and the activities associated with their development and commercialization, including their testing, manufacturing, recordkeeping, labeling, storage, approval, advertising, promotion, sales and distribution, are subject to comprehensive regulation by the FDA and other regulatory authorities. These requirements include submissions of safety and other post-approval information and reports, registration and listing requirements, current good manufacturing practices (“cGMP”) requirements relating to manufacturing, quality control, quality assurance and corresponding maintenance of records and documents, including periodic inspections by the FDA and other regulatory authority, restrictions or requirements regarding the distribution of samples to physicians and recordkeeping requirements.

The FDA may also impose requirements for costly post-marketing studies or clinical trials, diagnostic approval, and surveillance to monitor the safety or efficacy of the product. The FDA closely regulates the post-approval marketing and promotion of drugs to ensure drugs are marketed only for the approved indications and in accordance with the provisions of the approved labeling. The FDA imposes stringent restrictions on manufacturers’ communications regarding use of their products and if we promote our products beyond their approved indications, we may be subject to enforcement action for off-label promotion. Violations of the Federal Food, Drug and Cosmetic Act relating to the promotion of prescription drugs may lead to investigations alleging violations of federal and state healthcare fraud and abuse laws, as well as state consumer protection laws.

In addition, later discovery of previously unknown adverse events or other problems with our products, manufacturers or manufacturing processes, or failure to comply with regulatory requirements, may yield various results, including:

- restrictions on such products, manufacturers or manufacturing processes;
- restrictions on the labeling or marketing of a product;
- restrictions on product distribution or use;
- requirements to conduct post-approval studies or clinical trials;
- warning or untitled letters;
- withdrawal of the products from the market;
- refusal to approve pending applications or supplements to approved applications that we submit;
- recall of products;
- fines, restitution or disgorgement of profits or revenues;
- suspension or withdrawal of marketing approvals;
- refusal to permit the import or export of our products;
- product seizure; or
- injunctions or the imposition of civil or criminal penalties.

Noncompliance with European Union requirements regarding safety monitoring or pharmacovigilance, and with requirements related to the development of products for the pediatric population, can also result in significant financial penalties. Similarly, failure to comply with the European Union’s requirements regarding the protection of personal information can also lead to significant penalties and sanctions.

[Table of Contents](#)

Our relationships with customers and third-party payors will be subject to applicable anti-kickback, fraud and abuse and other healthcare laws and regulations, which could expose us to criminal sanctions, civil penalties, contractual damages, reputational harm and diminished profits and future earnings.

Healthcare providers, physicians and third-party payors will play a primary role in the recommendation and prescription of any product candidates for which we obtain marketing approval. Our future arrangements with third-party payors and customers may expose us to broadly applicable fraud and abuse and other healthcare laws and regulations that may constrain the business or financial arrangements and relationships through which we market, sell and distribute any products for which we obtain marketing approval. Restrictions under applicable federal and state healthcare laws and regulations include the following:

- the federal Anti-Kickback Statute prohibits, among other things, persons from knowingly and willfully soliciting, offering, receiving or providing remuneration, directly or indirectly, in cash or in kind, to induce or reward, or in return for, either the referral of an individual for, or the purchase, order or recommendation of, any good or service, for which payment may be made under a federal healthcare program such as Medicare and Medicaid;
- the federal False Claims Act imposes criminal and civil penalties, including civil whistleblower or *qui tam* actions, against individuals or entities for knowingly presenting, or causing to be presented, to the federal government, claims for payment that are false or fraudulent or making a false statement to avoid, decrease or conceal an obligation to pay money to the federal government;
- the federal Health Insurance Portability and Accountability Act of 1996 (“HIPAA”) imposes criminal and civil liability for executing a scheme to defraud any healthcare benefit program or making false statements relating to healthcare matters;
- HIPAA, as amended by the Health Information Technology for Economic and Clinical Health Act and its implementing regulations, also imposes obligations, including mandatory contractual terms, with respect to safeguarding the privacy, security and transmission of individually identifiable health information;
- federal law requires applicable manufacturers of covered drugs to report payments and other transfers of value to physicians and teaching hospitals, which includes data collection and reporting obligations. The information was to be made publicly available on a searchable website in September 2014; and
- analogous state and foreign laws and regulations, such as state anti-kickback and false claims laws, may apply to sales or marketing arrangements and claims involving healthcare items or services reimbursed by non-governmental third-party payors, including private insurers.

Some state laws require pharmaceutical companies to comply with the pharmaceutical industry’s voluntary compliance guidelines and the relevant compliance guidance promulgated by the federal government and may require drug manufacturers to report information related to payments and other transfers of value to physicians and other healthcare providers or marketing expenditures. State and foreign laws also govern the privacy and security of health information in some circumstances, many of which differ from each other in significant ways and often are not preempted by HIPAA, thus complicating compliance efforts.

Efforts to ensure that our business arrangements with third parties will comply with applicable healthcare laws and regulations will involve substantial costs. It is possible that governmental authorities will conclude that our business practices may not comply with current or future statutes, regulations or case law involving applicable fraud and abuse or other healthcare laws and regulations. If our operations are found to be in violation of any of these laws or any other governmental regulations that may apply to us, we may be subject to significant civil, criminal and administrative penalties, damages, fines, imprisonment, exclusion of products from government funded healthcare programs, such as Medicare and Medicaid and the curtailment or restructuring of our operations. If any of the physicians or other healthcare providers or entities with whom we expect to do business is found to be not in compliance with applicable laws, they may be subject to criminal, civil or administrative sanctions, including exclusions from government funded healthcare programs.

Recently enacted and future legislation may increase the difficulty and cost for us to obtain marketing approval of and commercialize our product candidates and affect the prices we may obtain.

In the United States and some foreign jurisdictions, there have been a number of legislative and regulatory changes and proposed changes regarding the healthcare system that could prevent or delay marketing approval of our product candidates, restrict or regulate post-approval activities and affect our ability to profitably sell any product candidates for which we obtain marketing approval.

In the United States, the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (“MMA”) changed the way Medicare covers and pays for pharmaceutical products. The legislation expanded Medicare coverage for drug purchases by the elderly and introduced a new reimbursement methodology based on average sales prices for physician-administered drugs. In addition, this legislation provided authority for limiting the number of drugs that will be covered in any therapeutic class. Cost reduction initiatives and other provisions of this legislation could decrease the coverage and price that we receive for any approved products.

[Table of Contents](#)

While the MMA only applies to drug benefits for Medicare beneficiaries, private payors often follow Medicare coverage policy and payment limitations in setting their own reimbursement rates. Therefore, any reduction in reimbursement that results from the MMA may result in a similar reduction in payments from private payors.

In March 2010, former President Obama signed into law the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (collectively the “PPACA”) a sweeping law intended to broaden access to health insurance, reduce or constrain the growth of healthcare spending, enhance remedies against fraud and abuse, add new transparency requirements for the healthcare and health insurance industries, impose new taxes and fees on the health industry and impose additional health policy reforms.

Among the provisions of the PPACA of importance to our potential product candidates are the following:

- an annual, nondeductible fee on any entity that manufactures or imports specified branded prescription drugs and biologic agents;
- an increase in the statutory minimum rebates a manufacturer must pay under the Medicaid Drug Rebate Program;
- expansion of healthcare fraud and abuse laws, including the False Claims Act and the Anti-Kickback Statute, new government investigative powers, and enhanced penalties for noncompliance;
- a new Medicare Part D coverage gap discount program, in which manufacturers must agree to offer 50% point-of-sale discounts off negotiated prices;
- extension of manufacturers’ Medicaid rebate liability;
- expansion of eligibility criteria for Medicaid programs;
- expansion of the entities eligible for discounts under the Public Health Service pharmaceutical pricing program;
- new requirements to report financial arrangements with physicians and teaching hospitals;
- a new requirement to annually report drug samples that manufacturers and distributors provide to physicians; and
- a new Patient-Centered Outcomes Research Institute to oversee, identify priorities in, and conduct comparative clinical effectiveness research, along with funding for such research.

In addition, other legislative changes have been proposed and adopted since the PPACA was enacted. These changes included aggregate reductions to Medicare payments to providers of up to 2% per fiscal year, starting in 2013. In January 2013, former President Obama signed into law the American Taxpayer Relief Act of 2012, which, among other things, reduced Medicare payments to several providers, and increased the statute of limitations period for the government to recover overpayments to providers from three to five years. The Tax Cuts and Jobs Act of 2017 includes a provision repealing, effective January 1, 2019, the tax-based shared responsibility payment imposed by the PPACA on certain individuals who fail to maintain qualifying health coverage for all or part of a year that is commonly referred to as the “individual mandate”. These new laws may result in additional reductions in Medicare and other healthcare funding. In 2016, the U.S. Congress held hearings on the rising costs of prescription drugs and in October 2017, President Trump issued the Executive Order Promoting Healthcare Choice and Competition, directing certain federal agencies to modify their implementation of the PPACA. Future legislation could potentially change drug pricing dynamics.

We expect that the PPACA, as well as other healthcare reform measures that may be adopted in the future, may result in more rigorous coverage criteria and additional downward pressure on the price that we receive for any approved product. Any reduction in reimbursement from Medicare or other government programs may result in a similar reduction in payments from private payors. The implementation of cost containment measures or other healthcare reforms may prevent us from being able to generate revenue, attain profitability, or commercialize our products.

Legislative and regulatory proposals have been made to expand post-approval requirements and restrict sales and promotional activities for pharmaceutical products. We cannot be sure whether additional legislative changes will be enacted, or whether the FDA regulations, guidance or interpretations will be changed, or what the impact of such changes on the marketing approvals of our product candidates, if any, may be. In addition, increased scrutiny by the U.S. Congress of the FDA’s approval process may significantly delay or prevent marketing approval, as well as subject us to more stringent product labeling and post-marketing testing and other requirements.

Governments outside the United States tend to impose strict price controls, which may adversely affect our revenues, if any.

In some countries, particularly the countries of the European Union, the pricing of prescription pharmaceuticals is subject to governmental control. In these countries, pricing negotiations with governmental authorities can take considerable time after the receipt of marketing approval for a product. To obtain reimbursement or pricing approval in some countries, we may be required to conduct a clinical trial that compares the cost-effectiveness of our product candidate to other available therapies. In the absence of

[Table of Contents](#)

such data, reimbursement for our products may be negatively affected. If reimbursement of our products is unavailable or limited in scope or amount, or if pricing is set at unsatisfactory levels, our business could be harmed, possibly materially.

If we fail to comply with environmental, health and safety laws and regulations, we could become subject to fines or penalties or incur costs that could harm our business.

We are subject to numerous environmental, health and safety laws and regulations, including those governing laboratory procedures and the handling, use, storage, treatment and disposal of hazardous materials and wastes. Our operations involve the use of hazardous and flammable materials, including chemicals and biological materials. Our operations also produce hazardous waste products. We generally contract with third parties for the disposal of these materials and wastes. We cannot eliminate the risk of contamination or injury from these materials. In the event of contamination or injury resulting from our use of hazardous materials, we could be held liable for any resulting damages, and any liability could exceed our resources. We also could incur significant costs associated with civil or criminal fines and penalties for failure to comply with such laws and regulations.

Although we maintain workers' compensation insurance to cover us for costs and expenses we may incur due to injuries to our employees resulting from the use of hazardous materials, this insurance may not provide adequate coverage against potential liabilities. We do not maintain insurance for environmental liability or toxic tort claims that may be asserted against us in connection with our storage or disposal of biological, hazardous or radioactive materials.

In addition, we may incur substantial costs in order to comply with current or future environmental, health and safety laws and regulations. These current or future laws and regulations may impair our discovery, preclinical development or production efforts. Our failure to comply with these laws and regulations also may result in substantial fines, penalties or other sanctions.

Risks Related to Our Dependence on Third Parties

Our existing collaboration with Bayer is important to our business. If we are unable to maintain this or any other collaboration, or if this or any other collaboration is not successful, our business could be adversely affected.

We have entered into collaborations with other companies to develop or commercialize several of our product candidates. We cannot predict the success of any current or future collaborations.

On November 14, 2017, we entered into the Bayer Agreement pursuant to which we will collaborate with Bayer to develop and commercialize larotrectinib and LOXO-195. Pursuant to the Bayer Agreement, we have granted co-exclusive development and commercialization licenses to Bayer for both larotrectinib and LOXO-195. We will lead global development activities and U.S. regulatory activities. Bayer will lead ex-U.S. regulatory activities, and global commercial activities. We will co-promote the products with Bayer in the United States. See Note 3 to our unaudited condensed consolidated financial statements.

Under the Bayer Agreement, we are eligible to receive \$450.0 million in milestone payments upon larotrectinib regulatory approvals and first commercial sale events in certain major markets and an additional \$200.0 million in milestone payments upon LOXO-195 regulatory approvals and first commercial sale events in certain major markets. Bayer will pay us a \$25.0 million milestone upon achieving a certain U.S. net sales threshold. We may not receive royalty or milestone revenue under the Bayer Agreement for several years, or at all.

Under the terms of the Bayer Agreement, Bayer will have significant discretion in determining the efforts and resources that they will apply to their marketing efforts and their management of the ex-U.S. regulatory activities and they may not perform their obligations as expected. Disputes may arise between the collaborators and us that result in the delay or termination of the research, development or commercialization of our medicines or product candidates or that result in costly litigation or arbitration that diverts management attention and resources. Furthermore, they may have changes in their strategic focus or available funding, or experience external factors, such as an acquisition, may divert resources or create competing priorities. Any of these events would have a material adverse effect on our results of operations and financial condition.

The Bayer Agreement may be terminated by either party for material breach or bankruptcy. In addition, Bayer may terminate the Bayer Agreement after the fourth anniversary of the effective date upon written notice to us, or in the event that we receive a "complete response letter" from the U.S. FDA with respect to larotrectinib, or if we do not receive marketing approval for larotrectinib by December 31, 2018.

If the Bayer Agreement is terminated, then, depending on the event:

- our cash expenditures could increase significantly if it is necessary for us to hire additional employees and allocate internal resources to the commercialization or regulatory activities that were previously shared by Bayer;
- we would bear all of the risks and costs related to the further development and commercialization, as well as regulatory activities, that were previously the subject of the Bayer Agreement;

[Table of Contents](#)

- in order to fund further commercialization or regulatory activities, we may need to seek out and establish alternative strategic collaborations with third-party partners, which may not be possible; or
- we may not be able to do so on terms which are acceptable to us, in which case it may be necessary for us to limit the size or scope of one or more of our programs or increase our expenditures and seek additional funding by other means.

Any of these events would have a material adverse effect on our results of operations and financial condition.

Future collaborations may be important to us. If we are unable to maintain these collaborations, or if these collaborations are not successful, our business could be adversely affected.

For some of our product candidates, we may in the future determine to collaborate with pharmaceutical and biotechnology companies for development of products. For example, on July 3, 2013, we entered into the Array Agreement, pursuant to which Array agreed to design, conduct and perform research and preclinical testing for certain compounds that we select, including larotrectinib, targeted at TRKA, TRKB and TRKC, and identify Investigational New Drug candidates for TRK and other targets (including RET and FGFR), while undertaking manufacturing activities sufficient to conduct Phase 1 clinical trials for a subset of these programs. Array granted us exclusive licenses worldwide, for clinical and commercial development of these compounds. See “Business—Array Collaboration.”

The contractual end of the Array Agreement is currently scheduled for September 30, 2018, unless we otherwise mutually agree to extend. Array has an obligation to test targets during our discovery phase, but we cannot be certain that our collaboration will lead to the discovery of any additional product candidates beyond larotrectinib, LOXO-292, and LOXO-195, or that any of these product candidates will be successfully commercialized and developed. If the Array Agreement is terminated as scheduled, we will develop new ways to discover additional product candidates, and there can be no assurance that we will be successful.

Furthermore, if Array changes its strategic focus, or if it independently develops products that compete directly or indirectly with our product candidates using resources it acquires from our collaboration, our business and results of operations could suffer. For example, while Array has granted us a license for compounds designed to target at least two of the three known TRK kinases. Array has retained ownership and rights to development of compounds targeting only one TRK kinase. We were notified by Array regarding their efforts and use of third parties for the development and/or commercialization of compounds that selectively modulate TRKA for oncology indications. We have not elected to be the third-party partner for such efforts, as permitted under our collaboration agreement with Array. If Array or its partners were to develop such compounds in direct competition with our product candidates, our business could be adversely impacted.

