Ellington Residential Mortgage REIT Reports Third Quarter 2018 Results

OLD GREENWICH, Connecticut—November 5, 2018

Ellington Residential Mortgage REIT (NYSE: EARN) (the "Company") today reported financial results for the quarter ended September 30, 2018.

Highlights

- Net income of \$0.9 million, or \$0.07 per share.
- Core Earnings¹ of \$3.7 million, or \$0.29 per share, and Adjusted Core Earnings¹ of \$4.1 million, or \$0.32 per share.
- Book value of \$13.40 per share as of September 30, 2018, after giving effect to a third quarter dividend of \$0.37 per share.
- Net interest margin of 1.02%, and adjusted net interest margin² of 1.12%.
- Weighted average constant prepayment rate for the fixed-rate Agency specified pool portfolio of 8.36%.
- Dividend yield of 14.1% based on the November 2, 2018 closing stock price of \$10.48.
- Debt-to-equity ratio of 8.8:1 as of September 30, 2018; adjusted for unsettled purchases and sales, the debt-to-equity ratio was 8.7:1.
- Net mortgage assets-to-equity ratio of 7.9:1³ as of September 30, 2018.

Third Quarter 2018 Results

"Our third quarter results again demonstrated the effectiveness of our hedging and portfolio management to protect book value and bolster net income in a rising interest rate environment," stated Laurence Penn, Chief Executive Officer and President. "As interest rates rose and Agency RMBS prices declined in yet another quarter, the gains from our hedges along with positive carry from our investments more than offset the markdowns in our portfolio. Our hedging strategy continues to be a meaningful differentiator for EARN.

"We continue to believe that Agency RMBS offers attractive value today, with favorable prepayment fundamentals and yield spreads that remain near their widest levels in the past two years. We took advantage of the yield spread widening during the quarter to cover a portion of our TBA short positions and increase our net mortgage assets-to-equity ratio.

"During the first weeks of the fourth quarter, we have seen more opportunities to add assets at both higher yields and wider spreads, and expand our net interest margin and grow core earnings. At the same time, the return of volatility to the markets is underscoring the importance of our hedges to preserve book value."

¹ Core Earnings and Adjusted Core Earnings are non-GAAP financial measures. Adjusted Core Earnings represents Core Earnings excluding the effect of the Catch-up Premium Amortization Adjustment on interest income. See "Reconciliation of Core Earnings to Net Income (Loss)" below for an explanation regarding the calculation of Core Earnings, Adjusted Core Earnings, and the Catch-up Premium Amortization Adjustment.

² Adjusted net interest margin represents net interest margin excluding the effect of the Catch-up Premium Amortization Adjustment on interest income.

³ The Company defines its net mortgage assets-to-equity ratio as the net aggregate market value of its mortgage-backed securities (including the underlying market values of its long and short TBA positions) divided by total shareholders' equity. As of September 30, 2018 the market value of the Company's mortgage-backed securities and its net short TBA position was \$1.576 billion and \$(223.8) million, respectively, and total shareholders' equity was \$170.2 million.

Financial Results

The following table summarizes the Company's portfolio of RMBS as of September 30, 2018 and June 30, 2018:

(1) Represents the dollar amount (not shown in thousands) per \$100 of current principal of the price or cost for the security.

(2) Excludes Agency IOs.

The Company's overall RMBS portfolio decreased by 0.3% to \$1.576 billion as of September 30, 2018, as compared to \$1.580 billion as of June 30, 2018. The Company's Agency RMBS portfolio turnover was 18% for the quarter, which was modestly higher than the prior quarter. The Company's total investment in non-Agency RMBS was \$12.0 million as of both September 30, 2018 and June 30, 2018.

The primary drivers of net income for the quarter were strong net interest income on the Company's Agency RMBS investments and net realized and unrealized gains from its interest rate hedges. A portion of this income was offset by net realized and unrealized losses on the Company's Agency RMBS investments that occurred as Agency RMBS prices declined again during the third quarter. During the quarter the Company continued to hedge interest rate risk, primarily through the use of interest rate swaps, short positions in TBAs, U.S. Treasury securities, and futures.

The Company's non-Agency RMBS performed well during the quarter, driven by strong net interest income and net realized and unrealized gains. Fundamentals underlying non-Agency RMBS continue to remain strong, led by a stable housing market. To the extent that more attractive entry points develop in non-Agency RMBS, the Company may increase its capital allocation to this sector.

In the third quarter, Core Earnings and Adjusted Core Earnings were modestly lower than in the second quarter due to lower adjusted net interest margin, where higher asset yields quarter-over-quarter were more than offset by increases in repo borrowing rates.

Reconciliation of Core Earnings to Net Income (Loss)

Core Earnings consists of net income (loss), excluding realized and change in net unrealized gains and (losses) on securities and financial derivatives, and, if applicable, items of income or loss that are of a non-recurring nature. Core Earnings includes net realized and change in net unrealized gains (losses) associated with payments and accruals of periodic payments on interest rate swaps. Adjusted Core Earnings represents Core Earnings excluding the effect of the Catch-up Premium Amortization Adjustment on interest income. The Catch-up Premium Amortization Adjustment is a quarterly adjustment to premium amortization triggered by changes in actual and projected prepayments on the Company's Agency RMBS (accompanied by a corresponding offsetting adjustment to realized and unrealized gains and losses). The adjustment is calculated as of the beginning of each quarter based on the Company's then assumptions about cashflows and prepayments, and can vary significantly from quarter to quarter.

Core Earnings and Adjusted Core Earnings are supplemental non-GAAP financial measures. The Company believes that Core Earnings and Adjusted Core Earnings provide information useful to investors because they are metrics that it uses to assess its performance and to evaluate the effective net yield provided by the portfolio. Moreover, one of the Company's objectives is to

generate income from the net interest margin on the portfolio, and Core Earnings and Adjusted Core Earnings are used to help measure the extent to which this objective is being achieved. However, because Core Earnings and Adjusted Core Earnings are incomplete measures of the Company's financial results and differ from net income (loss) computed in accordance with GAAP, they should be considered as supplementary to, and not as substitutes for, net income (loss) computed in accordance with GAAP.

The following table reconciles, for the three-month periods ended September 30, 2018 and June 30, 2018, the Company's Core Earnings and Adjusted Core Earnings on a consolidated basis to the line on the Company's Consolidated Statement of Operations entitled Net Income (Loss), which the Company believes is the most directly comparable GAAP measure on its Consolidated Statement of Operations to Core Earnings:
