Recent Developments

Bareboat structure on newbuild VLCCs

In August 2018, Navios Acquisition agreed to the main terms of a 12-year bareboat charter-in agreement with de-escalating purchase options for two newbuild Japanese VLCCs delivering in the third and fourth quarter of 2020, respectively. The bareboat charter-in agreement reflects an implied price of approximately \$84.5 million per vessel and an annual effective interest of approximately 6% fixed for the duration of the agreement. Concurrently, Navios Acquisition agreed to the main terms of bareboat charter-out agreements with a duration of 10 years for each vessel plus a five-year optional period granted to the charterer. The bareboat charter-out rate is \$27,816 net per day, \$29,751 net per day for the optional period, and the charterer is granted de-escalating purchase options. The above structure is subject to definitive documentation and there can be no assurances that it will be completed in full or that, if agreed upon, will be pursuant to the terms described above.

Navios Midstream Acquisition Proposal

On June 28, 2018, Navios Acquisition announced that it has submitted a proposal to the Board of Directors of Navios Midstream (NYSE:NAP) to acquire the publicly held units of Navios Midstream not already owned by Navios Acquisition in a stock for units exchange.

Subject to negotiation and execution of a definitive agreement, Navios Acquisition is proposing consideration of 6.292 Navios Acquisition shares for each outstanding publicly held common unit of Navios Midstream as part of a transaction that would be structured as a merger of Navios Midstream with and into Navios Acquisition.

The proposed transaction is subject to the negotiation and execution of a definitive agreement, approval of the Board of Directors of Navios Acquisition and the necessary approvals of the conflicts committee of Navios Midstream under Navios Midstream's limited partnership agreement. The consummation of the proposed transaction would be subject to customary closing conditions. There can be no assurance that any such approvals will be forthcoming, that a definitive agreement will be executed, or that any transaction will be consummated.

Dividend Policy

On July 31, 2018, the Board of Directors declared a quarterly cash dividend in respect of the second quarter of 2018 of \$0.02 per share of common stock payable on September 27, 2018 to stockholders of record as of September 20, 2018. The declaration and payment of any further dividends remain subject to the discretion of the Board of Directors and will depend on, among other things, Navios Acquisition's cash requirements as measured by market opportunities and restrictions under its credit agreements and other debt obligations and such other factors as the Board of Directors may deem advisable.

Equity Transactions

In February 2018, the Board of Directors of Navios Acquisition authorized a stock repurchase program for up to \$25.0 million of Navios Acquisition's common stock, for two years. Stock repurchases are made from time to time for cash in open market transactions at prevailing market prices or in privately negotiated transactions. The timing and amount of repurchases under the program are determined by management based upon market conditions and other factors. Repurchases may be made pursuant to a program adopted under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. The program does not require any minimum repurchase or any specific number or amount of shares of common stock and may be suspended or reinstated at any time in Navios Acquisition's discretion and without notice. The Board of Directors will review the program periodically. Repurchases are subject to restrictions under Navios Acquisition's credit facilities and indenture. As of August 22, 2018, the Company has repurchased 7,626,619 shares of common stock, at a total cost of approximately \$6.0 million.

Fleet

As of August 22, 2018, our fleet consisted of a total of 35 double-hulled tanker vessels, aggregating approximately 3.6 million deadweight tons, or dwt. The fleet includes seven Very Large Crude Carrier ("VLCC") tankers (over 200,000 dwt per ship), which transport crude oil, eight Long Range 1 ("LR1") product tankers (60,000-79,999 dwt per ship), 18 Medium Range 2 ("MR2") product tankers (30,000-59,999 dwt per ship) and two chemical tankers (25,000 dwt per ship), which transport refined petroleum products and bulk liquid chemicals. All our vessels are currently chartered-out to quality counterparties, including affiliates of Navig8 Chemicals Shipping and Trading Co ("Navig8"), Shell Tankers Singapore Private LTD ("Shell") and Mansel LTD ("Mansel"), with an average remaining charter period of approximately one year. As of August 22, 2018, we had charters covering 93.8 % of available days in 2018 and 25.9% of available days in 2019.

Charter Policy and Industry Outlook

Our core fleet currently consists of 35 vessels, of which seven are VLCCs, 26 are product tankers and two are chemical tankers. All of our vessels are chartered-out to quality counterparties, including affiliates of Navig8, Shell and Mansel with an average remaining contract period of approximately one year. Many of our contracts have profit sharing arrangements (see fleet table above). While all of our vessels are currently chartered-out, we intend to deploy any vessels that would become open—not chartered-out—to leading charterers in a mix of long, medium and short-term time charters, depending on the vessels' positions, seasonality and market outlook. This chartering strategy is intended to allow us to capture increased profits during strong charter markets, while developing relatively stable cash flows from longer-term time charters. We will also seek profit sharing arrangements in our employment contracts, to provide us with potential incremental revenue above the contracted minimum charter rates.

Using Navios Maritime Holdings Inc.'s ("Navios Holdings") global network of relationships and extensive experience in the maritime transportation industry, coupled with its commercial, financial and operational expertise, we plan to opportunistically grow our fleet through the timely and selective acquisition of high-quality newbuilding or secondhand vessels when we believe those acquisitions will result in attractive returns on invested capital and increased cash flow. We also intend to engage in opportunistic dispositions where we can achieve attractive values for our vessels as we assess the market cycle. We believe our diverse and versatile fleet, combined with the experience and long-standing relationships of Navios Holdings with participants in the maritime transportation industry, position us to identify and take advantage of attractive acquisition opportunities.

Factors Affecting Navios Acquisition's Results of Operations

We believe the principal factors that will affect our future results of operations are the economic, regulatory, political and governmental conditions that affect the shipping industry generally and that affect conditions in countries and markets in which our vessels engage in business. Other key factors that will be fundamental to our business, future financial condition and results of operations include:

- the demand for seaborne transportation services;
- the ability of Navios Holdings' commercial and chartering operations to successfully employ our vessels at economically attractive rates, particularly as our fleet expands and our charters expire;
- the effective and efficient technical management of our vessels;
- Navios Holdings' ability to satisfy technical, health, safety and compliance standards of major commodity traders; and
- the strength of and growth in the number of our customer relationships, especially with major commodity traders.

In addition to the factors discussed above, we believe certain specific factors will impact our consolidated results of operations. These factors include:

- the charter hire earned by our vessels under our charters;

Table of Contents

- our access to capital required to acquire additional vessels and/or to implement our business strategy;
- our ability to sell vessels at prices we deem satisfactory;
- our level of debt and the related interest expense and amortization of principal; and
- the level of any dividend to our stockholders.

Voyage, Time Charter and Pooling Arrangements

Revenues are driven primarily by the number of vessels in the fleet, the number of days during which such vessels operate and the amount of daily charter hire rates that the vessels earn under charters, which, in turn, are affected by a number of factors, including:

- the duration of the charters;
- the level of spot market rates at the time of charters;
- decisions relating to vessel acquisitions and disposals;
- the amount of time spent positioning vessels;
- the amount of time that vessels spend in dry dock undergoing repairs and upgrades;
- the age, condition and specifications of the vessels; and
- the aggregate level of supply and demand in the tanker shipping industry.

Time charters are available for varying periods, ranging from a single trip (spot charter) to long-term which may be many years. In general, a long-term time charter assures the vessel owner of a consistent stream of revenue. Operating the vessel in the spot market affords the owner greater spot market opportunity, which may result in high rates when vessels are in high demand or low rates when vessel availability exceeds demand. Vessel charter rates are affected by world economics, international events, weather conditions, strikes, governmental policies, supply and demand, and many other factors that might be beyond the control of management.

For vessels operating in pooling arrangements, the Company earns a portion of total revenues generated by the pool, net of expenses incurred by the pool. The amount allocated to each pool participant vessel, including the Company's vessels, is determined in accordance with an agreed-upon formula, which is determined by the points awarded to each vessel in the pool based on the vessel's age, design and other performance characteristics.

The cost to maintain and operate a vessel increases with the age of the vessel. Older vessels are less fuel efficient, cost more to insure and require upgrades from time to time to comply with new regulations. As of August 22, 2018 the average age of Navios Acquisition's owned fleet is 7.5 years. But, as such fleet ages or if Navios Acquisition expands its fleet by acquiring previously owned and older vessels the cost per vessel would be expected to rise and, assuming all else, including rates, remains constant, vessel profitability would be expected to decrease.

Navios Acquisition reports financial information and evaluates its operations by charter revenues. Navios Acquisition does not use discrete financial information to evaluate operating results for each type of charter. As a result, management reviews operating results solely by revenue per day and operating results of the fleet and thus Navios Acquisition has determined that it operates under one reportable segment.

Set forth below are selected historical and statistical data for Navios Acquisition for each of the three and six month periods ended June 30, 2018 and 2017 that the Company believes may be useful in better understanding the Company's financial position and results of operations.

Navios Acquisition believes that the important measures for analyzing trends in its results of operations consist of the following:

- (1) **Available days:** Available days for the fleet are total calendar days the vessels were in Navios Acquisition's possession for the relevant period after subtracting off-hire days associated with major repairs, drydocking or special surveys. The shipping industry uses available days to measure the number of days in a relevant period during which vessels should be capable of generating revenues.
- (2) **Operating days:** Operating days are the number of available days in the relevant period less the aggregate number of days that the vessels are off-hire due to any reason, including unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a relevant period during which vessels actually generate revenues.
- (3) **Fleet utilization:** Fleet utilization is the percentage of time that Navios Acquisition's vessels were available for generating revenue, and is determined by dividing the number of operating days during a relevant period by the number of available days during that period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the amount of days that its vessels are off hire for reasons other than scheduled repairs, dry dockings or special surveys.
- (4) **TCE Rate:** Time charter equivalent rate per day is defined as voyage and time charter revenues less voyage expenses during a period divided by the number of available days during the period. The TCE Rate per day is a standard shipping industry performance measure used primarily to present the actual daily earnings generated by vessels of various types of charter contracts for the number of available days of the fleet.

Revenue: Revenue for the three month period ended June 30, 2018 decreased by \$17.0 million, or 29.0%, to \$41.5 million, as compared to \$58.5 million for the same period of 2017. The decrease was mainly attributable to a: (i) decrease in the market rates during the second quarter ended June 30, 2018, as compared to the same period in 2017; and (ii) decrease in revenue by \$2.5 million due to the sale of the Nave Galactic to Navios Midstream in March 2018. Available days of the fleet decreased to 3,079 days for the three month period ended June 30, 2018, as compared to 3,256 days for the three month period ended June 30, 2017. The time charter equivalent rate, or TCE Rate, decreased to \$13,260 for the three month period ended June 30, 2018, from \$17,491 for the three month period ended June 30, 2017.

Time charter and voyage expenses: Time charter and voyage expenses for the three month period ended June 30, 2018 increased by \$0.8 million to \$6.4 million, as compared to \$5.6 million for the three month period ended June 30, 2017. The increase was attributable to a \$1.6 million increase in the backstop commitment to Navios Midstream; partially mitigated by a: (i) \$0.6 million decrease in bunkers and other voyage expenses; and (ii) \$0.2 million decrease in broker commission costs.

[Table of Contents](#)

Direct vessel expenses: Direct vessel expenses, comprising of the amortization of dry dock and special survey costs of certain vessels of our fleet amounted to \$1.7 million for the three month period ended June 30, 2018, as compared to \$0.9 million for the three month period ended June 30, 2017.

Management fees: Management fees for the three month period ended June 30, 2018 decreased by \$0.8 million to \$22.9 million as compared to \$23.7 million for the three month period ended June 30, 2017. The decrease was due to the sale of the Nave Galactic to Navios Midstream in March 2018, and was partially mitigated by the amendment to the fees under the Management Agreement. Pursuant to our Management Agreement, Navios Tankers Management Inc. (the “Manager”), a wholly owned subsidiary of Navios Holdings, provided commercial and technical management services to Navios Acquisition’s vessels for a daily fee of: (a) \$6,350 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) \$9,500 per VLCC, through May 2018. On May 3, 2018, Navios Acquisition fixed the fees for commercial and technical ship management services of its fleet for two additional years from May 29, 2018 through May 2020, at a daily fee of: (a) \$6,500 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) \$9,500 per VLCC.

General and administrative expenses: Total general and administrative expenses for the three month period ended June 30, 2018 increased by \$1.2 million to \$4.9 million compared to \$3.7 million for the three month period ended June 30, 2017, mainly due to the \$0.3 million increase in stock based compensation and \$0.9 million increase in other general and administrative expenses, including legal and professional fees and other compensation to the directors/ officers of the Company. For the three month periods ended June 30, 2018 and 2017, the expenses charged by Navios Holdings for administrative services were \$2.2 million and \$2.3 million, respectively.

Interest income: Interest income for the three month period ended June 30, 2018 decreased by \$0.6 million to \$2.0 million compared to \$2.5 million for the three month period ended June 30, 2017. Liquidity and Capital Resources

Our primary short-term liquidity needs are to fund general working capital requirements, dry docking expenditures, minimum cash balance maintenance as per our credit facility agreements and debt repayment, and other obligations from time to time, while our long-term liquidity needs primarily relate to expansion and investment capital expenditures and other maintenance capital expenditures and debt repayment. Expansion capital expenditures are primarily for the purchase or construction of vessels to the extent the expenditures increase the operating capacity of or revenue generated by our fleet, while maintenance capital expenditures primarily consist of dry docking expenditures and expenditures to replace vessels in order to maintain the operating capacity of or revenue generated by our fleet. We anticipate that our primary sources of funds for our short-term liquidity needs will be cash flows from operations, long-term borrowings and proceeds from asset sales. As of June 30, 2018, Navios Acquisition's current assets totaled \$86.6 million, while current liabilities totaled \$82.5 million, resulting in a positive working capital position of \$4.1 million. Navios Acquisition's cash forecast indicates that it will generate sufficient cash for at least the next 12 months following August 23, 2018 to make the required principal and interest payments on its indebtedness, provide for the normal working capital requirements of the business and remain in a positive working capital position. Generally, our long-term sources of funds derive from cash from operations, long-term bank borrowings and other debt or equity financings. We expect that we will rely upon cash from operations and upon external financing sources, including bank borrowings, to fund acquisitions, expansion and investment capital expenditures and other commitments we have entered into. We cannot assure you that we will be able to secure adequate financing or obtaining additional funds on favorable terms, to meet our liquidity needs.

Navios Acquisition may use funds to repurchase its outstanding capital stock and/or indebtedness from time to time. Repurchases may be made in the open market, or through privately negotiated transactions or otherwise, in compliance with applicable laws, rules and regulations, at prices and on terms Navios Acquisition deems appropriate and subject to its cash requirements for other purposes, compliance with the covenants under Navios Acquisition's debt agreements, and other factors management deems relevant.

In February 2018, the Board of Directors of Navios Acquisition authorized a stock repurchase program for up to \$25.0 million of Navios Acquisition's common stock, for two years. Stock repurchases will be made from time to time for cash in open market transactions at prevailing market prices or in privately negotiated transactions. The timing and amount of repurchases under the program will be determined by management based upon market conditions and other factors. Repurchases may be made pursuant to a program adopted under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. The program does not require any minimum repurchase or any specific number or amount of shares of common stock and may be suspended or reinstated at any time in Navios Acquisition's discretion and without notice. The Board of Directors will review the program periodically. Repurchases are subject to restrictions under Navios Acquisition's credit facilities and indenture. As of August 22, 2018, the Company has repurchased 7,626,619 shares of common stock, at a total cost of approximately \$6.0 million.

EBITDA in this document represents net (loss)/income before interest and finance costs, before depreciation and amortization and before income taxes. Adjusted EBITDA in this document represents EBITDA before the net negative effect on equity/ (loss) in net earnings of affiliated companies due to sale of the Shinyo Kannika by Navios Midstream to an unaffiliated third party, gain on sale of vessel, stock-based compensation and other-than-temporary-impairment loss on equity investment.

We use Adjusted EBITDA as liquidity measure and reconcile EBITDA and Adjusted EBITDA to net cash provided by/ (used in) operating activities, the most comparable U.S. GAAP liquidity measure. EBITDA in this document is calculated as follows: net cash provided by/(used in) operating activities adding back, when applicable and as the case may be, the effect of: (i) net increase/(decrease) in operating assets; (ii) net (increase)/decrease in operating liabilities; (iii) net interest cost; (iv) amortization of deferred finance costs and other related expenses; (v) equity/ (loss) in net earnings of affiliated companies, net of dividends received; (vi) payments for dry dock and special survey costs; (vii) impairment charges; (viii) gain/ loss on sale of assets; (ix) gain/ (loss) on debt repayment; and (x) stock-based compensation. Navios Acquisition believes that EBITDA and Adjusted EBITDA are each the basis upon which liquidity can be assessed and present useful information to investors regarding Navios Acquisition's ability to service and/or incur indebtedness, pay capital expenditures, meet working capital requirements and pay dividends. Navios Acquisition also believes that EBITDA and Adjusted EBITDA are used: (i) by potential lenders to evaluate potential transactions; (ii) to evaluate and price potential acquisition candidates; and (iii) by securities analysts, investors and other interested parties in the evaluation of companies in our industry.

EBITDA and Adjusted EBITDA have limitations as an analytical tool, and should not be considered in isolation or as a substitute for the analysis of Navios Acquisition's results as reported under U.S. GAAP. Some of these limitations are: (i) EBITDA and Adjusted EBITDA do not reflect changes in, or cash requirements for, working capital needs; and (ii) although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future. EBITDA and Adjusted EBITDA do not reflect any cash requirements for such capital expenditures. Because of these limitations, EBITDA and Adjusted EBITDA should not be considered as a principal indicator of Navios Acquisition's performance. Furthermore, our calculation of EBITDA and Adjusted EBITDA may not be comparable to that reported by other companies due to differences in methods of calculation.

Adjusted EBITDA, for the three month period ended June 30, 2018 decreased by approximately \$16.1 million to \$11.0 million, as compared to \$27.1 million for the same period of 2017. The decrease in Adjusted EBITDA was mainly due to a: (a) \$17.0 million decrease in revenue, as described above; (b) \$0.9 million increase in general and administrative expenses (excluding stock based compensation); (c) \$0.8 million increase in time charter expenses mainly due to the accrued backstop commitment to Navios Midstream; and (d) \$1.0 million increase in other (expense)/ income, net; partially mitigated by a: (i) \$2.9 million increase in equity/(loss) in net earnings of affiliated companies; and (ii) \$0.8 million decrease in management fees, due to the sale of the Nave Galactic to Navios Midstream in March 2018, which was partially offset by the amendment to the fees under the Management Agreement.

Adjusted EBITDA, for the six month period ended June 30, 2018 decreased by approximately \$38.5 million to \$26.0 million, as compared to \$64.5 million for the same period of 2017. The decrease in Adjusted EBITDA was mainly due to a: (a) \$35.3 million decrease in revenue, as described above; (b) \$3.4 million increase in time charter expenses mainly due to the accrued backstop commitment to Navios Midstream; (c) \$1.1 million increase in general and administrative expenses (excluding stock based compensation); (d) \$1.2 million increase in other (expense)/ income, net; partially mitigated by a: (i) \$1.8 million increase in equity/(loss) in net earnings of affiliated companies; and (ii) \$0.8 million decrease in management fees, due to the sale of the Nave Galactic to Navios Midstream in March 2018, which was partially offset by the amendment to the fees under the Management Agreement.

Quantitative and Qualitative Disclosures about Market Risks

Foreign Exchange Risk

Our functional and reporting currency is the U.S. dollar. We engage in worldwide commerce with a variety of entities. Although our operations may expose us to certain levels of foreign currency risk, our transactions are predominantly U.S. dollar denominated. Transactions in currencies other than U.S. dollars are translated at the exchange rate in effect at the date of each transaction. Differences in exchange rates during the period between the date a transaction denominated in a foreign currency is consummated and the date on which it is either settled or translated, are recognized in the statements of operations.

[Table of Contents](#)

Interest Rate Risk

As of June 30, 2018, Navios Acquisition had a total of \$1,035.7 million in long-term and short-term indebtedness. Borrowings under our credit facilities bear interest at rates based on a premium over U.S. \$ LIBOR except for the interest rate on the Existing Notes and the Additional Notes which is fixed. Therefore, we are exposed to the risk that our interest expense may increase if interest rates rise. For the six month period ended June 30, 2018, we paid interest on our outstanding debt at a weighted average interest rate of 6.87%. A 1% increase in LIBOR would have increased our interest expense for the six month period ended June 30, 2018 by \$1.9 million.

Concentration of Credit Risk

Financial instruments, which potentially subject us to significant concentrations of credit risk, consist principally of trade accounts receivable. We closely monitor our exposure to customers for credit risk. We have policies in place to ensure that we trade with customers with an appropriate credit history. For the six month period ended June 30, 2018, Navig8 and Mansel accounted for 39.9% and 12.7%, respectively, of Navios Acquisition's revenue. For the year ended December 31, 2017, Navig8, Mansel and Shell accounted for 31.9%, 14.3% and 13.7%, respectively, of Navios Acquisition's revenue.

Cash and Cash Equivalents

Cash deposits and cash equivalents in excess of amounts covered by government-provided insurance are exposed to loss in the event of non-performance by financial institutions. Navios Acquisition does maintain cash deposits and equivalents in excess of government-provided insurance limits. Navios Acquisition also minimizes exposure to credit risk by dealing with a diversified group of major financial institutions.

Inflation

Inflation has had a minimal impact on vessel operating expenses and general and administrative expenses. Our management does not consider inflation to be a significant risk to expenses in the current and foreseeable economic environment.

Recent Accounting Pronouncements

In January 2017, FASB issued Accounting Standard Update ("ASU") 2017-03 "Accounting Changes and Error Corrections (Topic 250) and Investments-Equity Method and Joint Ventures (Topic 323)". The ASU amends the Codification for SEC staff announcements made at recent Emerging Issues Task Force (EITF) meetings. The SEC guidance that specifically relates to our consolidated financial statement was from the September 2016 meeting, where the SEC staff expressed their expectations about the extent of disclosures registrants should make about the effects of the new FASB guidance as well as any amendments issued prior to adoption, on revenue (ASU 2014-09), leases (ASU 2016-02) and credit losses on financial instruments (ASU 2016-13) in accordance with SAB Topic 11.M. Registrants are required to disclose the effect that recently issued accounting standards will have on their financial statements when adopted in a future period. In cases where a registrant cannot reasonably estimate the impact of the adoption, then additional qualitative disclosures should be considered. The ASU incorporates these SEC staff views into ASC 250 and adds references to that guidance in the transition paragraphs of each of the three new standards. The adoption of this ASU did not have a material effect on the Company's consolidated financial statements.

In June 2016, FASB issued ASU 2016-13, "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." This standard requires entities to measure all expected credit losses of financial assets held at a reporting date based on historical experience, current conditions, and reasonable and supportable forecasts in order to record credit losses in a more timely matter. ASU 2016-13 also amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The standard is effective for interim and annual reporting periods beginning after December 15, 2019, although early adoption is permitted for interim and annual periods beginning after December 15, 2018. The Company is currently assessing the impact that adopting this new accounting guidance will have on its consolidated financial statements.

Critical Accounting Policies

Navios Acquisition's interim consolidated financial statements have been prepared in accordance with US GAAP. The preparation of these financial statements requires Navios Acquisition to make estimates in the application of our accounting policies based on the best assumptions, judgments and opinions of management. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are those that reflect significant judgments or uncertainties, and potentially result in materially different results under different assumptions and conditions. Other than as described below, all significant accounting policies are as described in Note 2 to the consolidated financial statements included in the Company's Annual Report on Form 20-F for the year ended December 31, 2017 filed with the SEC on April 5, 2018.

Investments in Equity Securities

Navios Acquisition evaluates its investment in Navios Midstream, Navios Europe I and Navios Europe II for OTTI on a quarterly basis. Consideration is given to (i) the length of time and the extent to which the fair value has been less than the carrying value, (ii) the financial condition and near-term prospects of Navios Midstream, Navios Europe I and Navios Europe II, and (iii) the intent and ability of the Company to retain its investment in Navios Midstream, Navios Europe I and Navios Europe II for a period of time sufficient to allow for any anticipated recovery in fair value.

Navios Acquisition considers whether the fair values of its equity method investments have declined below their carrying values whenever adverse events or changes in circumstances indicate that the carrying value may not be recoverable. If we consider any such decline to be other-than-temporary (based on various factors, including historical financial results, economic and industry events resulting in changes in the affiliate's trading performance and the overall health of the affiliate's industry), then we would write down the carrying amount of the investment to its estimated fair value.

As of June 30, 2018, the carrying amount of the investment in Navios Midstream was \$104.7 million or \$8.31 per unit, which represented our total ownership interest in the Partnership of 59.0%. The estimated market value of this investment was determined with reference to the quoted price of the common units of \$3.75 per unit as of June 30, 2018, which ranged from a high of \$10.32 per unit to a low of \$3.29 per unit during the six months ended June 30, 2018. Management considers the volatility and decline in the market value of its investment in Navios Midstream to be temporary and no adjustment to the carrying value of our investment was deemed necessary as of June 30, 2018 as we have both the ability and intent to hold our investment in Navios Midstream (See also Note 6).

As of June 30, 2018, the market value of the investment in Navios Midstream was \$47.3 million and was determined with reference to the quoted price of the common units of \$3.75 per unit, which ranged from a high of \$10.32 per unit to a low of \$3.29 per unit during the six months ended June 30, 2018. Management considers the volatility and decline in the market value of its investment in Navios Midstream to be temporary and no adjustment to the carrying value of our investment was deemed necessary as of June 30, 2018 as we have both the ability and intent to hold our investment in Navios Midstream.

