

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

- QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2019

OR

- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number: 001-35065

**WRIGHT MEDICAL GROUP N.V.**

(Exact name of registrant as specified in its charter)

**The Netherlands**

(State or other jurisdiction  
of incorporation or organization)

**98-0509600**

(I.R.S. Employer  
Identification No.)

**Prins Bernhardplein 200  
1097 JB Amsterdam, The Netherlands**

(Address of principal executive offices)

**None**

(Zip Code)

**(+31) 20 521 4777**

(Registrant's telephone number, including area code)

**Not applicable**

(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

<b>Title of each class</b>	<b>Trading Symbol(s)</b>	<b>Name of each exchange on which registered</b>
<b>Ordinary shares, par value €0.03 per share</b>	<b>WMGI</b>	<b>Nasdaq Global Select Market</b>

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.  Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).  Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer

Non-accelerated filer  Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  Yes  No

As of August 2, 2019, there were 126,678,118 ordinary shares outstanding.

WRIGHT MEDICAL GROUP N.V.

### SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This document may contain certain “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act), and that are subject to the safe harbor created by those sections. These statements reflect management’s current knowledge, assumptions, beliefs, estimates, and expectations and express management’s current view of future performance, results, and trends. Forward looking statements may be identified by their use of terms such as anticipate, believe, could, estimate, expect, intend, may, plan, predict, project, will, and other similar terms. Forward-looking statements are subject to a number of risks and uncertainties that could cause actual results to materially differ from those described in the forward-looking statements. The reader should not place undue reliance on forward-looking statements. Such statements are made as of the date of this report, and we undertake no obligation to update such statements after this date. Risks and uncertainties that could cause our actual results to materially differ from those described in forward-looking statements are discussed in our filings with the U.S. Securities and Exchange Commission (SEC) (including our most recent Annual Report on Form 10-K, which was filed with the SEC on February 27, 2019). By way of example and without implied limitation, such risks and uncertainties include:

- inability to achieve or sustain profitability;
- failure to achieve our financial guidance or projected goals and objectives, including long-term financial targets, in the time periods that we anticipate or announce publicly;
- failure to realize the anticipated benefits from previous acquisitions and dispositions, including our recent acquisition of Cartiva, Inc. (Cartiva);
- failure to obtain anticipated commercial sales of our AUGMENT® Bone Graft and AUGMENT® Injectable Bone Graft products;
- liability for product liability claims on hip/knee (OrthoRecon) products sold by Wright Medical Technology, Inc. (WMT) prior to the divestiture of the OrthoRecon business;
- risks and uncertainties associated with our metal-on-metal master settlement agreements and the settlement agreements with certain of our insurance companies, including without limitation, the resolution of the remaining unresolved claims, the effect of the broad release of certain insurance coverage for present and future claims, and the resolution of WMT’s dispute with the remaining carrier;
- adverse outcomes in existing product liability litigation;
- copycat claims against modular hip systems resulting from a competitor’s recall of its modular hip product;
- the ability of a creditor of any one particular entity within our corporate structure to reach the assets of the other entities within our corporate structure not liable for the underlying claims of the one particular entity, despite our corporate structure which is intended to ring-fence liabilities;
- new product liability claims;
- pending and future other litigation, which could have an adverse effect on our business, financial condition, or operating results;
- challenges to our intellectual property rights or inability to defend our products against the intellectual property rights of others;
- the possibility of private securities litigation or shareholder derivative suits;
- inadequate insurance coverage;
- inability to generate sufficient cash flow to satisfy our capital requirements, including future milestone payments, and existing debt, including the conversion features of our convertible senior notes, or refinance our existing debt as it matures;
- risks associated with our credit, security and guaranty agreement for our senior secured asset-based line of credit and term loan facility;
- inability to raise additional financing when needed and on favorable terms;
- the loss of key suppliers, which may result in our inability to meet customer orders for our products in a timely manner or within our budget;
- the incurrence of significant expenditures of resources to maintain relatively high levels of inventory, which could reduce our cash flows and increase the risk of inventory obsolescence, which could harm our operating results;
- our inability to timely manufacture products or instrument sets to meet demand;
- our private label manufacturers failing to provide us with sufficient supply of their products, or failing to meet appropriate quality requirements;
- our plans to bring the manufacturing of certain of our products in-house and possible disruptions we may experience in connection with such transition;
- our plans to increase our gross margins by taking certain actions designed to do so;
- inventory reductions or fluctuations in buying patterns by wholesalers or distributors;
- not successfully competing against our existing or potential competitors and the effect of significant recent consolidations amongst our competitors;
- not successfully developing and marketing new products and technologies and implementing our business strategy;
- insufficient demand for and market acceptance of our new and existing products;

## [Table of Contents](#)

- the reliance of our business plan on certain market assumptions;
- lack of suitable business development opportunities;
- inability to capitalize on business development opportunities;
- future actions of the SEC, the United States Attorney’s office, the U.S. Food and Drug Administration (FDA), the Department of Health and Human Services, or other U.S. or foreign government authorities, including those resulting from increased scrutiny under the U.S. Foreign Corrupt Practices Act and similar laws, that could delay, limit, or suspend our development, manufacturing, commercialization, and sale of products, or result in seizures, injunctions, monetary sanctions, or criminal or civil liabilities;
- failure or delay in obtaining FDA or other regulatory clearance for our products;
- the compliance of our products and activities with the laws and regulations of the countries in which they are marketed, which compliance may be costly and time-consuming;
- the use, misuse or off-label use of our products that may harm our image in the marketplace or result in injuries that may lead to product liability suits, which could be costly to our business or result in governmental sanctions;
- changes in healthcare laws, which could generate downward pressure on our product pricing;
- ability of healthcare providers to obtain reimbursement for our products or a reduction in the current levels of reimbursement, which could result in reduced use of our products and a decline in sales;
- the potentially negative effect of our ongoing compliance efforts on our relationships with customers and on our ability to deliver timely and effective medical education, clinical studies, and new products;
- failures of, interruptions to, or unauthorized tampering with, our information technology systems;
- our inability to maintain effective internal controls;
- product quality or patient safety issues;
- geographic and product mix impact on our sales;
- deriving a significant portion of our revenues from operations in certain geographic markets that are subject to political, economic, and social instability, including in particular France, and risks and uncertainties involved in launching our products in certain new geographic markets;
- the negative impact of the commercial and credit environment on us, our customers, and our suppliers;
- inability to retain key sales representatives, independent distributors, and other personnel or to attract new talent;
- consolidation in the healthcare industry that could lead to demands for price concessions or the exclusion of some suppliers from certain of our markets, which could have an adverse effect on our business, financial condition, or operating results;
- our clinical trials and their results and our reliance on third parties to conduct them;
- potentially burdensome tax measures; and
- fluctuations in foreign currency exchange rates.

For more information regarding these and other uncertainties and factors that could cause our actual results to differ materially from what we have anticipated in our forward-looking statements or otherwise could materially adversely affect our business, financial condition, or operating results, see “*Part I. Item 1A. Risk Factors*” of our most recent Annual Report on Form 10-K and “*Part II. Item 1A. Risk Factors*” of this report. The risks and uncertainties described above and in “*Part I. Item 1A. Risk Factors*” of our most recent Annual Report on Form 10-K and “*Part II. Item 1A. Risk Factors*” of this report are not exclusive and further information concerning us and our business, including factors that potentially could materially affect our financial results or condition, may emerge from time to time. We assume no obligation to update, amend, or clarify forward-looking statements to reflect actual results or changes in factors or assumptions affecting such forward-looking statements. We advise you, however, to consult any further disclosures we make on related subjects in our future Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K we file with or furnish to the SEC.

The accompanying notes are an integral part of these condensed consolidated financial statements.

WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)

**1. Organization and Description of Business**

Wright Medical Group N.V. (Wright or we) is a global medical device company focused on extremities and biologics products. We are committed to delivering innovative, value-added solutions improving quality of life for patients worldwide and are a recognized leader of surgical solutions for the upper extremities (shoulder, elbow, wrist and hand), lower extremities (foot and ankle) and biologics markets, three of the fastest growing segments in orthopaedics. We market our products in approximately 50 countries worldwide.

Our global corporate headquarters are located in Amsterdam, the Netherlands. We also have significant operations located in Memphis, Tennessee (U.S. headquarters, research and development, sales and marketing administration, and administrative activities); Bloomington, Minnesota (upper extremities sales and marketing and warehousing operations); Arlington, Tennessee (manufacturing and warehousing operations); Franklin, Tennessee (manufacturing and warehousing operations); Columbia City, Indiana (research and development); Alpharetta, Georgia (manufacturing and warehousing operations); Montbonnot, France (manufacturing and warehousing operations); Plouzané, France (research and development); and Macroom, Ireland (manufacturing). In addition, we have local sales and distribution offices in Canada, Australia, Asia, Latin America, and throughout Europe. For purposes of this report, references to “international” or “foreign” relate to non-U.S. matters while references to “domestic” relate to U.S. matters.

Our fiscal year-end is generally determined on a 52-week basis and runs from the Monday nearest to the 31st of December of a year and ends on the Sunday nearest to the 31st of December of the following year. Every few years, it is necessary to add an extra week to the year making it a 53-week period.

The condensed consolidated financial statements and accompanying notes present our consolidated results for each of the three and six months ended June 30, 2019 and July 1, 2018. The three and six months ended June 30, 2019 and July 1, 2018 each consisted of thirteen and twenty-six weeks, respectively.

All amounts are presented in U.S. dollars (\$), except where expressly stated as being in other currencies, e.g., Euros (€).

References in these notes to the condensed consolidated financial statements to “we,” “our” and “us” refer to Wright Medical Group N.V. and its subsidiaries after the merger with Tornier N.V. (legacy Tornier) (Wright/Tornier merger) and Wright Medical Group, Inc. (WMG or legacy Wright) and its subsidiaries before the Wright/Tornier merger.

**2. Basis of Presentation and Summary of Significant Accounting Policies**

*Basis of Presentation.* The unaudited condensed consolidated interim financial statements of Wright Medical Group N.V. have been prepared in accordance with U.S. generally accepted accounting principles (US GAAP) for interim financial statements and the instructions to the Quarterly Report on Form 10-Q and Rule 10-01 of Regulation S-X. Certain information and footnote disclosures normally included in financial statements prepared in accordance with US GAAP have been condensed or omitted pursuant to these rules and regulations. Accordingly, these unaudited condensed consolidated interim financial statements should be read in conjunction with our audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 30, 2018, as filed with the SEC on February 27, 2019.

In the opinion of management, these unaudited condensed consolidated interim financial statements reflect all adjustments necessary for a fair presentation of our interim financial results. All such adjustments are of a normal and recurring nature. The results of operations for any interim period are not indicative of results for the full fiscal year. The accompanying unaudited condensed consolidated interim financial statements include our accounts and those of our controlled subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the dates of the financial statements and the amounts of revenues and expenses during the reporting periods. Actual amounts realized or paid could differ from those estimates.

*Revenue recognition.* Our revenues are primarily generated through two types of customers, hospitals and surgery centers and stocking distributors, with the majority of our revenue derived from sales to hospitals and surgery centers. Our products are sold through a network of employee and independent sales representatives in the United States and by a combination of employee sales representatives, independent sales representatives, and stocking distributors outside the United States. We record revenues from sales to hospitals and surgery centers upon transfer of control of promised products in an amount that reflects the consideration we expect to receive in exchange for those products, which is generally when the product is surgically implanted in a patient.

We record revenues from sales to our stocking distributors at a point in time upon transfer of control of promised products to the distributor. Our stocking distributors, who sell the products to their customers, take control of the products and assume all risks

## WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

of ownership upon transfer. Our stocking distributors are obligated to pay us within specified terms regardless of when, if ever, they sell the products. In general, our stocking distributors do not have any rights of return or exchange; however, in limited situations, we have repurchase agreements with certain stocking distributors. Those certain agreements require us to repurchase a specified percentage of the inventory purchased by the distributor within a specified period of time prior to the expiration of the contract. During those specified periods, we defer the applicable percentage of the sales. An insignificant amount of sales related to these types of agreements was deferred and not yet recognized as revenue as of June 30, 2019 and July 1, 2018.

We must make estimates of potential future product returns related to current period product sales. We base our estimate for sales returns on historical sales and product return information, including historical experience and trend information. Our reserve for sales returns has historically been immaterial. We incur shipping and handling costs associated with the shipment of goods to customers, independent distributors, and our subsidiaries. Amounts billed to customers for shipping and handling of products are included in net sales. Costs incurred related to shipping and handling of products to customers are included in selling, general and administrative expenses. We also record depreciation on surgical instruments used by our hospital and surgery center customers within selling, general and administrative expense as these costs are considered to be similar to shipping and handling costs, necessary to deliver the implant products to the end customer.

*Discontinued Operations.* On January 9, 2014, pursuant to an Asset Purchase Agreement, dated as of June 18, 2013 (the MicroPort Agreement), by and among us and MicroPort Scientific Corporation (MicroPort), we completed the divestiture and sale of our business operations operating under our prior OrthoRecon operating segment to MicroPort.

All historical operating results for the OrthoRecon business are reflected within discontinued operations in the condensed consolidated financial statements. See [Note 4](#) for further discussion of discontinued operations. Other than [Note 4](#), unless otherwise stated, all discussion of assets and liabilities in these Notes to the condensed consolidated financial statements reflects the assets and liabilities held and used in our continuing operations, and all discussion of revenues and expenses reflects those associated with our continuing operations.

*Recent Accounting Pronouncements.* On February 25, 2016, the FASB issued ASU 2016-02, *Leases*, and has subsequently issued several supplemental and/or clarifying ASUs (collectively ASC 842). ASC 842 introduces a lessee model that brings most leases on the balance sheet. The new standard also aligns many of the underlying principles of the new lessor model with those in FASB ASC 606, the FASB's new revenue recognition standard (e.g., those related to evaluating when profit can be recognized). We adopted ASC 842 during the quarter ended March 31, 2019 using the hindsight practical expedient, the practical expedient for short-term leases, and the practical expedient package which primarily limited the need for reassessing lease classification on existing leases and allowed us to issue our financial statements showing comparative lease disclosures under previous GAAP. See additional details related to the impact of this adoption in [Note 9](#).

On June 16, 2016, the FASB issued ASU 2016-13, *Measurement of Credit Losses on Financial Instruments* and has subsequently issued several supplemental and/or clarifying ASUs. The new standard adds an impairment model (known as the current expected credit loss (CECL) model) that is based on expected losses rather than incurred losses. Under the new guidance, an entity recognizes as an allowance its estimate of expected credit losses, which the FASB believes will result in more timely recognition of such losses. The ASU will be effective for us beginning in fiscal year 2020. We do not believe this guidance will have a significant impact on our consolidated financial statements.

On August 29, 2018, the FASB issued ASU 2018-15, *Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40)* to provide guidance on implementation costs incurred in a cloud computing arrangement (CCA) that is a service contract. Specifically, the ASU amends ASC 350 to include in its scope implementation costs of a CCA that is a service contract and clarifies that a customer should apply ASC 350-40, *Internal Use Software*, to determine which implementation costs should be capitalized in such a CCA. The ASU will be effective for us beginning in fiscal year 2020. We are in the initial phases of our adoption plans and, accordingly, we are unable to estimate any effect this may have on our consolidated financial statements.

### 3. Acquisitions

#### Cartiva, Inc.

On October 10, 2018, we completed the acquisition of Cartiva, Inc. (Cartiva), an orthopaedic medical device company focused on treatment of osteoarthritis of the great toe. Under the terms of the agreement with Cartiva, we acquired 100% of the outstanding equity on a fully diluted basis of Cartiva for a total price of \$435 million in cash, subject to certain adjustments which totaled \$1.1 million, as set forth in the purchase agreement, \$0.7 million of which was refunded in 2019. We funded the acquisition with the proceeds from a registered underwritten public offering of 18.2 million ordinary shares which had net proceeds of \$423.0 million. This acquisition adds a differentiated premarket approval (PMA) approved technology for a high-volume foot and ankle procedure

## WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

and further accelerates growth opportunities in our global extremities business. The results of operations of Cartiva are included in our condensed consolidated financial statements for all periods after completion of the acquisition.

The acquired business contributed net sales of \$7.9 million and operating income of \$1.7 million to our consolidated results of operations for the three months ended June 30, 2019, which included \$0.4 million of inventory step-up amortization, \$0.6 million of transition expenses, and \$2.1 million of intangible asset amortization. The acquired business contributed net sales of \$17.1 million and operating income of \$5.1 million to our consolidated results of operations for the six months ended June 30, 2019, which included \$0.7 million of inventory step-up amortization, \$1.0 million of transition expenses, and \$3.9 million of intangible asset amortization.

*Purchase Consideration and Net Assets Acquired*

The following presents the preliminary allocation of the purchase consideration to the assets acquired and liabilities assumed on October 10, 2018 (in thousands):

Cash and cash equivalents	\$	309
Accounts receivable		4,352
Inventories		2,686
Other current assets		486
Property, plant and equipment		1,446
Intangible assets		81,000
Total assets acquired		90,279
Current liabilities		(4,226)
Deferred income taxes		(3,622)
Total liabilities assumed		(7,848)
Net assets acquired	\$	82,431
Goodwill		351,445
Total preliminary purchase consideration	\$	433,876

The acquisition was recorded by allocating the costs of the net assets acquired based on their estimated fair values at the acquisition date. The fair values were based on management's analysis, including work performed by third-party valuation specialists. Wright's estimates and assumptions are subject to change during the measurement period (up to one year from the acquisition date) as we finalize our valuations of assets acquired and liabilities assumed in connection with the acquisition. The primary areas of the purchase price allocation that are not yet finalized relate to identifiable intangible assets.

Trade receivables and payables, as well as certain other current assets and property, plant and equipment, were valued at the existing carrying values as they approximated the fair value of those items at the acquisition date, based on management's judgments and estimates. Trade receivables included gross contractual amounts of \$5.8 million and our best estimate of \$1.4 million which represented contractual cash flows not expected to be collected at the acquisition date. Inventory was recorded at estimated selling price less costs of disposal and a reasonable selling profit. The resulting inventory step-up adjustment is being recognized in cost of sales as the related inventory is sold.

In determining the fair value of intangibles, we used an income method which is based on forecasts of the expected future cash flows attributable to the respective assets. Significant estimates and assumptions inherent in the valuations reflect a consideration of other marketplace participants and include the amount and timing of future cash flows (including expected growth rates and profitability), technology life cycles, customer attrition rates, and the discount rate applied to the cash flows.

Of the \$81.0 million of acquired intangible assets, \$52.0 million was assigned to customer relationships (15 year life), \$28.0 million was assigned to developed technology (7 year life), and \$1.0 million was assigned to in-process research and development.