We face significant competition in seeking appropriate collaborators. Our ability to reach a definitive agreement for any collaboration will depend, among other things, upon our assessment of the collaborator’s resources and expertise, the terms and conditions of the proposed collaboration and the proposed collaborator’s evaluation of a number of factors. If we are unable to reach agreements with suitable collaborators on a timely basis, on acceptable terms, or at all, we may have to curtail the development of a product candidate, reduce or delay its development program or one or more of our other development programs, delay its potential development schedule or reduce the scope of research activities, or increase our expenditures and undertake discovery or preclinical development activities at our own expense. If we fail to enter into collaborations and do not have sufficient funds or expertise to undertake the necessary development activities, we may not be able to further develop our product candidates or continue to develop our product candidates and our business may be materially and adversely affected.

Future development collaborations we may enter into may involve the following risks:

- collaborators may have significant discretion in determining the efforts and resources that they will apply to these collaborations;
- collaborators may not perform their obligations as expected;
- changes in the collaborators’ strategic focus or available funding, or external factors, such as an acquisition, may divert resources or create competing priorities;
- collaborators may delay discovery and preclinical development, provide insufficient funding for product development of targets selected by us, stop or abandon discovery and preclinical development for a product candidate, repeat or conduct new discovery and preclinical development for a product candidate;
- collaborators could independently develop, or develop with third parties, products that compete directly or indirectly with our products or product candidates if the collaborators believe that competitive products are more likely to be successfully developed than ours;
- product candidates discovered in collaboration with us may be viewed by our collaborators as competitive with their own product candidates or products, which may cause collaborators to cease to devote resources to the development of our product candidates;

[Table of Contents](#)

- disagreements with collaborators, including disagreements over proprietary rights, contract interpretation or the preferred course of development, might cause delays or termination of the discovery, preclinical development or commercialization of product candidates, might lead to additional responsibilities for us with respect to product candidates, or might result in litigation or arbitration, any of which would be time-consuming and expensive;
- collaborators may not properly maintain or defend our intellectual property rights or intellectual property rights licensed to us or may use our proprietary information in such a way as to invite litigation that could jeopardize or invalidate our intellectual property or proprietary information or expose us to potential litigation;
- collaborators may infringe the intellectual property rights of third parties, which may expose us to litigation and potential liability; and
- collaborations may be terminated for the convenience of the collaborator and, if terminated, we could be required to raise additional capital to pursue further development or commercialization of the applicable product candidates.

Additionally, subject to its contractual obligations to us, if a collaborator of ours is involved in a business combination, the collaborator might deemphasize or terminate the development of any of our product candidates. If one of our collaborators terminates its agreement with us, we may find it more difficult to attract new collaborators and the perception of our company by the business and financial communities could be adversely affected.

If we are unable to maintain our collaborations, development of our product candidates could be delayed and we may need additional resources to develop them. All of the risks relating to product development, regulatory approval and commercialization described in this filing also apply to the activities of our collaborators.

We expect to rely on third-party contractors and organizations to conduct our clinical trials, and those third parties may not perform satisfactorily, including failing to meet deadlines for the completion of such trials.

We will rely on third-party clinical research contractors and organizations to conduct our ongoing clinical trials of larotrectinib, LOXO-292, and LOXO-195, and we will rely on third-party contractors, clinical data management organizations, independent contractors, medical institutions and clinical investigators to conduct our clinical trials beyond our current trials, and for clinical trials for programs other than larotrectinib, LOXO-292, and LOXO-195. These agreements may terminate for a variety of reasons, including a failure to perform by the third parties. If we needed to enter into alternative arrangements, our product development activities could be delayed.

We compete with many other companies, some of which may be our business competitors, for the resources of these third parties. Large pharmaceutical companies often have significantly more extensive agreements and relationships with such third-party providers, and such third-party providers may prioritize the requirements of such large pharmaceutical companies over ours. The third parties on whom we rely may terminate their engagements with us at any time, which may cause delay in the development and commercialization of our product candidates. If any such third party terminates its engagement with us or fails to perform as agreed, we may be required to enter into alternative arrangements, which would result in significant cost and delay to our product development program. Moreover, our agreements with such third parties generally do not provide assurances regarding employee turnover and availability, which may cause interruptions in the research on our product candidates by such third parties.

Our reliance on these third parties to conduct our clinical trials reduces our control over these activities but does not relieve us of our responsibilities. For example, we remain responsible for ensuring that each of our clinical trials is conducted in accordance with the general investigational plan and protocols for the trial. Moreover, the FDA and other regulatory authorities require us to comply with good clinical practices (“GCPs”) for conducting, recording and reporting the results of clinical trials to assure that data and reported results are credible and accurate and that the rights, integrity and confidentiality of trial participants are protected. We are also required to register ongoing clinical trials and post the results of completed clinical trials on a government-sponsored database, ClinicalTrials.gov, within specified timeframes. Failure to do so can result in fines, adverse publicity and civil and criminal sanctions.

Additionally, we expect to rely substantially on third-party data managers for our clinical trial data. There is no assurance that these third parties will not make errors in the design, management or retention of our data or data systems. There is no assurance that these third parties will pass FDA or other regulatory audits, which could delay or prevent regulatory approval.

If these third parties do not successfully carry out their contractual duties, meet expected deadlines or conduct our clinical trials in accordance with regulatory requirements or our stated protocols, we will not be able to obtain, or may be delayed in obtaining, marketing approvals for our product candidates and will not be able to, or may be delayed in our efforts to, successfully commercialize our product candidates.

[Table of Contents](#)

We contract with third parties for the manufacture of our product candidates for preclinical and clinical testing and expect to continue to do so for commercialization. This reliance on third parties increases the risk that we will not have sufficient quantities of our product candidates or products at an acceptable cost and quality, which could delay, prevent or impair our development or commercialization efforts.

We do not own or operate facilities for the manufacture of our product candidates, and we rely on outside manufacturing personnel to operate these third-party facilities. We currently have no plans to build our own clinical or commercial scale manufacturing capabilities. We rely, and expect to continue to rely, on third parties for the manufacture of our product candidates for preclinical and clinical testing. We will rely on third parties as well for commercial manufacture if any of our product candidates receive marketing approval. This reliance on third parties increases the risk that we will not have sufficient quantities of our product candidates or products or such quantities at an acceptable cost or quality, which could delay, prevent or impair our development or commercialization efforts.

Any performance failure on the part of our existing or future manufacturers could delay clinical development or marketing approval. Arrangements for redundant supply or a source for bulk drug product may be infeasible, too costly, unavailable or inadequate to prevent a delay in clinical development or marketing approval should our existing or future manufacturers experience performance failure. The formulation used in early studies is not necessarily a final formulation for commercialization. Additional, changes may be required by the FDA or other regulatory authorities on specifications and storage conditions. These may require additional studies and may delay our clinical trials.

We expect to rely on third-party manufacturers or third-party collaborators for the manufacture of commercial supply of any other product candidates for which our collaborators or we obtain marketing approval.

We also expect to rely on other third parties to store and distribute drug supplies for our clinical trials. Any performance failure on the part of our distributors could delay clinical development or marketing approval of our product candidates or commercialization of our products, producing additional losses and depriving us of potential product revenue.

We may be unable to establish any agreements with third-party manufacturers or to do so on acceptable terms. Even if we are able to establish agreements with third-party manufacturers, reliance on third-party manufacturers entails additional risks, including:

- reliance on the third party for regulatory compliance and quality assurance;
- the possible breach of the manufacturing agreement by the third party;
- the possible misappropriation of our proprietary information, including our trade secrets and know-how; and
- the possible termination or nonrenewal of the agreement by the third party at a time that is costly or inconvenient for us.

Third-party manufacturers may not be able to comply with cGMP regulations or similar regulatory requirements outside the United States. Our failure, or the failure of our third-party manufacturers, to comply with applicable regulations could result in sanctions being imposed on us, including clinical holds, fines, injunctions, civil penalties, delays, suspension or withdrawal of approvals, license revocation, seizures or recalls of product candidates or products, operating restrictions and criminal prosecutions, any of which could significantly and adversely affect supplies of our products. In addition, if, during a preapproval inspection or other inspection of our third-party manufacturers' facility or facilities, the FDA determines that the facility is not in compliance with cGMP, any of our marketing applications that lists such facility as a manufacturer may not be approved or approval may be delayed until the facility comes into compliance with cGMP and completes a successful reinspection by the FDA.

Our product candidates and any products that we may develop may compete with other product candidates and products for access to manufacturing facilities. There are a limited number of manufacturers that operate under cGMP regulations and that might be capable of manufacturing for us.

Our current and anticipated future dependence upon others for the manufacture of our product candidates or products may adversely affect our future profit margins and our ability to commercialize any products that receive marketing approval on a timely and competitive basis.

Risks Related to the Commercialization of Our Product Candidates

Even if any of our product candidates receives marketing approval, it may fail to achieve the degree of market acceptance by physicians, patients, third-party payors and others in the medical community necessary for commercial success.

If any of our product candidates receives marketing approval, it may nonetheless fail to gain sufficient market acceptance by physicians, patients, third-party payors and others in the medical community. For example, current cancer treatments like chemotherapy and radiation therapy are well established in the medical community, and doctors may continue to rely on these treatments to the exclusion of our product candidates. In addition, physicians, patients and third-party payors may prefer other novel products to ours. If our product candidates do not achieve an adequate level of acceptance, we may not generate significant product revenues and we may not become profitable. The degree of market acceptance of our product candidates, if approved for commercial sale, will depend on a number of factors, including:

[Table of Contents](#)

- the efficacy and safety and potential advantages and disadvantages compared to alternative treatments;
- our ability to offer our products for sale at competitive prices;
- the convenience and ease of administration compared to alternative treatments;
- the willingness of the target patient population to try new therapies and of physicians to prescribe these therapies;
- the strength of our marketing and distribution support;
- the availability of third-party coverage and adequate reimbursement, including patient cost-sharing programs such as copays and deductibles;
- our ability to develop or partner with third-party collaborators to develop companion diagnostics;
- the prevalence and severity of any side effects; and
- any restrictions on the use of our products together with other medications.

We currently have a limited commercial team. If we are unable to establish effective sales or marketing capabilities or enter into agreements with third parties to sell or market our product candidates, we may not be able to effectively sell or market our product candidates, if approved, or generate product revenues.

We currently have a limited commercial team for the marketing, sales and distribution of any of our product candidates that are able to obtain regulatory approval. Patient identification will be important in the commercial setting, much as it has been important in the clinical trial setting. Estimates for addressable patient populations relevant to our product candidates are uncertain. The work that informs these estimates is not definitive and future analyses may lead to estimates that are higher or lower than these estimates, making difficult the tasks of sizing of a marketing and sales force or evaluating the attractiveness of a commercial partnership. The utilization of sensitive diagnostic testing in routine clinical practice is likely an important variable in identifying all of the eligible patients that may truly exist. This requirement may cause the potential launch of larotrectinib or our other product candidates to be slower than other commercialized oncology products.

In order to commercialize any product candidates, we, in collaboration with commercial partners as applicable, must build on a territory-by-territory basis marketing, sales, distribution, managerial and other non-technical capabilities or make arrangements with third parties to perform these services, and we may not be successful in doing so. If our product candidates receive regulatory approval, we, in collaboration with commercial partners as applicable, intend to establish an internal sales or marketing team with technical expertise and supporting distribution capabilities to commercialize our product candidates, which will be expensive and time consuming and will require significant attention of our executive officers to manage. Capable managers with commercial experience will need to be identified and successfully recruited to the company. Any failure or delay in the development of our internal sales, marketing and distribution capabilities would adversely impact the commercialization of any of our products that we obtain approval to market. With respect to the commercialization of all or certain of our product candidates, we may choose to collaborate, either globally or on a territory-by-territory basis, with third parties that have direct sales forces and established distribution systems, either to augment our own sales force and distribution systems or in lieu of our own sales force and distribution systems. Under our collaboration agreement with Bayer, Bayer will lead global commercial and marketing activities for larotrectinib and LOXO-195 outside of the United States, over which we will have limited control. Within the United States, Bayer will lead commercial and marketing activities for larotrectinib and LOXO-195, and we will co-promote the products with Bayer. If we are unable to enter into such arrangements when needed on acceptable terms or at all, or if Bayer breaches our collaboration agreement or is otherwise unsuccessful in marketing our products, we may not be able to successfully commercialize any of our product candidates that receive regulatory approval or any such commercialization may experience delays or limitations. If we are not successful in commercializing our product candidates, either on our own or through collaborations with one or more third parties, our future product revenue will suffer and we may incur significant additional losses.

We face substantial competition, which may result in others discovering, developing or commercializing competing products before or more successfully than we do.

The development and commercialization of new drug products is highly competitive. We face competition with respect to our current product candidates, and will face competition with respect to any product candidates that we may seek to develop or commercialize in the future, from major pharmaceutical companies, specialty pharmaceutical companies and biotechnology companies worldwide. There are a number of large pharmaceutical and biotechnology companies that currently market and sell products or are pursuing the development of products for the treatment of the disease indications for which we are developing our product candidates. Some of these competitive products and therapies are based on scientific approaches that are the same as or similar to our approach, and others are based on entirely different approaches. Potential competitors also include academic institutions, government agencies and other public and private research organizations that conduct research, seek patent protection and establish collaborative arrangements for research, development, manufacturing and commercialization.

[Table of Contents](#)

Specifically, there are a large number of companies developing or marketing treatments for cancer, including many major pharmaceutical and biotechnology companies. In addition, many companies are developing cancer therapeutics that work by inhibiting multiple kinases that may directly compete with larotrectinib and our other product candidates.

For larotrectinib and LOXO-195, examples of such potential competitors include Daiichi Sankyo and its subsidiary Plexxikon (PLX-7486), Tesaro (TSR-011), Roche (entrectinib), Novartis AG (dovitinib), Mirati (MGDC516), Ono Pharmaceutical (ONO-4474 and ONO-5390556), Chugai Pharmaceutical, a member of the Roche Group (CH7057288), Blueprint Medicines, TP Therapeutics (TPX-0005) and Deciphera.

For LOXO-292, examples of such potential competitors include Eisai (lenvatinib), Exelixis (cabozantinib), AstraZeneca (vandetanib), Ariad (ponatinib), Novartis (dovitinib), Roche (alectinib), Pfizer (sunitinib), Roche (RXDX-105) and Blueprint Medicines (BLU-667). There are no selective RET inhibitors approved in RET-specific indications. Several multikinase inhibitors with anti-RET activity are part of ongoing RET-focused development programs: Eisai (lenvatinib), Exelixis (cabozantinib), AstraZeneca (vandetanib), Ariad (ponatinib), Novartis (dovitinib), Roche (alectinib), Pfizer (sunitinib) and Roche (RXDX-105). A compound from Blueprint Medicines (BLU-667) was developed to be a selective RET inhibitor and is currently in clinical development and there are preclinical selective RET inhibitor programs from Taiho Oncology, Nerviano Medical Sciences, and cancer Research UK.

For LOXO-305, examples of such potential competitors include Abbvie/Pharmacyclics (ibrutinib), AstraZeneca (acalabrutinib), Beigene (BGB-3111), Gilead/Ono (GS-4059), ArQule (ARQ-531), Sunesis (SNS-062), Biogen (BIIB-068), Celgene (CC-292), Principia (PRN1008, PRN2246), Bristol-Myers Squibb (BMS-986142), Genentech (GDC-0853), Roche (RN983) and Impetis (PNQ-154). Also, drugs that work by different mechanisms, other than BTK inhibition, are available or could be developed in patient populations relevant to LOXO-305—these include classes such as BCL-2 inhibitors (e.g. Roche/Abbvie, venetoclax), anti-CD20 biologics (e.g. Roche, rituximab), PI3kd inhibitors (e.g. Gilead, idelalisib), CAR-T therapies and cytotoxic chemotherapy.

For the FGFR program, examples of such potential competitors include J&J (JNJ-42756493), QED Therapeutics (BGJ-398, dovitinib), AstraZeneca (AZD4547), Clovis Oncology (lucitinib), Chugai (CH5183284), Bayer (BAY 1163877, BAY 1179470), Lilly (LY2874455), Eisai (E7090), Taiho (TAS-120), Boehringer Ingelheim (nintedanib), Ariad (ponatinib), FivePrime (FP-1039, FPA144), Incyte (INCB54828), ArQule (ARQ087), BioClinica (MFGR1877S) and Principia (PRN1371).