However, should these conditions continue to persist for an extended period of time, a conclusion could be reached in the future that an impairment exists that is "other-than-temporary", at which time we would write down the carrying amount of our investment to its estimated fair value which may have a material adverse impact on our results of operations in the period recognized.

NOTE 1: DESCRIPTION OF ORGANIZATION AND BUSINESS OPERATIONS

Navios Maritime Acquisition Corporation (“Navios Acquisition” or the “Company”) (NYSE: NNA) owns a large fleet of modern crude oil, refined petroleum product and chemical tankers providing worldwide marine transportation services. The Company’s strategy is to charter its vessels to international oil companies, refiners and large vessel operators under long-, medium- and short-term charters. The Company is committed to providing quality transportation services and developing and maintaining long-term relationships with its customers. The operations of Navios Acquisition are managed by a subsidiary of Navios Maritime Holdings Inc. (“Navios Holdings”).

Navios Acquisition was incorporated in the Republic of Marshall Islands on March 14, 2008. On July 1, 2008, Navios Acquisition completed its initial public offering (“IPO”). On May 28, 2010, Navios Acquisition consummated the vessel acquisitions which constituted its initial business combination. Following such transaction, Navios Acquisition commenced its operations as an operating company.

In November 2014, Navios Maritime Midstream Partners L.P. (“Navios Midstream”), a company formed as a subsidiary of Navios Acquisition, completed an IPO of its common units in the United States and is listed on the NYSE under the symbol “NAP”.

As of June 30, 2018, Navios Acquisition owned a 59.0% limited partner interest in Navios Midstream, which included a 2.0% general partner interest.

As of June 30, 2018, Navios Holdings had 45.0% of the voting power and 48.3% of the economic interest in Navios Acquisition.

As of June 30, 2018, Navios Acquisition had outstanding: 145,244,205 shares of common stock and 1,000 shares of Series C Convertible Preferred Stock held by Navios Holdings.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation: The accompanying interim condensed consolidated financial statements are unaudited, but, in the opinion of management, reflect all adjustments for a fair statement of Navios Acquisition’s consolidated balance sheets, statement of changes in equity, statements of operations and cash flows for the periods presented. The results of operations for the interim periods are not necessarily indicative of results for the full year. The footnotes are condensed as permitted by the requirements for interim financial statements and accordingly, do not include information and disclosures required under accounting principles generally accepted in the United States of America (“U.S. GAAP”) for complete financial statements. All such adjustments are deemed to be of a normal recurring nature. These interim financial statements should be read in conjunction with the Company’s consolidated financial statements and notes included in Navios Acquisition’s 2017 Annual Report filed on Form 20-F with the Securities and Exchange Commission (“SEC”).

Change in accounting principle: The Company historically presented changes in restricted cash and cash equivalents depending on the nature of the cash flow within the consolidated statement of cash flows. During the first quarter of 2018, the Company adopted the guidance codified in ASU 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash (ASU 2016-18), which requires that restricted cash and cash equivalents be included as components of total cash and cash equivalents as presented on the statement of cash flows. The recognition and measurement guidance for restricted cash is not affected. The Company applied this guidance retrospectively to all prior periods presented in the Company’s financial statements.

The reclassification of restricted cash in the statement of cash flows does not impact net income as previously reported or any prior amounts reported on the statements of operations, or balance sheet. The effect of the retrospective application of this change in accounting principle on the Company’s statement of cash flows for the six months ended June 30, 2017 resulted in a decrease of operating cash flows in the amount of \$33 and a decrease of financing cash flows in the amount of \$2,085 with a corresponding decrease in cash and cash equivalents of \$2,118.

(b) Principles of consolidation: The accompanying consolidated financial statements include the accounts of Navios Acquisition, a Marshall Islands corporation, and its majority owned subsidiaries. All significant intercompany balances and transactions have been eliminated in the consolidated statements.

NAVIOS MARITIME ACQUISITION CORPORATION
UNAUDITED CONDENSED NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in thousands of U.S. Dollars except share and per share data)

The Company also consolidates entities that are determined to be variable interest entities (“VIEs”) as defined in the accounting guidance, if it determines that it is the primary beneficiary. A variable interest entity is defined as a legal entity where either (a) equity interest holders as a group lack the characteristics of a controlling financial interest, including decision making ability and an interest in the entity’s residual risks and rewards, or (b) the equity holders have not provided sufficient equity investment to permit the entity to finance its activities without additional subordinated financial support, or (c) the voting rights of some investors are not proportional to their obligations to absorb the expected losses of the entity, their rights to receive the expected residual returns of the entity, or both and substantially all of the entity’s activities either involve or are conducted on behalf of an investor that has disproportionately few voting rights.

Based on internal forecasts and projections that take into account reasonably possible changes in our trading performance, management believes that the Company has adequate financial resources to continue in operation and meet its financial commitments, including but not limited to capital expenditures and debt service obligations, for a period of at least twelve months from the date of issuance of these interim condensed consolidated financial statements. Accordingly, the Company continues to adopt the going concern basis in preparing its financial statements.

(c) Equity method investments: Affiliates are entities over which the Company generally has between 20% and 50% of the voting rights, or over which the Company has significant influence, but it does not exercise control. Investments in these entities are accounted for under the equity method of accounting. Under this method, the Company records an investment in the stock of an affiliate at cost, and adjusts the carrying amount for its share of the earnings or losses of the affiliate subsequent to the date of investment and reports the recognized earnings or losses in income. Dividends received from an affiliate reduce the carrying amount of the investment. The Company recognizes gains and losses in earnings for the issuance of shares by its affiliates, provided that the issuance of such shares qualifies as a sale of such shares. When the Company’s share of losses in an affiliate equals or exceeds its interest in the affiliate, the Company does not recognize further losses, unless the Company has incurred obligations or made payments on behalf of the affiliate.

Navios Acquisition evaluates its equity method investments, for other than temporary impairment, on a quarterly basis. Consideration is given to (1) the length of time and the extent to which the fair value has been less than the carrying value, (2) the financial condition and near-term prospects and (3) the intent and ability of the Company to retain its investments for a period of time sufficient to allow for any anticipated recovery in fair value.