The excess of the cost of the acquisition over the fair value of the net assets acquired is recorded as goodwill. The goodwill is primarily attributable to strategic opportunities that arose from the acquisition of Cartiva. The goodwill is not expected to be deductible for tax purposes.

WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

*Pro Forma Condensed Combined Financial Information (Unaudited)*

The following unaudited pro forma combined financial information summarizes the results of operations for the periods indicated as if the Cartiva acquisition had been completed as of January 1, 2018.

Pro forma information reflects adjustments that are expected to have a continuing impact on our results of operations and are directly attributable to the acquisition. The unaudited pro forma results include adjustments to reflect the amortization of the inventory step-up and the incremental intangible asset amortization to be incurred based on the preliminary values of each identifiable intangible asset. The pro forma amounts do not purport to be indicative of the results that would have actually been obtained if the acquisition had occurred as of January 1, 2018 or that may be obtained in the future, and do not reflect future synergies, integration costs, or other such costs or savings.

(in thousands)	Three months ended		Six months ended	
	June 30, 2019	July 1, 2018	June 30, 2019	July 1, 2018
Net sales	\$ 229,734	\$ 213,403	\$ 459,861	\$ 420,847
Net loss from continuing operations	(18,580)	(91,801)	(48,484)	(111,954)

**4. Discontinued Operations**

For the three and six months ended June 30, 2019, our income (loss) from discontinued operations, net of tax, totaled \$1.1 million and \$(5.2) million, respectively. For the three and six months ended July 1, 2018, our income from discontinued operations, net of tax, totaled \$22.9 million and \$17.3 million, respectively. Cash used in discontinued operations totaled \$32.1 million and \$21.1 million for the six months ended June 30, 2019 and July 1, 2018, respectively. Our operating results from discontinued operations and cash used in discontinued operations during 2019 and 2018 were attributable primarily to expenses, net of insurance recoveries, associated with legacy Wright's former OrthoRecon business as described in [Note 13](#).

*OrthoRecon Business*

On January 9, 2014, legacy Wright completed the divestiture and sale of its OrthoRecon business to MicroPort Scientific Corporation. Certain liabilities associated with the OrthoRecon business, including product liability claims associated with hip and knee products sold by legacy Wright prior to the closing, were not assumed by MicroPort. Charges associated with these product liability claims, including legal defense, settlements and judgments, income associated with product liability insurance recoveries, and changes to any contingent liabilities associated with the OrthoRecon business have been reflected within results of discontinued operations, and we will continue to reflect these within results of discontinued operations in future periods.

All current and historical operating results for the OrthoRecon business are reflected within discontinued operations in the condensed consolidated financial statements. The following table summarizes the results of discontinued operations for the OrthoRecon business (in thousands):

	Three months ended		Six months ended	
	June 30, 2019	July 1, 2018	June 30, 2019	July 1, 2018
Net sales	\$ —	\$ —	\$ —	\$ —
Selling, general and administrative	(1,120)	(29,299)	5,225	(23,862)
Income (loss) from discontinued operations before income taxes	1,120	29,299	(5,225)	23,862
Provision for income taxes	—	6,183	—	6,183
Total income (loss) from discontinued operations, net of tax	\$ 1,120	\$ 23,116	\$ (5,225)	\$ 17,679

Our income from discontinued operations for the quarter ended June 30, 2019 and July 1, 2018 was primarily attributable to a \$15.5 million insurance recovery recognized in 2019 and a \$30.75 million insurance recovery recognized in 2018. See [Note 13](#) for further discussion regarding our retained contingent liabilities associated with the OrthoRecon business.

We will incur continuing cash outflows associated with legal defense costs and the ultimate resolution of these contingent liabilities, net of insurance proceeds, until these liabilities are resolved.

## WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)**5. Inventories**

Inventories consist of the following (in thousands):

	June 30, 2019	December 30, 2018
Raw materials	\$ 12,882	\$ 9,612
Work-in-process	27,115	26,839
Finished goods	154,723	144,239
	<u>\$ 194,720</u>	<u>\$ 180,690</u>

**6. Fair Value of Financial Instruments and Derivatives**

We account for derivatives in accordance with FASB ASC 815, which establishes accounting and reporting standards requiring that derivative instruments be recorded on the balance sheet as either an asset or liability measured at fair value. Additionally, changes in the derivatives' fair value shall be recognized currently in earnings unless specific hedge accounting criteria are met.

FASB ASC Section 820, *Fair Value Measurement* requires fair value measurements be classified and disclosed in one of the following three categories:

- Level 1: Financial instruments with unadjusted, quoted prices listed on active market exchanges.
- Level 2: Financial instruments determined using prices for recently traded financial instruments with similar underlying terms as well as directly or indirectly observable inputs, such as interest rates and yield curves that are observable at commonly quoted intervals.
- Level 3: Financial instruments that are not actively traded on a market exchange. This category includes situations where there is little, if any, market activity for the financial instrument. The prices are determined using significant unobservable inputs or valuation techniques.

As of June 30, 2019, we have convertible notes outstanding that are due in 2020, 2021, and 2023. See [Note 10](#) of the condensed consolidated financial statements for additional information about the convertible notes. These notes are cash settled upon conversion for the principal amount of the notes plus a conversion premium (valued at the amount our ordinary share price exceeds the respective conversion price of the notes). The conversion premium is a conversion derivative feature that requires bifurcation from the notes in accordance with ASC Topic 815 and is accounted for as a derivative liability (Notes Conversion Derivative).

At the time of issuance of the notes, we entered into hedges with certain option counterparties to reduce our exposure to potential cash payments required for these conversion premiums (Notes Hedges). Upon conversion of the notes, the option counterparties would settle these hedges with us in cash, valued in the same manner as the conversion premiums. The Notes Hedges are accounted for as a derivative asset in accordance with ASC Topic 815. In connection with certain events, our option counterparties have the discretion to make certain adjustments to the Note Hedges, which may reduce the effectiveness of the Note Hedges. See [Note 10](#).

Pursuant to ASC 815, the Notes Conversion Derivatives and Notes Hedges are recorded at fair value in our consolidated balance sheet. Changes in the fair value of the Notes Conversion Derivatives and the Notes Hedges are reflected within our results of operations as other income/expense.

WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

The following table summarizes the fair values and the presentation in our condensed consolidated balance sheets (in thousands) of our Notes Hedges and our Notes Conversion Derivatives:

	June 30, 2019		December 30, 2018	
	Location on condensed consolidated balance sheet	Amount	Location on condensed consolidated balance sheet	Amount
2023 Notes Hedges	Other assets	\$ 164,500	Other assets	\$ 115,923
2023 Notes Conversion Derivative	Other liabilities	\$ 164,027	Other liabilities	\$ 116,833
2021 Notes Hedges	Other current assets	\$ 212,864	Other assets	\$ 188,301
2021 Notes Conversion Derivative	Accrued expenses and other current liabilities	\$ 210,756	Other liabilities	\$ 187,539
2020 Notes Hedges	Other current assets	\$ 6,015	Other current assets	\$ 17,822
2020 Notes Conversion Derivative	Accrued expenses and other current liabilities	\$ 5,799	Accrued expenses and other current liabilities	\$ 17,386

As of June 30, 2019, the 2021 Notes are convertible at any time during the quarterly period ended September 30, 2019. See [Note 10](#). Due to the ability of the holders of the 2021 Notes to convert the notes during this period, the carrying value of the 2021 Notes and the fair value of the 2021 Notes Conversion Derivative were classified as current liabilities, and the fair value of the 2021 Notes Hedges were classified as current assets as of June 30, 2019. The respective balances were classified as long-term as of December 30, 2018. We currently do not expect significant conversions because the 2021 Notes currently trade at a premium to the as-converted value, and a converting holder would forego future interest payments. However, any conversions would reduce our cash resources. We believe that, in the event that holders elect to exercise the conversion option, our cash resources and access to additional borrowings would provide the necessary liquidity.

As described in [Note 10](#), because the holders of the 2020 Notes can convert their notes within the next year, the carrying value of the 2020 Notes and the fair value of the 2020 Notes Conversion Derivatives were classified as current liabilities and the fair value of the 2020 Notes Hedges was classified as current assets as of June 30, 2019 and December 30, 2018.

Neither the Notes Conversion Derivatives nor the Notes Hedges qualify for hedge accounting; thus, any changes in the fair value of the derivatives are recognized immediately in our condensed consolidated statements of operations. The following table summarizes the net gain (loss) on changes in fair value (in thousands) related to the Notes Hedges and Notes Conversion Derivatives:

	Three months ended		Six months ended	
	June 30, 2019	July 1, 2018	June 30, 2019	July 1, 2018
2023 Notes Hedges	\$ (36,757)	\$ (16,305)	\$ 18,433	\$ (16,305)
2023 Notes Conversion Derivative	37,404	(1,238)	(18,319)	(1,238)
2021 Notes Hedges	(37,358)	60,959	24,563	49,265
2021 Notes Conversion Derivative	37,543	(60,214)	(23,217)	(49,493)
2020 Notes Hedges	(3,208)	16,630	5,042	13,530
2020 Warrants Derivative	—	(250)	—	(250)
2020 Notes Conversion Derivative	3,192	(32,461)	(4,690)	(30,082)
Net gain (loss) on changes in fair value	\$ 816	\$ (32,879)	\$ 1,812	\$ (34,573)

In addition to the above gain (loss) on changes in fair value, we also recognized a \$28.9 million loss on the 2023 Notes Conversion Derivative and a \$16.3 million gain on the 2020 Notes Conversion Derivative during the quarter ended March 31, 2019 as part of the additional 2023 Notes exchange as described in [Note 10](#).

The Notes Hedges and the Notes Conversion Derivative are measured at fair value using Level 3 inputs. These instruments are not actively traded and are valued using an option pricing model that uses observable and unobservable market data for inputs. To determine the fair value of the embedded conversion option in the 2020, 2021, and 2023 Notes Conversion Derivatives, a trinomial lattice model was used. A trinomial stock price lattice generates three possible outcomes of stock price - one up, one down, and one stable. This lattice generates a distribution of stock prices at the maturity date and throughout the life of the 2020, 2021, and 2023 Notes. Using this stock price lattice, a convertible note lattice was created where the value of the embedded

WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

conversion option was estimated by comparing the value produced in a convertible note lattice with the option to convert against the value without the ability to convert. In each case, the convertible note lattice first calculates the possible convertible note values at the maturity date, using the distribution of stock prices, which equals to the maximum of (x) the remaining bond cash flows and (y) stock price times the conversion price. The values of the 2020, 2021, and 2023 Notes Conversion Derivatives at the valuation date were estimated using the values at the maturity date and moving back in time on the lattices (both for the lattice with the conversion option and without the conversion option). Specifically, at each node, if the 2020, 2021, or 2023 Notes are eligible for early conversion, the value at this node is the maximum of (i) converting to stock, which is the stock price times the conversion price, and (ii) holding onto the 2020, 2021, and 2023 Notes, which is the discounted and probability-weighted value from the three possible outcomes at the future nodes plus any accrued but unpaid coupons that are not considered at the future nodes. If the 2020, 2021, or 2023 Notes are not eligible for early conversion, the value of the conversion option at this node equals to (ii). In the lattice, a credit adjustment was applied to the discount for each cash flow in the model as the embedded conversion option, as well as the coupon and notional payments, is settled with cash instead of shares.

To estimate the fair value of the 2020, 2021 and 2023 Notes Hedges, we used the Black-Scholes formula combined with credit adjustments, as the option counterparties have credit risk and the call options are cash settled. We assumed that the call options will be exercised at maturity since our ordinary shares do not pay any dividends and management does not expect to declare dividends in the near term.

The following assumptions were used in the fair market valuations as of June 30, 2019:

	2020 Notes Conversion Derivative	2020 Notes Hedge	2021 Notes Conversion Derivative	2021 Notes Hedge	2023 Notes Conversion Derivative	2023 Notes Hedge
Black Stock Volatility <sup>(1)</sup>	32.58%	32.58%	38.09%	38.09%	31.43%	31.43%
Credit Spread for Wright <sup>(2)</sup>	3.49%	N/A	2.92%	N/A	2.58%	N/A
Credit Spread for Deutsche Bank AG <sup>(3)</sup>	N/A	0.33%	N/A	N/A	N/A	0.66%
Credit Spread for Wells Fargo Securities, LLC <sup>(3)</sup>	N/A	0.12%	N/A	N/A	N/A	N/A
Credit Spread for JPMorgan Chase Bank <sup>(3)</sup>	N/A	0.12%	N/A	0.20%	N/A	0.31%
Credit Spread for Bank of America <sup>(3)</sup>	N/A	N/A	N/A	0.24%	N/A	0.36%

(1) Volatility selected based on historical and implied volatility of ordinary shares of Wright Medical Group N.V.

(2) Credit spread implied from traded price.

(3) Credit spread of each bank is estimated using CDS curves. Source: Bloomberg.

*Derivatives not Designated as Hedging Instruments*

As a result of the acquired business of IMASCAP in 2017, we have recorded the estimated fair value of future contingent consideration of approximately €18.5 million, or approximately \$20.9 million, related to the achievement of certain technical milestones and sales earnouts as of June 30, 2019. The estimated fair value of contingent consideration related to technical milestones totaled \$14.2 million and \$12.7 million as of June 30, 2019 and December 30, 2018, respectively, and is contingent upon the development and approval of a next generation reverse shoulder implant system and new software modules. The estimated fair value of contingent consideration related to sales earnouts totaled \$6.7 million and \$6.5 million as of June 30, 2019 and December 30, 2018, respectively, and is contingent upon the sale of certain guides and the next generation reverse shoulder implant system.

The fair values of the sales earn out contingent consideration as of June 30, 2019 and December 30, 2018 were determined using a discounted cash flow model and probability adjusted estimates of the future earnings and are classified in Level 3. The discount rate is 12% for the sales earnout contingent consideration.

The contingent consideration from the IMASCAP acquisition related to technical milestones is based on meeting certain developmental milestones for new software modules and for the FDA and CE approval for the next generation reverse shoulder implant system. The fair value of this contingent consideration as of June 30, 2019 and December 30, 2018 was determined using probability adjusted estimates of the future payments and is classified in Level 3. The discount rate is approximately 6% for the

WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

contingent consideration related to technical milestones. A change in the discount rate would have limited impact on our profits or the fair value of this contingent consideration.

On March 1, 2013, as part of our acquisition of BioMimetic Therapeutics, Inc. (BioMimetic), we issued Contingent Value Rights (CVRs) as part of the merger consideration. Each CVR entitled its holder to receive additional cash payments of up to \$6.50 per share, which were payable upon receipt of FDA approval of AUGMENT® Bone Graft and upon achieving certain revenue milestones. On September 1, 2015, AUGMENT® Bone Graft received FDA approval and the first of the milestone payments associated with the CVRs was paid out at \$3.50 per share, which totaled \$98.1 million. The CVR agreement also provided for a revenue milestone payment equal to \$1.50 per share, or \$42 million, to be paid if, prior to March 1, 2019, sales of AUGMENT® Bone Graft reached \$40 million over 12 consecutive months. Sales for AUGMENT® Bone Graft reached \$40 million for the 12 months ended October 28, 2018, and this milestone payment was paid during the fourth quarter of 2018. The CVR agreement also provided for a second revenue milestone equal to \$1.50 per share, or \$42 million, if, prior to March 1, 2019, sales of AUGMENT® Bone Graft reach \$70 million over 12 consecutive months. This milestone was not met before the termination of the CVRs. There were no CVRs outstanding as of June 30, 2019, as the agreement terminated on March 1, 2019. The fair value of the CVRs outstanding at December 30, 2018 was \$0.4 million and was determined using the closing price of the security in the active market (Level 1), and is reflected within “Accrued expenses and other current liabilities” on our condensed consolidated balance sheet. For the three months ended July 1, 2018, the change in the fair value of the CVRs resulted in a gain of \$2.5 million. For the six months ended June 30, 2019 and July 1, 2018, the change in the fair value of the CVRs resulted in a gain of \$0.4 million and \$6.4 million, respectively.

The carrying value of cash and cash equivalents, accounts receivable, and accounts payable approximates the fair value of these financial instruments at June 30, 2019 and December 30, 2018 due to their short maturities and variable rates.

The following tables summarize the valuation of our financial instruments (in thousands):

**WRIGHT MEDICAL GROUP N.V.**
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)**
**8. Goodwill and Intangible Assets**

Changes in the carrying amount of goodwill occurring during the six months ended June 30, 2019 and July 1, 2018 are as follows (in thousands):

	U.S. Lower Extremities & Biologics	U.S. Upper Extremities	International Extremities & Biologics	Total
Goodwill at December 30, 2018	\$ 569,970	\$ 627,850	\$ 71,134	\$ 1,268,954
Foreign currency translation	—	(1,191)	(3,805)	(4,996)
Goodwill at June 30, 2019	\$ 569,970	\$ 626,659	\$ 67,329	\$ 1,263,958
Goodwill at December 31, 2017	\$ 218,525	\$ 630,650	\$ 84,487	\$ 933,662
Foreign currency translation	—	(780)	(8,929)	(9,709)
Goodwill at July 1, 2018	\$ 218,525	\$ 629,870	\$ 75,558	\$ 923,953

Goodwill is recognized for the excess of the purchase price over the fair value of net assets of businesses acquired. Goodwill is required to be tested for impairment at least annually. Unless circumstances otherwise dictate, the annual impairment test is performed in the fourth quarter annually.

Following the December 2017 IMASCAP acquisition, foreign currency translation has been reported within the U.S. Upper Extremities segment. While the IMASCAP offices are located in France and the majority of their operations have a functional currency of the Euro, the results of the IMASCAP business are managed by the U.S. Upper Extremities segment.

The components of our identifiable intangible assets, net, are as follows (in thousands):

	June 30, 2019		December 30, 2018	
	Cost	Accumulated amortization	Cost	Accumulated amortization
<b>Indefinite life intangibles:</b>				
In-process research and development (IPRD) technology	\$ 6,509	\$ —	\$ 6,262	\$ —
<b>Finite life intangibles:</b>				
Completed technology	173,045	63,573	174,596	55,114
Licenses	9,247	2,276	6,547	1,851
Customer relationships	181,435	36,109	179,605	30,935
Trademarks	13,989	11,675	14,048	11,564
Non-compete agreements	5,753	2,813	3,252	2,514
Other	760	760	764	764
Total finite life intangibles	384,229	\$ 117,206	378,812	\$ 102,742
Total intangibles	390,738		385,074	
Less: Accumulated amortization		(117,206)		(102,742)
Intangible assets, net	\$ 273,532		\$ 282,332	

Based on the total finite life intangible assets held at June 30, 2019, we expect amortization expense of approximately \$32 million in 2019, \$31 million in 2020, \$30 million in 2021, \$30 million in 2022, and \$30 million in 2023.

**9. Leases**

We lease various manufacturing, warehousing and distribution facilities, administrative and sales offices as well as equipment under operating leases. We evaluate our contracts to identify leases, which are generally deemed to exist if there is an identified asset over which we have the right to direct its use and from which we obtain substantially all of the economic benefit from its use. Certain of our lease agreements contain rent escalation clauses, rent holidays, and other lease concessions. We recognize our

## WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

minimum rental expense on a straight-line basis over the term of the lease beginning with the date of initial control of the asset. With the adoption of ASC 842, we recognized all operating leases with terms greater than twelve months in duration on our condensed consolidated balance sheet as of December 31, 2018 as right-of-use assets and lease liabilities which totaled approximately \$30 million. Additionally, we recorded a cumulative adjustment of \$0.2 million to our accumulated deficit upon adoption. We adopted the standard using the prospective approach and did not retrospectively apply it to prior periods.

We have made certain assumptions and judgments when applying ASC 842, the most significant of which are:

- We elected the package of practical expedients available for transition which allows us to not reassess whether expired or existing contracts contain leases under the new definition of a lease, lease classification for expired or existing leases and whether previously capitalized initial direct costs would qualify for capitalization under ASC 842.
- We elected to use hindsight when considering judgments and estimates such as assessments of lessee options to extend or terminate a lease or purchase the underlying asset.
- For all asset classes, we elected to not recognize a right-of-use asset and lease liability for short-term leases.
- For all asset classes, we elected to not separate non-lease components from lease components to which they relate and have accounted for the combined lease and non-lease components as a single lease component.
- The determination of the discount rate used in a lease is our incremental borrowing rate which is based on what we would normally pay to borrow an amount equal to the lease payments on a collateralized basis over a similar term.

Our net ROU assets under operating leases are included within Other Assets on our condensed consolidated balance sheet and include the following (in thousands):

	June 30, 2019
Buildings	\$ 24,972
Machinery and equipment	2,388
Furniture, fixtures and office equipment	918
	<u>\$ 28,278</u>

At June 30, 2019, future minimum lease payments under operating lease obligations, together with the present value of the net minimum lease payments, are included within Accrued expenses and other current liabilities and Other liabilities as follows (in thousands):

2019	\$ 4,789
2020	7,935
2021	6,175
2022	4,465
2023	2,925

		<u>1,145,259</u>	<u>1,115,127</u>
Less: Current portion <sup>1,2</sup>		(417,911)	(201,686)
Long-term debt and finance lease obligations		<u>\$ 727,348</u>	<u>\$ 913,441</u>

<sup>1</sup> As of June 30, 2019, the sale price condition (as defined below) for the 2021 Notes was satisfied and, therefore, the 2021 Notes are convertible at any time during the quarterly period ended September 30, 2019. As a result, the carrying value of the 2021 Notes was classified as a current liability as of June 30, 2019.

<sup>2</sup> The holders of the 2020 Notes may convert their notes at any time on or after August 15, 2019. Due to the ability of the holders of the 2020 Notes to convert within the next year, the carrying value of the 2020 Notes was classified as a current liability as of June 30, 2019 and December 30, 2018.

*Convertible Notes*

The components of our Convertible Notes were as follows (in thousands):

	June 30, 2019	December 30, 2018
Principal amount of 2023 Notes	\$ 814,556	\$ 675,000
Unamortized debt discount	(119,980)	(114,554)
Unamortized debt issuance costs	(12,108)	(12,370)
Net carrying amount of 2023 Notes	<u>\$ 682,468</u>	<u>\$ 548,076</u>
Principal amount of 2021 Notes	\$ 395,000	\$ 395,000
Unamortized debt discount	(58,659)	(69,382)
Unamortized debt issuance costs	(3,663)	(4,332)
Net carrying amount of 2021 Notes	<u>\$ 332,678</u>	<u>\$ 321,286</u>
Principal amount of 2020 Notes	\$ 56,455	\$ 186,589

Unamortized debt issuance costs	(243)	(1,414)
Net carrying amount of 2020 Notes	<u>\$ 54,214</u>	<u>\$ 173,533</u>

The 2021 Notes were issued by us and the 2020 Notes and the 2023 Notes were issued by Wright Medical Group, Inc. (WMG) and are fully and unconditionally guaranteed by Wright Medical Group N.V.

## WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

The holders of the Convertible Notes may convert their notes solely into cash at their option at any time prior to the Early Conversion date (as defined below) only under the following circumstances: (1) during any calendar quarter (and only during such calendar quarter), if the last reported sale price of our ordinary shares for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day (the “sale price condition”); (2) during the five business day period after any five consecutive trading day period in which the trading price per \$1,000 principal amount of Convertible Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our ordinary shares and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. The Certain terms of conversion are set forth below:

	2020 Notes	2021 Notes	2023 Notes
Conversion rate	33.39487	46.8165	29.9679
Conversion price	\$ 29.94	\$ 21.36	\$ 33.37
Early Conversion date	August 15, 2019	May 15, 2021	December 15, 2022
Maturity date	February 15, 2020	November 15, 2021	June 15, 2023

On or after the Early Conversion date until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their Convertible Notes solely into cash, regardless of the foregoing circumstances. Upon conversion, a holder will receive an amount in cash, per \$1,000 principal amount of the Convertible Notes, equal to the settlement amount as calculated under the Notes Indenture. If a fundamental change, as defined in the applicable Notes Indenture, occurs, subject to certain conditions, holders of the applicable series of Convertible Notes will have the option to require us to repurchase for cash all or a portion of their Convertible Notes at a repurchase price equal to 100% of the principal amount of the Notes to be repurchased, plus any accrued and unpaid interest to, but excluding, the fundamental change repurchase date, as defined in the applicable Notes Indenture. In addition, if a make-whole fundamental change, as defined in the applicable Notes Indenture, occurs prior to the maturity date, we are required to increase the applicable conversion rate for a holder that elects to convert its Notes in connection with such make-whole fundamental change.

As described above, the 2021 Notes are convertible during the quarter ended September 30, 2019. We currently do not expect significant conversions because the Convertible Notes currently trade at a premium to the as-converted value, and a converting holder would forego future interest payments. However, any conversions would reduce our cash resources. We believe that, in the event that holders elect to exercise the conversion option, our cash resources and access to additional borrowings would provide the necessary liquidity.

The 2021 Notes and our guarantee of the 2020 and 2023 Notes is our senior unsecured obligation that ranks: (i) senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the guarantee; (ii) equal in right of payment to any of our unsecured indebtedness that is not so subordinated; (iii) effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and (iv) structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries. Because the 2020 Notes and the 2023 Notes were issued by WMG, they are structurally senior to all indebtedness and other liabilities of Wright Medical Group N.V.

The estimated fair value of the 2020, 2021 and 2023 Notes was approximately \$61.6 million, \$585.5 million, and \$899.0 million, respectively, at June 30, 2019, based on a quoted price in an active market (Level 1).

The Notes Conversion Derivatives require bifurcation from the Convertible Notes in accordance with ASC Topic 815, *Derivatives and Hedging*, and are accounted for as a derivative liability. See [Note 6](#) for additional information regarding the Notes Conversion Derivative.

In connection with the issuance of each series of Convertible Notes, we and WMG entered in cash-settled convertible note hedge transactions with certain option counterparties (the “Note Hedges”), which are generally intended to reduce exposure to potential cash payments that we or WMG, as applicable, would be required to make if holders elect to convert the Convertible Notes at a time when our ordinary share price exceeds the conversion price. We also entered into warrant transactions (the “Warrants”) in connection with the issuance of each series of Convertible Notes in which we sold warrants that are initially exercisable in the same number of shares as are issuable upon conversion of the applicable series of Convertible Notes at the initial conversion rate. The strike price of the Note Hedge for each series of Convertible Notes is equal to the conversion price of the applicable series of Convertible Notes and the exercise prices for the Warrants issued with the 2020, 2021 and 2023 Notes are \$38.80, \$30.00, and \$40.86, respectively. The strike prices of the Notes Hedges and exercise prices of the Warrants are subject to adjustment upon the occurrence of certain events. See [Note 6](#) for additional information regarding the Notes Hedges.

## WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

However, in connection with certain events, including, among others, (i) a merger or other make-whole fundamental change; (ii) certain hedging disruption events, which may include changes in tax laws, an increase in the cost of borrowing our ordinary shares in the market or other material increases in the cost to the option counterparties of hedging the Note Hedges; (iii) our failure to perform certain obligations under the Notes Indenture or under the Notes Hedges; (iv) certain defaults on our, or any our other subsidiary's indebtedness in excess of \$25 million; (v) if we, or any of our significant subsidiaries become insolvent or otherwise become subject to bankruptcy proceedings or (vi) if we repurchase Convertible Notes in the open market, through a tender or exchange offer or in individually negotiated transactions, the option counterparties have the discretion to terminate the Notes Hedges, which may reduce the effectiveness of the Notes Hedges. In addition, the option counterparties have broad discretion to make certain adjustments to the Notes Hedges and Warrants upon the occurrence of certain other events, including, among others, (i) upon the announcement of certain significant corporate events, including events that may give rise to a termination event as described above, such as the announcement of a third-party tender offer; or (ii) solely with respect to the Notes Hedges, any adjustment to the conversion rate of the Notes. Any such adjustment may also reduce the effectiveness of the Note Hedges and further the dilutive effect of the Warrants.

Aside from the initial premiums paid to the option counterparties and subject to the right of the option counterparties to terminate the Notes Hedges and Warrants in certain circumstances, we do not generally expect to be required to make any cash payments to the option counterparties under the Notes Hedges and Warrants and expect to be entitled to receive from the option counterparties cash, generally equal to the amount by which the market price per ordinary share exceeds the strike price of the applicable Note Hedge during the relevant valuation period.

The Warrants are expected to be net-share settled and exercisable over a certain trading after the Convertible Notes mature. If the market value per ordinary share exceeds the strike price on any settlement date under the applicable Warrant, we will generally be obligated to issue to the Warrant holders in the aggregate, a number of shares equal in value to the amount by which the then-current market value of one ordinary share exceeds the then-effective strike price of each Warrant, multiplied by the number of Warrants exercised. As a result, the Warrants will have a dilutive effect on our ordinary shares to the extent that the market value per ordinary share during such period exceeds the applicable strike price of the Warrants.

As of June 30, 2019, we had warrants outstanding related to the 2020 Notes, 2021 Notes and 2023 Notes which were exercisable for 1.9 million ordinary shares, 18.5 million ordinary shares, and 24.4 million ordinary shares, respectively.

As of June 30, 2019, our effective interest rate for the 2020, 2021, and 2023 Notes were 8.54%, 9.72%, and 5.76%, respectively. For the three and six months ended June 30, 2019 and July 1, 2018, we recorded the following interest expense related to the amortization of the debt discount:

	Three months ended		Six months ended	
	June 30, 2019	July 1, 2018	June 30, 2019	July 1, 2018
2023 Notes	\$ 5,937	\$ 214	\$ 11,461	\$ 214
2021 Notes	\$ 5,426	\$ 4,926	\$ 10,723	\$ 9,734
2020 Notes	\$ 770	\$ 7,135	\$ 2,215	\$ 14,339

On February 7, 2019, WMG issued an additional \$139.6 million aggregate principal amount of 2023 Notes in exchange for \$130.1 million aggregate principal amount of 2020 Notes. For each \$1,000 principal amount of 2020 Notes validly submitted for exchange, we delivered \$1,072.40 principal amount of 2023 Notes to the exchanging investor (subject, in each case, to rounding to the nearest \$1,000 aggregate principal amount for each such exchanging investor). As this was a debt modification, a pro rata share of the 2020 Notes discount and deferred financing costs which totaled \$7.4 million and \$0.9 million, respectively, was transferred to the 2023 Notes discount and deferred financing costs. Additionally, the 2023 Notes discount was adjusted in order for net debt to remain the same subsequent to the exchange. The discount and deferred financing costs will be amortized over the remaining term of the 2023 Notes using the effective interest method.

The fair value of the 2023 Notes Conversion Derivative associated with the additional \$139.6 million of 2023 Notes was \$28.9 million at the time of issuance, and as the exchange was accounted for as a debt modification, this amount was recognized as a loss during the quarter ended March 31, 2019. The pro rata share of the 2020 Notes Conversion Derivative that was settled as part of the additional 2023 Notes exchange had a fair value of \$16.3 million immediately prior to issuance of the additional 2023 Notes which was recognized as a gain on settlement during the quarter ended March 31, 2019.

On January 30, 2019 and January 31, 2019, we entered into additional Note Hedge and Warrant transactions with the same strike and exercise prices as set forth above for the 2023 Notes. We paid approximately \$30.1 million in the aggregate to the option counterparties for the additional Note Hedge, and received approximately \$21.2 million in the aggregate from the option

WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

counterparties for the Warrants, resulting in a net cost to us of approximately \$8.9 million. In addition we settled a pro rata share of the 2020 Notes Hedges corresponding to the amount of the 2020 Notes exchanged pursuant to the above-described exchange. We received proceeds of approximately \$16.8 million related to the 2020 Notes Hedges and paid \$11.0 million related to the 2020 Warrants, generating net proceeds of \$5.8 million.

Concurrently with the initial issuance and sale of the 2023 Notes in June 2018, certain holders of the 2020 Notes exchanged approximately \$400.9 million aggregate principal amount of their 2020 Notes for the 2023 Notes. For each \$1,000 principal amount of 2020 Notes validly submitted for exchange, we delivered \$1,138.70 principal amount of the 2023 Notes (subject to rounding down to the nearest \$1,000 principal amount of the 2023 Notes for each exchanging investor, the difference being referred as the rounded amount) to the investor. As a result of this note exchange and retirement of \$400.9 million aggregate principal amount of the 2020 Notes, we recognized approximately \$39.9 million for the write-off of related pro-rata unamortized deferred financing fees and debt discount within "Other (income) expense, net" in our condensed consolidated statements of operations during the three months ended July 1, 2018.

In connection with this issuance and exchange, we agreed to settle a pro rata portion of the 2020 Notes Hedges and agreed to repurchase a pro rata portion of the Warrants associated with the 2020 Notes. As a result of these settlements, we received net proceeds of approximately \$10.6 million on July 30, 2018.

For more information relating to our Convertible Notes, please refer to our Annual Report on Form 10-K.

*ABL Credit Agreement*

On December 23, 2016, we, together with WMG and certain of our other wholly-owned U.S. subsidiaries (collectively, Borrowers), entered into a Credit, Security and Guaranty Agreement with Midcap Financial Trust, as administrative agent (Agent) and a lender and the additional lenders from time to time party thereto, which agreement was subsequently amended in May 2018 and February 2019 (as amended, the ABL Credit Agreement).

The ABL Credit Agreement provides for a \$175 million senior secured asset-based line of credit, subject to the satisfaction of a borrowing base requirement (ABL Facility) and a \$55 million term loan facility (Term Loan Facility). The ABL Facility may be increased by up to \$75 million upon the Borrowers' request, subject to the consent of the Agent and each of the other lenders providing such increase. All borrowings under the ABL Facility are subject to the satisfaction of customary conditions, including the absence of default, the accuracy of representations and warranties in all material respects and the delivery of an updated borrowing base certificate. The initial \$20 million term loan tranche was funded at closing in May 2018. The Borrowers may at any time borrow the second \$35 million term loan tranche, but are required to do so no later than May 7, 2021. All borrowings under the Term Loan Facility are subject to the satisfaction of customary conditions, including the absence of default and the accuracy of representations and warranties in all material respects.

As of June 30, 2019 and December 30, 2018, we had \$20.7 million and \$17.8 million respectively, in borrowings outstanding under the ABL Facility. We have reflected this debt as a current liability on our condensed consolidated balance sheet as of June 30, 2019 and December 30, 2018, as required by US GAAP due to the weekly lockbox repayment/re-borrowing arrangement underlying the agreement, as well as the ability for the lenders to accelerate the repayment of the debt under certain circumstances as described below. As of June 30, 2019 and December 30, 2018, we had \$1.7 million of unamortized debt issuance costs related to the ABL Facility. These amounts are included within "Other assets" on our condensed consolidated balance sheets and will be amortized over the five-year term of the ABL Facility as described below.

The interest rate margin applicable to borrowings under the ABL Facility is, at the option of the Borrowers, equal to either (a) 3.25% for base rate loans or (b) 4.25% for LIBOR rate loans, subject to a 0.75% LIBOR floor. In addition to paying interest on the outstanding loans under the ABL Facility, the Borrowers also are required to pay a customary unused line fee equal to 0.50% per annum in respect of unutilized commitments and certain other customary fees related to Agent's administration of the ABL Facility. Beginning January 1, 2017, the Borrowers are required to maintain a minimum drawn balance on the ABL Facility equal to 20% of the average borrowing base for each month. To the extent the actual drawn balance is less than 20%, the Borrowers must pay a fee equal to the amount the lenders under the ABL Facility would have earned had the Borrowers maintained a minimum drawn balance equal to 20% of the average borrowing base for such month.

The ABL Credit Agreement requires that the Borrowers calculate the borrowing base for the ABL Facility on at least a monthly basis and each time the Borrowers make a draw on the ABL Facility in accordance with the formula set forth in the ABL Credit Agreement. The borrowing base is subject to adjustment and the implementation of reserves by the Agent in its permitted discretion, as further described in the ABL Credit Agreement. If at any time the outstanding drawn balance under the ABL Facility exceeds the borrowing base as in effect at such time, Borrowers will be required to prepay loans under the ABL Facility in an amount equal

WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

to such excess. Certain accounts receivables and proceeds of collateral of the Borrowers will be applied to reduce the outstanding principal amount of the ABL Facility on a periodic basis.

There is no scheduled amortization under the ABL Facility and (subject to borrowing base requirements and applicable conditions to borrowing) the available revolving commitment may be borrowed, repaid, and reborrowed without restriction. All outstanding loans under the ABL Facility will be due and payable in full on the date that is the earliest to occur of (x) December 23, 2021; (y) the date that is 91 days prior to the maturity date of the 2020 Notes or (z) the date that is 91 days prior to the maturity date of the 2021 Notes; provided if we refinance, extend, renew or replace at least 85% of the 2020 Notes and/or the 2021 Notes, as applicable, outstanding as of the closing date of the ABL Facility pursuant to the terms of the ABL Credit Agreement, the maturity date will be deemed extended with respect to clause (y) and (z) above. Due to the additional exchange of 2020 Notes for additional 2023 Notes in February 2019 as described above, the maturity date will be deemed extended for the purposes of clause (y) as long as we maintain unrestricted cash in an amount equal to the aggregate outstanding principal amount of the 2020 Notes.

Any voluntary or mandatory permanent reduction or termination of the revolving commitments under the ABL Facility is subject to a prepayment premium equal to 0.75% of such reduced or terminated amount.

As of June 30, 2019 and December 30, 2018, we had \$20.0 million outstanding under the Term Loan Facility. The interest rate applicable to borrowings under the Term Loan Facility is equal to one-month LIBOR plus 7.85%, subject to a 1.00% LIBOR floor. Amortization payments under the Term Loan Facility are due in equal monthly installments beginning on May 1, 2019 unless we meet certain adjusted EBITDA targets; in which case, the amortization payments would not commence until May 1, 2021. To date we have met these targets. In addition to paying interest on the outstanding loans under the Term Loan Facility, the Borrowers are also required to pay certain other customary fees related to Agent's administration of the Term Loan Facility.

The Term Loan Facility requires mandatory prepayments, subject to the right of reinvestment and certain other exceptions, in amounts equal to 100% of the net cash proceeds from certain asset sales and casualty and condemnation events in excess of \$10 million in any fiscal year. Any voluntary or mandatory prepayment under the Term Loan Facility, subject to certain exceptions, is subject to a 1.00% prepayment premium. The advances under the Term Loan Facility are due and payable in full at the same time as the outstanding loans under the ABL Facility.

As a result of the Term Loan Facility, we recognized deferred financing charges of approximately \$1.2 million, which will be amortized over the three-year term using the effective interest method. As of June 30, 2019 and December 30, 2018, we had unamortized deferred financing charges of approximately \$0.9 million and \$1.0 million, respectively.

All of the obligations under the ABL Facility and the Term Loan Facility are guaranteed jointly and severally by us and each of the Borrowers and are secured by a senior first priority security interest in substantially all existing and after-acquired assets of us and each Borrower on the terms set forth in the ABL Credit Agreement.

The ABL Credit Agreement contains certain negative covenants that restrict our ability to take certain actions as specified in the ABL Credit Agreement and an affirmative covenant that we maintain net revenue at or above minimum levels and maintain liquidity in the United States at a level specified in the ABL Credit Agreement, subject to certain exceptions. In addition to financial and liquidity covenants consistent with those in the ABL Credit Agreement, while the Term Loan Facility is outstanding, the Company is required to maintain a minimum adjusted EBITDA, as described in the ABL Credit Agreement. The ABL Credit Agreement will not affect our ability to meet our existing contractual obligations, except in circumstances where an event of default (subject to certain exceptions) has occurred and is continuing. The ABL Credit Agreement also contains negative covenants, representations and warranties, affirmative covenants and events of default, in each case subject to grace periods, thresholds, and materiality qualifiers consistent with the ABL Credit Agreement.

Our exposure to interest rate risk arises principally from variable interest rates applicable to borrowings under our ABL Credit Agreement and the interest rates associated with our invested cash balances.

Borrowings under our ABL Credit Agreement, including our ABL Facility and Term Loan Facility, bear interest at variable rates. The interest rate margin applicable to borrowings under the ABL Facility is, at the option of the Borrowers, equal to either (a) 3.25% for base rate loans or (b) 4.25% for LIBOR rate loans, subject to a 0.75% LIBOR floor. The interest rate applicable to borrowings under the Term Loan Facility is equal to one-month LIBOR plus 7.85%, subject to a 1.00% LIBOR floor. As of June 30, 2019, we had \$20.7 million of borrowings under our ABL Facility and \$20.0 million principal outstanding under our Term Loan Facility. Based upon this debt level, and the LIBOR floor on our interest rate, a 100 basis point increase in the annual interest rate on such borrowings would have an immaterial impact on our interest expense on an annual basis.

## WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)*Other Debt*

Other debt primarily includes government loans, mortgages, loans acquired as a result of the IMASCAP acquisition and miscellaneous international bank loans.

**11. Accumulated Other Comprehensive Income (AOCI)**

Other comprehensive income (OCI) includes certain gains and losses that under US GAAP are included in comprehensive (loss) income but are excluded from net loss as these amounts are initially recorded as an adjustment to shareholders' equity. Amounts in OCI may be reclassified to net loss upon the occurrence of certain events.

For the three and six months ended June 30, 2019 and July 1, 2018, OCI was comprised solely of foreign currency translation adjustments.

Changes in AOCI for the three and six months ended June 30, 2019 and July 1, 2018 were as follows (in thousands):

	<u>Three months ended June 30, 2019</u>	
	<u>Currency translation adjustment</u>	
Balance at March 31, 2019	\$	(19,386)
Other comprehensive loss		(123)
Balance at June 30, 2019	\$	(19,509)
	<u>Three months ended July 1, 2018</u>	
	<u>Currency translation adjustment</u>	
Balance at April 1, 2018	\$	34,748
Other comprehensive loss		(29,327)
Balance at July 1, 2018	\$	5,421
	<u>Six months ended June 30, 2019</u>	
	<u>Currency translation adjustment</u>	
Balance at December 30, 2018	\$	(8,083)
Other comprehensive loss		(11,426)
Balance at June 30, 2019	\$	(19,509)
	<u>Six months ended July 1, 2018</u>	
	<u>Currency translation adjustment</u>	
Balance at December 31, 2017	\$	22,290
Other comprehensive loss		(16,869)
Balance at July 1, 2018	\$	5,421

**12. Capital Stock and Earnings Per Share**

Our articles of association provide an authorized capital of €9.6 million divided into 320 million ordinary shares, each with a par value of three Euro cents (€0.03). At our 2019 annual general meeting of shareholders, our shareholders authorized our board of directors until June 28, 2021 to issue, or grant rights to purchase or subscribe for, our unissued ordinary shares up to 20% of our issued and outstanding shares at the time of issue, which is further divided into 10% for general corporate purposes (including potential mergers and acquisitions) and an additional 10% only for potential mergers and acquisitions. We had 126.6 million and 125.6 million ordinary shares issued and outstanding as of June 30, 2019 and December 30, 2018, respectively.

FASB ASC Topic 260, *Earnings Per Share*, requires the presentation of basic and diluted earnings per share. Basic earnings per share is calculated based on the weighted-average number of ordinary shares outstanding during the period. Diluted earnings per share is calculated to include any dilutive effect of our ordinary share equivalents. For the three and six months ended June 30, 2019 and July 1, 2018, our ordinary share equivalents consisted of stock options, restricted stock units, performance share units,

## WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

and warrants. The dilutive effect of the stock options, restricted stock units, performance share units, and warrants is calculated using the treasury-stock method.

We had outstanding options to purchase 9.2 million ordinary shares, 1.0 million restricted stock units, and 0.2 million performance stock units, assuming target performance, at June 30, 2019 and outstanding options to purchase 9.4 million ordinary shares, 1.0 million restricted stock units, and 0.1 million performance stock units, assuming target performance, at July 1, 2018.

We had outstanding net-share settled warrants on the 2020 Notes of 1.9 million and 6.2 million ordinary shares at June 30, 2019 and July 1, 2018, respectively. We also had net-share settled warrants on the 2021 Notes of 18.5 million ordinary shares at June 30, 2019 and July 1, 2018. Finally, we had net-share settled warrants on the 2023 Notes of 24.4 million and 20.2 million ordinary shares at June 30, 2019 and July 1, 2018, respectively.

None of the options, restricted stock units, performance share units, or warrants were included in the calculation of diluted net loss from continuing operations per share, diluted net income (loss) from discontinued operations per share, and diluted net loss per share for the three and six months ended June 30, 2019 or July 1, 2018, because we recorded a net loss from continuing operations for all periods. Including these instruments would be anti-dilutive as the net loss from continuing operations is the control number in determining whether those potential common shares are dilutive or anti-dilutive.

The weighted-average number of ordinary shares outstanding for basic and diluted earnings per share purposes is as follows (in thousands):

	Three months ended		Six months ended	
	June 30, 2019	July 1, 2018	June 30, 2019	July 1, 2018
Weighted-average number of ordinary shares outstanding-basic and diluted	126,267	106,095	126,040	106,000

### 13. Commitments and Contingencies

#### *Legal Contingencies*

The legal contingencies described in this footnote relate primarily to WMT, an indirect subsidiary of Wright Medical Group N.V., and are not necessarily applicable to Wright Medical Group N.V. or other affiliated entities. Maintaining separate legal entities within our corporate structure is intended to ring-fence liabilities. We believe our ring-fenced structure should preclude corporate veil-piercing efforts against entities whose assets are not associated with particular claims.

As described below, our business is subject to various contingencies, including patent and other litigation and product liability claims. These contingencies could result in losses, including damages, fines, or penalties, any of which could be substantial. Although such matters are inherently unpredictable, and negative outcomes or verdicts can occur, we believe we have significant defenses in all of them and are vigorously defending all of them. However, we could incur judgments, pay settlements, or revise our expectations regarding the outcome of any matter. Such developments, if any, could have a material adverse effect on our results of operations in the period in which applicable amounts are accrued, or on our cash flows in the period in which amounts are paid, however, unless otherwise indicated, we do not believe any of them will have a material adverse effect on our financial position.

Our legal contingencies are subject to significant uncertainties and, therefore, determining the likelihood of a loss or the measurement of a loss can be complex. We have accrued for losses that are both probable and reasonably estimable. Unless otherwise indicated, we are unable to estimate the range of reasonably possible loss in excess of amounts accrued. Our assessment process relies on estimates and assumptions that may prove to be incomplete or inaccurate. Unanticipated events and circumstances may occur that could cause us to change our estimates and assumptions.

#### *Patent Litigation*

On March 23, 2018, WMT filed suit against Paragon 28, Inc. (Paragon 28) in the United States District Court for the District of Colorado, alleging infringement of ten patents concerning orthopedic plates, plating systems and instruments, and related methods of use. Our complaint seeks damages, injunctive relief and attorneys' fees. On June 4, 2018, Paragon 28 filed an amended answer and counterclaim seeking declaratory judgment of non-infringement and invalidity of the patent-in-suit, and attorneys' fees. On September 28, 2018, WMT filed an amended complaint adding claims against Paragon 28 for misappropriation of trade secrets and related wrongdoing. Paragon 28 filed a motion to dismiss those trade secret-related claims, which WMT has opposed, and the motion remains pending. In March 2019, Paragon 28 filed four petitions with the Patent Trial and Appeal Board seeking Inter Partes Reviews of the patents in question. We have filed responses opposing Paragon 28's petitions.

## WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)*Product Liability*

We have received claims for personal injury against us associated with fractures of the PROFEMUR® titanium modular neck product (PROFEMUR® Claims). As of June 30, 2019, there were approximately 19 unresolved pending U.S. lawsuits and approximately 54 unresolved pending non-U.S. lawsuits alleging such claims (44 of which are part of a single consolidated class action lawsuit in Canada). The overall fracture rate for the product is low and the fractures appear, at least in part, to relate to patient demographics. In 2009, we began offering a cobalt-chrome version of the PROFEMUR® modular neck, which has greater strength characteristics than the alternative titanium version. However, during the fiscal quarter ended September 30, 2011, as a result of an increase in the number and monetary amount of these claims, management estimated our liability to patients in the United States and Canada who have previously required a revision following a fracture of a PROFEMUR® titanium modular neck, or who may require a revision in the future. Management has estimated that this aggregate liability is \$14.1 million as of June 30, 2019. We have classified \$9.4 million of this liability in “Accrued expenses and other current liabilities,” as we expect to pay such claims within the next twelve months, and \$4.7 million as non-current in “Other liabilities” on our consolidated balance sheet. We expect to pay the majority of these claims within the next two years. Any claims associated with this product outside of the United States and Canada, or for any other products, will be managed as part of our standard product liability accrual methodology on a case-by-case basis.

We are aware that MicroPort has recalled a certain size of its cobalt chrome modular neck product as a result of alleged fractures. As of June 30, 2019, there were fourteen pending U.S. lawsuits and five pending non-U.S. lawsuits against us alleging personal injury resulting from the fracture of a cobalt chrome modular neck. These claims will be managed as part of our standard product liability accrual methodology on a case-by-case basis.

Claims for personal injury have also been made against us associated with metal-on-metal hip products (primarily the CONSERVE® product line). The pre-trial management of certain of these claims was consolidated in the federal court system, in the United States District Court for the Northern District of Georgia under multi-district litigation (MDL) and certain other claims by the Judicial Counsel Coordinated Proceedings in state court in Los Angeles County, California (JCCP) in state court in Los Angeles County, California (collectively, the Consolidated Metal-on-Metal Claims). Pursuant to previously disclosed settlement agreements with the Court-appointed attorneys representing plaintiffs in the MDL and JCCP described below (the MoM Settlement Agreements), the MDL and JCCP were closed to new cases effective October 18, 2017 and October 31, 2017, respectively.

Excluding claims resolved in the MoM Settlement Agreements, as of June 30, 2019, there were approximately 183 unresolved metal-on-metal hip cases pending in the U.S. This number includes cases ineligible for settlement under the MoM Settlement Agreements, cases which opted out of such settlements, post-settlement cases, tolled cases, and existing state court cases that were not part of the MDL or JCCP. As of June 30, 2019, we estimate there also were pending approximately 33 unresolved non-U.S. metal-on metal hip cases, 46 unresolved U.S. modular neck cases alleging claims related to the release of metal ions, and zero non-U.S. modular neck cases with metal ion allegations. We also estimate that as of June 30, 2019, there were approximately 531 non-revision claims either dismissed or awaiting dismissal from the MDL and JCCP, which dismissal is a condition of the MoM Settlement Agreements. Although there is a limited time period during which dismissed non-revision claims may be refiled, it is presently unclear how many non-revision claimants will elect to do so. As of June 30, 2019, no dismissed non-revision cases have been refiled.

We believe we have data that supports the efficacy and safety of these hip products. Every hip implant case, including metal-on-metal hip cases, involves fundamental issues of law, science, and medicine that often are uncertain, that continue to evolve, and which present contested facts and issues that can differ significantly from case to case. Such contested facts and issues include medical causation, individual patient characteristics, surgery specific factors, statutes of limitation, and the existence of actual, provable injury.

As previously disclosed, between November 2016 and October 2017, WMT entered into three MoM Settlement Agreements with Court-appointed attorneys representing plaintiffs in the MDL and JCCP to settle a total of 1,974 cases that met the eligibility requirements of the MoM Settlement Agreements and were either pending in the MDL or JCCP, or subject to court-approved tolling agreements in the MDL or JCCP, for an aggregate sum of \$339.2 million. As of June 30, 2019, we had funded \$306.5 million under the MoM Settlement Agreements. We, the indirect parent company of WMT, have guaranteed WMT's obligations under the MoM Settlement Agreements.

The MoM Settlement Agreements contain specific eligibility requirements and establish procedures for proof and administration of claims, negotiation, and execution of individual settlement agreements, determination of the final total settlement amount, and funding of individual settlement amounts by WMT. Eligibility requirements include, without limitation, that the claimant has a claim pending or tolled in the MDL or JCCP, that, with limited exceptions, the claimant has undergone a revision surgery within eight years of the original implantation surgery, and that the claim has not been identified by WMT as having possible statute of

WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

limitation issues. Claimants who have had bilateral revision surgeries will be counted as two claims but only to the extent both claims separately satisfy all eligibility criteria.

The MoM Settlement Agreements were entered into solely as a compromise of the disputed claims being settled and are not evidence that any claim has merit nor are they an admission of wrongdoing or liability by WMT. WMT will continue to vigorously defend metal-on-metal hip claims not settled pursuant to the MoM Settlement Agreements.

As of June 30, 2019, our accrual for metal-on-metal claims totaled \$60.5 million, of which \$33.8 million is included in our consolidated balance sheet within "Accrued expenses and other current liabilities" and \$26.7 million is included within "Other liabilities." Our accrual is based on (i) case by case accruals for specific cases where facts and circumstances warrant, and (ii) the implied settlement values for eligible claims under the MoM Settlement Agreements. We are unable to reasonably estimate the high-end of a possible range of loss for claims which elected to opt-out of the MoM Settlement Agreements. Claims we can confirm would meet the eligibility criteria set forth in the MoM Settlement Agreements but are excluded from the settlements due to the maximum settlement cap, or because they are cases not part of the MDL or JCCP, have been accrued as of the respective settlement rates. Due to the general uncertainties surrounding all metal-on metal claims as noted above, as well as insufficient information about individual claims, we are presently unable to reasonably estimate a range of loss for future claims; hence we have not accrued for these claims at the present time.

We continue to believe the high-end of a possible range of loss for existing revision claims that do not meet eligibility criteria of the MoM Settlement Agreements will not, on an average per case basis, exceed the average per case accrual we take for revision claims we can confirm do meet eligibility criteria of the applicable settlement agreement. Future claims will be evaluated for accrual on a case by case basis using the accrual methodologies described above (which could change if future facts and circumstances warrant).

We have maintained product liability insurance coverage on a claims-made basis. During the fiscal quarter ended September 30, 2012, we received a customary reservation of rights from Federal, our then primary product liability insurance carrier, asserting that certain present and future claims which allege certain types of injury related to the CONSERVE® metal-on-metal hip products (CONSERVE® Claims) would be covered as a single occurrence under the policy year the first such claim was asserted. The effect of this coverage position would have been to place CONSERVE® Claims into a single prior policy year in which applicable claims-made coverage was available, subject to the overall policy limits then in effect. We notified Federal that we disputed its characterization of the CONSERVE® Claims as a single occurrence, which resulted in multi-year insurance coverage litigation (the Tennessee Coverage Litigation) that has recently been resolved as discussed below.

As previously disclosed, we entered into settlement agreements with six of the seven insurance carriers with whom metal on metal hip coverage was in dispute - Columbia Casualty Company, Travelers, AXIS Surplus Lines Insurance Company, Federal, Catlin Specialty Insurance Company and Catlin Underwriting Agencies Limited for and on behalf of Syndicate 2003 at Lloyd's of London, thus resolving in full the Tennessee Coverage Litigation.

Separately, in March 2017, Lexington Insurance Company (Lexington), which had been dismissed from the Tennessee Coverage Litigation, requested arbitration under five Lexington insurance policies in connection with the CONSERVE® Claims. We subsequently engaged in discussions and correspondence with Lexington about the scope of the requested arbitration(s). On or about October 27, 2017, Lexington filed an Application for Order to Compel Arbitration in the Commonwealth of Massachusetts, Suffolk County Superior Court, naming us, WMT, and Wright Medical Group, Inc. We opposed the Application. On February 28, 2018, the Massachusetts Court ordered the parties to arbitrate the two Lexington insurance policies containing Massachusetts arbitration clauses but did not order arbitration under the remaining three Lexington policies at issue. We have appealed that ruling. While the appeal is pending, we are proceeding with the arbitration, but the selection of the arbitrators is still in dispute. In the arbitration, Lexington has asserted a claim for declaratory relief, and we have asserted counter-claims for breach of contract, declaratory relief, and bad faith. On September 26, 2018, Lexington sought to add a claim alleging our filing of the Tennessee lawsuit referred to below was not in good faith. We objected to Lexington's additional claim and argued that such claim could only be added upon agreement of the arbitrators (who are yet to be selected). The American Arbitration Association agreed with our position.

On May 22, 2018, we initiated a lawsuit against Lexington under the three policies that the court did not order into arbitration in Massachusetts. The lawsuit, filed in the Chancery Court of Tennessee, alleges breach of contract, declaratory relief, and bad faith in connection with Lexington's failure and refusal to provide coverage for the underlying metal-on-metal claims under policies issued for 2009-2012. On July 12, 2018, Lexington brought a motion to stay the litigation and compel arbitration under the 2009-2011 Lexington policies. On February 21, 2019, we filed a motion to strike Lexington's motion to stay. On March 13, 2019, we filed an opposition to Lexington's motion.

WRIGHT MEDICAL GROUP N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)  
(UNAUDITED)

On July 23, 2019, we reached an agreement in principle with Lexington to settle all presently remaining disputes between us, pursuant to which, among other things, Lexington agreed to buy back the subject insurance policies for an aggregate of \$15.5 million (in addition to \$5 million previously paid by Lexington). This amount will be payable in a lump sum on or before the 60th day after execution of a definitive settlement agreement (which the parties are presently negotiating) and will be in full satisfaction of all potential liability of Lexington relating to metal-on-metal hip claims, including but not limited to all claims asserted by our subsidiary WMT against Lexington in the above described insurance coverage arbitration and litigation. We have recorded a \$15.5 million receivable as a result of this settlement within "Other Current Assets" as of June 30, 2019.

As of June 30, 2019, and excluding the \$15.5 million to be paid under our above described settlement agreement in principle with Lexington, our insurance carriers have paid an aggregate of \$104.9 million of insurance proceeds related to the metal-on-metal claims, including amounts received under the above referenced settlement agreements, of which \$98.2 million has been paid directly to us and \$6.7 million has been paid directly to claimants. Except as provided in such settlement agreements, our acceptance of the insurance proceeds was not a waiver of any other claim we may have against the insurance carriers unrelated to metal-on-metal coverage and our disputes with carriers relating thereto.

Given the substantial or indeterminate amounts sought in these matters, and the inherent unpredictability of such matters, an adverse outcome in these matters in excess of the amounts included in our accrual for contingencies could have a material adverse effect on our financial condition, results of operations and cash flow. Future revisions to our estimates of these provisions could materially impact our results of operations and financial position. We use the best information available to determine the level of accrued product liabilities, and believe our accruals are adequate.

*Other*

In addition to those noted above, we are subject to various other legal proceedings, product liability claims, corporate governance, and other matters which arise in the ordinary course of business.

**14. Segment Information**

Our management, including our Chief Executive Officer, who is our chief operating decision maker, manages our operations as three operating business segments: U.S. Lower Extremities & Biologics, U.S. Upper Extremities, and International Extremities & Biologics. We determined that each of these operating segments represented a reportable segment. Our Chief Executive Officer reviews financial information at the operating segment level to allocate resources and to assess the operating results and performance of each segment.

Our U.S. Lower Extremities & Biologics segment consists of our operations focused on the sale in the United States of our lower extremities products, such as joint implants and bone fixation devices for the foot and ankle, and our biologics products used to support treatment of damaged or diseased bone, tendons, and soft tissues or to stimulate bone growth. Our U.S. Upper Extremities segment consists of our operations focused on the sale primarily in the United States of our upper extremities products, such as joint implants and bone fixation devices for the shoulder, elbow, wrist, and hand, and products used across several anatomic sites to mechanically repair tissue-to-tissue or tissue-to-bone injuries and other ancillary products. As the IMASCAP operations will be managed by the U.S. Upper Extremities management team, results of operations and assets related to IMASCAP are included within the U.S. Upper Extremities segment. Our International Extremities and Biologics segment consists of our operations focused on the sale outside the United States of all lower and upper extremities products, including associated biologics products.

Management measures segment profitability using an internal operating performance measure that excludes the impact of transaction and transition costs associated with acquisitions, as such items are not considered representative of segment results. We have determined that each reportable segment represents a reporting unit and, in accordance with ASC 350, requires an allocation of goodwill to each reporting unit.

<sup>1</sup> The Corporate category primarily reflects general and administrative expenses not specifically associated with the U.S. Lower Extremities & Biologics, U.S. Upper Extremities, and International Extremities & Biologics segments. These non-allocated corporate expenses relate to global administrative expenses that support all segments, including salaries and benefits of certain executive officers and expenses such as: information technology administration and support; corporate headquarters; legal, compliance, and corporate finance functions; insurance; and all share-based compensation.

Our principal geographic regions consist of the United States, EMEAC (which includes Europe, the Middle East, Africa, and Canada), and Other (which principally represents Asia, Australia, and Latin America). Net sales attributed to each geographic region are based on the location in which the products were sold.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following management's discussion and analysis of financial condition and results of operations describes the principal factors affecting the results of our operations, financial condition, and changes in financial condition for the three and six months ended June 30, 2019. This discussion should be read in conjunction with the accompanying unaudited condensed consolidated financial statements, our Annual Report on Form 10-K for the year ended December 30, 2018, which includes additional information about our critical accounting policies and practices and risk factors, and "*Special Note Regarding Forward-Looking Statements.*"

### Background

On January 9, 2014, legacy Wright completed the sale of its former hip and knee (OrthoRecon) business to MicroPort Scientific Corporation (MicroPort). The financial results of the OrthoRecon business are reflected within discontinued operations for all periods presented, unless otherwise noted.

All current and historical operating results for the OrthoRecon business are reflected within discontinued operations in the condensed consolidated financial statements.

Other than the discontinued operations discussed above, unless otherwise stated, all discussion of assets and liabilities in the notes to the condensed consolidated financial statements and in this section, reflects the assets and liabilities held and used in our continuing operations, and all discussion of revenues and expenses reflects those associated with our continuing operations.

On August 24, 2018, we entered into a definitive agreement to acquire 100% of the outstanding equity on a fully diluted basis of Cartiva, Inc. (Cartiva), an orthopaedic medical device company focused on treatment of osteoarthritis of the great toe, for a total price of \$435 million in cash, subject to certain adjustments as set forth in the agreement. On October 10, 2018, we completed the acquisition, which adds a differentiated PMA approved technology for a high-volume foot and ankle procedure and further accelerates growth opportunities in our global extremities business. We funded the acquisition with the proceeds from a registered underwritten public offering of 18.2 million ordinary shares which had net proceeds of \$423.0 million.

References in this section to "we," "our" and "us" refer to Wright Medical Group N.V. and its subsidiaries after the Wright/Tomier merger and Wright Medical Group, Inc. and its subsidiaries before the merger. Our fiscal year-end is generally determined on a 52-week basis and runs from the Monday nearest to the 31st of December of a year and ends on the Sunday nearest to the 31st of December of the following year. Every few years, it is necessary to add an extra week to the year making it a 53-week period. The three and six months ended June 30, 2019 and July 1, 2018 each consisted of thirteen and twenty-six weeks, respectively.

### Executive Overview

**Company Description.** We are a global medical device company focused on extremities and biologics products. We are committed to delivering innovative, value-added solutions improving quality of life for patients worldwide and are a recognized leader of surgical solutions for the upper extremities (shoulder, elbow, wrist and hand), lower extremities (foot and ankle) and biologics markets, three of the fastest growing segments in orthopaedics. Our product portfolio consists of the following product categories:

- Upper extremities, which include joint implants and bone fixation devices for the shoulder, elbow, wrist, and hand;
- Lower extremities, which include joint implants and bone fixation devices for the foot and ankle;
- Biologics, which include products used to support treatment of damaged or diseased bone, tendons, and soft tissues or to stimulate bone growth; and
- Sports medicine and other, which include products used across several anatomic sites to mechanically repair tissue-to-tissue or tissue-to-bone injuries and other ancillary products

Our global corporate headquarters are located in Amsterdam, the Netherlands. We also have significant operations located in Memphis, Tennessee (U.S. headquarters, research and development, sales and marketing administration, and administrative activities); Bloomington, Minnesota (upper extremities sales and marketing and warehousing operations); Arlington, Tennessee (manufacturing and warehousing operations); Franklin, Tennessee (manufacturing and warehousing operations); Columbia City, Indiana (research and development); Alpharetta, Georgia (manufacturing and warehousing operations); Montbonnot, France (manufacturing and warehousing operations); Plouzané, France (research and development); and Macroom, Ireland (manufacturing). In addition, we have local sales and distribution offices in Canada, Australia, Asia, Latin America, and throughout Europe.

We promote our products in approximately 50 countries with principal markets in the United States, Europe, Asia, Canada, Australia, and Latin America. Our products are sold primarily through a network of employee and independent sales representatives in the United States and by a combination of employee sales representatives, independent sales representatives, and stocking distributors outside the United States.

## [Table of Contents](#)

**Principal Products.** We have focused our efforts into growing our position in the high-growth extremities and biologics markets. We believe a more active and aging patient population with higher expectations regarding “quality of life,” an increasing global awareness of extremities and biologics solutions, improved clinical outcomes as a result of the use of such products, and technological advances resulting in specific designs for such products that simplify procedures and address unmet needs for early interventions, and the growing need for revisions and revision-related solutions will drive the market for extremities and biologics products.

Our principal upper extremities products include the AEQUALIS ASCEND® FLEX™ convertible shoulder system and SIMPLICITI® total shoulder replacement system, AEQUALIS® PERFORM™ Reversed Glenoid System, and the AEQUALIS® REVERSED II™ reversed shoulder system. SIMPLICITI® is the first minimally invasive, canal sparing total shoulder available in the United States. We believe SIMPLICITI® allows us to expand the market to include younger patients that historically have deferred these procedures. Our BLUEPRINT™ 3D Planning Software can be used with our products to assist surgeons in accurately positioning the glenoid and humeral implants and replicating the pre-operative surgical plan. Other principal upper extremities products include the EVOLVE® radial head prosthesis for elbow fractures, the EVOLVE® Elbow Plating System, and the RAYHACK® osteotomy system. FDA 510(k) clearance of the AEQUALIS® FLEX REVIVE™ shoulder system was received in the third quarter of 2018. AEQUALIS® FLEX REVIVE™ was launched to limited users early in the first quarter of 2019 and was fully launched at the end of the second quarter of 2019.

Our principal lower extremities products include the INBONE®, INFINITY®, and INVISION™ Total Ankle Replacement Systems, all of which can be used with our PROPHECY® Preoperative Navigation Guides, which combine computer imaging with a patient’s CT scan, and are designed to provide alignment accuracy while reducing surgical steps. As a result of our recent acquisition of Cartiva, our lower extremities product portfolio now includes Cartiva’s Synthetic Cartilage Implant (SCI), the only PMA approved product for treatment of first MTP joint osteoarthritis. Our lower extremities products also include the Salvation external fixation system for the treatment of Charcot diabetic foot, the CLAW® II Polyaxial Compression Plating System, the ORTHOLOC™ 3Di Reconstruction Plating System, the PhaLinx® System used for hammertoe indications, PRO-TOE® VO Hammertoe System, the DARCO® family of locked plating systems, the VALOR® ankle fusion nail system, and the Swanson line of toe joint replacement products. The PROstep™ Minimally Invasive Surgery System for Foot and Ankle was launched to limited users in the third quarter of 2017, and was fully launched early in the third quarter of 2018. We also launched a number of line extensions to the SALVATION™ limb salvage portfolio in 2018. We expect continued demand for these new products.

Our biologic products use both biological tissue-based and synthetic materials to allow the body to regenerate damaged or diseased bone and to repair damaged or diseased soft tissue. Our principal biologic products include AUGMENT® Bone Graft and AUGMENT® Injectable Bone Graft. AUGMENT® is based on recombinant human platelet-derived growth factor (rhPDGF-BB), a synthetic copy of one of the body’s principal healing agents. Other principal biologics products include the GRAFTJACKET® line of soft tissue repair and containment membranes, the ACTISHIELD™ and VIAFLOW™ products which are derived from amniotic and placental tissues, the ALLOMATRIX® line of injectable tissue-based bone graft substitutes, the PRO-DENSE® Injectable Graft, the OSTEOSET® synthetic bone graft substitute, and the PRO-STIM® Injectable Inductive Graft. Additionally, we expect BIOSKIN® Amniotic Wound Matrix to be launched in the third quarter of 2019.

**Supplemental Non-GAAP Pro Forma Information.** Due to the significance of the Cartiva business that is not included in our results of operations for the three and six months ended July 1, 2018 and to supplement our condensed consolidated financial statements prepared in accordance with US GAAP, we use certain non-GAAP financial measures, including organic and combined pro forma net sales. Our non-GAAP financial measures are not in accordance with, or an alternative for, GAAP measures and may be different from non-GAAP financial measures used by other companies. In addition, our non-GAAP financial measures are not based on any comprehensive or standard set of accounting rules or principles. Accordingly, the calculation of our non-GAAP financial measures may differ from the definitions of other companies using the same or similar names limiting, to some extent, the usefulness of such measures for comparison purposes. We believe that non-GAAP financial measures have limitations in that they do not reflect all of the amounts associated with our results of operations as determined in accordance with GAAP and that these measures should only be used to evaluate our results of operations in conjunction with the corresponding GAAP measures. See tables below for a reconciliation of our non-GAAP organic and combined pro forma net sales for the three and six months ended June 30, 2019 and July 1, 2018 to our net sales for such period as calculated in accordance with US GAAP.

The “Results of Operations” discussion that appears below has been presented utilizing a combination of historical unaudited and, where relevant, non-GAAP organic and combined pro forma unaudited information to include the effects on our condensed consolidated financial statements of our acquisition of Cartiva, if the Cartiva acquisition had been completed as of January 1, 2018, the beginning of Wright’s fiscal year 2018. The organic net sales reflect net sales by the legacy Wright business, which do not include net sales of products obtained through the Cartiva acquisition. The pro forma net sales have been adjusted to reflect the effect on our combined net sales of incremental revenues that would have been recognized had Cartiva been acquired on January 1, 2018. The Cartiva acquisition only affected the U.S. and international lower extremities product lines net sales. The non-GAAP organic and combined pro forma net sales have been developed based on available information and upon assumptions that our management believes are reasonable in order to reflect, on a pro forma basis, the impact of the Cartiva acquisition.

## [Table of Contents](#)

The non-GAAP organic and pro forma financial data is not necessarily indicative of results of operations that would have occurred had the Cartiva acquisition been consummated at the beginning of the period presented or which might be attained in the future.

**Financial Highlights.** Net sales increased 11.8% totaling \$229.7 million in the second quarter of 2019, compared to \$205.4 million in the second quarter of 2018, driven primarily by 13.8% growth in our U.S. net sales.

Our U.S. net sales increased \$21.0 million, or 13.8%, in the second quarter of 2019 as compared to the second quarter of 2018. The continued success of the combination of our BLUEPRINT™ enabling technology, PERFORM™ Reversed Glenoid System, and SIMPLICITI® shoulder system, as well as net sales growth of our AUGMENT® Injectable Bone Graft products, contributed to non-GAAP, legacy Wright U.S. organic growth of 9.4%. The impact to our net sales from Cartiva products was approximately \$6.7 million. Our combined non-GAAP pro forma growth was 8.3%, due to significant reduction in sales by the legacy Cartiva distributors.

Our international net sales increased \$3.4 million, or 6.2%, in the second quarter of 2019 as compared to the second quarter of 2018, driven by growth in direct market sales in our international upper extremities business and incremental Cartiva revenue of approximately \$1.2 million in our international lower extremities business. This increase was partially offset by a \$2.7 million unfavorable impact from foreign currency exchange rates. Our non-GAAP, legacy Wright international organic sales increased 4.0% driven primarily due to growth in our direct market sales of our international upper extremities business.

In the second quarter of 2019, our net loss from continuing operations totaled \$18.9 million, compared to a net loss from continuing operations of \$90.6 million for the second quarter of 2018. This decrease in net loss from continuing operations was primarily driven by decrease in other (income) expense, net in which the second quarter of 2018 included a \$39.9 million charge for the write-off of unamortized deferred financing fees and debt discount associated with the extinguishment of \$400.9 million of the 2020 Notes and a loss of \$32.9 million for non-cash adjustments to derivative fair values.

**Opportunities and Challenges.** We intend to continue to leverage the global strengths of our product brands as a pure-play extremities and biologics business. Additionally, we believe the highly complementary nature of our businesses gives us significant diversity and scale across a range of geographies and product categories. We were delighted to add Cartiva's SCI, the first and only PMA product for the treatment of great toe osteoarthritis, to our market-leading lower extremities portfolio. Supported by compelling clinical performance and backed by Level I clinical evidence, Cartiva is well positioned for future growth as it addresses large markets with significant unmet needs and strong patient demand. As of August 1, the U.S. Cartiva business has been transitioned to our direct U.S. lower extremities sales force; however, it will take some time for the benefits of the transition to be evident in the sales results.

Further, we believe our December 2017 acquisition of IMASCAP, a leader in the development of software-based solutions for preoperative planning of shoulder replacement surgery, ensures exclusive access to breakthrough software enabling technology and patents, including BLUEPRINT™, to further differentiate our product portfolio and to further accelerate growth opportunities in our global extremities business. BLUEPRINT™ is proving to be integral to our ability to convert competitive surgeons, and we believe that impact will increase as we execute our plans to make the system easier to use and release additional enhancements. As of June 30, 2019, approximately 40% of our U.S. shoulder customers were using BLUEPRINT™.

We believe we have significant opportunity to increase sales with the recent and anticipated launch of new products, including our AEQUALIS® PERFORM™ Reversed Glenoid System, AEQUALIS® FLEX REVIVE™, our PROstep™ Minimally Invasive Surgery System, AUGMENT® Injectable Bone Graft, and through driving BLUEPRINT™ adoption and by focusing on implementing initiatives to help us better compete at ambulatory surgery centers.

**Significant Industry Factors and Challenges.** Our industry is affected by numerous competitive, regulatory, and other significant factors. The growth of our business relies on our ability to continue to develop new products and innovative technologies, obtain regulatory clearance and maintain compliance for our products, protect the proprietary technology of our products and our manufacturing processes, manufacture our products cost-effectively, respond to competitive pressures specific to each of our geographic markets, including our ability to enforce non-compete agreements, and successfully market and distribute our products in a profitable manner. We, and the entire industry, are subject to extensive governmental regulation. Failure to comply with regulatory requirements could have a material adverse effect on our business, operating results, and financial condition. We, as well as other participants in our industry, are subject to product liability claims, which could have a material adverse effect on our business, operating results, and financial condition.

### **Net sales**

*U.S. Sales.* U.S. net sales totaled \$172.5 million in the second quarter of 2019, a 13.8% increase from \$151.6 million in the second quarter of 2018, primarily due to continued growth in our U.S. upper extremities business. Additionally, we had \$6.7 million of net sales from Cartiva, as well as continued growth in our U.S. biologics business from AUGMENT® Injectable Bone Graft and our core biologics products. We had non-GAAP organic growth of 9.4% along with non-GAAP combined pro forma growth of 8.3%.

U.S. sales represented approximately 75.1% of total net sales in the second quarter of 2019, compared to 73.8% of total net sales in the second quarter of 2018.

Our U.S. lower extremities net sales increased to \$66.8 million in the second quarter of 2019 compared to \$59.5 million in the second quarter of 2018, representing growth of 12.4%. This growth was primarily driven by Cartiva net sales of approximately \$6.7 million. Our non-GAAP organic growth of U.S. lower extremities was 1.2%. Our U.S. lower extremities net sales were lower than expected due to a combination of factors, including the significant reduction in sales by the Cartiva distributors and poor performance in our core foot products. To address this, we terminated the Cartiva distributors, and as of August 1, the Cartiva business has been transitioned to our direct U.S. lower extremities sales force. We also adjusted the sales compensation program and are increasing the size of the sales force. We are confident that the actions we have taken will improve the growth rates of Cartiva and the whole U.S. lower extremities business; however it will take some time for the benefits of these actions to be evident in the sales results.

Our U.S. upper extremities net sales increased to \$80.1 million in the second quarter of 2019 from \$70.2 million in the second quarter of 2018, representing growth of 14.2%. This growth was driven by continued demand for our innovative shoulder product portfolio, including the combination of our PERFORM™ Reversed Glenoid System, SIMPLICITI® shoulder system, and BLUEPRINT™ enabling technology, which enabled us to add more new customers in the second quarter of 2019 than we added in the second quarter of 2018.

Our U.S. biologics net sales totaled \$23.6 million in the second quarter of 2019 from \$20.2 million in the second quarter of 2018, representing a 16.6% increase over the second quarter of 2018. This increase was driven by net sales volume growth of AUGMENT® Injectable Bone Graft, which launched at the end of the second quarter of 2018, and in our core biologics products.

*International Sales.* Net sales in our international regions totaled \$57.2 million in the second quarter of 2019 compared to \$53.8 million in the second quarter of 2018. This 6.2% increase was primarily due to our international upper extremities business and incremental Cartiva net sales in our international lower extremities business. This increase was partially offset by a \$2.7 million unfavorable impact from foreign currency exchange rates (a 5 percentage point unfavorable impact to international sales growth rate).

Our international lower extremities net sales increased 8.3% to \$17.0 million in the second quarter of 2019 from \$15.7 million in the second quarter of 2018. Sales increased primarily due to \$1.2 million in Cartiva net sales. Non-GAAP organic international lower extremities sales increased 0.6%. These increases were partially offset by a \$0.7 million unfavorable impact from foreign currency exchange rates (a 5 percentage point unfavorable impact to international lower extremities sales growth rate).

Our international upper extremities net sales increased 6.9% to \$31.2 million in the second quarter of 2019 from \$29.1 million in the second quarter of 2018. Sales increased by 7.5% in our direct markets in Europe, and a combined 10.0% increase in our Canada, Australia, and Japan direct markets. These increases were partially offset by a \$1.7 million unfavorable impact from foreign currency exchange rates (a 6 percentage point unfavorable impact to international upper extremities sales growth rate).

Our international biologics net sales decreased 3.8% to \$6.3 million in the second quarter of 2019 from \$6.6 million in the second quarter of 2018, mostly due to a \$0.2 million unfavorable impact from foreign currency exchange rates (a 3 percentage point unfavorable impact to international biologics sales growth rate).

### **Cost of sales**

Our cost of sales totaled \$48.3 million, or 21.0% of net sales, in the second quarter of 2019, compared to \$45.6 million, or 22.2% of net sales, in the second quarter of 2018. Cost of sales as a percentage of net sales decreased 1 percentage point due to lower levels of provisions for excess and obsolete inventory, favorable manufacturing expenses, and increased gross margins from Cartiva net sales over gross margin from legacy Wright net sales.

### **Selling, general and administrative**

Our selling, general and administrative expenses totaled \$152.1 million, or 66.2% of net sales, in the second quarter of 2019, compared to \$140.8 million, or 68.6% of net sales, in the second quarter of 2018. Selling, general and administrative expenses as a percentage of net sales decreased 2 percentage points due to leveraging certain general and administrative expenses and keeping distribution expenses relatively flat over increased net sales.

[Table of Contents](#)

***Research and development***

Our research and development expense totaled \$18.8 million, or 8.2% of net sales, in the second quarter of 2019 compared to \$14.7 million, or 7.1% of net sales, in the second quarter of 2018. Research and development costs increased 1 percentage point primarily due to investments in our new product pipeline. Our research and development expenses are estimated to range from 7% to 8% as a percentage of net sales in 2019.

***Amortization of intangible assets***

Charges associated with amortization of intangible assets totaled \$7.9 million in the second quarter of 2019, compared to \$6.0 million in the second quarter of 2018. Based on intangible assets held at June 30, 2019, we expect amortization expense to be between \$30 million and \$32 million per year for the years 2019 through 2023.

***Interest expense, net***

Interest expense, net, totaled \$20.0 million in the second quarter of 2019 and \$20.7 million in the second quarter of 2018. Our interest expense in the second quarter of 2019 related primarily to non-cash interest expense associated with the amortization of the discount on the 2023 Notes, 2021 Notes and 2020 Notes of \$5.9 million, \$5.4 million and \$0.8 million, respectively; amortization of deferred financing charges on our borrowings totaling \$1.3 million; and cash interest expense totaling \$7.4 million primarily associated with the 2023 Notes, 2021 Notes, 2020 Notes and borrowings under our ABL Facility and the Term Loan Facility, partially offset by interest income of \$0.8 million.

Our interest expense in the second quarter of 2018 related primarily to non-cash interest expense associated with the amortization of the discount on the 2021 Notes and 2020 Notes of \$4.9 million and \$7.1 million, respectively, amortization of deferred financing charges on the 2021 Notes, 2020 Notes, and our ABL Facility totaling \$1.4 million; and cash interest expense totaling \$7.0 million primarily associated with the coupon on the 2021 Notes and 2020 Notes and borrowings under our ABL Facility and Term Loan Facility.

***Other (income) expense, net***

Other income, net totaled \$1.8 million in the second quarter of 2019, compared to \$72.7 million of other expense, net in the second quarter of 2018. In the second quarter of 2019, other income, net consisted primarily of a net gain on investments of \$3.3 million. This amount was partially offset by non-cash adjustments to contingent consideration fair values. During the second quarter of 2018, other expense, net consisted primarily of a \$39.9 million charge for the write-off of unamortized deferred financing fees and debt discount associated with the extinguishment of \$400.9 million aggregate principal amount of the 2020 Notes and a loss of \$32.9 million for non-cash adjustments to derivative fair values.

***Provision (benefit) for income taxes***

We recorded a tax provision from continuing operations of \$3.4 million in the second quarter of 2019, compared to a tax benefit from continuing operations of \$4.5 million in the second quarter of 2018. Our tax provision during the second quarter of 2019 includes a \$2.6 million tax provision due a change in tax rates on income from deferred intercompany transactions and tax provision on net earnings in jurisdictions where we do not have a valuation allowance offset by a tax benefit for foreign currency losses. We are unable to recognize a tax benefit in jurisdictions where we are incurring losses (primarily the U.S.) due to the valuation allowance on our net deferred assets. During the second quarter of 2018, our tax benefit includes a benefit resulting from our ability to recognize a tax benefit on pre-tax losses in the U.S., to the extent of our earnings within discontinued operations in the U.S. for the six months ended July 1, 2018, partially offset by a tax provision for foreign currency gains and the result of net earnings in jurisdictions where we do not have a valuation allowance.

***Income from discontinued operations, net of tax***

Income from discontinued operations, net of tax, consists primarily of the costs associated with legal defense, income/loss associated with product liability insurance recoveries/denials, and changes to any contingent liabilities associated with the OrthoRecon business that was sold to MicroPort.

Our income from discontinued operations for the quarter ended June 30, 2019 and July 1, 2018 was \$22.9 million and \$1.1 million, respectively. This income was primarily attributable to a \$15.5 million insurance recovery recognized in 2019 and a \$30.75 million insurance recovery recognized in 2018. See [Note 4](#) and [Note 13](#) to our condensed consolidated financial statements for further discussion regarding our discontinued operations and our retained contingent liabilities associated with the OrthoRecon business.

[Table of Contents](#)

**Net sales**

*U.S. Sales.* U.S. net sales totaled \$350.3 million in the first six months of 2019, an 18.2% increase from \$296.4 million in the first six months of 2018, primarily due to continued growth in our U.S. upper extremities business. Additionally, we had \$15.1 million of net sales from Cartiva, and our U.S. biologics business experienced continued growth from AUGMENT® Injectable Bone Graft and our core biologics products. We had non-GAAP organic growth of 13.1% along with non-GAAP combined pro forma growth of 12.0%. U.S. sales represented approximately 76.2% of total net sales in the first six months of 2019, compared to 73.4% of total net sales in the first six months of 2018.

*International Sales.* International net sales totaled \$109.5 million in the first six months of 2019 compared to \$107.6 million in the first six months of 2018. This 1.8% increase was primarily driven by incremental Cartiva net sales, an increase in our direct markets in our international upper extremities business, and increased sales volumes to our stock distributors. These increases were partially offset by a \$6.4 million unfavorable impact from foreign currency exchange rates (a 6 percentage point unfavorable impact to sales growth rate).

**Cost of sales**

Our cost of sales as a percentage of net sales decreased slightly to 20.6% in the first six months of 2019 compared to 21.5% in the first six months of 2018. This decrease as a percentage of sales was primarily due to lower levels of provisions for excess and obsolete inventory, favorable manufacturing expenses, and increased gross margins from Cartiva net sales over gross margin from legacy Wright net sales.

**Operating expenses**

As a percentage of net sales, operating expenses decreased to 77.5% in the first six months of 2019 compared to 79.2% in the first six months of 2018, reflecting a decrease of 2 percentage points as a percentage of net sales. This decrease was primarily the result of leveraging certain general and administrative expenses and keeping distribution expenses relatively flat over increased net sales.

**Provision (benefit) for income taxes**

We recorded an income tax provision from continuing operations of \$7.0 million in the first six months of 2019, compared to a tax benefit from continuing operations of \$4.3 million in the first six months of 2018. The tax provision for the current year period includes a \$5.2 million tax provision due a change in tax rates on income from deferred intercompany transactions. The remaining tax provision is resulting from net earnings in jurisdictions where we do not have a valuation allowance, partially offset by a tax benefit for foreign currency losses. The tax benefit for the prior year period includes a benefit recorded due to our ability to recognize a tax benefit on pre-tax losses in the U.S. as a result of the earnings within discontinued operations in the U.S, partially offset by tax provision for foreign currency gains and the result of net earnings in jurisdictions for which we do not have a valuation allowance.

**(Loss) income from discontinued operations, net of tax**

(Loss) income from discontinued operations, net of tax, consists primarily of the costs associated with legal defense, income/loss associated with product liability insurance recoveries/denials, and changes to any contingent liabilities associated with the OrthoRecon business that was sold to MicroPort for the six months ended June 30, 2019. We received an insurance recovery payment of \$30.75 million on May 8, 2018, which is reflected within our results of discontinued operations for the six months ended July 1, 2018, and contributed to the \$17.3 million in income from discontinued operations, net of tax for the first six months of 2018. See [Note 4](#) and [Note 13](#) to our condensed consolidated financial statements for further discussion regarding our discontinued operations and our retained contingent liabilities associated with the OrthoRecon business.

**Reportable segments**

The following tables set forth, for the periods indicated, net sales and operating income of our reportable segments expressed as dollar amounts (in thousands) and as a percentage of net sales:

	Three months ended June 30, 2019		
	U.S. Lower Extremities & Biologics	U.S. Upper Extremities	International Extremities & Biologics
Net sales	\$ 91,204	\$ 81,342	\$ 57,188
Operating income	\$ 23,009	\$ 28,784	\$ 308
Operating income as a percent of net sales	25.2%	35.4%	0.5%

[Table of Contents](#)

	Three months ended July 1, 2018		
	U.S. Lower Extremities & Biologics	U.S. Upper Extremities	International Extremities & Biologics
Net sales	\$ 80,402	\$ 71,173	\$ 53,825
Operating income (loss)	\$ 22,266	\$ 24,518	\$ (1,506)
Operating income (loss) as a percent of net sales	27.7%	34.4%	(2.8)%

	Six months ended June 30, 2019		
	U.S. Lower Extremities & Biologics	U.S. Upper Extremities	International Extremities & Biologics
Net sales	\$ 186,020	\$ 164,293	\$ 109,548
Operating income (loss)	\$ 51,950	\$ 60,232	\$ (1,181)
Operating income (loss) as a percent of net sales	27.9%	36.7%	(1.1)%

	Six months ended July 1, 2018		
	U.S. Lower Extremities & Biologics	U.S. Upper Extremities	International Extremities & Biologics
Net sales	\$ 156,299	\$ 140,069	\$ 107,569
Operating income (loss)	\$ 41,724	\$ 48,672	\$ (1,248)
Operating income (loss) as a percent of net sales	26.7%	34.7%	(1.2)%

Net sales of our U.S. lower extremities and biologics segment increased \$10.8 million and \$29.7 million in the three and six months ended June 30, 2019, respectively, compared to the three and six months ended July 1, 2018. Operating income of our U.S. lower extremities and biologics segment increased \$0.7 million and \$10.2 million for the three and six months ended June 30, 2019, respectively, compared to the three and six months ended July 1, 2018. These increases to both net sales and operating income were driven primarily by net sales from Cartiva, as well as net sales growth from AUGMENT® Injectable Bone Graft, and our core biologics businesses. The Cartiva acquisition had an impact of approximately \$6.7 million and \$15.1 million for the three and six months ended June 30, 2019, respectively, on net sales for our U.S. lower extremities and biologics segment. Additionally, the Cartiva acquisition had an impact of approximately \$4.0 million and \$9.2 million for the three and six months ended June 30, 2019, respectively, on operating income for our U.S. lower extremities and biologics segment.

Net sales of our U.S. upper extremities segment increased \$10.2 million and \$24.2 million in the three and six months ended June 30, 2019, respectively, compared to the three and six months ended July 1, 2018. Operating income of our U.S. upper extremities segment increased \$4.3 million and \$11.6 million in the three and six months ended June 30, 2019, respectively, as compared to the three and six months ended July 1, 2018. These increases to both net sales and operating income were primarily driven by continued net sales growth within our innovative shoulder product portfolio, including the combination of our PERFORM™ Reversed Glenoid System, SIMPLICITI® shoulder system, and BLUEPRINT™ enabling technology, and leveraging certain selling, general and administrative expenses over increased net sales.

Net sales of our International extremities and biologics segment increased \$3.4 million and \$2.0 million in the three and six months ended June 30, 2019, respectively, compared to the three and six months ended July 1, 2018. Operating income (loss) of our International extremities and biologics segment improved \$1.8 million and \$0.1 million in the three and six months ended June 30, 2019, respectively, compared to the three and six months ended July 1, 2018. These improvements were primarily due to growth in direct market sales in our international upper extremities business, incremental Cartiva net sales in our international lower extremities business, and reduced leveraging of operating expenses over increased net sales. These increases were partially offset by unfavorable impacts from foreign currency exchange rates.

[Table of Contents](#)**Liquidity and Capital Resources**

The following table sets forth, for the periods indicated, certain liquidity measures (in thousands):

	June 30, 2019	December 30, 2018
Cash and cash equivalents	\$ 150,574	\$ 191,351
Working capital <sup>1</sup>	(77,424)	136,106

<sup>1</sup> As of June 30, 2019, the closing price of our ordinary shares was greater than 130% of the 2021 Notes conversion price for 20 or more of the 30 consecutive trading days preceding the quarter-end, and, therefore, the holders of the 2021 Notes may convert the notes during the succeeding quarterly period. Due to the ability of the holders of the 2021 Notes to convert the notes during this period, the \$332.7 million carrying value of the 2021 Notes and the \$210.8 million fair value of the 2021 Notes Conversion Derivatives were classified as current liabilities and the \$212.9 million fair value of the 2021 Notes Hedges was classified as current assets as of June 30, 2019. We currently do not expect significant conversions of the 2021 Notes because they currently trade at a premium to the as-converted value, and a converting holder would forego future interest payments. However, any conversions would reduce our cash resources. We believe that, in the event that holders elect to exercise the conversion option, our cash resources and access to additional borrowings would provide the necessary liquidity.

**Operating Activities.** Cash provided by (used in) operating activities totaled \$2.1 million and \$(5.2) million in the first six months of 2019 and 2018, respectively. The increase in cash provided by operating activities in the first six months of 2019 was primarily driven by improved cash profitability of continuing operations.

**Investing Activities.** Our capital expenditures totaled \$48.0 million and \$29.7 million in the first six months of 2019 and 2018, respectively. This increase is primarily due to increased investments in surgical instrumentation to support the continued rollouts and upcoming product launches in our upper extremities business, as well as increased investments in computer systems. Historically, our capital expenditures have consisted principally of surgical instrumentation, purchased manufacturing equipment, research and testing equipment, and computer systems. Further, during 2019, we expect to incur approximately \$14 million for the purchase and set up of a 40,000 square foot state of the art manufacturing and distribution facility in Arlington, Tennessee. In total, we expect to incur capital expenditures of more than \$90 million in 2019.

**Financing Activities.** During the first six months of 2019, cash provided by financing activities totaled \$4.4 million, compared to \$181.8 million in the first six months of 2018.

Cash provided by financing activities in the first six months of 2019 was primarily attributable to \$14.0 million in cash received from the issuance of ordinary shares in connection with option exercises. These proceeds were partially offset by \$5.7 million of net payments related to the exchange of 2023 Notes for 2020 Notes (as further described below) and the associated issuance of additional 2023 Notes Hedges and warrants, and settlement of pro rata portions of the 2020 Notes Hedges and warrants.

On February 7, 2019, WMG issued \$139.6 million of Additional 2023 Notes in exchange for \$130.1 million aggregate principal amount of 2020 Notes. As this was a debt modification, a pro rata share of the 2020 Notes deferred financing costs and discount was transferred to the 2023 Notes deferred financing costs and discount. Additionally, the 2023 Notes discount was adjusted in order for net debt to remain the same subsequent to the exchange. While the debt modification was a non-cash transaction, we paid approximately \$2.9 million of convertible debt modification costs.

Additionally, on January 30, 2019 and January 31, 2019, we, along with WMG, entered into cash-settled convertible note hedge transactions with certain option counterparties. WMG paid approximately \$30.1 million in the aggregate to the option counterparties for the note hedge transactions, and received approximately \$21.2 million in the aggregate from the option counterparties for the warrants, resulting in a net cost to us of approximately \$8.9 million. In connection with the above described exchange, WMG also settled a pro rata share of the 2020 Notes Hedges and warrants corresponding to the amount of 2020 Notes exchanged pursuant to this transaction. We received proceeds of approximately \$16.8 million related to the 2020 Notes Hedges and paid \$11.0 million related to the 2020 Warrants, generating net proceeds of \$5.8 million.

Cash provided by financing activities in the first six months of 2018 was primarily attributable to the net cash proceeds received from the 2023 Notes exchange. During June 2018, we issued \$675 million aggregate principal amount of 2023 Notes, settled \$400.9 million aggregate principal amount of 2020 Notes, and paid a premium of \$55.6 million on the 2020 Notes. We also paid \$141.3 million for hedges associated with the 2023 Notes and received approximately \$102.1 million for the issuance of warrants associated with the 2023 Notes. Additionally, we received \$5.7 million in cash from the issuance of ordinary shares in connection with option exercises. Other debt proceeds were primarily made up borrowings under of the Term Loan Facility which were used to pay down a portion of the asset-based line of credit under the ABL Facility.

## [Table of Contents](#)

**Repatriation.** We provide for tax liabilities in our condensed consolidated financial statements with respect to amounts that we expect to repatriate from subsidiaries (to the extent the repatriation would be subject to tax); however, no tax liabilities are recorded for amounts that we consider to be permanently reinvested. Our current plans do not foresee a need to repatriate funds that are designated as permanently reinvested in order to fund our operations or meet currently anticipated liquidity and capital investment needs.

**Discontinued Operations.** Our cash flows from discontinued operations during 2019 and 2018 were attributable primarily to legacy Wright's former OrthoRecon business as described in [Note 13](#). Cash flows used in discontinued operations totaled \$32.1 million and \$21.1 million for the six months ended June 30, 2019 and July 1, 2018, respectively. Cash flows from discontinued operations are combined with cash flows from continuing operations in the condensed consolidated statements of cash flows.

We do not expect that the future cash outflows from discontinued operations, including the payment of retained liabilities of the OrthoRecon business, net of insurance recoveries, will have an impact on our ability to meet contractual cash obligations and fund our working capital requirements, operations, and anticipated capital expenditures.

**Contractual Cash Obligations.** As of June 30, 2019, there were no material changes to our contractual cash obligations and commercial commitments as disclosed in in "Part II. Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations-Liquidity and Capital Resources-Contractual Cash Obligations" of our Annual Report on Form 10-K for the year ended December 30, 2018, except for the issuance of the Additional 2023 Notes and the reclassification of the 2021 Notes as described in [Note 10](#) and a minimum purchase obligation of approximately \$3.6 million a year until March 29, 2026.

As of June 30, 2019, the closing price of our ordinary shares was greater than 130% of the 2021 Notes conversion price for 20 or more of the 30 consecutive trading days preceding the quarter-end, and, therefore, the holders of the 2021 Notes may convert the notes during the succeeding quarterly period. Due to the ability of the holders of the 2021 Notes to convert the notes during this period, the carrying value of the 2021 Notes and the fair value of the 2021 Notes Conversion Derivatives were classified as current liabilities and the fair value of the 2021 Notes Hedges was classified as current assets as of June 30, 2019.

We currently do not expect significant conversions of the 2021 Notes because they currently trade at a premium to the as-converted value, and a converting holder would forego future interest payments. However, any conversions would reduce our cash resources. We believe that, in the event that holders elect to exercise the conversion option, our cash resources and access to additional borrowings would provide the necessary liquidity.

**Other Liquidity Information.** We have historically funded our cash needs through various equity and debt issuances, more recently borrowings under our ABL Credit Agreement, and through cash flow from operations.

In June 2018, WMG issued \$675 million aggregate principal amount of the 2023 Notes, which, after consideration of the exchange of approximately \$400.9 million principal amount of the 2020 Notes, generated proceeds of approximately \$215.5 million net of premium and interest paid. We also paid \$141.3 million for hedges associated with the 2023 Notes and received approximately \$102.1 million for the issuance of warrants associated with the 2023 Notes. In July 2018, we settled a pro rata share of the 2020 Notes hedges and 2020 warrants which resulted in net proceeds of \$10.6 million.

On February 7, 2019, WMG issued \$139.6 million of Additional 2023 Notes in exchange for \$130.1 million of 2020 Notes. For each \$1,000 principal amount of 2020 Notes validly submitted for exchange, WMG delivered \$1,072.40 principal amount of Additional 2023 Notes to the exchanging investor (subject, in each case, to rounding to the nearest \$1,000 aggregate principal amount for each such exchanging investor).

On December 23, 2016, we, together with WMG and certain of our other wholly-owned U.S. subsidiaries (collectively, Borrowers), entered into a Credit, Security and Guaranty Agreement with Midcap Financial Trust, as administrative agent (Agent) and a lender and the additional lenders from time to time party thereto, which agreement was subsequently amended in May 2018 and February 2019 (as amended, the ABL Credit Agreement).

The ABL Credit Agreement provides for a \$175 million senior secured asset-based line of credit, subject to the satisfaction of a borrowing base requirement (ABL Facility) and a \$55 million term loan facility (Term Loan Facility). The ABL Facility may be increased by up to \$75 million upon the Borrowers' request, subject to the consent of the Agent and each of the other lenders providing such increase. All borrowings under the ABL Facility are subject to the satisfaction of customary conditions, including the absence of default, the accuracy of representations and warranties in all material respects and the delivery of an updated borrowing base certificate. The initial \$20 million term loan tranche was funded at closing in May 2018. The Borrowers may at any time borrow the second \$35 million term loan tranche, but are required to do so no later than May 7, 2021. All borrowings under the Term Loan Facility are subject to the satisfaction of customary conditions, including the absence of default and the accuracy of representations and warranties in all material respects. We are in compliance with all covenants as of June 30, 2019.

As of June 30, 2019, we had \$20.7 million in borrowings outstanding under the ABL Facility and \$154.3 million in unused availability under the ABL Facility. As of December 30, 2018, we had \$17.8 million in borrowings outstanding under the ABL Facility and \$132.2 million in unused availability under the ABL Facility.

## [Table of Contents](#)

Between November 2016 and October 2017, WMT entered into three MoM Settlement Agreements with Court-appointed attorneys representing plaintiffs in the MDL and JCCP to settle a total of 1,974 cases that met the eligibility requirements of the MoM Settlement Agreements and were either pending in the MDL or JCCP, or subject to court-approved tolling agreements in the MDL or JCCP, for an aggregate sum of \$339.2 million. As of June 30, 2019, we had funded \$306.5 million under the MoM Settlement Agreements.

As of June 30, 2019, our accrual for metal-on-metal claims totaled \$60.5 million, of which \$33.8 million is included in our condensed consolidated balance sheet within “Accrued expenses and other current liabilities” and \$26.7 million is included within “Other liabilities.” As of December 30, 2018, our accrual for metal-on-metal claims totaled \$74.5 million, of which \$51.9 million is included in our condensed consolidated balance sheet within “Accrued expenses and other current liabilities” and \$22.6 million is included within “Other liabilities.” See [Note 13](#) to our condensed consolidated financial statements for additional discussion regarding the MoM Settlement Agreements and our accrual methodologies for the metal-on-metal hip replacement product liability claims.

Although it is difficult for us to predict our future liquidity requirements, we believe that our cash and cash equivalents of \$150.6 million, the \$154.3 million in availability under the ABL Facility and the additional \$35 million in availability under the Term Loan Facility, as of June 30, 2019, will be sufficient for at least the next 12 months to fund the working capital requirements and operations, permit anticipated capital expenditures, pay retained metal-on-metal product and other liabilities of the OrthoRecon business, including without limitation amounts under the MoM Settlement Agreements, fund contingent considerations, and meet our other anticipated contractual cash obligations in 2019 and 2020.

**In-process research and development.** In connection with the IMASCAP acquisition, we acquired in-process research and development (IPRD) technology related to a next generation reverse shoulder implant system that had not yet reached technological feasibility as of the acquisition date. This project was assigned a fair value of \$5.3 million on the acquisition date.

In connection with the Cartiva acquisition, we acquired IPRD technology related to a thumb implant (CMC) that is in development. This project was assigned a fair value of \$1.0 million on the acquisition date.

The current IPRD projects we acquired in our IMASCAP and Cartiva acquisitions are as follows:

- The next generation reverse shoulder implant system is a reverse shoulder replacement implant having glenoid or glenoid and humeral implant components. We have an anticipated first clinical use in 2020 and launch in the second half of 2021; however, the risks and uncertainties associated with completion are dependent upon testing validations and FDA and CE mark clearance. We have incurred expenses of less than \$0.1 million in the six months ended June 30, 2019. Project cost to complete is estimated to be less than \$2 million.
- The CMC thumb implant is an arthroplasty device designed to resurface the CMC joint for the treatment of osteoarthritis. We anticipate the launch of CMC thumb implant no earlier than 2021; however, the risks and uncertainties associated with completion are dependent upon testing validations and FDA PMA approval. We have incurred expenses of approximately \$0.4 million in the six months ended June 30, 2019. Project cost to complete is estimated to be less than \$3 million.

### **Critical Accounting Policies and Estimates**

Information on judgments related to our most critical accounting policies and estimates is discussed in “*Part II. Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations-Critical Accounting Estimates*” of our Annual Report on Form 10-K for the year ended December 30, 2018 filed with the SEC on February 27, 2019. Certain of our more critical accounting estimates require the application of significant judgment by management in selecting the appropriate assumptions in determining the estimate. By their nature, these judgments are subject to an inherent degree of uncertainty. We develop these judgments based on our historical experience, terms of existing contracts, our observance of trends in the industry, information provided by our customers, and information available from other outside sources, as appropriate. Actual results may differ from these judgments under different assumptions or conditions. Different, reasonable estimates could have been used for the current period. Additionally, changes in accounting estimates are reasonably likely to occur from period to period. Both of these factors could have a material impact on the presentation of our financial condition, changes in financial condition or results of operations.

There have been no material changes to our critical accounting policies and estimates discussed in “*Part II. Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations-Critical Accounting Estimates*” of our Annual Report on Form 10-K for the year ended December 30, 2018.

### **Recent Accounting Pronouncements**

Information regarding recent accounting pronouncements is included in [Note 2](#) to our condensed consolidated financial statements.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.***Interest Rate Risk*

Our exposure to interest rate risk arises principally from variable interest rates applicable to borrowings under our ABL Credit Agreement and the interest rates associated with our invested cash balances.

Borrowings under our ABL Credit Agreement, including our ABL Facility and Term Loan Facility, bear interest at variable rates. The interest rate margin applicable to borrowings under the ABL Facility is, at the option of the Borrowers, equal to either (a) 3.25% for base rate loans or (b) 4.25% for LIBOR rate loans, subject to a 0.75% LIBOR floor. The interest rate applicable to borrowings under the Term Loan Facility is equal to one-month LIBOR plus 7.85%, subject to a 1.00% LIBOR floor. As of June 30, 2019, we had \$20.7 million of borrowings under our ABL Facility and \$20 million principal outstanding under our Term Loan Facility. Based upon this debt level, and the LIBOR floor on our interest rate, a 100 basis point increase in the annual interest rate on such borrowings would have an immaterial impact on our interest expense on an annual basis.

On June 30, 2019, we had invested cash and cash equivalents of approximately \$150.6 million. We believe that a 10 basis point change in interest rates is reasonably possible in the near term. Based on our current level of investment, an increase or decrease of 10 basis points in interest rates would have an annual impact of approximately \$0.2 million to our interest income.

As of June 30, 2019, we had outstanding an aggregate of \$56.5 million, \$395.0 million, and \$814.6 million, principal amount of our 2020 Notes, 2021 Notes, and 2023 Notes, respectively. We carry these instruments at face value less unamortized discount and unamortized debt issuance costs on our condensed consolidated balance sheets. Since these instruments bear interest at a fixed rate, we have no financial statement risk associated with changes in interest rates. However, the fair value of the 2020 Notes, 2021 Notes, and 2023 Notes fluctuates when interest rates change and when the market price of our ordinary shares fluctuates. We do not carry the 2020 Notes, 2021 Notes, or 2023 Notes at fair value, but present the fair value of the principal amount of our 2020 Notes, 2021 Notes, and 2023 Notes for disclosure purposes.

*Equity Price Risk*

On June 28, 2018, we issued \$675 million aggregate principal amount of the 2023 Notes. Additional 2023 Notes were issued in exchange for a portion of 2020 Notes in February 2019. As of June 30, 2019, \$814.6 million aggregate principal amount was outstanding on the 2023 Notes. The holders of the 2023 Notes may convert their 2023 Notes into cash upon the satisfaction of certain circumstances as described in [Note 10](#). The conversion and settlement provisions of the 2023 Notes are based on the price of our ordinary shares at conversion or at maturity of the notes. In addition, the hedges and warrants associated with these convertible notes also include settlement provisions that are based on the price of our ordinary shares. The amount of cash we may be required to pay, or the number of shares we may be required to provide to note holders at conversion or maturity of these notes, is determined by the price of our ordinary shares. The amount of cash that we may receive from hedge counterparties in connection with the related hedges and the number of shares that we may be required to provide warrant counterparties in connection with the related warrants are also determined by the price of our ordinary shares.

Upon the expiration of our warrants issued in connection with the 2023 Notes, we will issue ordinary shares to the purchasers of the warrants to the extent the price of our ordinary shares exceeds the warrant strike price of \$40.86 at that time. The following table shows the number of shares that we would issue to warrant counterparties at expiration of the warrants based on the warrants outstanding as of June 30, 2019 assuming various closing prices of our ordinary shares on the date of warrant expiration:

Share price		Shares (in thousands)
\$44.95	(10% greater than strike price)	2,219
\$49.03	(20% greater than strike price)	4,068
\$53.12	(30% greater than strike price)	5,633
\$57.20	(40% greater than strike price)	6,974
\$61.29	(50% greater than strike price)	8,137

[Table of Contents](#)

The fair value of the 2023 Notes Conversion Derivative and the 2023 Notes Hedge is directly impacted by the price of our ordinary shares. We entered into the 2023 Notes Hedges in connection with the issuance of the 2023 Notes with the option counterparties. The 2023 Notes Hedges, which are cash-settled, are intended to reduce our exposure to potential cash payments we are required to make upon conversion of the 2023 Notes in excess of the principal amount of converted notes if our ordinary share price exceeds the conversion price. The following table presents the fair values of the 2023 Notes Conversion Derivative and 2023 Notes Hedge as a result of a hypothetical 10% increase and decrease in the price of our ordinary shares. We believe that a 10% change in our share price is reasonably possible in the near term:

(in thousands)

	Fair value of security given a 10% decrease in share price	Fair value of security as of June 30, 2019	Fair value of security given a 10% increase in share price
2023 Notes Hedges (Asset)	\$ 124,080	\$ 164,500	\$ 209,362
2023 Notes Conversion Derivative (Liability)	\$ 120,334	\$ 164,027	\$ 212,985

On May 20, 2016, we issued \$395 million aggregate principal amount of the 2021 Notes. The holders of the 2021 Notes may convert their 2021 Notes into cash upon the satisfaction of certain circumstances as described in [Note 10](#). As of March 31, 2019, the closing price of our ordinary shares was greater than 130% of the 2021 Notes conversion price for 20 or more of the 30 consecutive trading days preceding the quarter-end; and, therefore, the holders of the 2021 Notes may convert the notes during the succeeding quarterly period. Due to the ability of the holders of the 2021 Notes to convert the notes during this period, the carrying value of the 2021 Notes and the fair value of the 2021 Notes Conversion Derivative were classified as current liabilities, and the fair value of the 2021 Notes Hedges was classified as current assets as of March 31, 2019. The respective balances were classified as long-term as of December 30, 2018. We currently do not expect significant conversions because the 2021 Notes currently trade at a premium to the as-converted value, and a converting holder would forego future interest payments. However, any conversions would reduce our cash resources.

The conversion and settlement provisions of the 2021 Notes are based on the price of our ordinary shares at conversion or at maturity of the notes. In addition, the hedges and warrants associated with these convertible notes also include settlement provisions that are based on the price of our ordinary shares. The amount of cash we may be required to pay, or the number of shares we may be required to provide to note holders at conversion or maturity of these notes, is determined by the price of our ordinary shares. The amount of cash that we may receive from hedge counterparties in connection with the related hedges and the number of shares that we may be required to provide warrant counterparties in connection with the related warrants are also determined by the price of our ordinary shares.