Our commercial opportunity could be reduced or eliminated if our competitors develop and commercialize products that are safer, more effective, have fewer or less severe side effects, are more convenient or are less expensive than any products that we may develop. Our competitors also may obtain FDA or other regulatory approval for their products more rapidly than we may obtain approval for ours, which could result in our competitors establishing a strong market position before we are able to enter the market or slow our regulatory approval. In addition, our ability to compete may be affected in many cases by insurers or other third-party payors seeking to encourage the use of generic products. Generic products are currently on the market for the indications that we are pursuing, and additional products are expected to become available on a generic basis over the coming years. If our product candidates achieve marketing approval, we expect that they will be priced at a significant premium over competitive generic products.

Many of the companies against which we are competing or against which we may compete in the future have significantly greater financial resources and expertise in research and development, manufacturing, preclinical testing, conducting clinical trials, obtaining regulatory approvals and marketing approved products than we do. Mergers and acquisitions in the pharmaceutical and biotechnology industries may result in even more resources being concentrated among a smaller number of our competitors. Smaller and other early-stage companies may also prove to be significant competitors, particularly through collaborative arrangements with large and established companies. These third parties compete with us in recruiting and retaining qualified scientific and management personnel, establishing clinical trial sites and patient registration for clinical trials, as well as in acquiring technologies complementary to, or necessary for, our programs.

The insurance coverage and reimbursement status of newly-approved products is uncertain. Failure to obtain or maintain adequate coverage and reimbursement for new or current products could limit our ability to market those products and decrease our ability to generate revenue.

The availability and extent of reimbursement by governmental and private payors is essential for most patients to be able to afford expensive treatments. Sales of our product candidates will depend substantially, both domestically and abroad, on the extent to which the costs of our product candidates will be paid by health maintenance, managed care, pharmacy benefit and similar healthcare management organizations, or reimbursed by government health administration authorities, private health coverage insurers and other third-party payors. If reimbursement is not available, or is available only to limited levels, we may not be able to successfully commercialize our product candidates. Even if coverage is provided, the approved reimbursement amount may not be high enough to allow us to establish or maintain pricing sufficient to realize a sufficient return on our investment.

There is significant uncertainty related to the insurance coverage and reimbursement of newly approved products. In the United States, the principal decisions about reimbursement for new medicines are typically made by the Centers for Medicare &

[Table of Contents](#)

Medicaid Services (“CMS”) an agency within the U.S. Department of Health and Human Services, as CMS decides whether and to what extent a new medicine will be covered and reimbursed under Medicare. Private payors tend to follow CMS to a substantial degree. It is difficult to predict what CMS will decide with respect to reimbursement for fundamentally novel products such as ours, as there is no body of established practices and precedents for these new products. In 2016, the U.S. Congress held hearings on the rising costs of prescription drugs, and there is increased media attention on the issue. Future legislation could potentially change drug pricing dynamics. Reimbursement agencies in Europe may be more conservative than CMS. For example, a number of cancer drugs have been approved for reimbursement in the United States and have not been approved for reimbursement in certain European countries. Outside the United States, international operations are generally subject to extensive governmental price controls and other market regulations, and we believe the increasing emphasis on cost containment initiatives in Europe, Canada, and other countries has and will continue to put pressure on the pricing and usage of our product candidates. In many countries, the prices of medical products are subject to varying price control mechanisms as part of national health systems. In general, the prices of medicines under such systems are substantially lower than in the United States. Other countries allow companies to fix their own prices for medicines, but monitor and control company profits. Additional foreign price controls or other changes in pricing regulation could restrict the amount that we are able to charge for our product candidates. Accordingly, in markets outside the United States, the reimbursement for our products may be reduced compared with the United States and may be insufficient to generate commercially reasonable revenues and profits.

Moreover, increasing efforts by governmental and third-party payors, in the United States and abroad, to cap or reduce healthcare costs may cause such organizations to limit both coverage and level of reimbursement for new products approved and, as a result, they may not cover or provide adequate payment for our product candidates. We expect to experience pricing pressures in connection with the sale of any of our product candidates, due to the trend toward managed healthcare, the increasing influence of health maintenance organizations and additional legislative changes. The downward pressure on healthcare costs in general, particularly prescription drugs and surgical procedures and other treatments, has become very intense. As a result, increasingly high barriers are being erected to the entry of new products into the healthcare market.

In addition to CMS and private payors, professional organizations such as the National Comprehensive Cancer Network and the American Society of Clinical Oncology can influence decisions about reimbursement for new medicines by determining standards for care. In addition, many private payors contract with commercial vendors who sell software that provide guidelines that attempt to limit utilization of, and therefore reimbursement for, certain products deemed to provide limited benefit to existing alternatives. Such organizations may set guidelines that limit reimbursement or utilization of our products.

If insurance reimbursement to the laboratories who purchase the companion diagnostic tests is inadequate, utilization may be low, and patient tumors may not be comprehensively screened for the presence of the genetic markers that predict response to our product candidates.

Product liability lawsuits against us could cause us to incur substantial liabilities and to limit commercialization of any products that we may develop.

We and our collaborators face an inherent risk of product liability exposure related to the testing of our product candidates in human clinical trials and will face an even greater risk if we commercially sell any products that we may develop. If we and our collaborators cannot successfully defend ourselves against claims that our product candidates or products caused injuries, we will incur substantial liabilities. Regardless of merit or eventual outcome, liability claims may result in:

- decreased demand for any product candidates or products that we may develop;
- injury to our reputation and significant negative media attention;
- withdrawal of clinical trial participants;
- significant costs to defend the related litigation;
- substantial monetary awards to trial participants or patients;
- loss of revenue;
- reduced resources of our management to pursue our business strategy; and
- the inability to commercialize any products that we may develop.

We currently hold \$5 million in product liability insurance coverage in the aggregate, with a per incident limit of \$5 million, which may not be adequate to cover all liabilities that we may incur. We may need to increase our insurance coverage as we expand our clinical trials or if we commence commercialization of our product candidates. Insurance coverage is increasingly expensive. We may not be able to maintain insurance coverage at a reasonable cost or in an amount adequate to satisfy any liability that may arise. In addition, if one of our collaboration partners were to become subject to product liability claims or were unable to successfully defend themselves against such claims, any such collaboration partner could be more likely to terminate such relationship with us and therefore substantially limit the commercial potential of our products.

Risks Related to Our Intellectual Property

If we are unable to obtain and maintain intellectual property protection for our technology and products, or if the scope of the intellectual property protection obtained is not sufficiently broad, our competitors could develop and commercialize technology and products similar or identical to ours, and our ability to successfully commercialize our technology and products may be impaired.

Our success depends in large part on our ability to obtain and maintain patent protection in the United States and other countries with respect to our proprietary technology and products, including any companion diagnostic developed by us or a third-party collaborator. We seek to protect our proprietary position by filing patent applications in the United States and abroad related to our novel technologies and product candidates. Our patent portfolio includes patents and patent applications we exclusively licensed from Array, exclusive worldwide licenses for all therapeutic indications for new intellectual property developed in our Array collaboration, and patents that we purchased from Redx. This patent portfolio includes issued patents and pending patent applications covering compositions of matter and methods of use.

The patent prosecution process is expensive and time-consuming, and we and our collaborators may not be able to file and prosecute all necessary or desirable patent applications at a reasonable cost or in a timely manner. We may choose not to seek patent protection for certain innovations and may choose not to pursue patent protection in certain jurisdictions, and under the laws of certain jurisdictions, patents or other intellectual property rights may be unavailable or limited in scope. It is also possible that we or our collaborators will fail to identify patentable aspects of our discovery and preclinical development output before it is too late to obtain patent protection. Moreover, in some circumstances, we do not have the right to control the preparation, filing and prosecution of patent applications, or to maintain the patents, covering technology that we license from third parties. Therefore, these patents and applications may not be prosecuted and enforced in a manner consistent with the best interests of our business.

The patent position of biotechnology and pharmaceutical companies generally is highly uncertain, involves complex legal and factual questions and has in recent years been the subject of much litigation. In addition, the laws of foreign countries may not protect our rights to the same extent as the laws of the United States. For example, India and China do not allow patents for methods of treating the human body. Publications of discoveries in the scientific literature often lag behind the actual discoveries, and patent applications in the United States and other jurisdictions are typically not published until 18 months after filing, or in some cases not at all. Therefore, we cannot know with certainty whether we were the first to make the inventions claimed in our owned or licensed patents or pending patent applications, or that we were the first to file for patent protection of such inventions. As a result, the issuance, scope, validity, enforceability and commercial value of our and our collaborators' patent rights are highly uncertain. Our and our collaborators' pending and future patent applications may not result in patents being issued which protect our technology or products, in whole or in part, or which effectively prevent others from commercializing competitive technologies and products. Changes in either the patent laws or interpretation of the patent laws in the United States and other countries may diminish the value of our patents or narrow the scope of our patent protection.

Patent reform legislation could increase the uncertainties and costs surrounding the prosecution of our patent applications and the enforcement or defense of our issued patents. On September 16, 2011, the Leahy-Smith America Invents Act (the "Leahy-Smith Act") was signed into law. The Leahy-Smith Act includes a number of significant changes to U.S. patent law. These include provisions that affect the way patent applications are prosecuted and may also affect patent litigation. The U.S. Patent and Trademark Office ("U.S. PTO") developed new regulations and procedures to govern administration of the Leahy-Smith Act, and many of the substantive changes to patent law associated with the Leahy-Smith Act, and in particular, the first to file provisions, only became effective on March 16, 2013. Accordingly, it is not clear what, if any, impact the Leahy-Smith Act will have on the operation of our business. However, the Leahy-Smith Act and its implementation could increase the uncertainties and costs surrounding the prosecution of our patent applications and the enforcement or defense of our issued patents, all of which could have a material adverse effect on our business and financial condition.

Moreover, we may be subject to a third-party pre-issuance submission of prior art to the U.S. PTO, or become involved in opposition, derivation, reexamination, inter partes review, post-grant review or interference proceedings challenging our patent rights or the patent rights of others. An adverse determination in any such submission, proceeding or litigation could reduce the scope of, or invalidate, our patent rights, allow third parties to commercialize our technology or products and compete directly with us, without payment to us, or result in our inability to manufacture or commercialize products without infringing third-party patent rights. In addition, if the breadth or strength of protection provided by our patents and patent applications is threatened, it could dissuade companies from collaborating with us to license, develop or commercialize current or future product candidates.

Even if our owned and licensed patent applications issue as patents, they may not issue in a form that will provide us with any meaningful protection, prevent competitors from competing with us or otherwise provide us with any competitive advantage. Our competitors may be able to circumvent our owned or licensed patents by developing similar or alternative technologies or products in a non-infringing manner.

The issuance of a patent is not conclusive as to its inventorship, scope, validity or enforceability, and our owned and licensed patents may be challenged in the courts or patent offices in the United States and abroad. Such challenges may result in loss of

[Table of Contents](#)

exclusivity or freedom to operate or in patent claims being narrowed, invalidated or held unenforceable, in whole or in part, which could limit our ability to stop others from using or commercializing similar or identical technology and products, or limit the duration of the patent protection of our technology and products. Given the amount of time required for the development, testing and regulatory review of new product candidates, patents protecting such candidates might expire before or shortly after such candidates are commercialized. As a result, our owned and licensed patent portfolio may not provide us with sufficient rights to exclude others from commercializing products similar or identical to ours.

The risks described elsewhere pertaining to our patents and other intellectual property rights also apply to the intellectual property rights that we license, and any failure to obtain, maintain and enforce these rights could have a material adverse effect on our business. In some cases, we may not have control over the prosecution, maintenance or enforcement of the patents that we license, and our licensors may fail to take the steps that we believe are necessary or desirable in order to obtain, maintain and enforce the licensed patents. Any inability on our part to protect adequately our intellectual property may have a material adverse effect on our business, operating results and financial position.

Obtaining and maintaining our patent protection depends on compliance with various procedural, document submission, fee payment and other requirements imposed by governmental patent agencies, and our patent protection could be reduced or eliminated for non-compliance with these requirements.

Periodic maintenance fees, renewal fees, annuity fees and various other governmental fees on patents and/or applications will be due to be paid to the U.S. PTO and various governmental patent agencies outside of the United States in several stages over the lifetime of the patents and/or applications. We have systems in place to remind us to pay these fees, and we employ an outside firm and rely on our outside counsel to pay these fees due to non-U.S. patent agencies. The U.S. PTO and various non-U.S. governmental patent agencies require compliance with a number of procedural, documentary, fee payment and other similar provisions during the patent application process. We employ reputable law firms and other professionals to help us comply, and in many cases, an inadvertent lapse can be cured by payment of a late fee or by other means in accordance with the applicable rules. However, there are situations in which non-compliance can result in abandonment or lapse of the patent or patent application, resulting in partial or complete loss of patent rights in the relevant jurisdiction. In such an event, our competitors might be able to enter the market and this circumstance would have a material adverse effect on our business.

We may become involved in lawsuits to protect or enforce our patents or other intellectual property, which could be expensive, time consuming and unsuccessful.

Because competition in our industry is intense, competitors may infringe or otherwise violate our issued or our collaborators' patents, patents of our licensors or other intellectual property. To counter infringement or unauthorized use, we or our collaborators may be required to file infringement claims, which can be expensive and time consuming. Any claims we or our collaborators assert against perceived infringers could provoke these parties to assert counterclaims against us or our collaborators alleging that we infringe their patents. In addition, in a patent infringement proceeding, a court may decide that a patent of ours or licensed to us is invalid or unenforceable, in whole or in part, construe the patent's claims narrowly or refuse to stop the other party from using the technology at issue on the grounds that our or our licensors' or collaborators' patents do not cover the technology in question. An adverse result in any litigation proceeding could put one or more of our or our licensors' or collaborators' patents at risk of being invalidated or interpreted narrowly. We may also elect to enter into license agreements in order to settle patent infringement claims or to resolve disputes prior to litigation, and any such license agreements may require us to pay royalties and other fees that could be significant. Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure.

We may need to license certain intellectual property from third parties, and such licenses may not be available or may not be available on commercially reasonable terms.

A third party may hold intellectual property, including patent rights, which are important or necessary to the development of our products. It may be necessary for us to use the patented or proprietary technology of third parties to commercialize our products, in which case we would be required to obtain a license from these third parties on commercially reasonable terms, or our business could be harmed, possibly materially. Although we believe that licenses to these patents are available from these third parties on commercially reasonable terms, if we were not able to obtain a license, or were not able to obtain a license on commercially reasonable terms, our business could be harmed, possibly materially.

Third parties may initiate legal proceedings alleging that we are infringing their intellectual property rights, the outcome of which would be uncertain and could have a material adverse effect on the success of our business.

Our commercial success depends upon our ability, and the ability of our collaborators, to develop, manufacture, market and sell our product candidates and use our proprietary technologies without infringing the proprietary rights of third parties. There is considerable intellectual property litigation in the biotechnology and pharmaceutical industries. We or our collaborators may become party to, or threatened with, future adversarial proceedings or litigation regarding intellectual property rights with respect to our or our

[Table of Contents](#)

collaborators' products and technology, including interference or derivation proceedings before the U.S. PTO. Third parties may assert infringement claims against us or our collaborators based on existing patents or patents that may be granted in the future.

If we or our collaborators are found to infringe a third party's intellectual property rights, we or our collaborators could be required to obtain a license from such third party to continue developing and marketing our products and technology. However, we or our collaborators may not be able to obtain any required license on commercially reasonable terms or at all. Even if we or our collaborators were able to obtain a license, it could be non-exclusive, thereby giving our competitors access to the same technologies licensed to us. We or our collaborators could be forced, including by court order, to cease commercializing the infringing technology or product. In addition, we or our collaborators could be found liable for monetary damages, including treble damages and attorneys' fees if we or our collaborators are found to have willfully infringed a patent. A finding of infringement could prevent us or our collaborators from commercializing our product candidates or force us or our collaborators to cease some of our business operations, which could materially harm our business. Claims that we have misappropriated the confidential information or trade secrets of third parties could have a similar negative impact on our business.

We may not be successful in obtaining or maintaining necessary rights for our development pipeline through acquisitions and in-licenses.

Presently we have rights to intellectual property to develop our product candidates, including patents and patent applications we exclusively licensed from Array, exclusive worldwide licenses for all therapeutic indications for new intellectual property developed in our Array collaboration, and patents that we purchased from Redx. Because our programs may involve additional product candidates that may require the use of proprietary rights held by third parties, the growth of our business may depend in part on our ability to acquire, in-license or use these proprietary rights. Additionally, a companion diagnostic may require that we or a third-party collaborator developing the diagnostic acquire use or proprietary rights held by third parties. We may be unable to acquire or in-license any compositions, methods of use, or other third-party intellectual property rights from third parties that we identify. The licensing and acquisition of third-party intellectual property rights is a competitive area, and a number of more established companies are also pursuing strategies to license or acquire third-party intellectual property rights that we may consider attractive. These established companies may have a competitive advantage over us due to their size, cash resources and greater clinical development and commercialization capabilities.