(d) Subsidiaries: Subsidiaries are those entities in which the Company has an interest of more than one half of the voting rights and/or otherwise has power to govern the financial and operating policies. The acquisition method of accounting is used to account for the acquisition of subsidiaries if deemed to be a business combination. The cost of an acquisition is measured as the fair value of the assets given up, shares issued or liabilities undertaken at the date of acquisition. The excess of the cost of acquisition over the fair value of the net assets acquired and liabilities assumed is recorded as goodwill.

As of June 30, 2018 and 2017 the entities included in these consolidated financial statements were:

(e) Use of estimates: The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. On an on-going basis, management evaluates the estimates and judgments, including those related to uncompleted voyages, future dry dock dates, the carrying value of investments in affiliates, the selection of useful lives for tangible assets and scrap value, expected future cash flows from long-lived assets to support impairment tests, provisions necessary for accounts receivable, provisions for legal disputes and contingencies. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates under different assumptions and/or conditions.

(f) Vessels, net: Vessels are stated at historical cost, which consists of the contract price, delivery and acquisition expenses and capitalized interest costs while under construction. Vessels acquired in an asset acquisition or in a business combination are recorded at fair value. Subsequent expenditures for major improvements and upgrading are capitalized, provided they appreciably extend the life, increase the earning capacity or improve the efficiency or safety of the vessels. Expenditures for routine maintenance and repairs are expensed as incurred.

Depreciation is computed using the straight line method over the useful life of the vessels, after considering the estimated residual value. Management estimates the residual values of our tanker vessels based on a scrap value of \$360 per lightweight ton, as we believe these levels are common in the shipping industry. Residual values are periodically reviewed and revised to recognize changes in conditions, new regulations or other reasons. Revisions of residual values affect the depreciable amount of the vessels and affect depreciation expense in the period of the revision and future periods.

Management estimates the useful life of our vessels to be 25 years from the vessel's original construction. However, when regulations place limitations over the ability of a vessel to trade on a worldwide basis, its useful life is re-estimated to end at the date such regulations become effective.

(g) Vessels held for sale: Vessels are classified as "Vessels held for sale" when all of the following criteria are met: management has committed to a plan to sell the vessel; the vessel is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of vessels; an active program to locate a buyer and other actions required to complete the plan to sell the vessel have been initiated; the sale of the vessel is probable and transfer of the vessel is expected to qualify for recognition as a completed sale within one year; the asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value and actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn. Vessels classified as held for sale are measured at the lower of their carrying amount or fair value less cost to sell. These vessels are not depreciated once they meet the criteria to be held for sale.

(h) Impairment of long-lived asset group: Vessels, other fixed assets and other long-lived assets held and used by Navios Acquisition are reviewed periodically for potential impairment whenever events or changes in circumstances indicate that the carrying amount of a particular asset may not be fully recoverable. Navios Acquisition's management evaluates the carrying amounts and periods over which long-lived assets are depreciated to determine if events or changes in circumstances have occurred that would require modification to their carrying values or useful lives. In evaluating useful lives and carrying values of long-lived assets, certain indicators of potential impairment are reviewed such as, undiscounted projected operating cash flows, vessel sales and purchases, business plans and overall market conditions.

Undiscounted projected net operating cash flows are determined for each asset group (consisting of the individual vessel and the intangible with respect to the time charter agreement to that vessel) and compared to the vessel carrying value and related carrying value of the intangible with respect to the time charter agreement attached to that vessel or the carrying value of deposits for new buildings, if any. Within the shipping industry, vessels are often bought and sold with a charter attached. The value of the charter may be favorable or unfavorable when comparing the charter rate to the then current market rates. The loss recognized either on impairment (or on disposition) will reflect the excess of carrying value over fair value (selling price) for the vessel individual asset group.

(i) Revenue Recognition: On January 1, 2018, the Company adopted the provisions of *ASC 606, Revenue from Contracts with Customers* (ASC 606). The guidance provides a unified model to determine how revenue is recognized. In doing so, the Company makes judgments including identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price, and allocating the transaction price to each performance obligation. Revenue is recognized when (or as) the Company transfers promised goods or services to its customers in amounts that reflect the consideration to which the company expects to be entitled to in exchange for those goods or services, which occurs when (or as) the Company satisfies its contractual obligations and transfers control of the promised goods or services to its customers. Revenues are recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In determining the appropriate amount of revenue to be recognized as it fulfills its obligations under its agreements, the Company performs the following steps: (i) identification of the promised goods or services in the contract; (ii) determination of whether the promised goods or services are performance obligations, including whether they are distinct in the context of the contract; (iii) measurement of the transaction price, including the constraint on variable consideration; (iv) allocation of the transaction price to the performance obligations based on estimated selling prices; and (v) recognition of revenue when (or as) the Company satisfies each performance obligation.

The Company's contract revenues from time chartering and pooling arrangements are governed by ASU 2016-02 "Leases". Upon adoption of ASC 606 and ASC 842, the timing and recognition of earnings from the pool arrangements and time charter contracts to which the Company is party did not change from previous practice. The Company has determined to recognize lease revenue as a combined single lease component for all time charters (operating leases) as the related lease component and non lease component will

NAVIOS MARITIME ACQUISITION CORPORATION

(Expressed in thousands of U.S. Dollars except share and per share data)

have the same timing and pattern of the revenue recognition of the combined single lease component. The performance obligations in a time charter contract are satisfied over term of the contract beginning when the vessel is delivered to the charterer until it is redelivered back to the Company. As a result of the adoption of these standards, there was no effect on the Company's opening retained earnings, consolidated balance sheets and consolidated statements of operations.

The Company's revenues earned under voyage contracts (revenues for the transportation of cargo) were previously recognized ratably over the estimated relative transit time of each voyage. A voyage was deemed to commence when a vessel was available for loading and was deemed to end upon the completion of the discharge of the current cargo. Estimated losses on voyages are provided for in full at the time such losses become evident. Under a voyage charter, a vessel is provided for the transportation of specific goods between specific ports in return for payment of an agreed upon freight per ton of cargo. Upon adoption of ASC 606, the Company will recognize revenue ratably from port of loading to when the charterer's cargo is discharged as well as defer costs that meet the definition of "costs to fulfill a contract" and relate directly to the contract. Revenues earned under voyage contracts amounted to \$0 and \$355 for the three month periods ended June 30, 2018 and 2017, respectively. For the six month periods ended June 30, 2018 and 2017, revenues under voyage contracts amounted to \$0 and \$2,068, respectively.