Upon the expiration of our warrants issued in connection with the 2021 Notes, we will issue ordinary shares to the purchasers of the warrants to the extent the price of our ordinary shares exceeds the warrant strike price of \$30.00 at that time. The following table shows the number of shares that we would issue to warrant counterparties at expiration of the warrants based on the warrants outstanding as of June 30, 2019 assuming various closing prices of our ordinary shares on the date of warrant expiration:

Share price		Shares (in thousands)
\$33.00	(10% greater than strike price)	1,681
\$36.00	(20% greater than strike price)	3,082
\$39.00	(30% greater than strike price)	4,268
\$42.00	(40% greater than strike price)	5,284
\$45.00	(50% greater than strike price)	6,164

[Table of Contents](#)

The fair value of the 2021 Notes Conversion Derivative and the 2021 Notes Hedge is directly impacted by the price of our ordinary shares. We entered into the 2021 Notes Hedges in connection with the issuance of the 2021 Notes with the option counterparties. The 2021 Notes Hedges, which are cash-settled, are intended to reduce our exposure to potential cash payments we are required to make upon conversion of the 2021 Notes in excess of the principal amount of converted notes if our ordinary share price exceeds the conversion price. The following table presents the fair values of the 2021 Notes Conversion Derivative and 2021 Notes Hedge as a result of a hypothetical 10% increase and decrease in the price of our ordinary shares. We believe that a 10% change in our share price is reasonably possible in the near term:

(in thousands)

	Fair value of security given a 10% decrease in share price	Fair value of security as of June 30, 2019	Fair value of security given a 10% increase in share price
2021 Notes Hedges (Asset)	\$168,980	\$212,864	\$259,171
2021 Notes Conversion Derivative (Liability)	\$163,383	\$210,756	\$260,576

On February 13, 2015, WMG issued \$632.5 million aggregate principal amount of the 2020 Notes. A portion of the 2020 Notes was exchanged in conjunction with both the 2021 Notes and the 2023 Notes. As of June 30, 2019, \$56.5 million aggregate principal amount was outstanding on the 2020 Notes. The holders of the 2020 Notes may convert their notes at any time prior to August 15, 2019 solely into cash upon satisfaction of certain circumstances as described in [Note 10](#). On or after August 15, 2019, holders may convert their 2020 Notes solely into cash, regardless of the foregoing circumstances. Due to the ability of the holders of the 2020 Notes to convert within the next year, the carrying value of the 2020 Notes and the fair value of the 2020 Notes Conversion Derivatives were classified as current liabilities and the fair value of the 2020 Notes Hedges was classified as current assets as of June 30, 2019 and December 30, 2018.

The conversion and settlement provisions of the 2020 Notes are based on the price of our ordinary shares at conversion or at maturity of the notes. In addition, the hedges and warrants associated with these convertible notes also include settlement provisions that are based on the price of our ordinary shares. The amount of cash we may be required to pay, or the number of shares we may be required to provide to note holders at conversion or maturity of these notes, is determined by the price of our ordinary shares. The amount of cash that we may receive from hedge counterparties in connection with the related hedges and the number of shares that we may be required to provide warrant counterparties in connection with the related warrants are also determined by the price of our ordinary shares.

Upon the expiration of our warrants associated with the 2020 Notes, we will issue ordinary shares to the purchasers of the warrants to the extent the price of our ordinary shares exceeds the warrant strike price at that time. On November 24, 2015, Wright Medical Group N.V. assumed WMG's obligations pursuant to the warrants, and the strike price of the warrants was adjusted from \$40.00 to \$38.8010 per ordinary share. The following table shows the number of shares that we would issue to warrant counterparties at expiration of the warrants based on the warrants outstanding as of June 30, 2019 assuming various closing prices of our ordinary shares on the date of warrant expiration:

Share price		Shares (in thousands)
\$42.68	(10% greater than strike price)	171
\$46.56	(20% greater than strike price)	314
\$50.44	(30% greater than strike price)	435
\$54.32	(40% greater than strike price)	539
\$58.20	(50% greater than strike price)	628

## [Table of Contents](#)

The fair value of the 2020 Notes Conversion Derivative and the 2020 Notes Hedge is directly impacted by the price of our ordinary shares. We entered into the 2020 Notes Hedges in connection with the issuance of the 2020 Notes with the option counterparties. In conjunction with the issuance of the 2021 Notes, a portion of the 2020 Notes Conversion Derivative and the 2020 Notes Hedges were settled. In conjunction with the issuance of the 2023 Notes and the Additional 2023 Notes, a portion of the 2020 Notes Conversion Derivative and the 2020 Notes Hedges were settled as described in [Note 6](#). The remaining 2020 Notes Hedges, which are cash-settled, are intended to reduce our exposure to potential cash payments we are required to make upon conversion of the 2020 Notes in excess of the principal amount of converted notes if our ordinary share price exceeds the conversion price. The following table presents the fair values of the 2020 Notes Conversion Derivative and 2020 Notes Hedges as a result of a hypothetical 10% increase and decrease in the price of our ordinary shares. We believe that a 10% change in our share price is reasonably possible in the near term:

(in thousands)

	Fair value of security given a 10% decrease in share price	Fair value of security as of June 30, 2019	Fair value of security given a 10% increase in share price
2020 Notes Hedges (Asset)	\$3,285	\$6,015	\$9,590
2020 Notes Conversion Derivative (Liability)	\$3,017	\$5,799	\$9,509

### *Foreign Currency Exchange Rate Fluctuations*

Fluctuations in the rate of exchange between the U.S. dollar and foreign currencies could adversely affect our financial results. Approximately 22% and 21% of our net sales from continuing operations were denominated in foreign currencies during the three and six months ended June 30, 2019 and we expect that foreign currencies will continue to represent a similarly significant percentage of our net sales in the future. The cost of sales related to these sales is primarily denominated in U.S. dollars; however, operating costs related to these sales are largely denominated in the same respective currencies, thereby partially limiting our transaction risk exposure. For sales not denominated in U.S. dollars, an increase in the rate at which a foreign currency is exchanged for U.S. dollars will require more of the foreign currency to equal a specified amount of U.S. dollars than before the rate increase. In such cases, if we price our products in the foreign currency, we will receive less in U.S. dollars than we did before the rate increase went into effect. If we price our products in U.S. dollars and our competitors price their products in local currency, an increase in the relative strength of the U.S. dollar could result in our prices not being competitive in a market where business is transacted in the local currency.

For the three and six months ended June 30, 2019, approximately 90% of our net sales denominated in foreign currencies were derived from European Union countries, which are denominated in the euro; from the United Kingdom, which are denominated in the British pound; from Australia which are denominated in Australian dollar; and from Canada, which are denominated in the Canadian dollar. Additionally, we have significant intercompany receivables, payables, and debt from our foreign subsidiaries that are denominated in foreign currencies, principally the euro, the Japanese yen, the British pound, the Australian dollar, and the Canadian dollar. Our principal exchange rate risk, therefore, exists between the U.S. dollar and the euro, the Japanese yen, the British pound, the Australian dollar, and the Canadian dollar. Fluctuations from the beginning to the end of any given reporting period result in the revaluation of our foreign currency-denominated intercompany receivables, payables, and debt generating currency translation gains or losses that impact our non-operating income and expense levels in the respective period.

A uniform 10% strengthening in the value of the U.S. dollar relative to the currencies in which our transactions are denominated would have resulted in a decrease and increase in operating income of approximately \$0.7 million and \$0.5 million for the three and six months ended June 30, 2019, respectively. This hypothetical calculation assumes that each exchange rate would change in the same direction relative to the U.S. dollar. This sensitivity analysis of the effects of changes in foreign currency exchange rates does not factor in a potential change in sales levels or local currency prices, which can also be affected by the change in exchange rates.

## **ITEM 4. CONTROLS AND PROCEDURES.**

### *Disclosure Controls and Procedures*

We have established disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934. Our disclosure controls and procedures are designed to ensure that material information relating to us, including our consolidated subsidiaries, is made known to our principal executive officer and principal financial officer by others within our organization. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our disclosure controls and procedures as of June 30, 2019 to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and

[Table of Contents](#)

communicated to our management, including our principal executive officer and principal financial officer as appropriate, to allow timely decisions regarding required disclosure. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of June 30, 2019.

*Changes in Internal Control Over Financial Reporting*

During the fiscal quarter ended June 30, 2019, there were no changes in our internal control over financial reporting that materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting.

## PART II - OTHER INFORMATION

### ITEM 1. LEGAL PROCEEDINGS.

From time to time, we or our subsidiaries are subject to various pending or threatened legal actions and proceedings, including those that arise in the ordinary course of our business and some of which involve claims for damages that are substantial in amount. These actions and proceedings may relate to, among other things, product liability, intellectual property, distributor, commercial, and other matters. These actions and proceedings could result in losses, including damages, fines, or penalties, any of which could be substantial, as well as criminal charges. Although such matters are inherently unpredictable, and negative outcomes or verdicts can occur, we believe we have significant defenses in all of them, are vigorously defending all of them, and do not believe any of them will have a material adverse effect on our financial position. However, we could incur judgments, pay settlements, or revise our expectations regarding the outcome of any matter. Such developments, if any, could have a material adverse effect on our results of operations in the period in which applicable amounts are accrued, or on our cash flows in the period in which amounts are paid.

The actions and proceedings described in this section relate primarily to WMT, an indirect subsidiary of Wright Medical Group N.V., and are not necessarily applicable to Wright Medical Group N.V. or other affiliated entities. Maintaining separate legal entities within our corporate structure is intended to ring-fence liabilities. We believe our ring-fenced structure should preclude corporate veil-piercing efforts against entities whose assets are not associated with particular claims.

#### *Patent Litigation*

On March 23, 2018, WMT filed suit against Paragon 28, Inc. (Paragon 28) in the United States District Court for the District of Colorado, alleging infringement of ten patents concerning orthopedic plates, plating systems and instruments, and related methods of use. Our complaint seeks damages, injunctive relief and attorneys' fees. On June 4, 2018, Paragon 28 filed an amended answer and counterclaim seeking declaratory judgment of non-infringement and invalidity of the patent-in-suit, and attorneys' fees. On September 28, 2018, WMT filed an amended complaint adding claims against Paragon 28 for misappropriation of trade secrets and related wrongdoing. Paragon 28 filed a motion to dismiss those trade secret-related claims, which WMT has opposed, and the motion remains pending. In March 2019, Paragon 28 filed four petitions with the Patent Trial and Appeal Board seeking Inter Partes Reviews of the patents in question. We have filed responses opposing Paragon 28's petitions.

#### *Product Liability*

We have been named as a defendant, in some cases with multiple other defendants, in lawsuits in which it is alleged that as yet unspecified defects in the design, manufacture, or labeling of certain metal-on-metal hip replacement products rendered the products defective. The lawsuits generally employ similar allegations that use of the products resulted in excessive metal ions and particulate in the patients into whom the devices were implanted, in most cases resulting in revision surgery (collectively, the CONSERVE® Claims) and generally seek monetary damages. We anticipate that additional lawsuits relating to metal-on-metal hip replacement products may be brought.

Because of the similar nature of the allegations made by several plaintiffs whose cases were pending in federal courts, upon motion of one plaintiff, Danny L. James, Sr., the United States Judicial Panel on Multidistrict Litigation on February 8, 2012 transferred certain actions pending in the federal court system related to metal-on-metal hip replacement products to the United States District Court for the Northern District of Georgia, for consolidated pre-trial management of the cases before a single United States District Court Judge (the MDL). The consolidated matter is known as *In re: Wright Medical Technology, Inc. Conserve Hip Implant Products Liability Litigation*.

Certain plaintiffs have elected to file their lawsuits in state courts in California. In doing so, most of those plaintiffs have named a surgeon involved in the design of the allegedly defective products as a defendant in the actions, along with his personal corporation. Pursuant to contractual obligations, we have agreed to indemnify and defend the surgeon in those actions. Similar to the MDL proceeding in federal court, because the lawsuits generally employ similar allegations, certain of those pending lawsuits in California were consolidated for pre-trial handling on May 14, 2012 pursuant to procedures of California State Judicial Counsel Coordinated Proceedings (the JCCP). The consolidated matter is known as *In re: Wright Hip Systems Cases, Judicial Counsel Coordination Proceeding No. 4710*. Pursuant to previously disclosed settlement agreements with the Court-appointed attorneys representing plaintiffs in the MDL and JCCP described below (the MoM Settlement Agreements), the MDL and JCCP were closed to new cases effective October 18, 2017 and October 31, 2017, respectively.

Every hip implant case, including metal-on-metal hip cases, involves fundamental issues of law, science and medicine that often are uncertain, that continue to evolve, and which present contested facts and issues that can differ significantly from case to case. Such contested facts and issues include medical causation, individual patient characteristics, surgery specific factors, statutes of limitation, and the existence of actual, provable injury. We believe we have data that supports the efficacy and safety of these hip products.

## [Table of Contents](#)

Excluding claims resolved in the MoM Settlement Agreements, as of June 30, 2019, there were approximately 183 unresolved metal-on-metal hip cases pending in the U.S. This number includes cases ineligible for settlement under the MoM Settlement Agreements, cases which opted out of such settlements, post-settlement cases, tolled cases, and existing state court cases that were not part of the MDL or JCCP. As of June 30, 2019, we estimate there also were pending approximately 33 unresolved non-U.S. metal-on metal hip cases, 46 unresolved U.S. modular neck cases alleging claims related to the release of metal ions, and zero non-U.S. modular neck cases with metal ion allegations. We also estimate that as of June 30, 2019, there were approximately 531 non-revision claims either dismissed or awaiting dismissal from the MDL and JCCP, which dismissal is a condition of the MoM Settlement Agreements. Although there is a limited time period during which dismissed non-revision claims may be refiled, it is presently unclear how many non-revision claimants will elect to do so. As of June 30, 2019, no dismissed non-revision cases have been refiled.

As previously disclosed, between November 2016 and October 2017, WMT entered into three MoM Settlement Agreements with Court-appointed attorneys representing plaintiffs in the MDL and JCCP to settle a total of 1,974 cases that met the eligibility requirements of the MoM Settlement Agreements and were either pending in the MDL or JCCP, or subject to court-approved tolling agreements in the MDL or JCCP, for an aggregate sum of \$339.2 million. See [Note 13](#) to our condensed consolidated financial statements for additional information regarding the MoM Settlement Agreements.

We have received claims for personal injury against us associated with fractures of the PROFEMUR® titanium modular neck product (Titanium Modular Neck Claims). As of June 30, 2019, there were approximately 19 unresolved pending U.S. lawsuits and approximately 54 unresolved pending non-U.S. lawsuits alleging such claims (44 of which are part of a single consolidated class action lawsuit in Canada). These lawsuits generally seek monetary damages.

We are aware that MicroPort has recalled a certain size of its cobalt chrome modular neck product as a result of alleged fractures. As of June 30, 2019, there were fourteen pending U.S. lawsuits and five pending non-U.S. lawsuits against us alleging personal injury resulting from the fracture of a cobalt chrome modular neck. These lawsuits generally seek monetary damages.

### *Insurance Litigation*

We have maintained product liability insurance coverage on a claims-made basis. During the fiscal quarter ended September 30, 2012, we received a customary reservation of rights from Federal, our then primary product liability insurance carrier, asserting that certain present and future claims which allege certain types of injury related to the CONSERVE® Claims would be covered as a single occurrence under the policy year the first such claim was asserted. The effect of this coverage position would have been to place CONSERVE® Claims into a single prior policy year in which applicable claims-made coverage was available, subject to the overall policy limits then in effect. We notified Federal that we disputed its characterization of the CONSERVE® Claims as a single occurrence, which resulted in multi-year insurance coverage litigation (the Tennessee Coverage Litigation) that has recently been resolved as discussed below.

As previously disclosed, we entered into confidential settlement agreements with six of the seven insurance carriers with whom metal on metal hip coverage was in dispute - Columbia Casualty Company, Travelers, AXIS Surplus Lines Insurance Company, Federal, Catlin Specialty Insurance Company, and Catlin Underwriting Agencies Limited for and on behalf of Syndicate 2003 at Lloyd's of London, thus resolving in full the Tennessee Coverage Litigation.

Separately, in March 2017, Lexington Insurance Company (Lexington), which had been dismissed from the Tennessee Coverage Litigation, requested arbitration under five Lexington insurance policies in connection with the CONSERVE® Claims. We subsequently engaged in discussions and correspondence with Lexington about the scope of the requested arbitration(s). On or about October 27, 2017, Lexington filed an Application for Order to Compel Arbitration in the Commonwealth of Massachusetts, Suffolk County Superior Court, naming WMT, Wright Medical Group, Inc., and Wright Medical Group N.V. We opposed the Application. On February 28, 2018, the Massachusetts Court ordered the parties to arbitrate the two Lexington insurance policies containing Massachusetts arbitration clauses but did not order arbitration under the remaining three Lexington policies at issue. We have appealed that ruling. The appeal, pending in the Appeals Court of the Commonwealth of Massachusetts, is known as *Lexington Insurance Company v. Wright Medical Group, Inc., Wright Medical Group, N.V., and Wright Medical Technology, Inc.*, Case No. 2018-P-0698. While the appeal is pending, we are proceeding with the arbitration, but the selection of the arbitrators is still in dispute. In the arbitration, Lexington has asserted a claim for declaratory relief, and we have asserted counter-claims for breach of contract, declaratory relief, and bad faith.

On September 26, 2018, Lexington sought to add a claim alleging our filing of the Tennessee lawsuit referred to below was not in good faith. We objected to Lexington's additional claim and argued that such claim could only be added upon agreement of the arbitrators (who are yet to be selected). The American Arbitration Association agreed with our position.

On May 22, 2018, we initiated a lawsuit against Lexington under the three policies that the court did not order into arbitration in Massachusetts. The lawsuit, filed in the Chancery Court of Tennessee for the Thirtieth Judicial District at Memphis, is known as *Wright Medical Group, Inc. and Wright Medical Technology, Inc. v. Lexington Insurance Company*, No. CH-18-0764. The lawsuit, filed in the Chancery Court of Tennessee, alleges breach of contract, declaratory relief, and bad faith in connection with Lexington's

[Table of Contents](#)

failure and refusal to provide coverage for the underlying metal-on-metal claims under policies issued for 2009-2012. On July 12, 2018, Lexington brought a motion to stay the litigation and compel arbitration under the 2009-2011 Lexington policies. On February 21, 2019, we filed a motion to strike Lexington's motion to stay. On March 13, 2019, we filed an opposition to Lexington's motion.

On July 23, 2019, we reached an agreement in principle with Lexington to settle all presently remaining disputes between us, pursuant to which, among other things, Lexington agreed to buy back the subject insurance policies for an aggregate of \$15.5 million (in addition to \$5 million previously paid by Lexington). This amount will be payable in a lump sum on or before the 60th day after execution of a definitive settlement agreement (which the parties are presently negotiating) and will be in full satisfaction of all potential liability of Lexington relating to metal-on-metal hip claims, including but not limited to all claims asserted by our subsidiary WMT against Lexington in the above described insurance coverage arbitration and litigation.

*Other*

In addition to those noted above, we are subject to various other legal proceedings, product liability claims, corporate governance, and other matters which arise in the ordinary course of business.

**ITEM 1A. RISK FACTORS.**

There have been no material changes to the risk factors that were discussed in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 30, 2018, as filed with the SEC on February 27, 2019.

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.**

None.

**ITEM 3. DEFAULTS UPON SENIOR SECURITIES.**

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER  
PURSUANT TO RULE 13a-14(a) UNDER  
THE SECURITIES EXCHANGE ACT OF 1934**

I, Robert J. Palmisano, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Wright Medical Group N.V.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