For example, we may collaborate with the United States and foreign academic institutions to accelerate our discovery and preclinical development work under written agreements with these institutions. Typically, these institutions provide us with an option to negotiate a license to any of the institution's rights in technology resulting from the collaboration. Regardless of such right of first negotiation for intellectual property, we may be unable to negotiate a license within the specified time frame or under terms that are acceptable to us. If we are unable to do so, the institution may offer the intellectual property rights to other parties, potentially blocking our ability to pursue our program.

In addition, companies that perceive us to be a competitor may be unwilling to assign or license rights to us. We also may be unable to license or acquire third-party intellectual property rights on terms that would allow us to make an appropriate return on our investment. If we are unable to successfully obtain rights to required third-party intellectual property rights, our business, financial condition and prospects for growth could suffer.

We may be subject to claims by third parties asserting that our employees or we have misappropriated their intellectual property, or claiming ownership of what we regard as our own intellectual property.

Many of our employees were previously employed at universities or other biotechnology or pharmaceutical companies, including our competitors or potential competitors. Although we try to ensure that our employees do not use the proprietary information or know-how of others in their work for us, we may be subject to claims that these employees or we have used or disclosed intellectual property, including trade secrets or other proprietary information, of any such employee's former employer. Litigation may be necessary to defend against these claims.

In addition, while it is our policy to require our employees and contractors who may be involved in the development of intellectual property to execute agreements assigning such intellectual property to us, we may be unsuccessful in executing such an agreement with each party who in fact develops intellectual property that we regard as our own. Our and their assignment agreements may not be self-executing or may be breached, and we may be forced to bring claims against third parties, or defend claims they may bring against us, to determine the ownership of what we regard as our intellectual property.

If we fail in prosecuting or defending any such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights or personnel. Even if we are successful in prosecuting or defending against such claims, litigation could result in substantial costs and be a distraction to management.

If we are unable to protect the confidentiality of our trade secrets, our business and competitive position would be harmed.

In addition to seeking patents for some of our technology and product candidates, we also rely on trade secrets, including unpatented know-how, technology and other proprietary information, to maintain our competitive position. We seek to protect these

[Table of Contents](#)

trade secrets, in part, by entering into non-disclosure and confidentiality agreements with parties who have access to them, such as our employees, corporate collaborators, outside scientific collaborators, contract manufacturers, consultants, advisors and other third parties. We seek to protect our confidential proprietary information, in part, by entering into confidentiality and invention or patent assignment agreements with our employees and consultants, however, we cannot be certain that such agreements have been entered into with all relevant parties. Moreover, to the extent we enter into such agreements, any of these parties may breach the agreements and disclose our proprietary information, including our trade secrets, and we may not be able to obtain adequate remedies for such breaches. Enforcing a claim that a party illegally disclosed or misappropriated a trade secret is difficult, expensive and time-consuming, and the outcome is unpredictable. In addition, some courts inside and outside the United States are less willing or unwilling to protect trade secrets. If any of our trade secrets were to be lawfully obtained or independently developed by a competitor, we would have no right to prevent them, or those to whom they communicate it, from using that technology or information to compete with us. If any of our trade secrets were to be disclosed to or independently developed by a competitor, our competitive position would be harmed.

Risks Related to Employee Matters, Managing Growth and Macroeconomic Conditions

We currently have a limited number of employees, are highly dependent on our Chief Executive Officer and our future success depends on our ability to retain key executives and to attract, retain and motivate qualified personnel.

We are an early-stage clinical development company with a limited operating history and, as of March 31, 2018, had 73 full-time employees. We are highly dependent on the research and development, clinical and business development expertise of Joshua H. Bilenker, M.D., our President and Chief Executive Officer, as well as the other principal members of our management, scientific and clinical team. Although we have entered into employment letter agreements with our executive officers, each of them may terminate their employment with us at any time. We do not maintain “key person” insurance for any of our executives or other employees.

Recruiting and retaining qualified scientific, clinical, manufacturing and sales and marketing personnel will also be critical to our success as we scale. The loss of the services of our executive officers or other key employees could impede the achievement of our research, development and commercialization objectives and seriously harm our ability to successfully implement our development or commercialization strategies. Furthermore, replacing executive officers and key employees may be difficult and may take an extended period of time because of the limited number of individuals in our industry with the breadth of skills and experience required to successfully develop, gain regulatory approval of and commercialize products. Competition to hire from this limited pool is intense, and we may be unable to hire, train, retain or motivate these key personnel on acceptable terms given the competition among numerous pharmaceutical and biotechnology companies for similar personnel. Additionally, if we fail to provide an adequate amount of equity consideration to new and existing employees we may be unable to compete for new talent and retain our existing talent. We have a certain number of shares available for grant under our 2014 Equity Incentive Plan and it may not be adequate to enable us to continue to competitively compensate our employees in the future, which may prevent us from retaining our employees and could significantly impact our operating results.

We also experience competition for the hiring of scientific and clinical personnel from universities and research institutions. In addition, we rely on consultants and advisors, including scientific and clinical advisors, to assist us in formulating our discovery and preclinical development and commercialization strategy. Our consultants and advisors may be employed by employers other than us and may have commitments under consulting or advisory contracts with other entities that may limit their availability to us. If we are unable to continue to attract and retain high quality personnel, our ability to pursue our growth strategy will be limited.

If stockholders do not approve an increase in the number of shares issuable under our 2014 Equity Incentive Plan, our ability to recruit and retain employees and remain competitive may be materially and adversely affected.

At our annual meeting of stockholders to be held on June 13, 2018, we are seeking stockholder approval for an increase of 1,500,000 shares issuable under our 2014 Equity Incentive Plan, among other changes. Our Board believes that stockholder approval of the 2014 Equity Incentive Plan share increase is critically important for our continued success and enhancement of stockholder value. If the 2014 Equity Incentive Plan share increase is not approved by our stockholders, we will have reduced flexibility to use equity-based compensation as a meaningful component of compensation and instead may be forced to rely more intensively on cash compensation and may have a more difficult time hiring or retaining employees. If we are unable to continue to attract and retain high quality personnel, our ability to pursue our growth strategy will be limited.

Stockholder approval of the share increase under the 2014 Equity Incentive Plan is necessary in order for us to meet the stockholder approval requirements of Nasdaq. Failure to obtain stockholder approval for an increase in the magnitude we seek may place us at a severe disadvantage from a talent retention and recruitment perspective. Our inability to fully deploy equity-based compensation may place us at a competitive disadvantage with respect to the recruitment and retention of executive, technical and other talent. Historically, equity-based compensation has been a meaningful component of compensation for our employees and a key method of motivating our employees and consultants to strive for organizational success.

Limitations on our ability to use equity-based compensation as part of our recruitment, retention and acquisition efforts would require us to increase the use of cash compensation, which could significantly decrease our working capital.

[Table of Contents](#)

We expect to expand our development and regulatory capabilities and potentially implement sales, marketing and distribution capabilities, and as a result, we may encounter difficulties in managing our growth, which could disrupt our operations.

We expect to experience significant growth in the number of our employees and the scope of our operations, particularly in the areas of medical affairs, drug development, regulatory affairs and, if any of our product candidates receives marketing approval, sales, marketing and distribution. To manage our anticipated future growth, we must continue to implement and improve our managerial, operational and financial systems, expand our facilities and continue to recruit and train additional qualified personnel. Due to our limited financial resources and the limited experience of our management team in managing a company with such anticipated growth, we may not be able to effectively manage the expansion of our operations or recruit and train additional qualified personnel. The expansion of our operations may lead to significant costs and may divert our management and business development resources. Any inability to manage growth could delay the execution of our business plans or disrupt our operations.

Comprehensive tax reform bills could adversely affect our business and financial condition.

The U.S. government has recently enacted comprehensive tax legislation, the Tax Cuts and Jobs Act of 2017, that includes significant changes to the taxation of business entities. These changes include, among others, (i) a permanent reduction to the corporate income tax rate, (ii) a partial limitation on the deductibility of business interest expense, (iii) a shift of the U.S. taxation of multinational corporations from a tax on worldwide income to a territorial system (along with certain rules designed to prevent erosion of the U.S. income tax base) and (iv) a one-time tax on accumulated offshore earnings held in cash and illiquid assets, with the latter taxed at a lower rate.

Further, the newly enacted comprehensive tax legislation, among other things, reduces the orphan drug credit from 100% to 50% of qualifying expenditures. When and if we become profitable, this reduction in tax credits may result in an increased federal income tax burden on our orphan drug programs as it may cause us to pay federal income taxes earlier under the revised tax law than under the prior law and, despite being partially off-set by a reduction in the corporate tax rate from a top marginal rate of 35% to a flat rate of 21%, may increase our total federal tax liability attributable to such programs. The new tax law also eliminates entirely the carry back of net operating losses (“NOLs”). Companies may no longer carry back NOLs to receive refunds for taxes paid in the previous two years. The new law also changes the rules on the carry forward of NOLs. The previous 20-year limitation was eliminated, giving taxpayers the ability to carry forward losses indefinitely. However, NOL carry forward arising after January 1, 2018, will now be limited to 80 percent of taxable income.

Notwithstanding the reduction in the corporate income tax rate, the overall impact of this tax reform is uncertain, and our business and financial condition could be adversely affected. In addition, it is uncertain if and to what extent various states will conform to the newly enacted federal tax law.

Unfavorable global economic conditions could adversely affect our business, financial condition or results of operations.

Our results of operations could be adversely affected by general conditions in the global economy and in the global financial markets. A severe or prolonged economic downturn could result in a variety of risks to our business, including our ability to raise additional capital when needed on acceptable terms, if at all. A weak or declining economy could also strain our suppliers, possibly resulting in supply disruption. Any of the foregoing could harm our business and we cannot anticipate all of the ways in which the current economic climate and financial market conditions could adversely impact our business.

Failure to protect our information technology infrastructure against cyber-based attacks, network security breaches, service interruptions, or data corruption could significantly disrupt our operations and adversely affect our business and operating results.

We rely on information technology and telephone networks and systems, including the Internet, to process and transmit sensitive electronic information and to manage or support a variety of business processes and activities. We use enterprise information technology systems to record, process, and summarize financial information and results of operations for internal reporting purposes and to comply with regulatory financial reporting, legal, and tax requirements. Our and our collaborators’ information technology systems, some of which are managed by third-parties, such as those of our CROs, may be susceptible to damage, disruptions or shutdowns due to computer viruses, attacks by computer hackers, failures during the process of upgrading or replacing software, databases or components thereof, power outages, hardware failures, telecommunication failures, user errors or catastrophic events. Although we have developed systems and processes that are designed to protect proprietary or confidential information and prevent data loss and other security breaches, including systems and processes designed to reduce the impact of a security breach at a third-party vendor, such measures cannot provide absolute security. If our or our collaborators’ systems are breached or suffer severe damage, disruption or shutdown and we or our collaborators are unable to effectively resolve the issues in a timely manner, our business and operating results may significantly suffer and we may be subject to litigation, government enforcement actions or potential liability. Security breaches could also cause us to incur significant remediation costs, result in product development delays, disrupt key business operations, including development of our product candidates, and divert attention of management and key information technology resources.

Risks Related to Our Common Stock

Provisions in our corporate charter documents and under Delaware law could make an acquisition of our Company, which may be beneficial to our stockholders, more difficult and may prevent attempts by our stockholders to replace or remove our current management.

Provisions in our certificate of incorporation and our bylaws may discourage, delay or prevent a merger, acquisition or other change in control of our Company that stockholders may consider favorable, including transactions in which you might otherwise receive a premium for your shares. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock, thereby depressing the market price of our common stock. In addition, because our board of directors is responsible for appointing the members of our management team, these provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our board of directors. Among other things, these provisions:

- establish a classified board of directors such that only one of three classes of directors is elected each year;
- allow the authorized number of our directors to be changed only by resolution of our board of directors;
- limit the manner in which stockholders can remove directors from our board of directors;
- establish advance notice requirements for stockholder proposals that can be acted on at stockholder meetings and nominations to our board of directors;
- require that stockholder actions must be effected at a duly called stockholder meeting and prohibit actions by our stockholders by written consent;
- limit who may call stockholder meetings;
- authorize our board of directors to issue preferred stock without stockholder approval, which could be used to institute a “poison pill” that would work to dilute the stock ownership of a potential hostile acquirer, effectively preventing acquisitions that have not been approved by our board of directors; and
- require the approval of the holders of at least two-thirds of the voting power of all of the then-outstanding shares of capital stock that would be entitled to vote generally in the election of directors to amend or repeal specified provisions of our certificate of incorporation or bylaws.

Moreover, because we are incorporated in Delaware, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which prohibits a person who owns in excess of 15% of our outstanding voting stock from merging or combining with us for a period of three years after the date of the transaction in which the person acquired in excess of 15% of our outstanding voting stock, unless the merger or combination is approved in a prescribed manner.

Future sales and issuances of our common stock or rights to purchase common stock, including pursuant to our equity incentive plans or otherwise, could result in dilution to the percentage ownership of our stockholders and could cause our stock price to fall.

We expect that significant additional capital will be needed in the future to continue our planned operations. To raise capital, we may sell common stock, convertible securities or other equity securities in one or more transactions at prices and in a manner we determine from time to time. If we sell additional common stock, convertible securities or other equity securities, investors in a prior transaction may be materially diluted. Additionally, new investors could gain rights, preferences and privileges senior to those of existing holders of our common stock. Further, any future sales of our common stock by us or resale of our common stock by our existing stockholders could cause the market price of our common stock to decline.

As of March 31, 2018, there were 216,282 shares of our common stock available for future grant under our 2014 Equity Incentive Plan. Additionally, as of March 31, 2018, there were outstanding options to purchase up to 4,395,060 shares of our common stock. Any future grants of options, warrants or other securities exercisable or convertible into our common stock, or the exercise or conversion of such shares, and any sales of such shares in the market, could have an adverse effect on the market price of our common stock.

The price of our common stock may be volatile and fluctuate substantially.

Our stock price is likely to be volatile. The stock market in general and the market for smaller biopharmaceutical companies in particular have experienced extreme volatility that has often been unrelated to the operating performance of the underlying companies. As a result of this volatility, the market price of our common stock may fall. The market price for our common stock may be influenced by many factors, including:

- the success of competitive products or technologies;
- results of clinical trials of our product candidates or those of our competitors;

[Table of Contents](#)

- events affecting our collaboration partners, including Bayer and Array;
- commencement or termination of collaborations for our development programs;
- regulatory or legal developments in the United States and other countries;
- developments or disputes concerning patent applications, issued patents or other proprietary rights;
- the recruitment or departure of key personnel;
- the level of expenses related to any of our product candidates or clinical development programs;
- the results of our efforts to discover, develop, acquire or in-license additional product candidates or products;
- actual or anticipated changes in estimates as to financial results, development timelines or recommendations by securities analysts;
- variations in our financial results or those of companies that are perceived to be similar to us;
- changes in the structure of healthcare payment systems;
- market conditions in the pharmaceutical and biotechnology sectors;
- general economic, industry and market conditions; and
- the other factors described in this “Risk Factors” section.

We may be subject to securities litigation, which is expensive and could divert management attention.

Our share price may be volatile, and in the past companies that have experienced volatility in the market price of their stock have been subject to an increased incidence of securities class action litigation. We may be the target of this type of litigation in the future. Securities litigation against us could result in substantial costs and divert our management’s attention from other business concerns, which could seriously harm our business.

If securities or industry analysts do not publish research or reports about our business, or publish negative reports about our business, our stock price and trading volume could decline.

The trading market for our common stock will depend in part on the research and reports that securities or industry analysts publish about us or our business. We do not have any control over these analysts. There can be no assurance that analysts will cover us or provide favorable coverage. If one or more of the analysts who cover us downgrade our stock or change their opinion of our stock, our stock price would likely decline. If one or more of these analysts cease coverage of our Company or fail to regularly publish reports on us, we could lose visibility in the financial markets, which could cause our stock price or trading volume to decline.

A significant portion of our total outstanding shares are eligible to be sold into the market, which could cause the market price of our common stock to drop significantly, even if our business is doing well.

Sales of a substantial number of shares of our common stock in the public market, or the perception in the market that the holders of a large number of shares intend to sell shares, could reduce the market price of our common stock. Sales of a substantial number of shares of our common stock in the public market could occur at any time.