Revenues from time chartering of vessels are accounted for as operating leases and are thus recognized on a straight-line basis as the average revenue over the rental periods of such charter agreements, as service is performed. A time charter involves placing a vessel at the charterers' disposal for a period of time during which the charterer uses the vessel in return for the payment of a specified daily hire rate. Under time charters, operating costs such as for crews, maintenance and insurance are typically paid by the owner of the vessel. Revenues from time chartering of vessels amounted to \$28,846 and \$47,029 for the three month periods ended June 30, 2018 and 2017, respectively. For the six month periods ended June 30, 2018 and 2017, revenues from time chartering of vessels amounted to \$61,558 and \$95,739, respectively.

Profit sharing revenues are calculated at an agreed percentage of the excess of the charterer's average daily income (calculated on a quarterly or half-yearly basis) over an agreed amount and accounted for on an accrual basis based on provisional amounts and for those contracts that provisional accruals cannot be made due to the nature of the profit share elements, these are accounted for on the actual cash settlement or when such revenue becomes determinable. Profit sharing for the three month periods ended June 30, 2018 and 2017 amounted to \$(11) and \$162, respectively. For the six month periods ended June 30, 2018 and 2017, profit sharing revenues amounted to \$437 and \$215, respectively.

For vessels operating in pooling arrangements, the Company earns a portion of total revenues generated by the pool, net of expenses incurred by the pool. The amount allocated to each pool participant vessel, including the Company's vessels, is determined in accordance with an agreed-upon formula, which is determined by points awarded to each vessel in the pool based on the vessel's age, design and other performance characteristics. Revenue under pooling arrangements is accounted for as variable rate operating leases on the accrual basis and is recognized in the period in which the variability is resolved. The Company recognizes net pool revenue on a monthly and quarterly basis, when the vessel has participated in a pool during the period and the amount of pool revenue can be estimated reliably based on the pool report. The allocation of such net revenue may be subject to future adjustments by the pool however, such changes are not expected to be material. Revenue for vessels operating in pooling arrangements amounted to \$12,644 and \$10,912 for the three month periods ended June 30, 2018 and 2017, respectively. For the six month periods ended June 30, 2018 and 2017, revenue operating in pooling arrangements amounted to \$25,634 and \$24,918, respectively.

Revenues are recorded net of address commissions. Address commissions represent a discount provided directly to the charterers based on a fixed percentage of the agreed upon charter or freight rate. Since address commissions represent a discount (sales incentive) on services rendered by the Company and no identifiable benefit is received in exchange for the consideration provided to the charterer, these commissions are presented as a reduction of revenue.

Adoption of new accounting standards

The Company elected to early adopt the requirements of Accounting Standard Update ("ASU") 2016-02, "Leases (Topic 842)" effective from January 1, 2018 using the modified retrospective method and has also elected the use of the practical expedients. The early adoption of this ASU did not have a material effect on the Company's consolidated balance sheets, consolidated statements of operations and opening retained earnings.

On January 1, 2018, the Company adopted ASU No. 2014-09, "Revenue from Contracts with Customers" and the related amendments ("ASC 606" or "the new revenue standard") using the modified retrospective method, requiring to recognize the cumulative effect of adopting this guidance as an adjustment to the 2018 opening balance of retained earnings and not retrospectively adjusting prior periods.

Under the new guidance, there is a five-step model to apply to revenue recognition. The five-steps consist of: (1) determination of whether a contract, an agreement between two or more parties that creates legally enforceable rights and obligations, exists; (2) identification of the performance obligations in the contract; (3) determination of the transaction price; (4) allocation of the transaction price to the performance obligations in the contract; and (5) recognition of revenue when (or as) the performance obligation is satisfied.

As a result of adoption, there was no cumulative impact to the Company's retained earnings at January 1, 2018. The comparative information has not been restated and continues to be reported under the accounting standards in effect for those periods. The Company expects the impact of the adoption of the new standard to be immaterial to its net income on an ongoing basis.

In August 2016, the FASB issued Accounting Standards Update No. 2016-15, "Statement of Cash Flows: Classification of Certain Cash Receipts and Cash Payments" ("ASU 2016-15"). This Update addresses eight specific cash flow issues with the objective of reducing the existing diversity in practice. The Company adopted the new guidance on January 1, 2018 and it did not have a material impact on the consolidated results of operations, financial condition, or cash flows.

Recent Accounting Pronouncements

In January 2017, FASB issued Accounting Standard Update (“ASU”) 2017-03 “Accounting Changes and Error Corrections (Topic 250) and Investments-Equity Method and Joint Ventures (Topic 323)”. The ASU amends the Codification for SEC staff announcements made at recent Emerging Issues Task Force (EITF) meetings. The SEC guidance that specifically relates to our consolidated financial statement was from the September 2016 meeting, where the SEC staff expressed their expectations about the extent of disclosures registrants should make about the effects of the new FASB guidance as well as any amendments issued prior to adoption, on revenue (ASU 2014-09), leases (ASU 2016-02) and credit losses on financial instruments (ASU 2016-13) in accordance with SAB Topic 11.M. Registrants are required to disclose the effect that recently issued accounting standards will have on their financial statements when adopted in a future period. In cases where a registrant cannot reasonably estimate the impact of the adoption, then additional qualitative disclosures should be considered. The ASU incorporates these SEC staff views into ASC 250 and adds references to that guidance in the transition paragraphs of each of the three new standards. The adoption of this ASU did not have a material effect on the Company’s consolidated financial statements.

In June 2016, FASB issued ASU 2016-13, “Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.” This standard requires entities to measure all expected credit losses of financial assets held at a reporting date based on historical experience, current conditions, and reasonable and supportable forecasts in order to record credit losses in a more timely matter. ASU 2016-13 also amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The standard is effective for interim and annual reporting periods beginning after December 15, 2019, although early adoption is permitted for interim and annual periods beginning after December 15, 2018. The Company is currently assessing the impact that adopting this new accounting guidance will have on its consolidated financial statements.

NOTE 3: CASH AND CASH EQUIVALENTS

Cash and cash equivalents consisted of the following:

	June 30, 2018	December 31, 2017
Cash on hand and at banks	\$ 26,208	\$ 60,088
Short-term deposits	23,258	21,063
Total cash and cash equivalents	\$ 49,466	\$ 81,151

Short-term deposits and highly liquid funds relate to amounts held in banks for general financing purposes and represent deposits with an original maturity of less than three months.

Cash deposits and cash equivalents in excess of amounts covered by government-provided insurance are exposed to loss in the event of non-performance by financial institutions. The Company does maintain cash deposits and equivalents in excess of government-provided insurance limits. The Company also minimizes exposure to credit risk by dealing with a diversified group of major financial institutions.