We will continue to incur increased costs as a result of operating as a public company, and our management is required to devote substantial time to compliance initiatives and corporate governance practices.

As a public company, we will incur significant legal, accounting and other expenses that we did not incur as a private company. The Sarbanes-Oxley Act of 2002, the Dodd-Frank Wall Street Reform and Consumer Protection Act, the listing requirements of The Nasdaq Stock Market and other applicable securities rules and regulations impose various requirements on public companies, including establishment and maintenance of effective disclosure and financial controls and corporate governance practices. Our management and other personnel will need to devote a substantial amount of time to these compliance initiatives. Moreover, these rules and regulations will increase our legal and financial compliance costs and will make some activities more time-consuming and costly. For example, we expect that these rules and regulations may make it more difficult and more expensive for us to obtain director and officer liability insurance, which in turn could make it more difficult for us to attract and retain qualified members of our board of directors.

We are evaluating these rules and regulations, and cannot predict or estimate the amount of additional costs we may incur or the timing of such costs. These rules and regulations are often subject to varying interpretations, in many cases due to their lack of specificity and, as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices.

[Table of Contents](#)

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002 (“Section 404”) we are required to furnish a report by our management on our internal control over financial reporting at the end of each fiscal year. This assessment includes disclosure of any material weaknesses identified by our management in our internal control over financial reporting. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting that results in more than a reasonable possibility that a material misstatement of annual or interim financial statements will not be prevented or detected on a timely basis.

To achieve compliance with Section 404, we have been engaged in a process to document and evaluate our internal control over financial reporting, which is both costly and challenging. In this regard, we have dedicated and will need to continue to dedicate internal resources, potentially engage outside consultants and adopt a detailed work plan to assess and document the adequacy of internal control over financial reporting, continue steps to improve control processes as appropriate, validate through testing that controls are functioning as documented and implement a continuous reporting and improvement process for internal control over financial reporting. Despite our efforts, there is a risk that we will not be able to conclude, that our internal control over financial reporting is effective as required by Section 404. If we identify one or more material weaknesses, it could result in an adverse reaction in the financial markets due to a loss of confidence in the reliability of our financial statements.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

Under Section 382 of the Internal Revenue Code of 1986, as amended (“Internal Revenue Code”), if a corporation undergoes an “ownership change,” generally defined as a greater than 50% change (by value) in its equity ownership over a three-year period, the corporation’s ability to use its pre-change NOLs and other pre-change tax attributes (such as research tax credits) to offset its post-change income or taxes may be limited. It is possible that we may have triggered an “ownership change” limitation. We may also experience ownership changes in the future as a result of subsequent shifts in our stock ownership (some of which are outside our control). As a result, if we earn net taxable income, our ability to use our pre-change NOL carryforwards to offset U.S. federal taxable income may be subject to limitations, which could potentially result in increased future tax liability to us. In addition, at the state level, there may be periods during which the use of NOLs is suspended or otherwise limited, which could accelerate or permanently increase state taxes owed.

Because we do not anticipate paying any cash dividends on our capital stock in the foreseeable future, capital appreciation, if any, will be your sole source of gain.

We have never declared or paid cash dividends on our capital stock. We currently intend to retain all of our future earnings, if any, to finance the growth and development of our business. In addition, the terms of any future debt agreements may preclude us from paying dividends. As a result, capital appreciation, if any, of our common stock will be your sole source of gain for the foreseeable future.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Sales of Unregistered Securities

None.

ITEM 3: DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4: MINE SAFETY DISCLOSURES

Not applicable

ITEM 5. OTHER INFORMATION

On May 7, 2018, our Board approved entering into amended and restated change of control and severance agreements (“amended and restated severance agreements”) with our following named executive officers:

- Jennifer Burstein, our principal financial officer and SVP of Finance; and
- Jake Van Naarden, our Chief Business Officer.

The amendments to the severance agreements clarify that if the named executive officer no longer reports to the CEO of the successor or parent company, following a change of control, he or she may resign for good reason. This description of the amended and restated severance agreements is qualified in all respects by reference to the full text of the agreement, filed hereto as Exhibit 10.1.

On May 8, 2018, we entered into an amended and restated employment agreement with Joshua H. Bilenker, M.D., our CEO.

The amended and restated employment agreement restates the current terms of Dr. Bilenker’s annual base salary of \$600,000, as well as eligibility to receive an annual target bonus equal to 60% of his base salary, and also provides for future annual equity awards in the discretion of the Board. Additionally, the employment agreement was revised to provide that if Dr. Bilenker is subject to a qualifying termination within the three months preceding a change in control (but after a legally binding and definitive agreement for a potential change in control has been executed) or within the 12 months following a change in control, the severance agreements provide the following benefits in exchange for a customary release of claims, complying with non-competition provisions, resigning from the board of directors on the date that his employment terminates, and returning to us all of our property and confidential information that is in his possession or control, then Dr. Bilenker is entitled to receive twenty-four (24) months of salary continuation payable in a lump sum, a lump sum equal to two times his target bonus for the year, and reimbursement for continuation coverage under COBRA for Dr. Bilenker and his eligible dependents until the earlier of twenty-four (24) months, the date Dr. Bilenker is eligible to receive substantially similar coverage from another employer and the date Dr. Bilenker is no longer eligible to receive COBRA coverage. The definition of “good reason” was updated to clarify that if Dr. Bilenker is not the CEO of the successor or parent company, following a change of control, he may resign for good reason. This description of the amended and restated offer letter is qualified in all respects by reference to the full text of the agreement, filed hereto as Exhibit 10.2

ITEM 6. EXHIBITS

The following is a list of exhibits filed as part of this Quarterly Report on Form 10-Q. Where so indicated by footnote, exhibits that were previously filed are incorporated by reference. For exhibits incorporated by reference, the location of the exhibit in the previous filing is indicated.

Exhibit Number	Description

AMENDED AND RESTATED CHANGE IN CONTROL AND SEVERANCE AGREEMENT

This Amended and Restated Change in Control and Severance Agreement (this “**Agreement**”) is entered into by and between _____ (the “**Executive**”) and Loxo Oncology, Inc., a Delaware corporation (the “**Company**”), on May _____, 2018 (the “**Effective Date**”).

1. **Term of Agreement.**

Except to the extent renewed as set forth in this Section 1, this Agreement shall terminate the earlier of March 6, 2020 (the “**Expiration Date**”) or the date the Executive’s employment with the Company terminates for a reason other than a Qualifying Termination or CIC Qualifying Termination; *provided however*, if a definitive agreement relating to a Change in Control has been signed by the Company on or before the Expiration Date, then this Agreement shall remain in effect through the earlier of:

(a) The date the Executive’s employment with the Company terminates for a reason other than a Qualifying Termination or CIC Qualifying Termination, or

(b) The date the Company has met all of its obligations under this Agreement following a termination of the Executive’s employment with the Company due to a Qualifying Termination or CIC Qualifying Termination.

This Agreement shall renew automatically and continue in effect for three (3) year periods measured from the initial Expiration Date and each subsequent Expiration Date, unless the Company provides Executive notice of non-renewal at least three (3) months prior to the date on which this Agreement would otherwise renew. For the avoidance of doubt, and notwithstanding anything to the contrary in Sections 2 or 3 below, the Company’s non-renewal of this Agreement shall not constitute a Qualifying Termination or CIC Qualifying Termination, as applicable.

2. **Qualifying Termination.** If the Executive is subject to a Qualifying Termination, then, subject to Sections 4, 9, and 10 below, Executive will be entitled to the following benefits:

(a) **Severance Benefits.** The Company shall pay the Executive 12 months of [his/her] monthly base salary (at the rate in effect immediately prior to the actions that resulted in the Qualifying Termination). The Executive will receive [his/her] severance payment in a cash lump-sum in accordance with the Company’s standard payroll procedures which will be made on the next regular payroll date occurring after the Release Conditions have been satisfied, provided that if the sixty (60) day period following the Separation spans two calendar years, then the severance payment will be paid on the first payroll date occurring in the second calendar year after the Release Conditions have been satisfied.

(b) **Continued Employee Benefits.** If Executive timely elects continued coverage under the Consolidated Omnibus Budget Reconciliation Act (“**COBRA**”), the Company shall pay the full amount of Executive’s COBRA premiums on behalf of the Executive for the Executive’s continued coverage under the Company’s health, dental and vision plans, including coverage for the Executive’s eligible dependents, for the same period that Executive is paid severance benefits pursuant to Section 2(a) following the Executive’s Separation or, if earlier, until Executive is eligible to be covered under another substantially equivalent medical insurance plan by a subsequent employer.

(c) **[Equity.** Any outstanding Equity Awards (as defined below), including awards that would otherwise vest only upon satisfaction of performance criteria, shall accelerate and become vested and exercisable as if an additional six (6) months of vesting had occurred at target to the then unvested shares subject to the Equity Awards. Subject to Section 4, the accelerated vesting described above shall be effective as of the Separation.]

3. **CIC Qualifying Termination.** If the Executive is subject to a CIC Qualifying Termination, then, subject to Sections 4, 9, and 10 below, Executive will be entitled to the following benefits:

(a) **Severance Payments.** The Company or its successor shall pay the Executive 12 months of [his/her] monthly base salary (at the rate in effect immediately prior to the actions that resulted in the Separation) [plus one hundred percent of Executive's target annual bonus for the year in which the Separation occurs]. Such payment shall be paid in a cash lump sum payment in accordance with the Company's standard payroll procedures, which payment will be made on the next regular payroll date occurring after the Release Conditions have been satisfied, provided that if the sixty (60) day period following the Separation spans two calendar years, then the severance payment will be paid on the first payroll date occurring in the second calendar year after the Release Conditions have been satisfied.

(b) **Equity.** Each of Executive's then outstanding awards of stock options, restricted stock awards, restricted stock units or other stock based awards, including but not limited to stock bonus awards, restricted stock, restricted stock units or stock appreciation rights ("**Equity Awards**"), including awards that would otherwise vest only upon satisfaction of performance criteria, shall accelerate and become vested and exercisable as to 100% of the then unvested shares at target subject to the Equity Award. Subject to Section 4, the accelerated vesting described above shall be effective as of the Separation.

(c) **Pay in Lieu of Continued Employee Benefits.** Continuation of COBRA or a cash benefit, in both cases on the same terms as set forth in Section 2(b) above, for the same period that the Executive is paid severance benefits pursuant to Section 3(a) following the Executive's Separation or, if earlier, until Executive is eligible to be covered under another substantially equivalent medical insurance plan by a subsequent employer.

(d) **[Termination for Death or Disability.** If the Executive is subject to a termination of his employment as a result of his death or Disability on or within 12 months following the consummation of a Change in Control, then, subject to Sections 4, 9, and 10 below, each of Executive's then outstanding Equity Awards, including awards that would otherwise vest only upon satisfaction of performance criteria, shall accelerate and become vested and exercisable as to 100% of the then unvested shares subject to the Equity Award. Subject to Section 4, the accelerated vesting described above shall be effective as of the date of his death or the Separation (as applicable).]

4. **General Release.** Any other provision of this Agreement notwithstanding, the benefits under Sections 2 and 3 shall not apply unless the Executive [or in the event of his death, the Executive's estate] (a) has executed a general release substantially in the form attached hereto as Exhibit A of all known and unknown claims that he or she may then have against the Company or persons affiliated with the Company and such release has become effective and (b) has agreed not to prosecute any legal action or other proceeding based upon any of such claims. The release must be in the form prescribed by the Company, without alterations (this document effecting the foregoing, the "Release"). The Company will deliver the form of Release to the Executive within ten (10) days after the Executive's Separation. The Executive must execute and return the Release within the time period specified in the form.

5. **Accrued Compensation and Benefits.** Notwithstanding anything to the contrary in Sections 2, 3 and 4 above, in connection with any termination of employment (whether or not a Qualifying Termination or CIC Qualifying Termination), the Company shall pay Executive's earned but unpaid base salary and other vested but unpaid cash entitlements for the period through and including the termination of employment, including unused earned vacation pay and unreimbursed documented business expenses incurred by Executive through and including the date of termination (collectively "**Accrued Compensation and Expenses**"), as required by law and the applicable Company plan or policy. In addition, Executive shall be entitled to any other vested benefits earned by Executive for the period through and including the termination date of Executive's employment under any other employee benefit plans and arrangements maintained by the Company, in accordance with the terms of such plans and arrangements, except as modified herein (collectively "**Accrued Benefits**"). Any Accrued Compensation and Expenses to which the Executive is entitled shall be paid to the Executive in cash as soon as

administratively practicable after the termination and, in any event, no later than two and one-half (2-1/2) months after the end of the taxable year of the Executive in which the termination occurs or at such earlier time as may be required by Section 10 below or to such lesser extent as may be mandated by Section 9 below. Any Accrued Benefits to which the Executive is entitled shall be paid to the Executive as provided in the relevant plans and arrangements.

6. **Covenants.**

- (a) **Non-Competition.** The Executive agrees that, during his or her employment with the Company, he or she shall not engage in any other employment, consulting or other business activity (whether full-time or part-time) that would create a conflict of interest with the Company.
- (b) **Cooperation.** The Executive agrees that, during the six (6) month period following his or her cessation of employment, he or she shall cooperate with the Company in every reasonable respect and shall use his or her best efforts to assist the Company with the transition of Executive's duties to his or her successor. The Company's request for cooperation will take into consideration Executive's personal and business commitments. The Company will reimburse Executive for his or her reasonable out-of-pocket expenses incurred in connection with Executive's compliance with this Section.
- (c) **Non-Disparagement.** The Executive further agrees that, during the six (6) month period following his or her cessation of employment, he or she shall not in any way or by any means disparage the Company, the members of the Company's Board of Directors or the Company's officers and employees. Notwithstanding the foregoing, the Executive is not prohibited from cooperating with a government agency or testifying truthfully in any government inquiry or other proceeding or in which Executive is required to testify pursuant to subpoena or other valid legal process.

7. **Definitions.**

- (a) **"Cause"** shall have the same meaning as the definition of "Cause" as set forth in the Plan.
 - (b) **"Code"** means the Internal Revenue Code of 1986, as amended.
 - (c) **"Change in Control."** For all purposes under this Agreement, a Change in Control shall mean a "Corporate Transaction," as such term is defined in the Plan, *provided that* the transaction (including any series of transactions) also qualifies as a change in control event under U.S. Treasury Regulation 1.409A-3(i)(5).
 - (d) **"CIC Qualifying Termination"** means a Separation within twelve (12) months following a Change in Control or within three (3) months preceding a Change in Control (if after a Potential Change in Control) resulting from (A) the Company or its successor terminating the Executive's employment for any reason other than Cause or (B) the Executive voluntarily resigning his or her employment for Good Reason. A termination or resignation due to the Executive's death or Disability shall not constitute a CIC Qualifying Termination. A **"Potential Change in Control"** means the date of execution of a definitive agreement whereby the Company will consummate a Change in Control if such transaction is consummated. In the case of a termination following a Potential Change in Control and before a Change in Control, solely for purposes of benefits under this Agreement, the date of Separation will be deemed to be the date the Change in Control is consummated.
 - (e) **"Disability"** shall have that meaning set forth in Section 22(e)(3) of the Code.
 - (f) **"Good Reason"** means, without the Executive's consent, (i) a material reduction or adverse change in the Executive's level of responsibility and/or scope of authority, (ii) a reduction by more than 10% in Executive's base salary or annual bonus opportunity or aggregate benefits, (iii) relocation of the Executive's principal workplace by more than thirty-five (35) miles from Executive's then current place
-

of employment, (iv) Executive does not report to the Chief Executive Officer of the parent company following any Change in Control, or (v) a material breach of this Agreement, including without limitation Section 8(a), or any other written agreement between the Executive and the Company in connection with an Equity Award. For the Executive to receive the benefits under this Agreement as a result of a voluntary resignation under this subsection (f), all of the following requirements must be satisfied: (1) the Executive must provide notice to the Company of his or her intent to assert Good Reason within sixty (60) days of the initial existence of one or more of the conditions set forth in subclauses (i) through (iii); (2) the Company will have thirty (30) days (the “**Company Cure Period**”) from the date of such notice to remedy the condition and, if it does so, the Executive may withdraw his or her resignation or may resign with no benefits; and (3) any termination of employment under this provision must occur within ten (10) days of the earlier of expiration of the Company Cure Period or written notice from the Company that it will not undertake to cure the condition set forth in subclauses (i) through (iii). Should the Company remedy the condition as set forth above and then one or more of the conditions arises again within twelve months following the occurrence of a Change in Control, the Executive may assert Good Reason again subject to all of the conditions set forth herein.