In restricted cash there is an amount of \$2,598 as of June 30, 2018 and \$5,307 as of December 31, 2017 held in retention accounts in order to service debt and interest payments, as required by certain of Navios Acquisition’s credit facilities.

NOTE 6: INVESTMENT IN AFFILIATES

Navios Europe I

On October 9, 2013, Navios Holdings, Navios Acquisition and Navios Maritime Partners L.P. (“Navios Partners”) established Navios Europe I and had economic interests of 47.5%, 47.5% and 5.0%, respectively. On December 18, 2013, Navios Europe I acquired ten vessels for aggregate consideration consisting of: (i) cash which was funded with the proceeds of senior loan facility (the “Senior Loan I”) and loans aggregating \$10,000 from Navios Holdings, Navios Acquisition and Navios Partners (collectively, the “Navios Term Loans I”); and (ii) the assumption of a junior participating loan facility (the “Junior Loan I”). In addition to the Navios Term Loans I, Navios Holdings, Navios Acquisition and Navios Partners will also make available to Navios Europe I revolving loans up to \$24,100 to fund working capital requirements (collectively, the “Navios Revolving Loans I”). Effective November 2014 and as of June 30, 2018, Navios Holdings, Navios Acquisition and Navios Partners had a voting interest of 50%, 50% and 0%, respectively.

On an ongoing basis, Navios Europe I is required to distribute cash flows (after payment of operating expenses, amounts due pursuant to the terms of the Senior Loan I and repayments of the Navios Revolving Loans I) according to a defined waterfall calculation.

The Navios Term Loans I will be repaid from the future sale of vessels owned by Navios Europe I and is deemed to be the initial investment by Navios Acquisition. Navios Acquisition evaluated its investment in Navios Europe I under ASC 810 and concluded that Navios Europe I is a VIE and that the Company is not the party most closely associated with Navios Europe I and, accordingly, is not the primary beneficiary of Navios Europe I.

Navios Acquisition further evaluated its investment in the common stock of Navios Europe I under ASC 323 and concluded that it has the ability to exercise significant influence over the operating and financial policies of Navios Europe I and, therefore, its investment in Navios Europe I is accounted for under the equity method.

The fleet of Navios Europe I is managed by subsidiaries of Navios Holdings.

As of June 30, 2018 and December 31, 2017, the estimated maximum potential loss by Navios Acquisition in Navios Europe I would have been \$25,713 and \$24,147, respectively, which represented the Company’s carrying value of its investment of \$4,750 (December 31, 2017: \$4,750) the Company’s portion of the carrying balance of the Navios Revolving Loans I including accrued interest on the Navios Term Loans I of \$15,458 (December 31, 2017: \$14,944), which is included under “Due from related parties, long-term” and the accrued interest income on the Navios Revolving Loans I in the amount of \$5,505 (December 31, 2017: \$4,453) which is included under “Due from related parties, short-term”. Refer to Note 11 for the terms of the Navios Revolving Loans I.

Income recognized in “Equity/ (loss) in net earnings of affiliated companies” for the three month period ended June 30, 2018 was \$262 (June 30, 2017: \$215). Income recognized in “Equity/ (loss) in net earnings of affiliated companies” for the six month period ended June 30, 2018 was \$514 (June 30, 2017: \$483).

Accounting for basis difference

The initial investment in Navios Europe I recorded under the equity method of \$4,750, at the inception included the Company’s share of the basis difference between the fair value and the underlying book value of the assets of Navios Europe I, which amounted to \$6,763. This difference is amortized through “Equity/ (loss) in net earnings of affiliated companies” over the remaining life of Navios Europe I. As of June 30, 2018 and December 31, 2017, the unamortized difference between the carrying amount of the investment in Navios Europe I and the amount of the Company’s underlying equity in net assets of Navios Europe I was \$3,696, and \$4,034, respectively.

NOTE 14: SEGMENT INFORMATION

Navios Acquisition reports financial information and evaluates its operations by charter revenues. Navios Acquisition does not use discrete financial information to evaluate operating results for each type of charter. As a result, management reviews operating results solely by revenue per day and operating results of the fleet and thus Navios Acquisition has determined that it operates under one reportable segment.

The following table sets out operating revenue by geographic region for Navios Acquisition's reportable segment. Revenue is allocated on the basis of the geographic region in which the customer is located. Tanker vessels operate worldwide. Revenues from specific geographic region which contribute over 10% of total revenue are disclosed separately.

Revenue by Geographic Region

Vessels operate on a worldwide basis and are not restricted to specific locations. Accordingly, it is not possible to allocate the assets of these operations to specific countries.

NOTE 16: INCOME TAXES

Marshall Islands, Cayman Islands, British Virgin Islands, and Hong Kong, do not impose a tax on international shipping income. Under the laws of these countries, the countries of incorporation of the Company and its subsidiaries and /or vessels' registration, the companies are subject to registration and tonnage taxes which have been included in the daily management fee.

In accordance with the currently applicable Greek law, foreign flagged vessels that are managed by Greek or foreign ship management companies having established an office in Greece are subject to duties towards the Greek state which are calculated on the basis of the relevant vessels' tonnage. The payment of said duties exhausts the tax liability of the foreign ship owning company and the relevant manager against any tax, duty, charge or contribution payable on income from the exploitation of the foreign flagged vessel. In the event that tonnage tax and/or similar taxes/duties are paid to the vessel's flag state, these are deducted from the amount of the duty to be paid in Greece. The amount included in Navios Acquisition's statements of operations related to the Greek Tonnage tax for the six months ended June 30, 2018, and 2017 was \$772 and \$480, respectively, and for the three months ended June 30, 2018 and 2017, it was \$274 and \$68, respectively.

Pursuant to Section 883 of the Internal Revenue Code of the United States (the "Code"), U.S. source income from the international operation of ships is generally exempt from U.S. income tax if the company operating the ships meets certain incorporation and ownership requirements. Among other things, in order to qualify for this exemption, the company operating the ships must be incorporated in a country, which grants an equivalent exemption from income taxes to U.S. corporations. All the Navios Acquisition's ship-operating subsidiaries satisfy these initial criteria. In addition, these companies must meet an ownership test. Subject to proposed regulations becoming finalized in their current form, the management of Navios Acquisition believes by virtue of a special rule applicable to situations where the ship operating companies are beneficially owned by a publicly traded company like Navios Acquisition, the second criterion can also be satisfied based on the trading volume and ownership of the Company's shares, but no assurance can be given that this will remain so in the future.