(g) “**Plan**” means the Company’s 2014 Equity Incentive Plan, as may be amended from time to time.

(h) “**Release Conditions**” mean the following conditions occurring within sixty (60) days following the Separation: (i) Company has received the Executive’s executed Release; and (ii) any rescission period applicable to the Executive’s executed Release has expired.

(i) “**Qualifying Termination**” means a Separation that is not a CIC Qualifying Termination, but which results from (i) the Company terminating the Executive’s employment for any reason other than Cause or (ii) the Executive voluntarily resigning his or her employment for Good Reason. A termination or resignation due to the Executive’s death or Disability shall not constitute a Qualifying Termination.

(j) “**Separation**” means a “separation from service,” as defined in the regulations under Section 409A of the Code.

8. **Successors.**

(a) **Company’s Successors.** The Company shall require any successor (whether direct or indirect and whether by purchase, lease, merger, consolidation, liquidation or otherwise) to all or substantially all of the Company’s business and/or assets, by an agreement in substance and form satisfactory to the Executive, to assume this Agreement and to agree expressly to perform this Agreement in the same manner and to the same extent as the Company would be required to perform it in the absence of a succession. For all purposes under this Agreement, the term “Company” shall include any successor to the Company’s business and/or assets or which becomes bound by this Agreement by operation of law.

(b) **Executive’s Successors.** This Agreement and all rights of the Executive hereunder shall inure to the benefit of, and be enforceable by, the Executive’s personal or legal representatives, executors, administrators, successors, heirs, distributees, devisees and legatees.

9. **Golden Parachute Taxes.**

(a) **Best After-Tax Result.** In the event that any payment or benefit received or to be received by Executive pursuant to this Agreement or otherwise (“**Payments**”) would (i) constitute a “parachute payment” within the meaning of Section 280G of the Code and (ii) but for this subsection (a), be subject to the excise tax imposed by Section 4999 of the Code, any successor provisions, or any comparable federal, state, local or foreign excise tax (“**Excise Tax**”), then, subject to the provisions of Section 10, such Payments shall be either (A) provided in full pursuant to the terms of this Agreement or any other applicable agreement, or (B) provided as to such lesser extent which would result in the

Payments being \$1.00 less than the amount at which any portion of the Payments would be subject to the Excise Tax (“**Reduced Amount**”), whichever of the foregoing amounts, taking into account the applicable federal, state, local and foreign income, employment and other taxes and the Excise Tax (including, without limitation, any interest or penalties on such taxes), results in the receipt by Executive, on an after-tax basis, of the greatest amount of payments and benefits provided for hereunder or otherwise, notwithstanding that all or some portion of such Payments may be subject to the Excise Tax. Unless the Company and Executive otherwise agree in writing, any determination required under this Section shall be made by independent tax counsel designated by the Company and reasonably acceptable to Executive (“**Independent Tax Counsel**”), whose determination shall be conclusive and binding upon Executive and the Company for all purposes. For purposes of making the calculations required under this Section, Independent Tax Counsel may make reasonable assumptions and approximations concerning applicable taxes and may rely on reasonable, good faith interpretations concerning the application of Sections 280G and 4999 of the Code; *provided that* Independent Tax Counsel shall assume that Executive pays all taxes at the highest marginal rate. The Company and Executive shall furnish to Independent Tax Counsel such information and documents as Independent Tax Counsel may reasonably request in order to make a determination under this Section. The Company shall bear all costs that Independent Tax Counsel may reasonably incur in connection with any calculations contemplated by this Section. In the event that Section 9(a)(ii)(B) above applies, then based on the information provided to Executive and the Company by Independent Tax Counsel, Executive may, in Executive’s sole discretion and within thirty (30) days of the date on which Executive is provided with the information prepared by Independent Tax Counsel, determine which and how much of the Payments (including the accelerated vesting of equity compensation awards) to be otherwise received by Executive shall be eliminated or reduced (as long as after such determination the value (as calculated by Independent Tax Counsel in accordance with the provisions of Sections 280G and 4999 of the Code) of the amounts payable or distributable to Executive equals the Reduced Amount). If the Internal Revenue Service (the “**IRS**”) determines that any Payment is subject to the Excise Tax, then Section 9(b) hereof shall apply, and the enforcement of Section 9(b) shall be the exclusive remedy to the Company.

(b) **Adjustments.** If, notwithstanding any reduction described in Section 9(a) hereof (or in the absence of any such reduction), the IRS determines that Executive is liable for the Excise Tax as a result of the receipt of one or more Payments, then Executive shall be obligated to surrender or pay back to the Company, within one-hundred twenty (120) days after a final IRS determination, an amount of such payments or benefits equal to the “**Repayment Amount.**” The Repayment Amount with respect to such Payments shall be the smallest such amount, if any, as shall be required to be surrendered or paid to the Company so that Executive’s net proceeds with respect to such Payments (after taking into account the payment of the Excise Tax imposed on such Payments) shall be maximized. Notwithstanding the foregoing, the Repayment Amount with respect to such Payments shall be zero (0) if a Repayment Amount of more than zero (0) would not eliminate the Excise Tax imposed on such Payments or if a Repayment Amount of more than zero would not maximize the net amount received by Executive from the Payments. If the Excise Tax is not eliminated pursuant to this Section 9(b), Executive shall pay the Excise Tax.

10. **Miscellaneous Provisions.**

(a) **Section 409A.** To the extent (i) any payments to which Executive becomes entitled under this Agreement, or any agreement or plan referenced herein, in connection with Executive’s termination of employment with the Company constitute deferred compensation subject to Section 409A of the Code and (ii) Executive is deemed at the time of such termination of employment to be a “specified” employee under Section 409A of the Code, then such payment or payments shall not be made or commence until the earlier of (i) the expiration of the six (6)-month period measured from the Executive’s Separation; or (ii) the date of Executive’s death following such Separation; *provided, however,* that such deferral shall only be effected to the extent required to avoid adverse tax treatment to Executive, including (without limitation) the additional twenty percent (20%) tax for which Executive would otherwise be liable under Section 409A(a)(1)(B) of the Code in the absence of such deferral. Upon the expiration of the applicable deferral period, any payments which would have otherwise been made during that period (whether in a single sum or in installments) in the absence of this paragraph shall be paid to Executive or

Executive's beneficiary in one lump sum (without interest). Except as otherwise expressly provided herein, to the extent any expense reimbursement or the provision of any in-kind benefit under this Agreement (or otherwise referenced herein) is determined to be subject to (and not exempt from) Section 409A of the Code, the amount of any such expenses eligible for reimbursement, or the provision of any in-kind benefit, in one calendar year shall not affect the expenses eligible for reimbursement or in kind benefits to be provided in any other calendar year, in no event shall any expenses be reimbursed after the last day of the calendar year following the calendar year in which Executive incurred such expenses, and in no event shall any right to reimbursement or the provision of any in-kind benefit be subject to liquidation or exchange for another benefit. To the extent that any provision of this Agreement is ambiguous as to its exemption or compliance with Section 409A, the provision will be read in such a manner so that all payments hereunder are exempt from Section 409A to the maximum permissible extent, and for any payments where such construction is not tenable, that those payments comply with Section 409A to the maximum permissible extent. To the extent any payment under this Agreement may be classified as a "short-term deferral" within the meaning of Section 409A, such payment shall be deemed a short-term deferral, even if it may also qualify for an exemption from Section 409A under another provision of Section 409A. Payments pursuant to this Agreement (or referenced in this Agreement) are intended to constitute separate payments for purposes of Section 1.409A-2(b)(2) of the regulations under Section 409A.

(b) **Other Arrangements.** This Agreement supersedes any and all cash severance arrangements, severance and salary continuation arrangements, programs and plans which were previously offered, or may be offered on the Effective Date or thereafter, by the Company to the Executive, including change in control severance arrangements, employment agreement or offer letter, and Executive hereby waives Executive's rights to such other benefits. In no event shall any individual receive cash severance benefits under both this Agreement and any other severance pay or salary continuation program, plan or other arrangement with the Company. For the avoidance of doubt, in no event shall Executive receive payment under both Section 2 and Section 3 with respect to Executive's Separation. This Section will not supersede the Company's obligation to accelerate outstanding Equity Awards under Section 21.1 of the Plan in connection with a Corporate Transaction (as that term is defined in the Plan).

(c) **Dispute Resolution.** To ensure rapid and economical resolution of any and all disputes that might arise in connection with this Agreement, Executive and the Company agree that any and all disputes, claims, and causes of action, in law or equity, arising from or relating to this Agreement or its enforcement, performance, breach, or interpretation, will be resolved solely and exclusively by final, binding, and confidential arbitration, by a single arbitrator, in Fairfield County, and conducted by Judicial Arbitration & Mediation Services, Inc. ("JAMS") under its then-existing employment rules and procedures. Nothing in this Section, however, is intended to prevent either party from obtaining injunctive relief in court to prevent irreparable harm pending the conclusion of any such arbitration. Each party to an arbitration or litigation hereunder shall be responsible for the payment of its own attorneys' fees.

(d) **Notice.** Notices and all other communications contemplated by this Agreement shall be in writing and shall be deemed to have been duly given when personally delivered or when mailed by U.S. registered or certified mail, return receipt requested and postage prepaid or deposited with Federal Express Corporation, with shipping charges prepaid. In the case of the Executive, mailed notices shall be addressed to him or her at the home address which he or she most recently communicated to the Company in writing. In the case of the Company, mailed notices shall be addressed to its corporate headquarters, and all notices shall be directed to the attention of its Secretary.

(e) **Waiver.** No provision of this Agreement shall be modified, waived or discharged unless the modification, waiver or discharge is agreed to in writing and signed by the Executive and by an authorized officer of the Company (other than the Executive). No waiver by either party of any breach of, or of compliance with, any condition or provision of this Agreement by the other party shall be considered a waiver of any other condition or provision or of the same condition or provision at another time.

(f) **Withholding Taxes.** All payments made under this Agreement shall be subject to reduction to reflect taxes or other charges required to be withheld by law.

(g) **Severability.** The invalidity or unenforceability of any provision or provisions of this Agreement shall not affect the validity or enforceability of any other provision hereof, which shall remain in full force and effect.

(h) **No Retention Rights.** Nothing in this Agreement shall confer upon the Executive any right to continue in service for any period of specific duration or interfere with or otherwise restrict in any way the rights of the Company or any subsidiary of the Company or of the Executive, which rights are hereby expressly reserved by each, to terminate his or her service at any time and for any reason, with or without Cause.

(i) **Choice of Law.** The validity, interpretation, construction and performance of this Agreement shall be governed by the laws of the State of Connecticut (other than its choice-of-law provisions).

IN WITNESS WHEREOF, each of the parties has executed this Agreement, in the case of the Company by its duly authorized officer, as of the day and year first above written.

EXECUTIVE

LOXO ONCOLOGY, INC.

By:

Title:

Exhibit A
Form of General Release

I, _____, hereby acknowledge that my employment with or any of its affiliates Loxo Oncology, Inc., a Delaware corporation, (the "Company") terminated as of _____ (the "Termination Date") and, in connection with such termination of employment, the Company has agreed to provide me with certain benefits in consideration of my execution and performance of this General Release Agreement (the "Release Agreement") pursuant to the terms of that certain Amended and Restated Change in Control and Severance Agreement entered into between me and the Company dated as of May _____, 2018 (the "Severance Agreement").

1. In consideration of and in exchange for the payments and benefits set forth in the Severance Agreement, for myself, my heirs, administrators, executors and assigns, knowingly and voluntarily agree to release and forever discharge the Company, its parents, subsidiaries, affiliated companies, successors and assigns, each of their current and former employees, owners, officers, directors, shareholders, members, agents and attorneys, in their personal and official capacities (collectively referred to as "Releasees"), from any and all claims against Releasees that I may have as a result of any injuries, losses, damages or any other costs whatsoever, whether known or unknown, that I now have or claim to have or which I heretofore had from the beginning of time to the date of the execution of this Release Agreement (the "Execution Date"). This general release of claims includes, without limitation, claims arising out of or in any way connected with or relating to my employment with the Company or its termination, including but not limited to, any known or unknown claims arising under federal, state, local or municipal laws, including, but not limited to, claims for breach of contract, breach of the implied covenant of good faith and fair dealing, privacy violations, defamation, fraud, hostile work environment, impairment of economic opportunity, intentional infliction of emotional harm or other tort, or claims arising under Title VII of the Civil Rights Act of 1964, as amended; the Civil Rights Act of 1991; Sections 1981 through 1988 of Title 42 of the United States Code, as amended; the Fair Labor Standards Act; the Employee Retirement Income Security Act of 1974; the Family and Medical Leave Act; the Americans with Disabilities Act of 1990; the Age Discrimination in Employment Act, 29 U.S.C. Sec. 626 et seq. including the Older Workers' Benefit Protection Act, 29 U.S.C. Sec. 626(f)(1); the Civil Rights Act of 1991; the New York Labor Law; the New York Human Rights Law; the New York City Human Rights Law, and any other similar federal, state or local civil rights, disability, discrimination, retaliation or labor law, or any theory of contract, or any other federal, state or municipal statute, ordinance or the common law, including those relating to employment or employment discrimination, including claims for age, sex, gender, race, religion, national origin, marital status, sexual orientation, ancestry, veteran status or disability discrimination, or claims growing out of any legal restrictions on the rights of the Company to discharge its employees or the obligations of the Company to pay any sums or provide any benefits upon termination, that I now have or claim to have, or which I heretofore had based on acts or omissions occurring through the date I sign this Release Agreement, and I expressly waive any and all remedies that may be available thereunder, including without limitation attorney's fees and costs.

2. The Company and I do not intend to release claims that I may not release as a matter of law, including but not limited to claims for indemnity, or any claims for enforcement of this Release Agreement. This general release of claims also excludes any claims made under state workers' compensation or unemployment laws, and/or any claims which cannot be waived by law. For the avoidance of doubt, I preserve any claims resulting from (i) payments and benefits due under the Severance Agreement; (ii) continued ownership of any securities issued to me by the Company or any of its affiliates, and (iii) indemnification pursuant to Company's articles, bylaws or other governing documents, directors' and officers' liability and errors and omissions liability insurance secured by the Company, or as otherwise permitted or required by applicable law.

3. I understand that nothing in Sections 1 and 2 (general release and waiver of claims) of this Release Agreement, or otherwise in this Release Agreement or the Severance Agreement, limits my ability to file a charge or complaint with the Equal Employment Opportunity Commission, the National Labor Relations Board, the Occupational Safety and Health Administration, the Securities and Exchange Commission or any other federal, state or local government agency or commission ("Government").

Agencies”). I further understand that this Release Agreement does not limit my ability to communicate with any Government Agencies or otherwise participate in any investigation or proceeding that may be conducted by any Government Agency, including providing documents or other information, without notice to the Company. This Release Agreement does not limit my right to receive an award for information provided to any Government Agencies.

4. I agree and acknowledge that, other than the payments and benefits set forth in the Severance Agreement, no additional monies, benefits or payments, including without limitation, severance or separation pay, salary continuation, benefits, health insurance coverage (except as provided for under COBRA and/or in the Severance Agreement) or other fringe benefits, commissions, bonuses, fees, incentive compensation, vacation pay, notice pay, or equity interest in the Company, are due to me by the Company or shall be paid or provided to me by the Company.

5. I acknowledge that I have certain obligations under the Severance Agreement and agree that I will continue to be bound by those terms of the Severance Agreement (including Sections 6, 9 and 10 thereof).

6. The Company and I each agree not to publish, publicize or otherwise make known to any person the existence of or the terms and conditions of this Release Agreement, except as provided by law, administrative regulation, court order, subpoena, or the purpose of enforcing this Release Agreement. This provision does not prohibit or restrict the Company or me from disclosing the terms of this Release Agreement to immediate family, legal counsel or tax accountants solely for the purpose of obtaining professional advice relating thereto.

7. This Release Agreement shall be construed under Delaware law, without reference to any state’s conflict of laws rules.

8. It is understood and agreed that this Release Agreement is not to be construed as an admission of liability or wrongdoing by the Company or by me.

9. I have had an opportunity to consult with an attorney prior to executing this Release Agreement.

10. I acknowledge that I have been given a period of 21 days within which to consider this Release Agreement and to the extent I execute this Release Agreement before the expiration of the 21-day period, I do so knowingly and voluntarily and only after consulting an attorney. I understand that I have the right to cancel and revoke this Release Agreement during a period of seven (7) days following the Execution Date, and this Release Agreement shall not become effective, and no payments or benefits shall be made or provided pursuant to the Severance Agreement until the day after the expiration of such seven (7)-day period. The seven (7)-day period of revocation shall commence upon my execution of this Release Agreement. In order to revoke this Release Agreement, I understand that I must deliver to the Company, prior to the expiration of such seven (7)-day period, a written notice of revocation. Upon such revocation, this Release Agreement shall be null and void and of no further force or effect.

11. A facsimile or photocopy copy of this Release Agreement that has been signed by me shall have the same force and effect as a signed original of the Release Agreement.

12. My signature below indicates that I have had a reasonable period of time within which to consider this Release Agreement, that I have carefully read and reviewed this Release Agreement, and I fully understand all of its terms and conditions. The release and waiver of claims set forth in this Release Agreement is an essential and material part of the Release Agreement. My release and waiver of rights and claims is voluntary and knowing, without duress or coercion.

13. The terms of this Release Agreement cannot be changed or modified in any respect except in writing signed by me and a duly authorized representative of the Company.

14. I agree that this Release Agreement and the documents referenced herein constitute the entire understanding between myself and the Company relating to the subject matter hereof and that no one at the Company or anyone acting on its behalf has made any oral or written promises to me that are not fully and accurately set forth in this Agreement.

IN WITNESS WHEREOF, I have executed this General Release Agreement as of the date first above written.

[Executive Name]

May 8, 2018

Joshua H. Bilenker

Stamford, CT 06901

Re: Amended and Restated Offer of Employment by Loxo Oncology, Inc.

Dear Josh:

On behalf of Loxo Oncology, Inc. (the "Company"), the Board of Directors of the Company (the "Board") is very pleased to offer you this amended and restated employment agreement (the "Agreement"):

1. Position: Chief Executive Officer. As President and Chief Executive Officer of the Company, you will work primarily out of the Company's offices in Stamford, Connecticut and traveling from time to time as necessary. As President and Chief Executive Officer, you have responsibility for the Company's operations and strategic direction and the selection, management and termination of the Company's senior executive team, as well as other tasks assigned to you by the Board from time to time. You will continue to report directly to the Board. The Company will continue to recommend that you serve on the Board so long as you remain Chief Executive Officer of the Company. While employed by the Company, you will devote substantially all of your business time, energy and skill to the performance of your duties for the Company. Notwithstanding the foregoing, you will be entitled to (i) serve as a member of the board of directors of up to two other public companies (including your continued service as a director of ViewRay, Inc.) subject to the advance approval of the Board, which shall not be unreasonably withheld, (ii) advise private investors in connection with investments in early stage companies, provided you do not participate in the investment decision process of such investors on transactions that are competitive with the Business (as defined below); (iii) serve on civic, charitable, educational, religious, public interest or public service boards, and (iv) manage your personal and family investments, in each case, to the extent such activities do not materially interfere with the performance of your duties and responsibilities to the Company.

2. Starting Salary.

(a) Base Salary. Effective January 1, 2018, your salary will be six hundred thousand dollars (\$600,000.00) per year, payable in accordance with the Company's standard payroll schedule and subject to adjustment pursuant to the Company's employee compensation policies in effect from time to time.

(b) Annual Bonus. Effective January 1, 2018, you will be eligible for a bonus for each fiscal year that you remain employed with the Company with a target of sixty percent (60%) of your then current base salary, subject to pro rata adjustment for any partial years worked (the "Bonus"). The Bonus will be based upon individual and Company achievement of milestones or goals agreed upon by you and the Board within 60 days following the beginning of each new fiscal year. Any Bonus you earn for a fiscal year will be paid within 2¹/₂ months after the close of that fiscal year. The determinations of the Board with respect to your Bonus will be final, conclusive and binding.

3. Benefits. You are eligible to participate in regular health insurance, bonus and other employee benefit plans established by the Company for its employees and executives from time to time. Notwithstanding the Company's formal travel policy, you may elect to travel business class, or if business class is not available, first class on any flight that has a scheduled duration of four hours or more.

4. Equity.

(a) You will be eligible to participate in any and all plans providing for awards of stock options, restricted stock awards, restricted stock units or other stock based awards, including but not limited to stock bonus awards, restricted stock, restricted stock units or stock appreciation rights ("Equity Awards") adopted by the Company and applicable generally to other senior executives of the Company, including without limitation the Loxo Oncology, Inc. 2014 Equity Incentive Plan. You will be eligible for an Equity Award for each fiscal year that you remain employed with the Company, as recommended by an independent compensation firm and as approved by the Compensation Committee of the Board. The grant and terms of any Equity Award is subject to the Board's approval.

(b) Notwithstanding the terms of any plan adopted by the Company or the terms of any Equity Award, if in connection with a Change of Control (as defined below), the acquirer or the successor corporation in a Change of Control does not substitute your existing Equity Awards for an equivalent Equity Award, then 100% of your then outstanding and unvested Equity Awards will immediately vest and no longer be subject to any forfeiture restrictions.

5. Termination of Employment.

(a) Accrued Compensation. In the event your employment with the Company terminates for any reason, you will receive any unpaid base salary, together with any accrued but unused vacation, that is earned through the effective termination date (the "Accrued Compensation").

(b) Severance Not in Connection with a Change of Control. If your employment with the Company is terminated by the Company for any reason other than (i) for Cause, (ii) due to your death or (iii) due to your Disability (as defined below), or if your employment with the Company is terminated by you for Good Reason (the foregoing terminations other than clauses (i), (ii) or (iii), each a "Qualifying Termination"), in each case not in connection with the consummation of a Change of Control, you will receive the Accrued Compensation, and, conditioned on your (A) delivering to the Company a signed settlement agreement and general release of claims in favor of the Company in the form attached hereto as Exhibit A (the "Release") and satisfying all conditions to make the Release effective and enforceable within sixty (60) days following your termination of employment, (B) complying with the non-competition provisions set forth in Section 6 below and (C) resigning from the Board (if applicable) on the date that your employment terminates, you will also receive the following beginning on the Company's first regular payroll date that is at least sixty (60) days following your termination of employment:

(i) continuation of your then current base salary for eighteen (18) months beyond the effective termination date, payable in accordance with the regular payroll practices of the Company, provided that the first installment will include a catch-up payment

covering the amount that would have otherwise been paid during the period between your termination of employment and the first payment date and the balance of the installments will be payable in accordance with the Company's regular payroll schedule;

(iii) twelve (12) months of additional vesting for all of your then outstanding and unvested Equity Awards, including awards that would otherwise vest only upon satisfaction of performance criteria at the target levels; and

(iv) if you elect to continue your health insurance coverage pursuant to your rights under the Consolidated Omnibus Budget Reconciliation Act of 1985, as amended ("COBRA") following the termination of your employment, then the Company shall pay you an amount equal to the monthly COBRA premium that you would be required to pay to continue your group health, dental and vision coverage in effect on the date the termination of your employment becomes effective (which amount shall be based on the premium for the first month of COBRA coverage), including coverage for your eligible dependents, until the earlier of (x) eighteen (18) months following the effective termination date, (y) the date upon which you become eligible to receive substantially similar coverage from another employer and (z) the date that you are no longer eligible to receive COBRA coverage.

Notwithstanding the foregoing, (1) if you do not agree to be bound by the post-termination non-competition provisions in Section 6(b) below, you will have no rights to the payments and benefits set forth in this Section 5 and (2) if you agree to the terms and conditions in Section 6(b) below and you subsequently breach any such terms, you will have no further rights to payments or benefits set forth in this Section 5(b).

(c) Severance in Connection with a Change of Control. If you are subject to a Qualifying Termination, in each case in connection with the consummation of a Change of Control, you will receive the Accrued Compensation, and, conditioned on your (A) delivering to the Company a signed Release and satisfying all conditions to make the Release effective and enforceable within sixty (60) days following your termination of employment, (B) complying with the non-competition provisions set forth in Section 6 below, (C) resigning from the Board (if applicable) on the date that your employment terminates, and (D) returning to the Company all of its property and confidential information that is in your possession and/or control, you will also receive the following beginning on the Company's first regular payroll date that is at least sixty (60) days following your termination of employment:

(i) an amount equal to twenty-four (24) months of your current base salary, paid in a lump sum, payable on the first regular payroll date that is at least sixty (60) days following your termination of employment;

(ii) a lump sum payment equal to two times your target Bonus for the year in which the termination of your employment occurs, payable on the first regular payroll date that is at least sixty (60) days following your termination of employment;

(iii) 100% of your then outstanding and unvested Equity Awards will immediately vest and no longer be subject to any forfeiture restrictions, including awards that would otherwise vest at target only upon satisfaction of performance criteria; and

(iv) if you elect to continue your health insurance coverage pursuant to your rights under COBRA following the termination of your employment, then the Company shall pay you an amount equal to the monthly COBRA premium that you would be required to pay to continue your group health, dental and vision coverage in effect on the date the termination of your employment becomes effective (which amount shall be based on the premium for the first month of COBRA coverage), including coverage for your eligible dependents, until the earlier of (x) twenty-four (24) months following the effective termination date, (y) the date upon which you become eligible to receive substantially similar coverage from another employer and (z) the date that you are no longer eligible to receive COBRA coverage.

A Qualifying Termination shall be considered to be in connection with consummation of a Change of Control if the termination occurs within twelve (12) months following a Change of Control or within three (3) months preceding a Change of Control (if after a Potential Change of Control). A "Potential Change of Control" means the date of execution of a definitive agreement whereby the Company will consummate a Change of Control if such transaction is consummated. In the case of a termination following a Potential Change of Control and before a Change of Control, solely for purposes of benefits under this Agreement, the date of Qualifying Termination will be deemed the date the Change of Control is consummated.

(d) Severance in Connection with Disability or Death. If your employment with the Company is terminated by the Company (i) due to your death or (ii) due to your Disability, you or your estate will receive the Accrued Compensation, and, conditioned on you or your estate, as applicable (A) delivering to the Company a signed Release and satisfying all conditions to make the Release effective and enforceable within sixty (60) days following your termination of employment, (B) complying with the non-competition provisions set forth in Section 6 below, (C) resigning from the Board (if applicable) on the date that your employment terminates, and (D) returning to the Company all of its property and confidential information that is in your possession and/or control, you or your estate will also receive the following beginning on the Company's first regular payroll date that is at least sixty (60) days following your termination of employment:

(i) if your death or termination of employment for Disability occurs on or within twelve (12) months following the consummation of a Change of Control, 100% of your then outstanding and unvested Equity Awards will immediately vest and no longer be subject to any forfeiture restrictions, including awards that would otherwise vest only upon satisfaction of performance criteria; and

(ii) if you, or in the event of your death, your eligible dependents elect to continue your health insurance coverage pursuant to your rights under COBRA following the termination of your employment, then the Company shall pay you or your eligible dependents an amount equal to the monthly COBRA premium that you would be required to pay to continue your group health, dental and vision coverage in effect on the date the termination of your employment becomes effective (which amount shall be based on the premium for the first month of COBRA coverage) until the earlier of (x) eighteen (18) months following the effective termination date, (y) the date upon which you or your eligible dependents become eligible to receive substantially similar coverage from another employer and (z) the date that you or your eligible dependents are no longer eligible to receive COBRA coverage.

(e) Definitions. As used in this Agreement:

(i) "Cause" means any of the following: (A) you willfully engage in conduct that is in bad faith and materially injurious to the Company, including but not limited to, misappropriation of trade secrets, fraud or embezzlement; (B) your material breach of any written employment or equity agreement between you and the Company that causes harm to the Company, which breach, if curable, is not cured within thirty (30) days after receipt of written notice describing in detail such breach to you from the Company; (C) you willfully refuse to implement or follow a lawful directive by the Board, directly related to your duties, which breach, if curable, is not cured within thirty (30) days after receipt of written notice describing in detail such breach to you from the Company; (D) you engage in material misfeasance or malfeasance demonstrated by a continued pattern of material failure to perform the essential job duties associated with your position, which breach, if curable, is not cured within thirty (30) days after receipt of written notice describing in detail such breach to you from the Company; (E) your conviction of (including any plea of no contest to) a felony or a crime involving moral turpitude; or (F) your material breach of the Employee Invention Assignment and Confidentiality Agreement or similar agreement entered into between you and the Company.

(ii) "Change of Control" means a "Corporate Transaction," as such term is defined in the Plan, *provided that* with respect to any compensation that constitutes non-qualified deferred compensation pursuant to Code Section 409A, the transaction (including any series of transactions) also qualifies as a change in control event under U.S. Treasury Regulation 1.409A-3(i)(5).

(iii) "Disability" shall have that meaning set forth in Section 22(e)(3) of the Internal Revenue Code of 1986, as amended (the "Code").

(iv) "Good Reason" means any of the following actions by the Company without your written consent and provided (A) the Company receives, within sixty (60) days following the occurrence of any of the events set forth in clauses (1) through (4) below, written notice from you specifying the specific basis for your belief that you are entitled to terminate employment for Good Reason, (B) the Company fails to cure the event constituting Good Reason within thirty (30) days after receipt of such written notice thereof, and (C) you terminate your employment within thirty (30) days following expiration of such cure period: (1) you are not Chief Executive Officer of the parent company following any Change of Control, (2) the requirement that you change your principal office to a facility that increases your one-way commute by more than thirty-five (35) miles, (3) the Company's material breach of this Agreement or another written agreement between you and the Company governing an Equity Award; or (4) a material reduction in your annual base salary in effect immediately prior to such reduction.

6. Confidentiality; Non-Competition.

(a) Confidentiality. As an employee of the Company, you will have access to certain confidential information of the Company and you may, during the course of your employment, develop certain information or inventions that will be the property of the Company. To protect the interests of the Company, you will need to sign the Company's standard "Employee Invention Assignment and Confidentiality Agreement" as a condition of your employment. We wish to impress upon you that we do not want you to, and we hereby direct you not to, bring with you any confidential or proprietary material of any former employer or to violate any other obligations you may have to any former employer.

(b) Non-Competition. During the period that you render services to the Company, you agree to not engage in any employment, business or activity that is in any way competitive with the business or proposed business of the Company. You will disclose to the Company in writing any other gainful employment, business or activity that you are currently associated with or participate in that competes with the Company. You will not assist any other person or organization in competing with the Company or in preparing to engage in competition with the business or proposed business of the Company. In consideration of your employment with the Company, you agree that during the period that is twelve (12) months following the termination of your employment either (x) for Cause or without Good Reason or (y) without Cause or for Good Reason following which you accept the payments and benefits set forth in Section 5, you will not:

(i) serve as an officer, director, stockholder, employee or consultant of any person, corporation, firm, partnership or other entity that directly competes with the Business of the Company and any subsidiary of the Company, anywhere in the world; provided, however, that you may work for a private equity firm, venture capital fund or other investment vehicle that makes investments in early stage companies so long as you do not participate in or influence the investment decision process of such fund or vehicle on transactions that are competitive with the Business; and

(ii) directly or indirectly, individually or with others solicit, induce, persuade or entice, or attempt to do so, or otherwise cause, or attempt to cause, any employee or independent contractor of the Company (or any of its subsidiaries or affiliates) to terminate his employment or contracting relationship in order to become an employee, or independent contractor to or for any other person or entity.

For purposes of this Agreement, "Business" means research relating to Trk and RET receptor small molecule inhibitors for oncology applications.

Notwithstanding the foregoing, in the event of the termination of your employment by the Company without Cause or your resignation for Good Reason, you may elect not to be bound by the post-termination non-competition provisions set forth herein and you will forfeit all rights to the payments and benefits set forth in Section 5.

7. At Will Employment. With this Agreement, you will remain an at-will employee of the Company, which means the employment relationship can be terminated by either of us for any reason, at any time, with or without prior notice and with or without cause. Any statements or representations to the contrary (and, indeed, any statements contradicting any provision in this Agreement) should be regarded by you as ineffective. Further, your participation in any stock option or benefit program is not to be regarded as assuring you of continuing employment for any particular period of time. Any modification or change in your at will employment status may only occur by way of a written employment agreement signed by you and the Board.

8. Indemnification. During your employment and thereafter, the Company shall indemnify and hold you and your heirs and representatives harmless, to the maximum extent permitted or required by the laws of the State of Delaware in effect on the date of this Agreement or as such laws may from time to time hereafter be amended to increase the scope of such permitted indemnification, against any and all damages, costs, liabilities, losses and expenses

(including reasonable attorneys' fees) as a result of any claim or proceeding (whether civil, criminal, administrative or investigative), or any threatened claim or proceeding (whether civil, criminal, administrative or investigative), against you that arises out of or relates to your service as an officer, director or employee, as the case may be, of the Company, or your service in any such capacity or similar capacity with any affiliate of the Company or other entity at the Company's request (collectively, "Claims"), both prior to and after the date of this Agreement. Notwithstanding the foregoing, you will not be entitled to indemnification under this Section in connection with any Claim initiated by you against the Company or any director or officer of the Company unless the Company has joined in or consented to the initiation of that Claim. The Company will promptly advance to you or your heirs or representatives such expenses, including litigation costs and attorneys' fees, upon written request with appropriate documentation of such expenses upon receipt of an undertaking by you or on your behalf to repay such amount if it shall ultimately be determined that you are not entitled to be indemnified by the Company. If you have any knowledge of any actual or threatened action, suit or proceeding, whether civil, criminal, administrative or investigative, as to which you may request indemnity under this provision, you will notify the Company promptly in writing of the potential Claim; provided that the failure to give such notice shall not affect your right to indemnification. The Company shall be entitled to assume the defense of any such proceeding and you will use reasonable efforts to cooperate with such defense. To the extent that you determine in good faith that there is an actual or potential conflict of interest between the Company and you in connection with the defense of a proceeding, you will so notify the Company and will be entitled to separate representation at the Company's expense by counsel selected by you (provided that the Company may reasonably object to the selection of counsel within ten (10) business days after notification thereof) which counsel shall cooperate, and coordinate the defense, with the Company's counsel and minimize the expense of such separate representation to the extent consistent with your separate defense.

9. Arbitration. You and the Company agree to submit to mandatory binding arbitration any and all claims arising out of or related to your employment with the Company and the termination thereof, including, but not limited to, claims for unpaid wages, wrongful termination, torts, stock or stock options or other ownership interest in the Company, and/or discrimination (including harassment) based upon any federal, state or local ordinance, statute, regulation or constitutional provision. All arbitration hearings shall be conducted in New York, New York. **THE PARTIES HEREBY WAIVE ANY RIGHTS THEY MAY HAVE TO TRIAL BY JURY IN REGARD TO SUCH CLAIMS.** This Agreement does not restrict your right to file administrative claims you may bring before any government agency where, as a matter of law, the parties may not restrict the employee's ability to file such claims (including, but not limited to, the National Labor Relations Board, the Equal Employment Opportunity Commission and the Department of Labor). However, the parties agree that, to the fullest extent permitted by law, arbitration shall be the exclusive remedy for the subject matter of such administrative claims. The arbitration shall be conducted through JAMS before a single neutral arbitrator, in accordance with the JAMS employment arbitration rules then in effect. The JAMS rules may be found and reviewed at <http://www.jamsadr.com/rules-employment-arbitration>. If you are unable to access these rules, please let me know and I will provide you with a hardcopy. The arbitrator shall issue a written decision that contains the essential findings and conclusions on which the decision is based.

10. Tax Matters.

(a) Withholding. All forms of compensation referred to in this Agreement are subject to reduction to reflect applicable withholding and payroll taxes and other deductions required by law.

(b) Tax Advice. You are encouraged to obtain your own tax advice regarding your compensation from the Company. You agree that the Company does not have a duty to design its compensation policies in a manner that minimizes your tax liabilities, and you will not make any claim against the Company or the Board related to tax liabilities arising from your compensation.

(c) Section 409A. To the extent (i) any payments or benefits to which you become entitled under this Agreement, or under any agreement or plan referenced herein, in connection with your termination of employment with the Company constitute deferred compensation subject to Section 409A of the Code and (ii) you are deemed at the time of such termination of employment to be a "specified employee" under Section 409A of the Code, then such payments shall not be made or commenced until the earliest of (x) the expiration of the six-month period measured from the date of your "separation from service" (as such term is at the time defined in Treasury Regulations under Section 409A) from the Company; or (y) the date of your death following such separation from service; provided, however, that such deferral shall only be effected to the extent required to avoid adverse tax treatment to you, including, without limitation, the additional twenty percent (20%) tax for which you would otherwise be liable under Section 409A(a)(1)(B) of the Code in the absence of such deferral. Upon the expiration of the applicable deferral period, any payments which would have otherwise been made during that period (whether in a single sum or in installments) in the absence of this paragraph shall be paid you or your beneficiary in one lump sum (without interest). Any termination of your employment that would entitle you to receive the payments and benefits set forth in Sections 5(b) or (c) must also constitute a "separation from service" as such term is defined in Treasury Regulation Section 1.409A-1. If the termination of your employment does constitute a separation from service, the payments and benefits provided under Sections 5(b) or (c) will be delayed until such time as you incur a "separation from service." It is intended that each installment of the payments provided hereunder constitute separate "payments" for purposes of Treasury Regulation Section 1.409A-2(b)(2)(i). It is further intended that payments hereunder satisfy, to the greatest extent possible, the exemption from the application of Code Section 409A (and any state law of similar effect) provided under Treasury Regulation Section 1.409A-1(b)(4) (as a "short-term deferral") and that the installment severance payments set forth in Section 5(b)(i) of this Agreement be divided into two portions: the first portion will include a number of installment payments commencing on the first payment date set forth in Section 5(b)(i) of this Agreement that are in the aggregate less than two times the applicable compensation limit under Section 401(a)(17) of the Code for the year in which the termination of your employment occurs shall be payable in accordance with Treas. Reg. §1.409A-1(b)(9)(iii) as an involuntary separation plan. The remainder of the installments (if any) will be paid consistent with the terms of this Section. Except as otherwise expressly provided herein, to the extent any expense reimbursement or the provision of any in-kind benefit under this Agreement is determined to be subject to Section 409A of the Code, the amount of any such expenses eligible for reimbursement, or the provision of any in-kind benefit, in one calendar year shall not affect the expenses eligible for reimbursement in any other taxable year (except for any lifetime or other aggregate limitation applicable to medical expenses), in no event shall any expenses be reimbursed after the last day of the calendar year following the calendar year in which you

incurred such expenses, and in no event shall any right to reimbursement or the provision of any in-kind benefit be subject to liquidation or exchange for another benefit.

(d) Section 280G. If (i) any amounts payable to you under this Agreement or otherwise are characterized as excess parachute payments pursuant to Section 4999 of the Code, and (ii) you thereby would be subject to any United States federal excise tax due to that characterization, then your termination benefits hereunder will be payable either in full or in a lesser amount, whichever would result, after taking into account the applicable federal, state and local income taxes and the excise tax imposed by Section 4999, in your receipt on an after-tax basis of the greatest amount of termination and other benefits. The determination of any reduction required pursuant to this section (including the determination as to which specific payments shall be reduced) shall be made by a nationally recognized accounting firm doing business in the United States which otherwise does not perform services for the Company (which will be chosen by the mutual agreement of you and Company, such services to be paid by the Company), and such determination shall be conclusive and binding upon the Company or any related corporation for all purposes. If required, the payments and benefits under this Agreement shall be reduced in the following order: (x) a pro rata reduction of (A) cash payments that are subject to Section 409A of the Code as deferred compensation and (B) cash payments not subject to Section 409A of the Code; (y) a pro rata reduction of (A) employee benefits that are subject to Section 409A of the Code as deferred compensation and (B) employee benefits not subject to Section 409A of the Code; and (z) a pro rata cancellation of (A) accelerated vesting of stock and other equity-based awards that are subject to Section 409A of the Code as deferred compensation and (B) stock and other equity-based awards not subject to Section 409A of the Code. In the event that acceleration of vesting of stock and other equity-based award compensation is to be reduced, such acceleration of vesting shall be cancelled in the reverse order of the date of grant of your stock and other equity-based awards unless you elect in writing a different order for cancellation.

11. Governing Law. This Agreement shall be governed by and construed in accordance with the laws of the State of New York without reference to conflict of laws.

12. Severability. If any provision of this Agreement shall be found by any arbitrator or court of competent jurisdiction to be invalid or unenforceable, then the parties hereby waive such provision to the extent of its invalidity or unenforceability, and agree that all other provisions in this Agreement shall continue in full force and effect.

13. Entire Agreement. This offer, once accepted, the Stock Purchase Agreement, the Stock Restriction Agreement and the Employee Invention Assignment and Confidentiality Agreement constitutes the entire agreement between you and the Company with respect to the subject matter hereof and supersedes all prior offers, negotiations and agreements, if any, whether written or oral, relating to such subject matter. You acknowledge that neither the Company nor its agents have made any promise, representation or warranty whatsoever, either express or implied, written or oral, which is not contained in this Agreement for the purpose of inducing you to execute the Agreement, and you acknowledge that you have executed this agreement in reliance only upon such promises, representations and warranties as are contained herein.

14. Acceptance. This offer will remain open until May 8, 2018. If you decide to accept our offer, and I hope you will, please sign the enclosed copy of this Agreement in the

space indicated and return it to me. Your signature will acknowledge that you have read and understood and agreed to the terms and conditions of this offer letter and the attached documents, if any. Should you have anything else that you wish to discuss, please do not hesitate to call me.

Very truly yours,

/s/ Tim M. Mayleben
Tim M. Mayleben
Chair of the Compensation Committee

I have read and understood this Agreement and hereby acknowledge, accept and agree to the terms as set forth above and further acknowledge that no other commitments were made to me as part of my employment offer except as specifically set forth herein.

/s/ Joshua H. Bilenker, M.D.

Date signed: May 8, 2018

Joshua H. Bilenker, M.D.

Exhibit A
Form of General Release

I, Joshua H. Bilenker, M.D., hereby acknowledge that my employment with or any of its affiliates Loxo Oncology, Inc., a Delaware corporation, (the "Company") terminated as of (the "Termination Date") and, in connection with such termination of employment, the Company has agreed to provide me with certain benefits in consideration of my execution and performance of this General Release Agreement (the "Release Agreement") pursuant to the terms of that certain Amended and Restated Employment Agreement entered into between me and the Company dated as of May , 2018 (the "Employment Agreement").

1. In consideration of and in exchange for the payments and benefits set forth in the Severance Agreement, for myself, my heirs, administrators, executors and assigns, knowingly and voluntarily agree to release and forever discharge the Company, its parents, subsidiaries, affiliated companies, successors and assigns, each of their current and former employees, owners, officers, directors, shareholders, members, agents and attorneys, in their personal and official capacities (collectively referred to as "Releasees"), from any and all claims against Releasees that I may have as a result of any injuries, losses, damages or any other costs whatsoever, whether known or unknown, that I now have or claim to have or which I heretofore had from the beginning of time to the date of the execution of this Release Agreement (the "Execution Date"). This general release of claims includes, without limitation, claims arising out of or in any way connected with or relating to my employment with the Company or its termination, including but not limited to, any known or unknown claims arising under federal, state, local or municipal laws, including, but not limited to, claims for breach of contract, breach of the implied covenant of good faith and fair dealing, privacy violations, defamation, fraud, hostile work environment, impairment of economic opportunity, intentional infliction of emotional harm or other tort, or claims arising under Title VII of the Civil Rights Act of 1964, as amended; the Civil Rights Act of 1991; Sections 1981 through 1988 of Title 42 of the United States Code, as amended; the Fair Labor Standards Act; the Employee Retirement Income Security Act of 1974; the Family and Medical Leave Act; the Americans with Disabilities Act of 1990; the Age Discrimination in Employment Act, 29 U.S.C. Sec. 626 et seq. including the Older Workers' Benefit Protection Act, 29 U.S.C. Sec. 626(f)(1); the Civil Rights Act of 1991; the New York Labor Law; the New York Human Rights Law; the New York City Human Rights Law, and any other similar federal, state or local civil rights, disability, discrimination, retaliation or labor law, or any theory of contract, or any other federal, state or municipal statute, ordinance or the common law, including those relating to employment or employment discrimination, including claims for age, sex, gender, race, religion, national origin, marital status, sexual orientation, ancestry, veteran status or disability discrimination, or claims growing out of any legal restrictions on the rights of the Company to discharge its employees or the obligations of the Company to pay any sums or provide any benefits upon termination, that I now have or claim to have, or which I heretofore had based on acts or omissions occurring through the date I sign this Release Agreement, and I expressly waive any and all remedies that may be available thereunder, including without limitation attorney's fees and costs.

2. The Company and I do not intend to release claims that I may not release as a matter of law, including but not limited to claims for indemnity, or any claims for enforcement of this Release Agreement. This general release of claims also excludes any claims made under state workers' compensation or unemployment laws, and/or any claims which cannot be waived by law. For the avoidance of doubt, I preserve any claims resulting from (i) payments and

benefits due under the Employment Agreement; (ii) continued ownership of any securities issued to me by the Company or any of its affiliates, and (iii) indemnification pursuant to Section 8 of the Employment Agreement, Company's articles, bylaws or other governing documents, directors' and officers' liability and errors and omissions liability insurance secured by the Company, or as otherwise permitted or required by applicable law.

3. I understand that nothing in Sections 1 and 2 (general release and waiver of claims) of this Release Agreement, or otherwise in this Release Agreement or the Employment Agreement, limits my ability to file a charge or complaint with the Equal Employment Opportunity Commission, the National Labor Relations Board, the Occupational Safety and Health Administration, the Securities and Exchange Commission or any other federal, state or local government agency or commission ("Government Agencies"). I further understand that this Release Agreement does not limit my ability to communicate with any Government Agencies or otherwise participate in any investigation or proceeding that may be conducted by any Government Agency, including providing documents or other information, without notice to the Company. This Release Agreement does not limit my right to receive an award for information provided to any Government Agencies.

4. I agree and acknowledge that, other than the payments and benefits set forth in the Employment Agreement, no additional monies, benefits or payments, including without limitation, severance or separation pay, salary continuation, benefits, health insurance coverage (except as provided for under COBRA and/or in the Employment Agreement) or other fringe benefits, commissions, bonuses, fees, incentive compensation, vacation pay, notice pay, or equity interest in the Company, are due to me by the Company or shall be paid or provided to me by the Company.

5. I acknowledge that I have certain obligations under the Employment Agreement and agree that I will continue to be bound by those terms of the Employment Agreement (including Section 6 thereof).

6. The Company and I each agree not to publish, publicize or otherwise make known to any person the existence of or the terms and conditions of this Release Agreement, except as provided by law, administrative regulation, court order, subpoena, or the purpose of enforcing this Release Agreement. This provision does not prohibit or restrict the Company or me from disclosing the terms of this Release Agreement to immediate family, legal counsel or tax accountants solely for the purpose of obtaining professional advice relating thereto.

7. This Release Agreement shall be construed under Delaware law, without reference to any state's conflict of laws rules.

8. It is understood and agreed that this Release Agreement is not to be construed as an admission of liability or wrongdoing by the Company or by me.

9. I have had an opportunity to consult with an attorney prior to executing this Release Agreement.

10. I acknowledge that I have been given a period of 21 days within which to consider this Release Agreement and to the extent I execute this Release Agreement before the expiration of the 21-day period, I do so knowingly and voluntarily and only after consulting an attorney. I understand that I have the right to cancel and revoke this Release Agreement during a period of

seven (7) days following the Execution Date, and this Release Agreement shall not become effective, and no payments or benefits shall be made or provided pursuant to the Employment Agreement until the day after the expiration of such seven (7)-day period. The seven (7)-day period of revocation shall commence upon my execution of this Release Agreement. In order to revoke this Release Agreement, I understand that I must deliver to the Company, prior to the expiration of such seven (7)-day period, a written notice of revocation. Upon such revocation, this Release Agreement shall be null and void and of no further force or effect.

11. A facsimile or photocopy copy of this Release Agreement that has been signed by me shall have the same force and effect as a signed original of the Release Agreement.

12. My signature below indicates that I have had a reasonable period of time within which to consider this Release Agreement, that I have carefully read and reviewed this Release Agreement, and I fully understand all of its terms and conditions. The release and waiver of claims set forth in this Release Agreement is an essential and material part of the Release Agreement. My release and waiver of rights and claims is voluntary and knowing, without duress or coercion.

13. The terms of this Release Agreement cannot be changed or modified in any respect except in writing signed by me and a duly authorized representative of the Company.

14. I agree that this Release Agreement and the documents referenced herein constitute the entire understanding between myself and the Company relating to the subject matter hereof and that no one at the Company or anyone acting on its behalf has made any oral or written promises to me that are not fully and accurately set forth in this Agreement.

IN WITNESS WHEREOF, I have executed this General Release Agreement as of the date first above written.

Joshua H. Bilenker, M.D.

Certification of Principal Executive Officer of Loxo Oncology, Inc.
Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

I, Joshua H. Bilenker, M.D., certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Loxo Oncology, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures, and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
